It is expected that the next few years will witness a greatly augmented volume of shipping. The Coast Guard, whose duty it is to render aid and protection to the marine commerce along our seaboard, should be provided ample means for coping with the usual exigencies attending ocean navigation. It is earnestly hoped that early steps will be taken to provide additional vessels for the Service, four or five at least, of such type and of such size as will best meet present and future requirements. Five vessels are now under contract, but even these will not supply the deficiencies that before long will be brought about by the withdrawal of some of the older vessels from the heavy work of the Service for lighter duty. Some of the vessels are in poor physical condition, and their equipment is not commensurate with the demands of the Service. This condition is due to the lack of sufficient funds to keep the vessels in repair and to provide them with adequate equipment. Ample appropriations should be made to cover the needs of the Service in these respects. The vessels of the Eagle and subchaser types, which were recently obtained from the Navy, are not wholly suited to the needs of the Service. Vessels adapted to the special work the Coast Guard is called upon to perform should be provided. This work is both arduous and hazardous. It is necessary for these vessels to put to sea at the very time other vessels are seeking shelter from storm. The service vessels are necessarily subjected to the hardest usage, and the officers and men must live under extremely difficult conditions and circumstances. The accommodations on the vessels should be ample so that these conditions may be ameliorated so far as practicable. It is urged that Congress be asked to meet these imperative needs.

Stations.

Many of the shore stations of the Service are greatly in need of repairs, and others should be replaced by new ones. Some of them are in a state of dilapidation through age and usage, and are unfit for occupancy. It is earnestly hoped that Congress will appropriate sufficient funds to carry forward the necessary work of rehabilitation and renewal. It is recommended that the sum included in the estimates for the establishment of Coast Guard stations be allowed by Congress. The establishment of a number of stations, now authorized by law, is being delayed because of insufficient funds.

New river cutters.

Two of the river cutters (*Kankakee* and *Yocona*) authorized by law were completed and placed in commission. The *Kankakee* was allocated to the Ohio River section, with station during the flood season at Evansville, Ind. The *Yocona* was allocated to the Mississippi River section, with station at Vicksburg, Miss. The special duty to be accomplished by these vessels will be, in the case of the former, to render assistance during floods on the Ohio River and its tributaries and on that portion of the Mississippi River adjacent to the mouth of the Ohio River, and, in the case of the latter, to render assistance on the Mississippi River and its tributaries. In addition to this special duty of giving relief, succor, and assistance to victims of flood, each of these vessels will perform other duties with which the Coast Guard is charged in the matter of rendering assistance to vessels in distress, saving life and property, protecting the revenue, enforcing the navigation and motor-boat laws, and prosecuting such other work as properly may come within the purview of the Service.

Derelicts.

The Coast Guard has continued the work of removing derelicts and other floating dangers to navigation. During the year the number of derelicts destroyed or removed from the paths of marine commerce was seven.

Enforcement of customs laws.

All units and agencies of the Coast Guard have continued their duties in connection with the enforcement of the customs laws. Twelve harbor cutters detailed especially for customs service are stationed at the principal ports to aid the customs authorities in boarding incoming vessels and in performing other customs duties.

Other activities.

Regatta courses, as is customary, were patrolled and supervised in the interests of public safety at such places where facilities were available. During the year two regattas were patrolled.

In enforcing the navigation, motor-boat, and customs laws there were boarded and examined during the year 2,005 vessels. Derelictions were found in 601 cases, involving penalties in the total sum of \$65,025.

During the year the Coast Guard continued its assistance to the Steamboat-Inspection Service, Department of Commerce, in the examination of merchant seamen as to their qualifications for "certificated lifeboat men," as contemplated by the so-called seamen's act. Thirteen hundred and ninety-nine men were examined during the year.

Repairs, etc.

Extensive repairs were made during the year to the Coast Guard cutters *Itasca*, *Acushnet*, *Androscoggin*, *Pequot*, *Ossipee*, *Bear*, *Tuscarora*, *Winnisimmet*, *Manning*, *Gresham*, *Pamlico*, *Tioga*, *Apache*, *Seneca*, and *Algonquin*.

The station building at Station No. 57 (Quonochontaug, R. I.) has been extensively repaired. The station building at Station No. 141 (Rehoboth Beach, Del.) has been moved to the rear of the station lot and put into good condition. The boathouse at Station No. 147 (North Beach, Md.), which was destroyed by storm, has been rebuilt. A riprap stone protection has been constructed at Station No. 137 (Cape May, N. J.). The launchway at Station No. 318 (Humboldt Bay, Calif.) has been rebuilt. Contracts have been awarded or work has begun in connection with the following projects: Launchway at Station No. 14 (Isles of Shoals, N. H.); moving station buildings to new site at Station No. 83 (Fire Island, N. Y.); construction of stables at Stations Nos. 163 (Dam Neck Mills, Va.) and 190 (Cape Lookout, N. C.); construction of lifeboat house at Station No. 252 (Thunder Bay Island, Mich.); construction of lifeboat house at Station No. 253 (Middle Island, Mich.); construction of wharf and approach at Station No. 314 (Siuslaw, Oreg.). All of the buildings at Station No. 221 (Aransas, Tex.) were destroyed by the hurricane of September 14, 1919. The establishment of a Coast Guard station on the coast of Lake Superior, in Cook County, Minn., in such locality as the commandant of the Coast Guard may recommend, was authorized by act of May 6, 1920.

The number of commissioned officers, warrant officers, and enlisted men in the Service at the close of the year was 4,294.

There were in the Service at the close of the year 28 cruising cutters, 27 inshore patrol cutters, 25 harbor cutters, and 23 harbor launches. The number of stations was 273.

Transfer of Coast Guard to the Navy.

The repeated efforts looking to the transfer of the Coast Guard to the Navy suggest a few pertinent observations at this time upon the subject. Similar propositions brought forward from time to time for many years past have failed, very properly, to elicit the support of various Secretaries of the Treasury or the sanction of Congress. Under the law the Coast Guard operates as a part of the Navy in time of war and brings to the aid of that military branch of the Government its resources of personnel and material, the former, with their military training and discipline and their experience, fitting at once into the naval organization so that there is a minimum of disturbance in securing immediately the closest sort of cooperative direction and effort. The peace-time duties of the Coast Guard, and these, it is hardly necessary to state, make up nearly the sum total of its activities, have nothing in common with naval functions. The Coast Guard in the execution of its normal duties deals with entirely different problems—problems having to do with the preservation of life and property from the perils of the sea; with the rescue and relief of the shipwrecked; with assistance to vessels in distress at sea; with the removal of derelicts and other dangerous obstructions from the paths of marine commerce; with rendering assistance and succor in a multitude of ways to those whose business engages them in marine commerce along our shores; with assisting other departments of the Government in the prosecution of such of their duties as require the services of vessels which they do not possess, and a trained personnel; with the patrol of the coasts for the timely discovery of wrecks. It assists in the protection of the customs revenue, in the administration of the Customs Service, and in preventing illegal importations; it protects wrecked property; it releases vessels from threatening and dangerous positions; it places lookouts upon our shores and in our harbors to guard the lives of those who incur the hazards of boating; it averts disaster to shipping by signals of warning from the shore, and performs hundreds of beneficent offices that make for the public good and benefit. Surely, it can not be claimed that these duties have any relation to naval matters or any place in naval jurisdiction.

It is believed that the fundamental, primary duties of the Coast Guard, and its great humanitarian offices, universally recognized as of the highest usefulness, importance, and distinction, would be impaired seriously, if not actually subverted, by merging them per-

manently into the Naval Establishment. The constituted authorities of the Coast Guard stoutly and rightly maintain that the Service is needed by the Treasury Department and that it is not needed by the Navy Department in time of peace. There is no doubt that the transfer would be inimical to the public interests, and it is hoped that Congress will continue to see the wisdom of withholding its approval of any proposal to that end.

Award of life-saving medals.

Sixty-seven awards of life-saving medals of honor were made by the Secretary of the Treasury during the fiscal year 1920, under authority of the acts of Congress approved June 20, 1874, June 18, 1878, May 4, 1882, and June 21, 1897, in recognition of bravery exhibited on 41 occasions in the rescue, or attempted rescue, of persons in danger of drowning. Six of the medalists were civilians, 7 were attached to the United States Army, 28 to the United States Navy, 1 to the United States Marine Corps, 23 to the United States Coast Guard, and 2 to police forces. The rescues were performed in the following localities: 34 in the United States, 1 in the Bay of Biscay, 1 in Germany, 2 in France, 1 in the Dominican Republic, 1 in Cuba, and 1 in the Azores. The number of persons rescued was about 150. In two instances only did the persons attempting the rescues fail in their undertakings. A tabulated statement of the awards follows, with a brief description of the services performed in each instance.

GOLD MEDALS.

Medalist.	Title, etc.	Date of award.	Service rendered.
J. B. Blee.....	Lieutenant, U. S. Navy.	Nov. 15, 1919	Aug. 5, 1919, rescued, near Sitka, Alaska, Seaman Ershel Silvey, U. S. Navy, who had been carried over a waterfall. Lieut. Blee, fully clad, dove into the pool, and, after exhaustive efforts, succeeded in bringing Seaman Silvey to the surface. Both men were assisted ashore.
H. G. Hamlet.....	Captain, U. S. Coast Guard.	Jan. 5, 1920	Apr. 28, 1919, while in command U. S. S. Marietta, rescued, in Bay of Biscay, crew of 47 persons from the U. S. S. James, which was sinking at sea. This rescue was made extremely difficult and hazardous owing to high seas, which threatened momentarily to send the two vessels crashing together. In effecting the rescue Capt. Hamlet displayed admirable seamanship.
George H. Knaepple.....	Chief machinist's mate, U. S. Navy.	Feb. 25, 1920	Aug. 29, 1918, rescued, at Detroit, Mich., Fireman (3d class) William Hansen, U. S. Navy, who was thrown overboard while working on a raft beside the ship. Chief Machinist's Mate George H. Knaepple, U. S. Navy, was thrown overboard at the same time, and in spite of injuries sustained—namely, a fracture to four ribs, two bones in his leg and body of the twelfth dorsal vertebra—Knaepple succeeded in crawling to the edge of the raft and dragging Hansen back upon it.

GOLD MEDALS—Continued.

Medalist.	Title, etc.	Date of award.	Service rendered.
James Pine.....	Captain, U. S. Coast Guard.	May 11, 1920	{ Mar. 14, 1920, rescued two men found clinging to the masts of the schooner Isaiah K. Stetson, which sank on Handkerchief Shoal, Mass. The men who performed this service were members of the crew of the Coast Guard cutter Acushnet, who volunteered to undertake the rescue. Owing to high winds and a rough sea, the rescue was made not only very difficult, but also extremely dangerous.
Charles Hansen.....	Carpenter, U. S. Coast Guard.		
Henry P. Hanson.....	Machinist's mate, 2d class, U. S. Navy.	May 15, 1920	{ June 24, 1918, rescued crew of a wrecked naval seaplane, at San Diego, Calif. By swimming out through the surf to the wreck, and back to shore, Machinist's Mate Henry P. Hanson saved eight lives. In his endeavor to save a ninth man, however, Hanson lost his own life. Machinist's Mate Lawrence C. Spangard saved three lives, and Arthur F. Norton saved one, in circumstances equally dangerous.
Lawrence C. Spangard.....	do.		
Arthur F. Norton.....	Acting chief machinist's mate, U. S. Navy.		
John O. Anderson.....	Keeper, U. S. Coast Guard.	June 3, 1920	{ Nov. 14, 1919, rescued crew of 17 persons of steamer H. E. Runnels, which stranded at Grand Marais, Mich. In performing this service, some of the rescuers were washed overboard from their boat, but no one was lost. The rescue was made most hazardous by a blinding snowstorm, high seas and ice which covered the decks of the steamer.
Alfred E. Kristofferson.....	No. 1 surfman, U. S. Coast Guard.		
William E. Campbell.....	Surfman, U. S. Coast Guard.		
Samuel Martin.....	do.		
George Olsen.....	do.		
Leon E. Alford.....	do.		
Edward J. Spencer.....	do.		
Joseph G. McShea.....	Oilier, U. S. Coast Guard.		
Glen Wells.....	Surfman, U. S. Coast Guard.		
James MacDonald.....	Grand Marais, Mich.		
Joseph Graham.....	do.		
Ora Endress.....	do.		
Ambrose Graham.....	do.		

SILVER MEDALS.

Carl I. Nelson.....	First lieutenant, U. S. Army.	July 29, 1919	May 22, 1919, rescued, in New York Harbor, an insane soldier who had jumped overboard from the transport Leviathan.
William Pepper.....	Patrolman, New York police department.	July 19, 1919	Aug. 25, 1918, rescued, in New York Harbor, two boys.
Layton Oeder.....	Private, U. S. Army.	Aug. 15, 1919	Apr. 20, 1919, rescued from the Moselle River, Germany, two boys whose boat had overturned.
Eugene J. Hannigan.....	Sergeant, U. S. Army.do.....	May 18, 1915, rescued from Long Island Sound, Pvt. Joseph Canniff, U. S. Army, who fell into the water while trying to jump from the deck of one vessel to another.
J. H. MacDonald.....	Lieutenant, U. S. Navy.	Sept. 3, 1919	Jan. 31, 1919, rescued at Tompkinsville, N. Y., Carpenter's Mate (1st class) H. C. Gilbert, who had fallen overboard between the U. S. S. Turkey and the dock.
William T. Sherman.....	Private, U. S. Marine Corps.do.....	June 27, 1919, rescued at Quantico, Va., Robert M. Harris, who was in bathing.
Arthur O. Stein.....	Coxswain, U. S. Coast Guard.	Sept. 12, 1919	Apr. 1, 1919, rescued at Key West, Fla., a navy-yard mechanic who had fallen off the gangplank while about to board the Coast Guard cutter Tuscarora.
Thomas S. Taylor.....	Pharmacist's mate, U. S. Navy.	Nov. 28, 1919	Sept. 2, 1919, rescued at Norfolk, Va., two occupants of an automobile that had backed off the stern of a ferryboat.
Robert J. Dalton.....	Baker, 1st class, U. S. Navy.do.....	Aug. 23, 1919, rescued at St. Nazaire, France, a boy who had fallen off a wharf.
L. W. Preston.....	Ensign, U. S. Navy.	Dec. 20, 1919	{ Sept. 11, 1919, rescued A. J. Freno, apprentice seaman, U. S. Navy, who had fallen into the water while about to board a launch.
H. J. Anderson.....	Gunner's mate, U. S. Navy.		

SILVER MEDALS—Continued.

Medalist.	Title, etc.	Date of award.	Service rendered.
William C. McCustion...	Private, U. S. Army.	Dec. 20, 1919	Sept. 14, 1919, rescued at Corpus Christi, Tex., a number of persons during the ravages of a flood.
George A. Dunagin.....	First lieutenant, U. S. Army.do.....	Apr. 28, 1918, rescued at Limoges, France, an elderly French woman who had jumped into the river with suicidal intent.
Bernard L. Moran.....	Master at arms, U. S. Coast Guard, retired.do.....	Sept. 2, 1900, rescued at Baltimore, Md., a little girl who had fallen off a dock. Moran risked his life in effecting this rescue.
Adam Arellano.....	Seaman, 2d class, U. S. Navy.	} Feb. 9, 1920	{ Nov. 24, 1919, rescued from San Francisco Bay, Calif., Seaman (2d class) George W. Welch, U. S. Navy, who had fallen overboard from the U. S. S. Minneapolis.
Myron W. Tandy.....	Gunner's mate, U. S. Navy.		
George M. Brown.....	Bridgeport, Conn.do.....	July 27, 1919, rescued at Bridgeport, Conn., four small boys who were thrown out of a rowboat by the swells from the steamer City of Lowell.
Walter L. Moore.....	Chief boatswain's mate, U. S. Navy.do.....	Dec. 11, 1917, rescued at Ponta Delgada, Azores, Albert R. Ewing, bowman, attached to the U. S. S. Hannibal, who had been swept overboard.
John Enright.....	Police department, New York City.do.....	Mar. 22, 1916, rescued from Harlem River Ship Canal a man found clinging to a cake of ice.
Stanley H. Smith.....	Gunner's mate, U. S. Navy.do.....	Aug. 31, 1919, rescued at Providence, R. I., a woman who had jumped into the water from a burning gig.
Bertram L. Smith.....	Coxswain, U. S. Navy.do.....	Sept. 1, 1919, rescued from North River, N. Y., an intoxicated man who had fallen overboard from the U. S. S. Edwards.
G. A. Papperman.....	Lockport, N. Y.	Feb. 13, 1920	Aug. 19, 1919, rescued at Ocean City, Md., two bathers who had gone beyond their depth.
James F. Hopkins.....	Lieutenant, U. S. Navy.	Apr. 23, 1920	Feb. 5, 1903, rescued at sea a boy named Galloway, who had fallen overboard from the U. S. S. Essex.
Hugo A. Stahl.....	Boatswain's mate, U. S. Navy.	Apr. 30, 1920	Oct. 26, 1916, rescued at Jamestown, R. I., an eleven-year-old boy who had fallen off a dock.
Frank L. Devlin.....	Fireman, U. S. Navy.	}do.....	{ Oct. 6, 1919, rescued at Hell Gate, N. Y., Ens. J. H. Joyce, U. S. Navy, who was thrown from the bridge of submarine U. S. S. O-7 by collision with the U. S. S. Lexington.
William Roach.....	Machinist's mate, U. S. Navy.		
Lester Carpenter.....	Lieutenant, U. S. Navy.do.....	Dec. 9, 1919, attempted to rescue at San Domingo, Dominican Republic, Pvt. E. Benson, U. S. Marine Corps, attached to the U. S. S. Prometheus. Benson had fallen overboard between a lighter and his vessel. Lieut. Carpenter was successful only in recovering the body, but he displayed great bravery in going into the water between the two vessels.
Michael Sulzona.....	Seaman, U. S. Navy.	May 4, 1920	Feb. 10, 1920, rescued at New Orleans, La., J. A. Keller, who had fallen overboard while about to board the tug Barnett.
Chester W. Nimitz.....	Commander, U. S. Navy.do.....	May 20, 1912, rescued in Hampton Roads, Va., W. J. Walsh, fireman, 2d class, U. S. Navy, who had fallen overboard from the U. S. S. Tonopah.
Robert L. Rutter.....	Commissary steward, U. S. Navy.do.....	Sept. 14, 1919, rescued at Charleston, S. C., Acting Coxswain Charles Connors, U. S. Coast Guard, who had fallen overboard from the Coast Guard launch Kathrich.
D. C. Patterson.....	Lieutenant commander, U. S. Navy.	May 11, 1920	Jan. 16, 1920, rescued off Huntington Beach, Calif., a man who had fallen into the water while cleaning side of the U. S. S. Idaho.
Philip W. Heron.....	Sergeant major, U. S. Army.do.....	Dec. 20, 1902, rescued near Rowell Barracks, Cuba, Mrs. James F. Brady and Mrs. James S. Bevans, when the Army tug Ord, on which they were passengers, turned turtle and sank.
Charles Schenck.....	Electrician, 3d class, U. S. Navy.	May 15, 1920	Aug. 3, 1919, rescued at Norfolk, Va., a colored boy who had fallen into the water while trying to jump from the wharf to the deck of a moving barge.

SILVER MEDALS—Continued.

Medalist.	Title, etc.	Date of award.	Service rendered.
Edward D. Connery.....	Quartermaster, U. S. Coast Guard.	May 11, 1920	Mar. 14, 1920, rescued 2 men found clinging to the masts of the schooner Isaiah K. Stetson, which sank on Handkerchief Shoal, Mass. The men who performed this service were members of the crew of the Coast Guard cutter Acushnet, and volunteered to undertake the rescue. Owing to high winds and a rough sea, the rescue was made not only very difficult but extremely dangerous.
William R. Garvin.....	Electrician, 3d class, U. S. Coast Guard.		
John E. Gomes.....	Seaman, U. S. Coast Guard.		
James F. Chapman.....	Boy, 1st class, U. S. Coast Guard.		
Arthur J. Flores.....	do.		
William Moratta.....	do.	Sept. 20, 1919	May 28, 1919, attempted to rescue in New York Harbor a child who had been dragged into the water by becoming entangled in the mooring lines of a launch. In his endeavor to save the child, Abell dived a number of times under the dock, which place was extremely dangerous, owing to flood tide.
William A. Abell.....	Commissary steward, U. S. Navy.		
L. A. Torras.....	Musician, U. S. Army.	Nov. 1, 1919	July 13, 1919, rescued near Sullivan's Island, S. C., A. A. Whaley and his wife, who had gone beyond their depth while in bathing.
Albert R. Genet.....	Lieutenant, U. S. Navy.	Nov. 15, 1919	Jan. 26, 1919, rescued at Cambridge, Mass., Electrician (3d class) M. P. Viol, U. S. Navy, who had broken through the ice while skating. Both Lieut. Genet and Ship's cook Shea risked their lives in effecting this rescue.
James D. Shea.....	Ship's cook, U. S. Navy.		
William McCauley.....	Oiler, 1st class, U. S. Coast Guard.	do.	Aug. 14, 1919, rescued from East River, N. Y., a man who had jumped overboard from a ferryboat with suicidal intent.
Claude Hawthorn.....	Oiler, 2d class, U. S. Coast Guard.		
S. E. Augustynski.....	Coal heaver, U. S. Coast Guard.		

DIVISION OF LOANS AND CURRENCY.

The following is the report of the Division of Loans and Currency for the fiscal year ended June 30, 1920:

Interest-bearing debt of the United States—Changes during the fiscal year ended June 30, 1920.

Title of loan.	Rate (per cent).	Outstanding June 30, 1919.	Issued.	Retired.	Outstanding June 30, 1920.
Consols of 1930.....	2	\$599,724,050.00	\$599,724,050.00
Loan of 1925.....	4	118,489,900.00	118,489,900.00
Panama Canal loan:					
Series of 1916-1936.....	2	48,954,180.00	48,954,180.00
Series of 1918-1938.....	2	25,947,400.00	25,947,400.00
Series of 1961.....	3	50,000,000.00	50,000,000.00
Conversion bonds.....	3	28,894,500.00	28,894,500.00
Postal savings bonds, first to eighteenth series.....	2½	11,349,960.00	\$189,400.00	11,539,360.00
Certificates of indebtedness:					
Various issues.....	Various.	13,446,260,490.00	14,648,073,968.53	² \$15,580,062,458.53	³ \$2,509,550,500.00

DIVISION OF PUBLIC MONEYS.

On May 19, 1920, the Division of Deposits was created, and the functions formerly performed in the Division of Public Moneys in respect to Government depositaries were transferred to the new division. A summary of this work is given under the heading of Division of Deposits.

The act approved May 29, 1920, directed the discontinuance of the subtreasuries from and after July 1, 1921, or at such earlier date or dates as the Secretary may deem advisable. The Secretary was authorized in his discretion to transfer any and all duties and functions performed or authorized to be performed by the assistant treasurers or their offices to the Treasurer of the United States or the mints or

assay offices of the United States, under such rules and regulations as he may prescribe, or to utilize any of the Federal reserve banks acting as depositaries or fiscal agents of the United States for the purpose of performing any or all of such duties and functions. Plans are now under way for carrying out this provision of law, and several of the subtreasuries have already been discontinued, as heretofore stated in this report.

Alien Property Custodian account.

Under the provisions of the act of Congress approved October 6, 1917, and the proclamations and Executive orders issued thereunder by the President, the Secretary of the Treasury purchased from funds deposited by the Alien Property Custodian United States securities of a par value of \$230,512,000. There were on hand on July 1, 1919, similar securities of a par value of \$101,398,500. Securities of the value of \$174,668,500 matured and were redeemed, the proceeds being reinvested as available. The total amount of such securities carried by the Secretary of the Treasury in the vaults of the Treasurer of the United States in trust for the Alien Property Custodian on June 30, 1920, was \$157,242,000.

Refunds and payments under the act during the fiscal year 1920 were made to 1,546 individuals, firms, or corporations, aggregating \$15,111,169.76.

Purchase of farm loan bonds.

On July 1, 1919, there were held by the Secretary of the Treasury \$136,885,000 Federal farm loan bonds, purchased under the provisions of the act of January 18, 1918, amending the act of July 17, 1916. During the fiscal year 1920 the Secretary made further purchases of Federal farm loan bonds in accordance with the provisions of the joint resolution of May 26, 1920, to the extent of \$29,500,000. No farm loan bonds were purchased by the Federal land banks during the fiscal year, thus leaving the total amount of such bonds on hand at the close of the fiscal year 1920, \$166,385,000.

DIVISION OF DEPOSITS.

During the fiscal year ending June 30, 1920, the Treasury maintained the following depositaries: The Treasurer of the United States, the assistant treasurers of the United States, Federal reserve banks and their branches, Federal land banks, the Treasurer of the Philippine Islands, insular depositaries, general and limited national-bank depositaries, special depositaries, and foreign depositaries.

The number of depositaries at the end of the fiscal year 1919 and at the end of the fiscal year 1920, other than the Treasurer of the United States and the assistant treasurers, is indicated by the following statement:

	June 30, 1919.	June 30, 1920.
Federal land banks.....	12	12
Federal reserve banks.....	12	12
Federal reserve branch banks.....	18	21
Special depositaries.....	9,550	9,475
Foreign depositaries.....	22	17
General national-bank depositaries.....	765	537
Limited national-bank depositaries.....		116
Inactive and temporary national-bank depositaries.....	566	
Insular depositaries (including Philippine Treasury).....	6	6
Total.....	10,951	10,246

The amounts of public moneys held by such depositaries, at the end of the fiscal year 1919, and at the end of the fiscal year 1920, on the basis of Daily Treasury Statements, were as follows:

	June 30, 1919.	June 30, 1920.
Deposits in Federal land banks.....	\$500,000.00	\$5,950,000.00
Deposits in Federal reserve banks and branches.....	105,457,355.50	44,393,367.32
Deposits in special depositaries.....	905,397,000.00	273,335,000.00
Deposits in foreign depositaries: To credit of Treasurer of the United States.....	24,641,009.19	8,608,654.46
Deposits in national banks:		
To credit of Treasurer of the United States.....	45,492,512.64	12,644,214.62
To credit of other Government officers.....	9,081,833.82	11,567,054.19
Deposits in the Philippine Treasury:		
To credit of the Treasurer of the United States.....	6,299,935.95	1 1,893,050.38
To credit of other Government officers.....	2,075,807.01	
Total.....	1,098,945,454.11	358,391,340.97

¹ Combined balance.

During the year additional depositaries were designated as follows: 20 general national-bank depositaries, 123 limited national-bank depositaries, 476 special depositaries, and 1 foreign depositary, making a total of 620 designated. In addition, branch Federal reserve banks at Nashville, Tenn., Houston, Tex., and Los Angeles, Calif., opened for business during the fiscal year and took over the transaction of the Government's depositary work at those points. All general depositaries in those cities were accordingly discontinued.

The following depositaries were discontinued during the year: 198 general national-bank depositaries, 7 limited national-bank depositaries, 566 inactive national-bank depositaries, 551 special depositaries, and 6 foreign depositaries, making a total of 1,328 depositary banks discontinued. The fixed balance to the credit of the Treasurer's general account was reduced in 575 general national-bank depositaries.

The Secretary continued the policy of specially designating incorporated banks and trust companies as special depositaries of public moneys under the provisions of the act of September 24, 1917, as amended and supplemented. Funds derived from the sale of Government securities were deposited in these banks in direct proportion to the amounts of such securities subscribed to by them from time to time and the funds so deposited were with-

drawn as needed by the Government for current disbursements. Of the 9,475 special depositaries at the close of the fiscal year 1920, 4,527 were national banks and 4,948 were State banks and trust companies.

At the end of the fiscal year 1920 there were 17 foreign depositaries, designated under section 8 of the act of September 24, 1917, as amended, a net reduction of five such depositaries during the year. The continuance of foreign depositaries was necessary for the convenience of disbursing officers of the Government stationed in foreign countries. At the present time there are two depositaries in Belgium, two in Canada, five in England, four in France, two in Italy, and two in Spain.

Temporary deposits in six Federal land banks under section 32 of the act of July 17, 1916, aggregating \$5,950,000, were made by the Secretary during the fiscal year.

DIVISION OF BOOKKEEPING AND WARRANTS.

The fiscal transactions recorded upon the books of this division during the fiscal year ended June 30, 1920, were as follows:

Receipt accounts—customs, internal revenue, public lands, miscellaneous, Panama Canal receipts from tolls, etc., and public debt receipts—to the number of 1,052 and appropriation accounts for all executive departments, other Government establishments, and the District of Columbia to the number of 7,179, have been credited and charged, respectively, with all warrant entries affecting the receipts and disbursements, and the results exhibited in the annual reports of the department.

Approximately 9,500 active accounts of collecting and disbursing officers of the Government were carried in the fiscal officers' ledgers of the division, recording their transactions as to collections and deposits of public moneys and of expenditures made from moneys advanced to them.

Warrants issued during the fiscal year 1920.

General classes.	Number of warrants issued.	Gross amount involved.
Receipt warrants.....	120	\$22,557,390,639.88
Repay and counter warrants.....	1,197	3,800,996,738.46
Pay and transfer warrants.....	279,938	26,977,189,230.95
Total.....	281,255	53,335,576,609.29

Appropriation warrants have also been issued to the number of 637, crediting detailed appropriation accounts with amounts provided by law for disbursement.

Warrants in the amount of \$45,733,583,132.37, representing receipts of \$22,557,390,639.88 and net disbursements¹ of \$23,176,192,492.49,

¹ "Disbursements," as here used, in addition to actual expenditures, include unexpended balances to the credit of disbursing officers.

including Panama Canal and public-debt transactions, were credited and charged, respectively, to the general fund of the Treasury. Warrants representing \$3,345,113,082.44 were issued for adjustment of appropriation accounts, largely for the detailed naval accounts against "general account of advances," without affecting the general fund.

The following table exhibits the totals of the receipts and disbursements¹ of the year adjusted for the general fund:

	Receipts.	Disbursements. ¹	Excess of receipts (+) or of dis- bursements ¹ (-).
Ordinary, including Panama Canal and other items heretofore classed as "special".	\$6,704,414,437.63	\$6,141,745,240.08	+ \$562,669,197.55
Public debt.....	15,852,345,949.79	17,036,444,271.25	-1,184,098,321.46
Total.....	22,556,760,387.42	23,178,189,511.33	- 621,429,123.91

¹ "Disbursements," as here used, in addition to actual expenditures, include unexpended balances to the credit of disbursing officers.

This shows an excess of ordinary receipts over ordinary disbursements¹ of \$562,669,197.55, and an excess of all disbursements¹ over all receipts of \$621,429,123.91, taking into account special accounts as enumerated above, public debt transactions, and payments from the general fund of the Treasury during the year of \$6,031,463.72 for the Panama Canal without sales of bonds, offset by receipts from Panama Canal tolls, etc., of \$9,039,670.95.

The general fund.

State bonds and stocks owned by the United States.

The following statement shows the nonpaying State bonds and stocks, formerly in the Indian trust fund, now in the Treasury, belonging to the United States:

State.	Principal.	Interest coupons due and unpaid.
Louisiana.....	\$37,000.00	\$17,220.00
North Carolina.....	58,000.00	88,140.00
Tennessee.....	335,666.66 $\frac{2}{3}$	157,830.51
Total.....	430,666.66 $\frac{2}{3}$	263,190.51

A history of these State stocks and bonds is given in House Document No. 263, Fifty-fourth Congress, second session.

SECRET SERVICE DIVISION.

Seven hundred and seventy-nine persons were arrested by agents of the Secret Service Division or by their direction during the year—the greatest number of arrests reported by the Secret Service for any year since 1897. Note raisers and check forgers continue as the principal offenders, constituting approximately 60 per cent of the total number arrested. Nineteen new counterfeit-note issues were discovered, several of which were made in foreign countries and had no circulation in the United States. The Service has discovered and arrested those responsible for the production of practically all those made in the United States; \$90,930.45 (representative value) in counterfeit and altered bills, \$16,564.37 in counterfeit coins, 70 plates, 7 $\frac{1}{2}$ sets of dies, 121 $\frac{1}{2}$ molds, together with a large quantity of miscellaneous property consisting of printing presses, cameras, furnaces, crucibles, ladles, melting pots, metals, acids, etc., were seized or captured.

Valuable service was rendered by the Secret Service agents in cooperation with the Grain Corporation, Wheat Director's office, and the Farm Loan Board. Many cases of thefts of Government property, including war-savings stamps, bonds, incomplete currency, and other obligations and securities were investigated. Brokers or dealers in war-savings stamps who were discovered altering and otherwise manipulating certificates or stamps, or violating other provisions of the law governing the issuance and redemption of war-savings certificates were proceeded against vigorously. Several convictions were obtained of these offenders and the industry practically suppressed.

A small group of employees of the War Risk Insurance Bureau was found to be engaged in defrauding veterans of the late war of amounts due them as disability compensation. In some of these cases the soldier was defrauded of half or more than half of the

amount due him. Ten persons have been arrested in connection with these frauds and will be vigorously prosecuted.

The valuable assistance rendered by agents of the Secret Service Division in cooperation with the Bureau of Engraving and Printing, Division of Loans and Currency, and the Register's and Treasurer's offices in the matter of safeguarding the obligations and securities of the United States emphasizes again the need for authority to use these skilled investigators in all matters affecting the Treasury Department and the several branches of the public service under its control. This could be accomplished by the elimination of the restrictive clause incorporated in the act making appropriation for the Secret Service, included in the sundry civil appropriation act each year under the caption "Suppressing counterfeiting and other crimes."

The field force of the Secret Service is commended for its loyalty and industry, and the hearty cooperation of the local authorities throughout the country is acknowledged.

DIVISION OF PRINTING AND STATIONERY.

Printing and binding.

The total expenditures for printing and binding for the fiscal year 1920, as shown in the following table by bureaus, offices, and divisions, were \$1,753,792.39. Of this amount there was reimbursed from other appropriations the sum of \$1,121,119.41. At the close of the fiscal year there was an unexpended balance of \$167,327.02. This apparently large unexpended balance is due to the fact that Congress did not make deficiency appropriations asked for until so late in the fiscal year that the Public Printer was unable to execute the work before June 30.

The increase in expenditures over the fiscal year 1919 was \$364,473.05. The principal increases were: Comptroller of the Currency, \$34,739.21; Internal Revenue, \$257,095.29, of which \$128,221.44 was for the enforcement of the prohibition act; General Supply Committee, \$17,395.73; Public Health Service, \$139,530.53, of which \$110,945.66 was chargeable to the appropriation for pay of personnel and maintenance of hospitals.

The principal decreases were: Customs, \$20,075.18, and expenses of loans, \$87,852.74.

On March 24, 1920, at 7 p. m., a fire, origin unknown, destroyed approximately \$150,000 worth of department stock of books and blanks in the Darby Building, Fourteenth and E Streets, NW, which had to be replaced from the appropriation for printing and binding. The Congress was asked for a deficiency for this purpose, but the appropriation was made so late in the year that the amount appropriated could not all be utilized.

Appropriations, expenditures, and reimbursements for printing and binding.

	Fiscal year 1919.	Fiscal year 1920.	Increase.	Decrease.
Appropriation.....	\$475,000.00	\$800,000.00	\$325,000.00

Stationery.

The appropriation for stationery for the service of the Treasury Department and its various offices in Washington and outside of Washington for the fiscal year 1920 amounted to \$306,400. Owing to the increased demand from practically every division and service during the fiscal year, an additional appropriation of \$200,000 was authorized by Congress, making a total of \$506,400.

The total issues of stationery articles amounted to \$927,969.83, of which \$562,481.72 represented reimbursements for such supplies forwarded to services not having specific appropriations therefor.

The appropriation for the fiscal year 1921 was \$476,250; but if the present demands continue for paper and paper articles, most of which have to be purchased at about double 1920 prices, it will become necessary to request further appropriations to provide for the service.

The following statement exhibits the details in the transactions of this service:

Appropriation.....	\$506,400.00
Reimbursements.....	562,481.72
Total.....	1,068,881.72
Purchase orders.....	1,059,872.63

Postage and materials for bookbinder.

The following table shows appropriations, expenditures, and unexpended balances on account of postage and materials for bookbinder for the fiscal years 1919 and 1920:

Postage.

Fiscal year.	Appropriation.	Expended.	Unexpended balance.
1919.....	\$1,200.00	\$1,200.00
1920.....	2,400.00	2,399.83	\$0.17

Materials for bookbinder.

1919.....	\$250.00	\$248.78	\$1.22
1920.....	250.00	244.17	5.83

Department advertising.

Following is a statement of the number of authorizations and the amount expended for department advertising for the fiscal years 1919 and 1920. The increase in the number of authorizations in 1920 over 1919 is due largely to increased advertising required because of advanced prices in all articles entering into the construction of public buildings, which has necessitated publicity to secure most favorable prices; to advertising incident to sales of seized goods, the result of violations of the internal revenue and customs laws; and to advertising on account of public health and marine hospitals.

	Fiscal year.		Increase.
	1919	1920	
Number of authorizations.....	1,346	1,825	479
Amount expended.....	\$7,219.93	\$9,635.61	\$2,415.68

OFFICE OF THE DISBURSING CLERK.

There is given below a summary of the work performed by the office of the disbursing clerk during the past two fiscal years and during the fiscal year 1916, the last year before the war:

Comparative summary of work.

	1920	1919	1916
Amount disbursed by check.....	\$86,970,367.52	\$138,210,610.88	\$19,346,556.86
Amount disbursed in cash (salaries).....	12,463,864.54	7,618,408.47	4,138,569.79
Total disbursed.....	99,434,232.06	145,829,019.35	23,485,126.65
Number of checks issued.....	400,744	298,738	170,463
Number of salary payments made in cash.....	217,704	163,300	85,032
Total number of payments.....	618,448	462,038	255,495
Number of vouchers paid.....	212,021	193,025	142,476
Number of collections made on account of rents, sales, etc.....	3,260	2,950	3,889
Amount of said collections.....	\$624,976.27	\$441,194.78	\$317,655.20
Number of appropriations under which disbursements were made.....	492	647	770

It is believed that these figures, in some measure at least, give an idea of the growth of the work of the Treasury Department, which bids fair to continue indefinitely, probably in increasing volume. The work of the Public Health Service in providing hospital and sanatorium facilities for discharged, sick, and disabled soldiers, sailors, and marines is stupendous. The Internal Revenue Bureau must maintain and probably enlarge its vast official machinery for collecting the war revenues and enforcing the prohibition and narcotic acts. The work of paying the interest on and handling the various Liberty loans is with us for many years.

The total number of payments made, probably better than any other item, illustrates the actual amount of work of the office. It will be seen that there is a marked increase both as to number of checks issued and number of payments made in cash. The combined total in 1916 was 255,495. This jumped to 462,038 in 1919, and in 1920 reached 618,448.

The office makes disbursements for all salaries and expenses of the Treasury Department in the District of Columbia (except the bureaus of Engraving and Printing, and War Risk Insurance) and a great part of the salaries and expenses outside the District of Columbia

under the Coast Guard, Public Health Service, Supervising Architect's office, the Comptroller of the Currency, the Federal Farm Loan Board, the Secret Service, the Customs Division, the Internal Revenue Bureau, and the Division of Loans and Currency. The office also receives and accounts for moneys due the United States on account of rents of sites for public buildings, sales of public property, etc.

During the year the disbursing clerk continued to act as disbursing clerk for the United States Tariff Commission, as expressly provided by law. These disbursements were accounted for in a separate account rendered to the Auditor for the State and Other Departments.

GENERAL SUPPLY COMMITTEE.

The operations of the General Supply Committee for the fiscal year ended June 30, 1920, are shown in the following condensed report.

The reported purchases made from the contracts negotiated by the Secretary of the Treasury, through the medium of the General Supply Committee, for the fiscal year 1920 amounted to \$7,627,064.82. To this amount should be added \$760,355.74, the cost of surplus material, supplies, and equipment sold by the committee to the various executive departments and independent establishments of the Government under the provisions of the executive order of December 3, 1918. The latter amount includes \$133,913.72 as discounts allowed for usage. While the reported purchases were not as large as for the two preceding fiscal years, which were abnormal because of war conditions, they represent greater activity of the committee because of the many short-term contracts negotiated.

The following comparative statement shows the purchases reported for the fiscal years 1913 to 1920, inclusive:

Comparative statement showing total purchases as reported to the committee, under contracts negotiated by the Secretary of the Treasury through the General Supply Committee.

¹ For names of classes see preceding table.

The appended statements of the Division of Property Transfer show the original cost of supplies received and issued and does not reflect their present market value, which is considerably greater than it was in 1918 and 1919, when purchased. In order to gain an accurate idea of the saving effected in carrying out the provisions of the Executive order of December 3, 1918, it would be necessary to consider this increased value.

The necessity for proper and adequate storage space for property falling into disuse in the Government departments has become urgent. Reductions in appropriations have made it necessary for the Government departments to release employees, consolidate office space, and transfer the surplus property to the General Supply Committee. The buildings assigned to the committee for the storage of this surplus are filled to their capacity. Because of their flimsy construction, these temporary buildings are deteriorating under the weather and require constant repair. Their isolation offers a dangerous risk from fire and theft and renders efficient administration more costly than if adequate fireproof warehouses were available.

Information received from various Government departments during the month of June disclosed that in order to accommodate the existing surplus furniture and equipment awaiting transfer to the General Supply Committee at least 50 per cent additional storage space will be required. As the committee does not have necessary

space the property must necessarily be retained by the Government departments having it in their possession.

In addition to handling the surplus material located in the District of Columbia, the committee maintains a card record of war surplus material, supplies, and equipment located throughout the United States, in accordance with the provisions of the Executive order of August 27, 1919. This record covers 19,427 separate items, and shows that inquiries covering approximately 900 items are submitted daily by purchasing officials, of which amount 185 are stamped as having been reported available in other Government departments.

LEGAL-TENDER NOTES.							
The act of February 25, 1862 (12 Statutes, 345), authorized the issue of \$150,000,000 United States notes, not bearing interest, payable to bearer at the Treasury of the United States, and of such denominations, not less than five dollars, as the Secretary of the Treasury might deem expedient, \$50,000,000 to be applied to the redemption of demand notes authorized by the act of July 17, 1861; these notes to be a legal tender in payment of all debts, public and private, within the United States, except duties on imports and interest on the public debt, and to be exchangeable for 6 per cent United States bonds. The act of July 11, 1862 (12 Statutes, 532), authorized an additional issue of \$150,000,000 of such denominations as the Secretary of the Treasury might deem expedient, but no such note should be for a fractional part of a dollar, and not more than \$35,000,000 of a lower denomination than five dollars; these notes to be a legal tender as before authorized. The act of March 3, 1863 (12 Statutes, 710), authorized an additional issue of \$150,000,000 of such denominations, not less than one dollar, as the Secretary of the Treasury might prescribe; which notes were made a legal tender as before authorized. The same act limited the time in which the	Indefinite ..	On demand...	None	Par	450,000,000.00	346,681,016.00

Treasury notes might be exchanged for United States bonds to July 1, 1863. The amount of notes authorized by this act were to be in the sum of \$100,000,000 authorized by the resolution of January 17, 1863 (12 Statutes, 822). The act of May 31, 1878 (20 Statutes, 87), provides that no more of the United States legal-tender notes shall be canceled or retired, and that when any of said notes are redeemed or received into the Treasury under any law, from any source whatever, and shall belong to the United States, they shall not be retired, canceled, or destroyed, but shall be reissued and paid out again, and kept in circulation.

The act of March 14, 1900, provides that United States notes, when presented to the Treasury for redemption, shall be redeemed in gold coin of the standard fixed in said act, and that in order to secure the prompt and certain redemption of such notes it shall be the duty of the Secretary of the Treasury to set apart in the Treasury a reserve fund of one hundred and fifty million dollars in gold coin and bullion, to be used for such redemption purposes only, and that whenever and as often as any of said notes shall be redeemed from said fund it shall be the duty of the Secretary of the Treasury to use said notes so redeemed to restore and maintain the reserve fund so established—first, by exchanging the notes so redeemed for any gold coin in the general fund of the Treasury; second, by accepting deposits of gold coin at the Treasury or at any subtreasury in exchange for such notes; third, by procuring gold coin by the use of said notes in accordance with the provisions of section 3700 of the Revised Statutes of the United States. The above-mentioned act also provides that if the Secretary of the Treasury is unable to restore and maintain the gold coin in the reserve fund by the foregoing methods, and the amount of such gold coin and bullion in said fund shall at any time fall below one hundred million dollars, it shall be his duty to restore the same to the maximum sum of one hundred and fifty million dollars by borrowing money on the credit of the United States, and for the debt so incurred to issue and sell coupon or registered bonds of the United States bearing interest at the rate of not exceeding three per centum per annum, payable quarterly, the bonds to be payable at the pleasure of the United States after one year from the date of their issue, and to be payable, principal and interest, in gold coin of the present standard value, the gold coin received from the sale of said bonds to be exchanged for an equal amount of the notes redeemed and held for exchange, and the Secretary of the Treasury may, in his discretion, use said notes in exchange for gold, or to purchase or redeem any bonds of the United States, or for any other lawful purpose the public interests may require, except that they shall not be used to meet deficiencies in the current revenues.

The act of March 4, 1907, section 2, provides that whenever and so long as the outstanding silver certificates of the denominations of one dollar, two dollars, and five dollars, issued under the provisions of section seven of an act entitled "An act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and

† Including reissues.

TABLE A.—Statement of the outstanding principal of the public debt, etc.—Continued.

Length of loan.	When redeemable.	Rate of interest.	Price at which sold.	Amount authorized.	Amount issued.	Amount outstanding.
<p>The act of January 14, 1875 (18 Statutes, 296), authorizes the Secretary of the Treasury to use any surplus revenues from time to time in the Treasury not otherwise appropriated, and to issue, sell, dispose of, at not less than par, in coin, either of the description of bonds of the United States described in the act of July 14, 1870 (16 Statutes, 272), to the extent necessary for the redemption of fractional currency in silver coins of the denominations of ten, twenty-five, and fifty cents of standard value.</p> <p>The act of March 3, 1875 (18 Statutes, 466), directs the Secretary of the Treasury to issue bonds of the character and description set out in the act of July 14, 1870 (16 Statutes, 272), to James B. Eads, or his legal representatives, in payment at par of the warrants of the Secretary of War for the construction of jetties and auxiliary works to maintain a wide and deep channel between the South Pass of the Mississippi River and the Gulf of Mexico, unless Congress shall have previously provided for the payment of the same by the necessary appropriation of money.</p> <p>The act of July 14, 1870 (16 Statutes, 272), authorizes the issue of \$200,000,000 at 5 per centum, principal and interest payable in coin of the present standard value, at the pleasure of the United States Government, after ten years; these bonds to be exempt from the payment of all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority. Bonds and coupons payable at the Treasury of the United States. This act not to authorize an increase of the bonded debt of the United States. Bonds to be sold at not less than par in coin, and the proceeds to be applied to the redemption of outstanding 5-20's or to be exchanged for said 5-20's, par for par. Payment of these bonds, when due, to be made in order of dates and numbers, beginning with each class last dated and numbered. Interest to cease at the end of three months from notice of intention to redeem. The act of January 20, 1871 (16 Statutes, 399), increases the amount of 5 per cents to \$500,000,000, provided the total amount of bonds issued shall not exceed the amount originally authorized, and authorizes the interest on any of these bonds to be paid quarterly.</p> <p>The act of December 17, 1873 (18 Statutes, 1), authorized the issue of an equal amount of bonds of the loan of 1858, which the holders thereof may, on or before February 1, 1874, elect to exchange for the bonds of this loan.</p>	10 years..... May 1, 1881.....	5 per cent....	Par	\$1,500,000,000	\$517,994,150.00	\$22,400.00

FUNDED LOAN OF 1891. (REFUNDING.)

The act of July 14, 1870 (16 Statutes, 272), authorizes the issue of \$300,000,000 at 4 per centum, payable in coin of the present standard value, at the pleasure of the United States Government, after fifteen years; these bonds to be exempt from the payment of all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority. Bonds and coupons payable at the Treasury of the United States. This act not to authorize an increase of the bonded debt of the United States. Bonds to be sold at not less than par in coin, and the proceeds to be applied to the redemption of outstanding 5-20's or to be exchanged for said 5-20's, par for par. Payment of these bonds, when due, to be made in order of dates and numbers, beginning with each class last dated and numbered. Interest to cease at the end of three months from notice of intention to redeem.

FUNDED LOAN OF 1891. (RESUMPTION.)

The act of January 14, 1875 (18 Statutes, 296), authorizes the Secretary of the Treasury to use any surplus revenues from time to time in the Treasury not otherwise appropriated, and to issue, sell, dispose of, at not less than par in coin, either of the descriptions of bonds of the United States described in the act of July 14, 1870 (16 Statutes, 272), for the purpose of redeeming, on and after January 1, 1879, in coin, at the office of the assistant treasurer of the United States in New York, the outstanding United States legal-tender notes when presented in sums of not less than fifty dollars.

FUNDED LOAN OF 1907. (REFUNDING.)

The act of July 14, 1870 (16 Statutes, 272), authorizes the issue of \$1,000,000,000 at 4 per centum, payable in coin of the present standard value, at the pleasure of the United States Government, after thirty years; these bonds to be exempt from the payment of all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority. Bonds and coupons payable at the Treasury of the United States. This act not to authorize an increase of the bonded debt of the United States. Bonds to be sold at not less than par in coin, and the proceeds to be applied to the redemption of outstanding 5-20's, or to be exchanged for said 5-20's, par for par. Payment of these bonds, when due, to be made in order of dates and numbers, beginning with each class last dated and numbered. Interest to cease at the end of three months from notice of intention to redeem. See Refunding Certificates, page 590.

FUNDED LOAN OF 1907. (RESUMPTION.)

The act of January 14, 1875 (18 Statutes, 296), authorizes the Secretary of the Treasury to use any surplus revenues from time to time in the Treasury not otherwise appropriated, and to issue, sell, dispose of,

<p>FUNDED LOAN OF 1907 (RESUMPTION).—Continued.</p> <p>at not less than par, in coin, either of the description of bonds of the United States described in the act of July 14, 1870 (16 Statutes, 272), for the purpose of redeeming, on and after January 1, 1879, in coin, at the office of the assistant treasurer of the United States in New York, the outstanding United States legal-tender notes when presented in sums of not less than fifty dollars.</p> <p>GOLD CERTIFICATES.</p> <p>The act of March 3, 1863 (12 Stat., 711), authorizes the Secretary of the Treasury to receive deposits of gold coin and bullion in sums of not less than twenty dollars, and to issue certificates therefor in denominations of not less than twenty dollars each; the coin and bullion deposited for or representing the certificates to be retained in the Treasury for the payment of the same on demand. The certificates so issued to be received at par in payment of interest on the public debt and for duties on imports. The act of July 12, 1882 (22 Statutes, 165), provides that the Secretary of the Treasury shall suspend the issue of gold certificates whenever the amount of gold coin and gold bullion in the Treasury reserved for the redemption of United States notes falls below one hundred millions of dollars.</p> <p>The act of March 14, 1900, as amended by the act of March 4, 1907, authorizes and directs the Secretary of the Treasury to receive deposits of gold coin with the Treasurer or any assistant treasurer of the United States, in sums of not less than twenty dollars, and to issue gold certificates therefor in denominations of not less than ten dollars, and the coin so deposited shall be retained in the Treasury and held for the payment of such certificates on demand, and used for no other purpose; such certificates to be received for customs, taxes, and all public dues, and when so received may be reissued, and when held by any national banking association may be counted as a part of its lawful reserve. The act also provides that whenever and so long as the gold coin held in the reserve fund in the Treasury for the redemption of United States notes and Treasury notes shall fall and remain below one hundred million dollars, the authority to issue certificates as herein provided shall be suspended; and also, that whenever and so long as the aggregate amount of United States notes and silver certificates in the general fund of the Treasury shall exceed sixty million dollars, the Secretary of the Treasury may, in his discretion, suspend the issue of the certificates herein provided for; and further, that the Secretary of the Treasury may, in his discretion, issue such certificates in denominations of ten thousand dollars, payable to order.]</p>	On demand	None	Par	Indefinite		\$1,375,659,569 00

The act of March 2, 1911 (36 Stat., 965, sec. 1), provides that the Secretary of the Treasury may, in his discretion, receive, with the assistant treasurer in New York and the assistant treasurer in San Francisco, deposits of foreign gold coin at their bullion value in amounts of not less than one thousand dollars in value and issue gold certificates therefor of the description herein authorized; and also provides that the Secretary of the Treasury may, in his discretion, receive, with the Treasurer or any assistant treasurer of the United States, deposits of gold bullion bearing the stamp of the coinage mints of the United States, or the assay office in New York, certifying their weight, fineness, and value, in amounts of not less than one thousand dollars in value, and issue gold certificates therefor of the description herein authorized. But the amount of gold bullion and foreign coin so held shall not at any time exceed one-third of the total amount of gold certificates at such time outstanding. And section fifty-one hundred and ninety-three of the Revised Statutes of the United States is hereby repealed.

SILVER CERTIFICATES.

The act of February 28, 1878 (20 Statutes, 26, sec. 3), provides that any holder of the coin authorized by this act may deposit the same with the Treasurer or any assistant treasurer of the United States in sums not less than ten dollars and receive therefor certificates of not less than ten dollars each, corresponding with the denominations of the United States notes. The coin deposited for or representing the certificates shall be retained in the Treasury for the payment of the same on demand. Said certificates shall be receivable for customs, taxes, and all public dues, and, when so received, may be reissued. The act of August 4, 1886 (24 Statutes, 227), authorizes the issue of silver certificates in denominations of one, two, and five dollars; said certificates to be receivable, redeemable, and payable in like manner and for like purposes as is provided for by the act of February 28, 1878.

The act of March 14, 1900, provides that it shall be the duty of the Secretary of the Treasury, as fast as silver dollars are coined under the provisions of the acts of July 14, 1890, and June 13, 1898, from bullion purchased under the act of July 14, 1890, to retire and cancel an equal amount of Treasury notes whenever received into the Treasury, and upon the cancellation of Treasury notes, silver certificates shall be issued against the silver dollars so coined. The act also provides that silver certificates shall be issued only of denominations of ten dollars and under, except that not exceeding in the aggregate ten per centum of the total volume of said certificates, in the discretion of the Secretary of the Treasury, may be issued in denominations of twenty dollars, fifty dollars, and one hundred dollars; and silver certificates of higher denomination than ten dollars, except as therein provided, shall, whenever received at the Treasury or redeemed, be retired and canceled, and certificates of denominations of ten dollars or less shall be substituted therefor, and after such substitution, in whole or in part, a

United States described in the act of July 14, 1870 (16 Statutes, 272), for the purpose of redeeming, on and after January 1, 1879, in coin, at the office of the assistant treasurer of the United States in New York, the outstanding United States legal-tender notes when presented in sums of not less than fifty dollars.

LOAN OF 1925.

The act of January 14, 1875 (18 Statutes, 296), authorizes the Secretary of the Treasury to use any surplus revenues from time to time in the Treasury not otherwise appropriated, and to issue, sell, dispose of at not less than par, in coin, either of the descriptions of bonds of the United States described in the act of July 14, 1870 (16 Statutes, 272), for the purpose of redeeming, on and after January 1, 1879, in coin, at the office of the assistant treasurer of the United States in New York, the outstanding United States legal-tender notes, when presented in sums of not less than fifty dollars.

LOAN OF 1908-1918.

The act of June 13, 1898 (30 Statutes, 467, sec. 33), authorizes the Secretary of the Treasury to borrow on the credit of the United States, from time to time, as the proceeds may be required, to defray expenditures authorized on account of the war with Spain (such proceeds when received to be used only for the purpose of meeting such expenditures), the sum of four hundred million dollars, or so much thereof as may be necessary, and to prepare and issue therefor coupon or registered bonds of the United States in such form as he may prescribe, and in denominations of twenty dollars or some multiple of that sum, redeemable in coin at the pleasure of the United States after ten years from the date of their issue, and payable twenty years from such date, and bearing interest payable quarterly, in coin, at the rate of three per centum per annum; the bonds so issued to be exempt from all taxes or duties of the United States, as well as from taxation in any form by or under state, municipal, or local authority.

CONSOLS OF 1930.

The act of March 14, 1900, section 11, authorizes the Secretary of the Treasury to receive at the Treasury any of the outstanding bonds of the United States of the five per cent loan of 1904, of the four per cent funded loan of 1907, and of the three per cent loan of 1908-1918, and to issue in exchange therefor an equal amount of coupon or registered bonds of the United States, in such form as he may prescribe, in denominations of fifty dollars, or any multiple thereof, bearing interest at the rate of two per centum per annum, payable quarterly, such bonds to be payable at the pleasure of the United States after thirty years from the date of their issue. The principal and interest of said bonds to be payable in gold coin of the present standard value, and to be exempt from the payment of all taxes or duties of the United States, as well as from taxation in any form by or under state, municipal, or local authority. The bonds to be issued at not less than par and numbered consecutively in the order of their issue; and when payment is made the last numbers shall be issued first.

CONSOLS OF 1930—Continued. paid, and this order followed until all the bonds are paid. Interest to cease three months after any call made by the government to redeem. TREASURY NOTES OF 1890. The act of July 14, 1890 (26 Statutes, 289), directs the Secretary of the Treasury to purchase, from time to time, silver bullion to the aggregate amount of four million five hundred thousand ounces, or so much thereof as may be offered, in each month, at the market price thereof, not exceeding one dollar for three hundred and seventy-one and twenty-five hundredths grains of pure silver, and to issue in payment for such purchases of silver bullion Treasury notes of the United States, to be prepared by the Secretary of the Treasury. In such form and of such denominations, not less than one dollar nor more than one thousand dollars, as he may prescribe. That said notes shall be redeemable on demand, in coin, at the Treasury of the United States, or at the office of any assistant treasurer of the United States, and when so redeemed may be reissued; but no greater or less amount of such notes shall be outstanding at any time than the cost of the silver bullion and the standard silver dollars coined therefrom then held in the Treasury, purchased by such notes; and such Treasury notes shall be a legal tender in payment of all debts, public and private, except where otherwise expressly stipulated in the contract, and shall be receivable for customs, taxes, and all public dues, and when so received may be reissued; and such notes, when held by any national banking association, may be counted as a part of its lawful reserve. That upon demand of the holder of any of the Treasury notes provided for, the Secretary of the Treasury shall redeem the same in gold or silver coin, at his discretion, it being the established policy of the United States to maintain the two metals on a parity with each other upon the present legal ratio, or such ratio as may be provided by law. The act of November 1, 1893 (28 Stat., 4), repeals so much of the act of July 14, 1890, as directs the Secretary of the Treasury to purchase from time to time silver bullion to the aggregate amount of four million five hundred thousand ounces, or so much thereof as may be offered in each month, at the market price thereof, and to issue in payment for such purchases Treasury notes of the United States. The act of June 13, 1898 (30 Stat., 467), directs that all of the silver bullion in the Treasury purchased in accordance with the provisions of the act of July 14, 1890, shall be coined into standard silver dollars as rapidly as the public interests may require, to an amount of not less than one and one-half millions of dollars in each month, and that said dollars, when so coined, shall be used and applied in						\$1,659,000.00

the manner and for the purposes named in said act. The act of March 14, 1900, provides that United States notes, and Treasury notes issued under the act of July 14, 1890, when presented to the Treasury for redemption, shall be redeemed in gold coin of the standard fixed by said act, and requires that the Secretary of the Treasury shall set apart in the Treasury a reserve fund of one hundred and fifty million dollars to be used for such redemption purposes only. It also provides that it shall be the duty of the Secretary of the Treasury, as fast as silver dollars are coined under the provisions of the acts of July 14, 1890, and June 13, 1898, from bullion purchased under the act of July 14, 1890, to retire and cancel an equal amount of Treasury notes whenever received into the Treasury, and upon such cancellation to issue silver certificates against the silver dollars so coined.

PANAMA CANAL LOAN.

The act of June 28, 1902 (32 Stat. 484 sec. 8), provides that the Secretary of the Treasury is hereby authorized to borrow on the credit of the United States from time to time as the proceeds may be required to defray expenditures authorized by this act (such proceeds when received to be used only for the purpose of meeting such expenditures), the sum of one hundred and thirty million dollars, or so much thereof as may be necessary, and to prepare and issue therefor coupon or registered bonds of the United States in such form as he may prescribe, and in denominations of twenty dollars or some multiple of that sum, redeemable in gold coin at the pleasure of the United States after ten years from the date of their issue, and payable thirty years after ten years from the date of their issue, and bearing interest payable quarterly in gold coin at the rate of two per centum per annum; and the bonds herein authorized shall be exempt from all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority. *Provided*, That said bonds may be disposed of by the Secretary of the Treasury at not less than par, under such regulations as he may prescribe, giving to all citizens of the United States an equal opportunity to subscribe therefor, but no commissions shall be allowed or paid thereon; and a sum not exceeding one-tenth of one per centum of the amount of the bonds herein authorized is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to pay the expense of preparing, advertising, and issuing the same; and the act of December 21, 1905 (34 Stat. 5, sec. 1), provides that the two per cent bonds of the United States authorized by section eight of the act entitled "An act to provide for the construction of a canal connecting the waters of the Atlantic and Pacific Oceans," approved June twenty-eighth, nineteen hundred and two, shall have all the rights and privileges accorded by law to other two per cent bonds of the United States, and every national banking association having on deposit, as provided by law, such bonds issued under the provisions of said section eight of said act approved June twenty-eighth, nineteen hundred and two, to secure its circulating notes, shall pay to the Treasurer of the United States, in the months of January and July, a tax of one-fourth of one per cent each half year upon the average amount of such of its notes in circulation as are based upon the

<p>PANAMA CANAL LOAN—Continued.</p> <p>deposit of said two per cent bonds; and such taxes shall be in lieu of existing taxes on its notes in circulation imposed by section fifty-two hundred and fourteen of the Revised Statutes.</p> <p>The act of August 5, 1909 (36 Stat., 117, sec. 39), provides that the Secretary of the Treasury is hereby authorized to borrow on the credit of the United States from time to time, as the proceeds may be required to defray expenditures on account of the Panama Canal and to reimburse the Treasury for such expenditures already made and not covered by previous issues of bonds, the sum of two hundred and ninety million five hundred and sixty-nine thousand dollars (which sum together with the eighty-four million six hundred and thirty-one thousand nine hundred [and eighty] dollars already borrowed upon issues of two per cent bonds under section eight of the act of June twenty-eighth, nineteen hundred and two, equals the estimate of the Isthmian Canal Commission to cover the entire cost of the canal from its inception to its completion), and to prepare and issue therefor coupon or registered bonds of the United States in such form as he may prescribe, and in denominations of one hundred dollars, five hundred dollars, and one thousand dollars, payable fifty years from the date of issue, and bearing interest payable quarterly in gold coin at a rate not exceeding three per centum per annum; and the bonds herein authorized shall be exempt from all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority: <i>Provided</i>, That said bonds may be disposed of by the Secretary of the Treasury at not less than par, under such regulations as he may prescribe, giving to all citizens of the United States an equal opportunity to subscribe therefor, but no commissions shall be allowed or paid thereon; and the bonds herein authorized is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to pay the expenses of preparing, advertising, and issuing the same, and the authority contained in section eight of the act of June twenty-eighth, nineteen hundred and two, for the issue of bonds bearing interest at two per centum per annum, is hereby repealed.</p> <p>The act of March 2, 1911 (36 Stat., 1013), provides that the Secretary of the Treasury be, and he is hereby, authorized to insert in the bonds to be issued by him under section thirty-nine of an Act entitled "An Act to provide revenue, equalize duties, and encourage the industries of the United States, and for other purposes," approved August fifth, nineteen hundred and nine, a provision that such bonds shall not be receivable by the Treasurer of the United States as security</p>							

for the issue of circulating notes to national banks; and the bonds containing such provision shall not be receivable for that purpose.

POSTAL SAVINGS BONDS.

The act of June 25, 1910 (36 Stat., 817, sec. 10) provides that any depositor in a postal savings depository may surrender his deposit, or any part thereof, in sums of twenty dollars, forty dollars, sixty dollars, eighty dollars, one hundred dollars, and multiples of one hundred dollars and five hundred dollars, and receive in lieu of such surrendered deposits, under such regulations as may be established by the board of trustees, the amount of the surrendered deposits in United States coupon or registered bonds of the denominations of twenty dollars, forty dollars, sixty dollars, eighty dollars, one hundred dollars, and five hundred dollars, which bonds shall bear interest at the rate of two and one-half per centum per annum, payable semiannually, and be redeemable at the pleasure of the United States after one year from the date of their issue and payable twenty years from such date, and both principal and interest shall be payable in United States gold coin of the present standard of value: *Provided*, That the bonds herein authorized shall be issued only (first) when there are outstanding bonds of the United States subject to call, in which case the proceeds of the bonds shall be applied to the redemption at par of outstanding bonds of the United States subject to call; and (second) at times when under authority of law other than that contained in this act the Government desires to issue bonds for the purpose of replenishing the Treasury, in which case the issue of bonds under authority of this Act shall be in lieu of the issue of a like amount of bonds issuable under authority of law other than that contained in this Act: *Provided further*, That the bonds authorized by this Act shall be issued by the Secretary of the Treasury under such regulations as he may prescribe: *And provided further*, That the authority contained in section nine of this Act for the investment of postal savings funds in United States bonds shall include the authority to invest in the bonds herein authorized whenever such bonds may be lawfully issued: *And provided further*, That the bonds herein authorized shall be exempt from all taxes or duties of the United States as well as from taxation in any form by or under State, municipal, or local authority: *And provided further*, That no bonds authorized by this Act shall be receivable by the Treasurer of the United States as security for the issue of circulating notes by national banking associations.

CONVERSION BONDS

ONE-YEAR TREASURY NOTES

Sec. 18 of the act of Dec. 23, 1913 (38 Stat., 251), provides that upon application of any Federal reserve bank, approved by the Federal Reserve Board, the Secretary of the Treasury may issue, in exchange for United States two per centum gold bonds bearing the circulation privilege, but against which no circulation is outstanding, one-year gold notes of the United States without the circulation privilege, to an amount not to ex-

CONVERSION BONDS AND ONE-YEAR TREASURY NOTES— Continued.	Length of loan.	When redeem- able.	Rates of in- terest.	Price at which sold.	Amount authorized.	Amount issued.	Amount out- standing.
ceed one-half of the two per centum bonds so tendered for exchange, and thirty-year three per centum gold bonds without the circulation privilege for the remainder of the two per centum bonds so tendered; <i>Provided</i> , That at the time of such exchange the Federal reserve bank obtaining such one-year gold notes shall enter into an obligation with the Secretary of the Treasury binding itself to purchase from the United States for gold at the maturity of such one-year notes an amount equal to those delivered in exchange for such bonds, if so requested by the Secretary, and at each maturity of one-year notes so purchased by such Federal reserve bank, to purchase from the United States such an amount of one-year notes as the Secretary may tender to such bank, not to exceed the amount issued to such bank in the first instance, in exchange for the two per centum United States gold bonds; said obligation to purchase at maturity such notes shall continue in force for a period not to exceed thirty years.							
For the purpose of making the exchange herein provided for, the Secretary of the Treasury is authorized to issue at par Treasury notes in coupon or registered form as he may prescribe in denominations of one hundred dollars, or any multiple thereof, bearing interest at the rate of three per centum per annum, payable quarterly, such Treasury notes to be payable not more than one year from the date of their issue in gold coin of the present standard value, and to be exempt as to principal and interest from the payment of all taxes and duties of the United States except as provided by this act, as well as from taxes in any form by or under State, municipal, or local authorities. And for the same purpose, the Secretary is authorized and empowered to issue United States gold bonds at par, bearing three per centum interest, payable thirty years from the date of issue, such bonds to be of the same general tenor and effect and to be issued under the same general terms and conditions as the United States three per centum bonds without the circulation privilege now issued and outstanding.							
Upon application of any Federal reserve bank, approved by the Federal Reserve Board, the Secretary may issue at par such three per centum bonds in exchange for the one-year gold notes herein provided for.

SEC. 401. That section thirty-two of an act entitled "An act providing ways and means to meet war expenditures and for other purposes," approved June thirteenth, eighteen hundred and ninety-eight, as amended by section forty of an act entitled "An act to provide revenue, equalize duties and encourage the industries of the United States, and for other purposes," approved August fifth, nineteen hundred and nine, be, and the same is hereby, amended to read as follows:

"SEC. 32. That the Secretary of the Treasury is authorized to borrow, from time to time, at a rate of interest not exceeding three per centum per annum, such sum or sums as, in his judgment, may be necessary to meet public expenditures, and to issue therefor certificates of indebtedness in such form and in such denominations as he may prescribe; and each certificate so issued shall be payable, with the interest accrued thereon, at such time, not exceeding one year from the date of its issue, as the Secretary of the Treasury may prescribe: *Provided*, That the sum of such certificates outstanding shall at no time exceed \$300,000,000, and the provisions of existing law respecting counterfeiting and other fraudulent practices are hereby extended to the bonds and certificates of indebtedness authorized by this act." (Act of Mar. 3, 1917.)

SEC. 6. That in addition to the bonds authorized by sections one and four of this act, the Secretary of the Treasury is authorized to borrow from time to time, on the credit of the United States, for the purposes of this act and to meet public expenditures authorized by law, such sum or sums as, in his judgment, may be necessary, and to issue therefor certificates of indebtedness at not less than par in such form and subject to such terms and conditions and at such rate of interest not exceeding three and one-half per centum per annum, as he may prescribe; and each certificate so issued shall be payable, with the interest accrued thereon, at such time, not exceeding one year from the date of its issue, as the Secretary of the Treasury may prescribe. Certificates of indebtedness herein authorized shall not bear the circulation privilege, and the sum of such certificates outstanding shall at no time exceed in the aggregate \$2,000,000,000, and such certificates shall be exempt, both as to principal and interest, from all taxation, except estate or inheritance taxes, imposed by authority of the United States, or its possessions, or any State or local taxing authority. (Act of Apr. 24, 1917.)

SEC. 5. That in addition to the bonds authorized by section one of this act, the Secretary of the Treasury is authorized to borrow from time to time, on the credit of the United States, for the purposes of this act and to meet public expenditures authorized by law, such sum or sums as in his judgment may be necessary, and to issue therefor certificates of indebtedness of the United States at not less than par in such form or forms and subject to such terms and conditions and at such rate or rates of interest as he may prescribe; and each certificate so issued shall be payable at such time not exceeding one year from the date of its issue, and may be redeemable before maturity upon such terms and conditions, and the interest accruing thereon shall be payable at such time or times as the Secretary of the Treasury may prescribe. The sum of such certificates outstanding hereunder and under section six of said act approved April twenty-fourth, nineteen hundred and seventeen, shall not at any one time exceed in the aggregate \$4,000,000,000. (Act of Sept. 24, 1917.)							
SEC. 4. That the last sentence of section five of said act approved September twenty-fourth, nineteen hundred and seventeen, be, and is hereby, amended to read as follows: "The sum of such certificates outstanding hereunder and under section six of said act approved April twenty-fourth, nineteen hundred and seventeen, shall not at any one time exceed in the aggregate \$8,000,000,000." (Act of Apr. 4, 1918.)							
SEC. 3. That section 5 of the Second Liberty Bond Act, as amended by section 4 of the Third Liberty Bond Act, is hereby further amended by striking out the figures "\$8,000,000,000" and inserting in lieu thereof the figures "\$10,000,000,000." (Act of Mar. 3, 1919.)

That the Secretary of the Treasury, with the approval of the President, is hereby authorized to borrow, from time to time, on the credit of the United States for the purposes of this act, and to meet expenditures authorized for the national security and defense and other public purposes authorized by law not exceeding in the aggregate \$5,000,000,000, exclusive of the sums authorized by section four of this act, and to issue therefor bonds of the United States.

The bonds herein authorized shall be in such form and subject to such terms and conditions of issue, conversion, redemption, maturities, payment, and rate and time of payment of interest, not exceeding three and one-half per centum per annum, as the Secretary of the Treasury may prescribe. The principal and interest thereof shall be payable in United States gold coin of the present standard of value and shall be exempt, both as to principal and interest, from all taxation, except estate or inheritance taxes, imposed by authority of the United States, or its possessions, or by any State or local taxing authority; but such bonds shall not bear the circulation privilege.

The bonds herein authorized shall first be offered at not less than par as a popular loan, under such regulations prescribed by the Secretary of the Treasury as will give all citizens of the United States an equal opportunity to participate therein: and any portion of the bonds so offered and not subscribed for may be otherwise disposed of at not less than par by the Secretary of the Treasury: but no commissions shall be allowed or paid on any bonds issued under authority of this act.

Sec. 4. That the Secretary of the Treasury, in his discretion, is hereby authorized to issue the bonds not already issued heretofore authorized by section thirty-nine of the Act approved August fifth, nineteen hundred and nine, entitled "An Act to provide revenue, equalize duties, and encourage the industries of the United States, and for other purposes;" section one hundred and twenty-four of the Act approved June third, nineteen hundred and sixteen, entitled "An Act for making further and more effectual provision for the national defense, and for other purposes;" section thirteen of the Act of September seventh, nineteen hundred and sixteen, entitled "An Act to establish a United States shipping board for the purpose of encouraging, developing, and creating a naval auxiliary and a naval reserve and a merchant marine to meet the requirements of the commerce of the United States with its Territories and possessions and with foreign countries, to regulate carriers by water engaged in the foreign and interstate commerce of the United States, and for other purposes;" section four hundred of the Act approved March third, nineteen hundred and seventeen, entitled "An Act to provide increased revenue to defray the expenses of the increased appropriations for the Army and Navy, and the extensions of fortifications, and for other purposes"; and the public resolution approved March fourth, nineteen hundred and seventeen, entitled "Joint resolution to expedite the delivery of materials, equipment, and munitions and to secure more expeditious construction of ships," in the manner and under the terms and conditions prescribed in section one of this Act.

That the Secretary of the Treasury is hereby authorized to borrow on the credit of the United States from time to time, in addition to the sum authorized in section one of this Act, such additional amount, not exceeding \$3,945,400 as may be necessary to redeem the three per cent loan of nineteen hundred and eight to nineteen hundred and eighteen, maturing August first, nineteen hundred and eighteen, and to issue therefor bonds of the United States in the manner and under the terms and conditions prescribed in section one of this Act.

TABLE A.—*Statement of the outstanding principal of the public debt, etc.*—Continued.

	Length of loan.	When redeemable.	Rates of interest.	Price at which sold.	Amount authorized.	Amount issued.	Amount outstanding.
<p>SEC. 5. That any series of bonds issued under authority of sections one and four of this Act may, under such terms and conditions as the Secretary of the Treasury may prescribe, be convertible into bonds bearing a higher rate of interest than the rate at which the same were issued, if any subsequent series of bonds shall be issued at a higher rate of interest before the termination of the war between the United States and the Imperial German Government, the date of such termination to be fixed by a proclamation of the President of the United States. (Act of Apr. 24, 1917.)</p> <p>SEC. 11. That bonds shall not be issued under authority of sections one and four of said Act approved April twenty-fourth, nineteen hundred and seventeen, in addition to the \$2,000,000,000 thereof heretofore issued or offered for subscription, but bonds shall be issued from time to time upon the interchange of such bonds of different denominations and of coupon and registered bonds and upon the transfer of registered bonds, under such rules and regulations as the Secretary of the Treasury shall prescribe, and, if and to the extent that the privilege of conversion provided for in such bonds shall arise and shall be exercised, in accordance with such provision for such conversion. No bonds shall be issued under authority of the several sections of Acts and of the resolution mentioned in said section four of the Act approved April twenty-fourth, nineteen hundred and seventeen; but the proceeds of the bonds herein authorized may be used for purposes mentioned in said section four of the Act of April twenty-fourth, nineteen hundred and seventeen, and as set forth in the Acts therein enumerated. (Act of Sept. 24, 1917.)</p> <p>SEC. 5. That the privilege of converting 4 per centum bonds of the First Liberty Loan converted and 4 per centum bonds of the Second Liberty Loan into 4½ per centum bonds, which privilege arose on May 8, 1918, and expired on November 9, 1918, may be extended by the Secretary of the Treasury for such period, upon such terms and conditions and subject to such rules and regulations, as he may prescribe. For the purpose of computing the amount of interest payable, bonds presented for conversion under any such extension shall be deemed to be converted on the dates for the payment of the semiannual interest on the respective bonds so presented for conversion next succeeding the date of such presentation. (Act of Mar. 3, 1919.)</p> <p>[See also Act of Apr. 4, 1918, under Third Liberty Loan.] [See also Act of Sept. 24, 1918, under Fourth Liberty Loan.]</p>							

shall bear the circulation privilege. All such bonds and certificates shall be exempt, both as to principal and interest from all taxation now or hereafter imposed by the United States, any State, or any of the possessors of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess profits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations. The interest on an amount of such bonds and certificates the principal of which does not exceed in the aggregate \$5,000, owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in subdivision (b) of this section. (Act of Sept. 24, 1917.)

[See also Act of Apr. 4, 1918, under Third Liberty Loan.]

[See also Act of Sept. 24, 1918, under Fourth Liberty Loan.]

[See also Act of Mar. 3, 1919, sec. 11, under First Liberty Loan.]

THIRD LIBERTY LOAN.

That the first section of the act approved September twenty-fourth, nineteen hundred and seventeen, entitled "An act to authorize an additional issue of bonds to meet expenditures for the national security and defense, and for the purpose of assisting in the prosecution of the war, to extend additional credit to foreign governments, and for other purposes," be, and is hereby, amended to read as follows:

"That the Secretary of the Treasury, with the approval of the President, is hereby authorized to borrow, from time to time, on the credit of the United States for the purposes of this act, and to meet expenditures authorized for the national security and defense and other public purposes authorized by law, not exceeding in the aggregate \$12,000,000,000, and to issue therefor bonds of the United States, in addition to the \$2,000,000,000 bonds already issued or offered for subscription under authority of the act approved April twenty-fourth, nineteen hundred and seventeen, entitled 'An act to authorize an issue of bonds to meet expenditures for the national security and defense, and for the purpose of assisting in the prosecution of the war, to extend credit to foreign governments, and for other purposes':

Provided, That of this sum \$3,063,945,460 shall be in lieu of that amount of the unissued bonds authorized by sections one and four of the act approved April twenty-fourth, nineteen hundred and seventeen, \$225,000,000 shall be in lieu of that amount of the unissued bonds authorized by section thirty-nine of the act approved August fifth, nineteen hundred and nine, \$150,000,000 shall be in lieu of the unissued bonds authorized by the joint resolution approved March fourth, nineteen hundred and seventeen, and \$100,000,000 shall be in lieu of the unissued bonds authorized by section four hundred of the act approved March third, nineteen hundred and seventeen.

"The bonds herein authorized shall be in such form or forms and denomination or denominations and subject to such terms and conditions of issue, conversion, redemption, maturities, payment, and rate or rates of interest, not exceeding four and one-quarter per centum per

----------------------------	------------------	----------	---------------------	--------------------	--------------------

¹ Includes amount authorized by Act of Sept. 24, 1917.

"If bonds bearing interest at a higher rate than four per centum per annum shall be issued before July first, nineteen hundred and eighteen, then any bonds bearing interest at the rate of four per centum per annum which shall, after July first, nineteen hundred and eighteen, and before the expiration of the six months' conversion period prescribed by the Secretary of the Treasury, be presented for conversion into bonds bearing interest at such higher rate, shall, for the purpose of computing the amount of interest payable, be deemed to have been converted on the dates for the payment of the semiannual interest on the respective bonds so presented for conversion, last preceding the date of such presentation." (Act of Apr. 4, 1918.)

[See also Act of Sept. 24, 1918, under Fourth Liberty Loan.]

FOURTH LIBERTY LOAN.

That section one of the Second Liberty Bond Act, as amended by the Third Liberty Bond Act, is hereby further amended by striking out the figures "\$12,000,000,000" and inserting in lieu thereof the figures "\$20,000,000,000."

SEC. 3. That notwithstanding the provisions of the Second Liberty Bond Act, as amended by the Third Liberty Bond Act, or of the War Finance Corporation Act, bonds and certificates of indebtedness of the United States payable in any foreign money or foreign moneys, and bonds of the War Finance Corporation payable in any foreign money or foreign moneys exclusively or in the alternative, shall, if and to the extent expressed in such bonds at the time of their issue, with the approval of the Secretary of the Treasury, while beneficially owned by a nonresident alien individual, or by a foreign corporation, partnership, or association, not engaged in business in the United States, be exempt both as to principal and interest from any and all taxation now or hereafter imposed by the United States, or any of the possessions of the United States, or by any local taxing authority. (Act of July 9, 1918.)

That until the expiration of two years after the date of the termination of the war between the United States and the Imperial German Government, as fixed by proclamation of the President—

(1) The interest on an amount of bonds of the Fourth Liberty Loan the principal of which does not exceed \$30,000, owned by any individual, partnership, association, or corporation, shall be exempt from graduated additional income taxes, commonly known as surtaxes and excess profits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations;

(2) The interest received after January 1, 1918, on an amount of bonds of the First Liberty Loan Converted, dated either November 15, 1917, or May 9, 1918, the Second Liberty Loan, converted and unconverted, and the Third Liberty Loan, the principal of which does not exceed \$45,000 in the aggregate, owned by any individual, partnership, association, or corporation, shall be exempt from such taxes: *Provided, however*, That no owner of such bonds shall be

- "(b) The notes herein authorized may be issued in any one or more of the following series as the Secretary of the Treasury may prescribe in connection with the issue thereof:
- "(1) Exempt, both as to principal and interest, from all taxation (except estate or inheritance taxes) now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority;
- "(2) Exempt, both as to principal and interest, from all taxation of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes commonly known as surtaxes, and excess-profits and war-profits taxes, now or hereafter imposed by the United States upon the income or profits of individuals, partnerships, associations, or corporations;
- "(3) Exempt, both as to principal and interest, as provided in paragraph (2); and with an additional exemption from the taxes referred to in clause (b) of such paragraph, of the interest on an amount of such notes the principal of which does not exceed \$30,000, owned by any individual, partnership, association, or corporation; or
- "(4) Exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) all income, excess-profits, and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations.
- "(c) If the notes authorized under this section are offered in more than one series bearing the same date of issue, the holder of notes of any such series shall (under such rules and regulations as may be prescribed by the Secretary of the Treasury) have the option of having such notes held by him converted at par into notes of any other such series offered bearing the same date of issue.
- "(d) None of the notes authorized by this section shall bear the circulation privilege. The principal and interest thereof shall be payable in United States gold coin of the present standard of value. The word 'bond' or 'bonds' where it appears in sections 8, 9, 10, 14, and 15 of this act as amended, and sections 3702, 3703, 3704, and 3705 of the Revised Statutes, and section 3200 of the Revised Statutes as amended, but in such sections only, shall be deemed to include notes issued under this section."
- SEC. 2. (a) That until the expiration of five years after the date of the termination of the war between the United States and the German Government, as fixed by proclamation of the President, in addition to the exemptions provided in section 7 of the Second Liberty Bond Act in respect to the interest on an amount of bonds and certificates, authorized by such act and amendments thereto, the principal of which does not exceed in the aggregate \$5,000, and in addition to all other exemptions provided in the Second Liberty Bond Act or the Supplement to Second Liberty Bond Act, the interest received on and after January 1, 1919, on an amount of bonds of the First Liberty Loan converted, dated November 15, 1917, May 9, 1918, or October 24, 1918, the Second Liberty Loan

TABLE A.—Statement of the outstanding principal of the public debt, etc.—Continued.

<p>VICTORY LIBERTY LOAN—Continued.</p> <p>converted and unconverted, the Third Liberty Loan, and the Fourth Liberty Loan, the principal of which does not exceed \$30,000 in the aggregate, owned by any individual, partnership, association, or corporation, shall be exempt from graduated additional income taxes commonly known as surtaxes, and excess-profits and war-profits taxes: now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations.</p> <p>(b) In addition to the exemption provided in subdivision (a), and in addition to the other exemptions therein referred to, the interest received on and after January 1, 1919, on an amount of the bonds therein specified the principal of which does not exceed \$20,000 in the aggregate, owned by any individual, partnership, association, or corporation, shall be exempt from the taxes therein specified: <i>Provided</i>, That no owner of such bonds shall be entitled to such exemption in respect to the interest on an aggregate principal amount of such bonds exceeding three times the principal amount of notes of the Victory Liberty Loan originally subscribed for by such owner and still owned by him at the date of his tax return. * * *</p> <p>SEC. 4. That section 3 of the Fourth Liberty Bond Act is hereby amended to read as follows:</p> <p>"SEC. 3. That, notwithstanding the provisions of the Second Liberty Bond Act or of the War Finance Corporation Act or of any other act, bonds, notes, and certificates of indebtedness of the United States and bonds of the War Finance Corporation shall, while beneficially owned by a nonresident alien individual, or a foreign corporation, partnership, or association, not engaged in business in the United States, be exempt both as to principal and interest from any and all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States or by any local taxing authority." (Act of March 3, 1919.)</p> <p>WAR-SAVINGS CERTIFICATES.</p> <p>SEC. 6. That in addition to the bonds authorized by section 1 of this act and the certificates of indebtedness authorized by section 5 of this act, the Secretary of the Treasury is authorized to borrow from time to time, on the credit of the United States, for the purpose of this act and to meet public expenditures authorized by law, such sum or sums as in his judgment may be necessary, and to issue there-</p>						
		Av. 4 percent	\$1,400,000,000.00	\$1,164,257,473.23	\$827,419,021.36

for, at such price or prices and upon such terms and conditions as he may determine, war-savings certificates of the United States on which interest to maturity may be discounted in advance at such rate or rates and computed in such manner as he may prescribe. Such war-savings certificates shall be in such form or forms and subject to such terms and conditions, and may have such provisions for payment thereof before maturity, as the Secretary of the Treasury may prescribe. Each war-saving certificate so issued shall be payable at such time, not exceeding five years from the date of its issue, and may be redeemable before maturity, upon such terms and conditions as the Secretary of the Treasury may prescribe. The sum of such war-savings certificates outstanding shall not at any one time exceed in the aggregate \$2,000,000,000. The amount of war-savings certificates sold to any one person at any one time shall not exceed \$100, and it shall not be lawful for any one person at any one time to hold war-savings certificates to an aggregate amount exceeding \$1,000. The Secretary of the Treasury may, under such regulations and upon such terms and conditions as he may prescribe, issue or cause to be issued, stamps to evidence payments for or on account of such certificates. (Act of Sept. 24, 1917.)

SEC. 2. That section 6 of the Second Liberty Bond Act is hereby amended by striking out the figures "\$2,000,000,000," and inserting in lieu thereof the figures "\$4,000,000,000." Such section is further amended by striking out the words "The amount of war-savings certificates sold to any one person at any one time shall not exceed \$100, and it shall not be lawful for any one person at any one time to hold war-savings certificates to an aggregate amount exceeding \$1,000," and inserting in lieu thereof the words "It shall not be lawful for any one person at any one time to hold war-savings certificates of any one series to an aggregate amount exceeding \$1,000." (Act of Sept. 24, 1918.)

NATIONAL-BANK NOTES (REDEMPTION ACCOUNT).

The act of July 14, 1890 (26 Stat., 289), provides that balances standing with the Treasurer of the United States to the respective credits of national banks for deposits made to redeem the circulating notes of such banks, and all deposits thereafter received for like purpose, shall be covered into the Treasury as a miscellaneous receipt, and the Treasurer of the United States shall redeem from the general cash in the Treasury the circulating notes of said banks which may come into his possession subject to redemption, * * * and the balance remaining of the deposits so covered shall, at the close of each month, be reported on the monthly public-debt statement as debt of the United States bearing no interest.

Total bonds, certificates, and notes outstanding¹

¹ Including \$796,921,214 gold and silver certificates and Treasury notes of 1890 in the Treasury on June 30, 1920.

NOTE.—Issues of Soldiers' and Sailors' Civil Relief Bonds not included in the above: Total issue to June 30, 1920, was \$195,400, of which \$600 had been retired.

1920						

¹ Including legal-tender notes, gold and silver certificates, etc.

² Consisting of the balance in the general fund, the gold reserve and coin and bullion set apart for redemption of certificates and Treasury notes.

³ Up to and including 1915, disbursing officers' credits subject to check were shown as a liability against cash in the Treasury, thereby reducing the balance in the general fund;

since that year such credits have not been so carried because they are merely book credits or authorizations to draw on the Treasurer.

⁴ Without deducting matured interest obligations, etc.

1 Continued at 2 per cent.
 2 Postal savings bonds, 2½ per cent.
 3 Certificates of indebtedness, 3½ per cent.
 4 Third Liberty Loan, 4½ per cent.
 5 Certificates of indebtedness and postal savings bonds, at 2½ per cent.
 6 Liberty bonds at 4½ per cent.
 7 Victory Liberty Loan, at 3½ and 4½ per cent.
 8 Certificates of indebtedness, special issue.
 9 Certificates of indebtedness, at 4½ per cent.
 10 Certificates of indebtedness, at 4½ per cent.

NOTE 1.—Annual interest charge is computed on amount of outstanding principal at close of fiscal year and is exclusive of interest charge on Pacific Railway bonds.
 NOTE 2.—The figures for July 1, 1893, were made up assuming pending funding operations to have been completed.
 NOTE 3.—The temporary loan per act of July 11, 1862, is included in the 4 per cent from 1862 to 1865, inclusive, with the exception of the amount outstanding Aug. 31, 1865, this being the date at which the public debt reached its highest point during the Civil War period. This loan bore interest from 4 per cent to 6 per cent, and was redeemable on 10 days' notice after 30 days, but being constantly changing it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent interest on an average for the year.

TABLE D.—Statement of the issue and redemption of loans and Treasury notes and of deposits and redemptions in bank-note account for the fiscal year 1920.

	Issues and deposits.	Redemptions.	Excess of issues and deposits.	Excess of redemptions.
Legal-tender notes, acts of Feb. 25 and July 11, 1862, Jan. 7 and Mar. 3, 1863, and Mar. 14, 1900...	\$319,836,000.00	\$319,836,000.00
Fractional currency, acts of July 17, 1862, Mar. 3, 1863, and June 30, 1864.....		1,247.78	\$1,247.78
Compound interest notes, acts of Mar. 3, 1863, and June 30, 1864.....		130.00	130.00
Gold certificates, acts of Mar. 3, 1863, July 12, 1882, and Mar. 14, 1900.....	12,210,000.00	186,810,100.00	174,600,100.00
One-year notes of 1863, act of Mar. 3, 1863.....		20.00	20.00
Seven-thirties of 1864 and 1865, act of June 30, 1864.....		500.00	500.00
Consols of 1867, act of Mar. 3, 1865.....			
Funded loan of 1891, acts of July 14, 1870, Jan. 21, 1871, and Jan. 14, 1875.....

¹ Excess of disbursements.

² Up to and including the month of September, 1915, disbursing officers' credits subject to check were shown as a liability against cash in the Treasury thereby reducing the balance in the general fund; since that month such credits have not been so carried because they are merely book credits or authorizations to draw on the Treasurer.

TABLE F.—*Statement showing the ordinary receipts and disbursements of the Government by months, etc.*—Continued.
 ["Disbursements," as used in this table, in addition to actual expenditures, include unexpended balances to the credit of disbursing officers.]

Month.		Ordinary receipts, exclusive of postal.	Ordinary disbursements, exclusive of postal, principal of debt, and premium.	Surplus receipts.	Net gold in Treasury.	Balance in general fund, including net gold.	Imports of gold.	Exports of gold.

¹ Excess of disbursements.

² Up to and including the month of September, 1915, disbursing officers' credits subject to check were shown as a liability against cash in the Treasury, thereby reducing the balance in the general fund; since that month such credits have not been so carried because they are merely book credits or authorizations to draw on the Treasurer.

³ Excess of repayments.

⁴ Includes Panama Canal in 1920.

Note.—The receipts and disbursements, by months, were made up from the partial reports prior to July 1, 1908; and being subject to change by subsequent concentration of accounts, did not agree with the totals by years. The latter are the actual results, as shown by complete returns.

TABLE G.—Statement of the balance in the general fund of the Treasury, including the gold reserve, by calendar years from 1791 to 1842, and by fiscal years from 1843 to 1920.¹

Date.	Balance in general fund, including gold reserve since 1875.	Date.	Balance in general fund, including gold reserve since 1875.

¹ This statement is made from warrants paid by the Treasurer of the United States to Dec. 31, 1821, and by warrants issued after that date, and is exclusive of disbursing officers' credits and outstanding warrants and checks.

² The unavailable funds are not included from and after this date.

³ The amount deposited with the States under act of June 23, 1836, having been taken out of the control of the Treasury Department by the act of Oct. 2, 1837, is not included from and after this date.

⁴ Up to and including 1915, disbursing officers' credits subject to check were shown as a liability against cash in the Treasury, thereby reducing the balance in the general fund; since that year such credits have not been so carried because they are merely book credits or authorizations to draw on the Treasurer.

TABLE II.—Receipts and disbursements of the United States.
[“Disbursements,” as used in this table, in addition to actual expenditures, include unexpended balances to the credit of disbursing officers.]
RECAPITULATION OF RECEIPTS BY FISCAL YEARS.

Year.	Ordinary receipts.					Excess of ordinary receipts (+) or of ordinary disbursements (—), including postal deficiencies.

¹ Includes deposits of \$17,641,634, for principal of bonds, only \$2,035,700 of which were actually issued in 1911; the balance was issued in the fiscal year 1912.
² Receipts from tolls, etc. (included in miscellaneous receipts in 1915).
³ Only the annual excess of deposits over redemptions included in this column.
⁴ National-bank redemption fund herein includes only the annual excess of deposits on account of national-bank redemption fund since 1890.

NOTE.—Issues and redemptions of certificates and notes not affecting the cash in general fund are excluded from the public debt figures in this statement.

["Disbursements," as used in this table, in addition to actual expenditures, include unexpended balances to the credit of disbursing officers.]

1920.....										

¹ Only the annual excess of redemptions over deposits included in this column.

² National-bank redemption fund herein includes only the annual excess of redemptions on account of national-bank redemption fund since 1890.

Note.—The disbursements are stated by warrants paid to June 30, 1896, and by warrants issued since that date.

The disbursements for postal deficiencies are grants by law from the Treasury, and differ from the fiscal year expenditures thereof shown by reports of the Auditor for the Post Office Department.

¹ Based on warrants issued during the year.

² The cost of collecting the internal revenue embraces the following items: Salaries and expenses of the Internal Revenue Service, including collectors, deputy collectors, clerks, etc., and including expenses incident to enforcing the provisions of law taxing oleomargarine; salaries and expenses of revenue agents, surveyors of distilleries, gaugers, storekeepers, and miscellaneous expenses; paper for internal-revenue stamps; expenses of detecting and punishing violations of internal-revenue laws; and expenses of collecting the corporation and income tax.

³ The expenses of collecting the revenue from customs includes all sums drawn from the appropriation made by Congress for that purpose. (See details, Table N.) The money is expended for salaries, rents, labor in weighing, gauging, and measuring imported merchandise, revenue boatmen, repairs, and other expenses incident to rented buildings, stationery, and the traveling expenses of special agents, but does not include disbursements for revenue cutters, fuel, lights, water, furniture, janitors, etc., for buildings owned by the Government, nor disbursements for erecting new buildings, all of which are paid for from specific appropriations made for those purposes.

The expenses of collecting internal and customs revenue do not include disbursements for salaries, etc., incident to auditing accounts in the office of Auditor for Treasury Department.

⁴ No data.

⁵ Includes \$20,951,780.97 corporation tax.

⁶ Includes \$33,516,976.59 corporation tax.

⁷ Includes \$28,583,303.73 corporation tax.

⁸ Includes \$35,006,299.84 corporation tax.

NOTE 1.—Revised figures for June 30 of each year used in above table.

NOTE 2.—Specie payments were suspended from January 1, 1862, to January 1, 1879, during the greater part of which period gold and silver coins were not in circulation except on the Pacific coast, where, it is estimated, the specie circulation was generally about \$25,000,000. In 1876 subsidiary silver again came into use. The coinage of standard silver dollars was resumed in 1878 and again discontinued during the fiscal year 1905. First issue of Federal reserve notes in fiscal year 1915.

NOTE 3.—For redemption of outstanding certificates an exact equivalent in gold coin or bullion or standard silver dollars is held in the Treasury, and is not included in the account of money held as assets of the Treasury. During the fiscal year 1915 there is included with the Treasury assets the amount of money held by Federal reserve banks and Federal reserve agents against issues of Federal reserve notes.

NOTE 4.—In 1907 the Director of the Mint reduced his estimate of the stock of gold coin in the United States by \$135,000,000, and in 1910 reduced his estimate of the stock of subsidiary silver coin in the United States by \$9,700,000.

NOTE 5.—Revised figures used for population for 1919 and 1910.

¹ Collections, expenses, etc., are reported in this statement for the districts as they were constituted on June 30, 1920.

² Exact expenses for May and June while a separate district.

³ Estimated expenses for 10 months while a part of North and South Dakota district. Total expenses while consolidated were \$126,273.02.

⁴ Includes \$1,504.02 income tax on Alaska railroads.

TABLE L.—*Collections, expenses, and average number of persons employed in the Internal Revenue Service, fiscal year ended June 30, 1920—Continued.*

Collection district.	Collections.	Expenses.	Average number of persons employed.
Wisconsin.....	\$93,512,768.99	\$385,583.29	190
Wyoming.....	4,225,268.94	44,236.07	30
Philippine Islands.....	¹ 1,423,478.69		
Total.....	5,407,580,251.81	13,327,564.26	7,695
Expenses not included in above.....		² 16,319,875.45	
Grand total.....	\$5,407,580,251.81	⁴ 29,647,439.71	

¹ In addition, \$1,804.98 was reported by various collectors from sale of stamps affixed to products from the Philippine Islands.

² These expenses include salaries and expenses of internal-revenue agents and inspectors, salaries of the officers, clerks, and employees in the office of the Commissioner of Internal Revenue, expenses incident to enforcing the national prohibition act, amounts expended in detecting and punishing violations of internal-revenue laws, and certain miscellaneous expenses which can not be apportioned among the several collection districts.

³ These figures differ from those carried in other Treasury statements showing the financial condition of the Government, because the former represent collections by internal-revenue officers throughout the country, including deposits by postmasters of amounts received from sale of internal-revenue documentary stamps, while the latter represent the deposits of these collections in the Treasury or depositories during the fiscal year concerned, the differences being due to the fact that some of the collections in the latter part of the fiscal year can not be deposited, or are not reported to the Treasury as deposited, until after June 30, thus carrying them into the following fiscal year as recorded in the statements showing the condition of the Treasury (Department Circular No. 176, par. 19).

⁴ Based on amounts actually paid and not on warrants issued.

SUMMARY.

Duties and tonnage covered into the Treasury by warrants during the fiscal year 1920..... \$323,536,559.25
 (The above amount represents the official "customs receipts" for 1920.)
 Aggregate receipts from all sources, as reported by collectors during the fiscal year 1920..... 328,633,392.26
 (The above amount includes all collections made for the Departments of Commerce and Labor, estimated duties, duties and fines on mail importations, increased and additional duties, fines, penalties, and forfeitures, and sundry miscellaneous receipts.)

Expenses reported by collectors as above..... 10,809,487.76
 Deduct \$240, increase in compensation paid during the fiscal year 1920 (not paid from customs appropriation)..... 1,439,017.08

Total expenses reported by collectors paid from customs appropriation..... 9,370,470.68
 Add salaries and expenses of the Board of United States General Appraisers..... 171,119.06
 Add payments for detection and prevention of frauds, fiscal year 1920..... 188,588.31
 Add salaries and expenses of the special agents' force, fiscal year 1920..... 139,075.74
 Add payments for transportation, traveling, and miscellaneous expenses, fiscal year 1920..... 24,260.58
 Add \$86,700 transferred from customs appropriation for stationery for the customs service, fiscal year 1920..... 66,700.00
 Add salaries and expenses of division of customs statistics, New York..... 143,886.70

Deduct reimbursements from other departments for services rendered those departments..... 10,104,101.07
 5,293.08

Total expenses of the customs service, including enforcement of navigation laws and compilation of statistics..... 10,098,807.99

Cost to collect \$1 (based on aggregate receipts and aggregate expenses, including increased compensations)..... \$0.0307
 Total number of employees, including special agents' and customs agents' forces and Board of General Appraisers..... 6,578

RECEIPTS AND DISBURSEMENTS ON ACCOUNT OF THE POST OFFICE DEPARTMENT.

The Postmaster General has exclusive control of the receipts and disbursements of the Post Office Department. During the fiscal year 1920 the postal receipts deposited in the Treasury and credited to the Post Office Department were \$240,824,746.13; other receipts to the amount of \$351,870,520.65 were received and disbursed directly by postmasters without being deposited in the Treasury. Such disbursements are authorized by existing law and are accounted for under the provisions of section 406 of the Revised Statutes of the United States. All Post Office Department warrants are issued by the Postmaster General on the Treasurer of the United States, and under department regulations they are also payable by any assistant treasurer, Federal reserve bank, or regular national-bank depository of the United States.

A statement of the transactions relating to the account for the service of the Post Office Department with the Treasury during the fiscal year 1920 may be studied on page 904 of this report.

TRANSACTIONS IN THE PUBLIC DEBT.

The transactions affecting the principal of the public debt during the fiscal years 1919 and 1920 are compared in the statement following:

Excess of disbursements.....	1,184,098,321.46

¹ Counter entry.

APPROPRIATION OF THE NET EARNINGS DERIVED BY THE UNITED STATES FROM FEDERAL RESERVE BANKS.

Section 7 of the Federal reserve act provides—

That the net earnings derived by the United States from Federal reserve banks shall, in the discretion of the Secretary, be used to supplement the gold reserve held against outstanding United States notes, or shall be applied to the reduction of the outstanding indebtedness of the United States under regulations to be prescribed by the Secretary of the Treasury. * * *

The net earnings derived by the United States from Federal reserve banks for the fiscal year 1920 amounted to \$2,703,850.74, and were applied by the Secretary of the Treasury to the purchase of \$2,922,450 of the second Liberty loan converted 4½ per cent bonds, under the foregoing provisions.

**PAYMENT OF OBLIGATIONS OF FOREIGN GOVERNMENTS PURCHASED
ON BEHALF OF THE UNITED STATES.**

Section 3 of the act approved April 24, 1917, provides in part—

That the Secretary of the Treasury, under such terms and conditions as he may prescribe, is hereby authorized to receive on or before maturity payment for any obligations of such foreign Governments purchased on behalf of the United States, and to sell at not less than the purchase price any of such obligations and to apply the proceeds thereof, and any payments made by foreign Governments on account of their obligations to the redemption or purchase at not more than par and accrued interest of any bonds of the United States issued under authority of this act; and if such bonds are not available for this purpose the Secretary of the Treasury shall redeem or purchase any other outstanding interest-bearing obligations of the United States which may at such time be subject to call or which may be purchased at not more than par and accrued interest.

During the fiscal year 1920 special purchases of interest-bearing obligations of the United States were made under the foregoing provisions as follows:

Title of loan.	Principal.	Interest.	Total.
Third Liberty loan.....	\$70,154,950.00	\$837,780.76	\$70,992,730.76
Fourth Liberty loan.....	2,514,950.00	51,690.47	2,566,640.47
Total.....	72,669,900.00	889,471.23	73,559,371.23

UNITED STATES PAPER CURRENCY ISSUED AND REDEEMED.

' During the fiscal year 1920 the paper currency issued under the direct authority of the Government amounted to \$398,018,000, an increase of \$47,880,000 as compared with that of 1919. The redemptions were \$652,415,700, a decrease of \$137,319,300 for like period. The net excess of redemptions over issues was \$254,397,700.

The amount of each kind of paper currency issued and redeemed during the fiscal year 1920 is stated in the table following:

	United States notes.	Trust-fund obligations.			Total.
		Treasury notes of 1890.	Gold certificates.	Silver certificates.	
Outstanding June 30, 1919.....	\$346,681,016	\$1,754,000	\$1,550,259,669	\$203,943,000	\$2,102,637,685
Issued during fiscal year 1920....	319,836,000	12,210,000	65,972,000	398,018,000
Redeemed during fiscal year 1920.	666,517,016	1,754,000	1,562,469,669	269,915,000	2,500,655,685
	319,836,000	95,000	186,810,100	145,674,600	652,415,700
Outstanding June 30, 1920...	346,681,016	1,659,000	1,375,659,569	124,240,400	1,848,239,985
Less amount held in Treasury...	9,567,164	2,773	790,935,924	5,982,517	806,488,378
Net amount in circulation.	337,113,852	1,656,227	584,723,645	118,257,883	1,041,751,607

In a study of the foregoing table it will be observed that the United States notes issued and credited in the general account as a receipt are offset by an equal amount of worn or unfit notes in kind withdrawn therefrom, canceled, and retired, which is in accordance with the provisions of the act of May 31, 1878. In explanation of the manner of issuing and redeeming gold certificates, silver certificates,

and Treasury notes of 1890, it may be said that for certificates issued and credited in the general account an equal amount of the respective kinds of money held in the general account is transferred therefrom to, and retained in, the trust funds for their redemption; for gold certificates, silver certificates, and Treasury notes withdrawn from the general fund, canceled, and retired, a like amount of the respective coins is released from the trust funds and brought into the general fund in their stead.

THE PUBLIC DEBT, 1919 AND 1920.

At the close of the fiscal year 1920 the principal of the interest-bearing debt was \$24,061,095,361.36, a decrease of \$1,173,400,912.18 as compared with that of the preceding year.

The debt bearing no interest and that on which interest has ceased since maturity amounted to \$236,823,050.17, a decrease of \$10,715,-094.78.

The public debt, by items, for the fiscal years 1919 and 1920 is compared in the statement following:

Title of loan.	Rate.	When payable.	Outstanding June 30, 1919.	Outstanding June 30, 1920.
Interest-bearing debt:	<i>Per ct.</i>			
Consols of 1930.....	2	After Apr. 1, 1930.....	\$599,724,050.00	\$599,724,050.00

¹ Various.

PAYMENT OF INTEREST ON THE REGISTERED BONDS AND NOTES OF THE UNITED STATES.

The interest on registered bonds and notes of the United States is paid by checks prepared and mailed from the office of the Secretary of the Treasury. Such checks indicate the title of the loan for which they are drawn and the rate of interest it bears per annum; the name of the Secretary of the Treasury is printed on the checks, and they are

countersigned by a clerk in his office. These checks are drawn on the Treasurer of the United States, but may be cashed by any assistant treasurer, Federal reserve bank, or regular national bank depository of the United States, and the amount so disbursed is included in the requisition for reimbursement made by the Treasurer at the end of each month. The paid checks are sent to the Auditor for the Treasury Department. There were 5,722,880 checks drawn during the fiscal year 1920, amounting to \$139,173,879.90.

THE RESERVE FUND.

During the fiscal year 1920 the redemptions from the reserve fund were, in United States notes, \$3,585,390. The redeemed notes were, under the provisions of the act of March 14, 1900, immediately exchanged for gold, and thereby the reserve was maintained in volume and character.

STATEMENT OF THE TREASURY OF THE UNITED STATES.

The Treasury holdings of moneys at the close of the fiscal year 1920 amounted to \$3,569,760,793.30, and from the revised figures of the several funds it was set apart as follows:

RESERVE FUND.

Gold coin and bullion.....	\$152,979,025.63
----------------------------	------------------

TRUST FUNDS.

[Held for redemption of the notes and certificates for which they are respectively pledged.]

Gold coin and bullion.....	\$584,723,645	Gold certificates outstanding.....	\$1,375,659,569
Silver dollars.....	118,257,883	Less amount in the Treasury.....	790,935,924
Silver dollars of 1890.....	1,656,227		
		Net.....	584,723,645
		Silver certificates outstanding.....	124,240,400
		Less amount in the Treasury.....	5,982,517
		Net.....	118,257,883
		Treasury notes (1890) outstanding..	1,659,000
		Less amount in the Treasury.....	2,773
		Net.....	1,656,227
Total.....	704,637,755	Total.....	704,637,755

GOLD SETTLEMENT FUND, FEDERAL RESERVE BOARD.

Gold coin and bullion.....	\$1,184,275,551.87
----------------------------	--------------------

GENERAL FUND.

The items composing the general fund are subdivided; the first part shows the amount of each kind of available cash actually held in the vaults of Treasury offices, after setting out from the assets the appropriate kinds of money to meet the requirements of the reserve fund, trust funds, and gold settlement fund, followed by the amounts of public moneys in Federal reserve banks, national banks, and other depositories to the credit of the Treasurer of the United States and of disbursing officers; the second part shows the current demands against the same, and finally the net balance in the general fund.

The assets in the general fund of the Treasury on June 30, 1920, and the demand liabilities outstanding on that date were as follows:

In Treasury offices:		
Gold coin.....	\$249,981,700.36	
Standard silver dollars.....	14,935,674.00	
United States notes.....	9,567,164.00	
Federal reserve notes.....	27,622,296.00	
Federal reserve bank notes.....	353,402.00	
National-bank notes.....	1,629,665.80	
Certified checks on banks.....	475,834.81	
Subsidiary silver coin.....	6,605,093.65	
Minor coin.....	1,076,790.26	
Silver bullion (at cost).....	19,516,565.10	
Unclassified (unsorted currency, etc.).....	5,833,638.84	
Public debt obligations paid, awaiting reimbursement.....	1,242,633.03	
		\$338,840,458.85
In Federal land banks:		5,950,000.00
Federal reserve banks.....	30,433,519.22	
In transit.....	8,545,005.29	
		39,028,524.51
In special depositories:		
Account of sales of certificates of indebtedness.....		273,428,577.33
In national-bank depositories:		
To credit of Treasurer of the United States.....	11,863,207.11	
To credit of other Government officers.....	15,133,161.88	
In transit.....	11,598,446.06	
		38,599,815.05
In foreign depositories:		
To credit of Treasurer of the United States.....		8,301,507.40
In treasury of Philippine Islands:		
To credit of Treasurer of the United States.....	¹ 1,986,669.06	
To credit of other Government officers.....	2,785,579.60	
		798,910.54
		704,947,793.68
Deduct current liabilities:		
Federal reserve note 5 per cent fund.....	\$239,669,857.39	
Less notes in process of redemption.....	2,474,283.00	
		237,195,574.39
Federal reserve bank note 5 per cent fund.....	11,642,140.00	
Less notes in process of redemption.....	2,192,381.00	
		9,449,759.00
National-bank note 5 per cent fund.....	21,332,789.12	
Less notes in process of redemption.....	21,332,789.12	
Treasurer's checks outstanding.....	466,273.36	
Post Office Department balances.....	35,838,627.79	
Board of trustees, Postal Savings System balance.....	7,791,054.64	
Balance to credit of postmasters, etc.....	33,974,101.19	
Undistributed assets of insolvent national banks.....	1,168,284.92	
Retirement of additional circulating notes (act of May 30, 1908).....	138,860.00	
Miscellaneous redemption accounts.....	18,978,235.06	
		345,000,773.35
Balance in Treasury.....		359,947,020.33

¹ Credit balance.

During the fiscal year 1920 the pay warrants drawn were \$621,429,123.91 in excess of the receipts. This excess is verified by the net results in the accounts of receipts and pay warrants drawn stated on previous pages of this report, which are brought together here:

Excess of public debt disbursements over receipts for 1920 (see p. 12).....	\$1,184,098,321.46
Deduct: Excess of ordinary receipts over disbursements for 1920 (see p. 858).....	562,669,197.55
Net excess of pay warrants drawn.....	621,429,123.91

The balance in the general fund on June 30, 1920 (on a cash receipt and cash payment basis), was \$359,947,020.33. The amount of pay warrants drawn during the fiscal year exceeded the receipts by \$621,429,123.91. The warrants outstanding at the close of the fiscal year on June 30, 1920, however, were \$9,556,884.62 in excess of those outstanding on June 30, 1919, leaving a net excess of warrant payments over receipts in the fiscal year 1920 of \$611,872,239.29. The book credits of disbursing officers and agencies with the Treasurer at the close of the fiscal year 1920 were \$254,345,675.64 less than at

the close of the previous fiscal year. The net decrease in the general fund balance of \$1,226,164,935.26 at the close of the fiscal year 1919 was, therefore, \$866,217,914.93 (on a cash receipt and cash payment basis).

The balance in the Treasury at the end of each month from January, 1914, is stated in Table No. 17, page 926, and for July 1 in each year since 1910 in the statement following:

Available cash balance (including the reserve fund) on the dates named.

Date.	Available cash balance.		
	Reserve fund.	General fund.	Total.
July 1, 1910.....	\$150,000,000.00	\$106,894,675.67	\$256,894,675.67
1911.....	150,000,000.00	140,176,926.13	290,176,926.13
1912.....	150,000,000.00	167,152,478.99	317,152,478.99
1913.....	150,000,000.00	165,960,984.79	315,960,984.79
1914.....	150,000,000.00	161,612,615.53	311,612,615.53
1915.....	152,977,036.63	104,170,105.78	257,147,142.41
1916.....	152,979,025.63	178,491,415.58	331,470,441.21
1917.....	152,979,025.63	967,247,123.48	1,120,226,149.11
1918.....	152,979,025.63	1,684,929,580.21	1,837,908,605.84
1919.....	152,979,025.63	1,226,164,935.26	1,379,143,960.89
1920.....	152,979,025.63	359,947,020.33	512,926,045.96

¹ Including credits to disbursing officers.

GOLD IN THE TREASURY.

The gold in the Treasury at the beginning of the fiscal year 1920 amounted to \$2,516,441,004.60. There was a noticeable monthly decrease until May 1, 1920, when the Treasury holding of the precious metal had been reduced to \$2,121,747,409.92. Thereafter the accumulation of gold in the Treasury was gradual to the close of the year, when it amounted to \$2,171,959,922.86 on June 30, 1920.

The imports of gold during the fiscal year 1920 were \$150,540,200, the exports \$466,592,606, and the excess of exports \$316,052,406.

The total amount of gold in the Treasury on July 1 in each year from 1910, set apart for the respective uses, is shown in the statement annexed:

Gold in the Treasury.

Date.	Reserve.	For certificates in circulation.	Gold settlement fund, Federal Reserve Board.	General fund.	Total.
July 1, 1910...	\$150,000,000.00	\$802,754,199.00	\$92,411,286.24	\$1,045,165,485.24
1911...	150,000,000.00	930,367,929.00	83,533,254.56	1,163,901,183.56

1920...	152,979,025.63	584,723,645.00	1,184,275,551.87	249,981,700.36	2,171,959,922.86

BONDS HELD AS SECURITY FOR NATIONAL BANKS.

The United States obligations in the custody of the Treasurer pledged to secure national-bank circulation amounted to \$707,963,400, and for circulation issued by Federal reserve banks \$276,525,200, making a total of \$984,488,600. The securities pledged for the safe-keeping of public deposits in national banks were \$37,637,500, while those held for postal-savings depositaries amounted to \$199,263,584.12.

The kinds of securities in the custody of the Treasurer and the changes therein during the fiscal year 1920 are recorded in the statements following:

Securities held for national banks, close of June, 1919 and 1920, and changes during 1920.

Kind of securities.	Rate.	Held June 30, 1919.	Transactions during 1920.		Held June 30, 1920.

¹ Various.

The board of trustees of the Postal Savings System accepts as security for postal savings deposits, at the respective values herein fixed, negotiable interest-bearing bonds or securities of the following classes, viz:

(a) Bonds and interest-bearing certificates of indebtedness of the United States, bonds of the Philippine Islands, of the District of Columbia, and of Porto Rico, and Farm-Loan bonds authorized by act of Congress approved July 17, 1916 (39 Stat., 360), will be accepted at their par value.

(b) Bonds of any State of the United States and of the Territory of Hawaii will be accepted at their market value, but if such market value is above par they will be accepted at their par value.

(c) Bonds of any city in the United States having a population of over 30,000, as shown by the latest annual report of the Bureau of Census, entitled "Official Statistics of Cities having a Population of over Thirty Thousand," which has been in existence for a period of 10 years, which for a period of 10 years previously has not defaulted in the payment of any part of either principal or interest of any funded debt authorized to be contracted by it, and whose *net funded indebtedness* does not exceed 10 per cent of the valuation of its taxable property, to be ascertained by the last preceding valuation for the assessment of taxes, will be accepted at 90 per cent of their market value, but if such market value is above par, they will be accepted at 90 per cent of their par value.

(d) Bonds of any other city, town, county, or other legally constituted municipality or district in the United States, which has been in existence for a period of 10 years, which for a period of 10 years previously has not defaulted in the payment of any part of either principal or interest of any funded debt authorized to be contracted by it, and whose *net funded indebtedness* does not exceed 10 per cent of the valuation of its taxable property, to be ascertained by the last preceding valuation for the assessment of taxes, will be accepted at 75 per cent of their market value, but if such market value is above par they will be accepted at 75 per cent of their par value.

Bonds of the several classes described in paragraphs (b), (c), and (d), to be acceptable as security, shall be the general obligations of the States, Territories, counties, cities, towns, or other political divisions by or in behalf of which they are issued, and payable, either directly or ultimately, without limitation to a special fund, from the proceeds of taxes levied upon all the taxable real and personal property within the territorial limits of such political divisions.

The term "*net funded indebtedness*," for the purposes of paragraphs (c) and (d), is hereby defined to be the difference between the legal gross indebtedness of a city, town, county, or other municipality (including the amount of any school district or other bonds which depend for their redemption upon taxes levied upon property within the municipality) and the aggregate of the following items:

(1) The total of all sinking funds accumulated for the redemption of such gross indebtedness, except sinking funds applicable to bonds hereafter described in this section.

(2) The amount of outstanding bonds or other debt obligations made payable from current revenues.

(3) The amount of outstanding bonds issued for the purpose of providing the inhabitants of a municipality with public utilities, including the supplying of water or the construction of subways and tunnels for railways: *Provided*, That evidence is submitted showing that the income from such utilities is sufficient for maintenance, for

payment of interest on such bonds, and for the accumulation of a sinking fund for their redemption.

(4) The amount of outstanding improvement bonds, issued under laws which provide for the levying of special assessments against abutting property in sufficient amounts to insure the payment of interest on the bonds and the redemption thereof: *Provided*, That such bonds are direct obligations of the municipality and included in the gross indebtedness of the municipality.

(5) The amount of outstanding bonds issued by a political subdivision, funds for the payment of which are donated by the State: *Provided*, That evidence is submitted showing that such funds are sufficient in amount to insure the payment of interest on the bonds and the principal thereof at maturity.

Obligations of the general class embracing what are commonly known as "revenue bonds," "temporary bonds," "temporary notes," "certificates of indebtedness," "warrants," and the like obligations, whether issued in anticipation of the collection of taxes, assessments, or other revenues, or of the sale of bonds or other obligations, or for similar purposes, will not be accepted as security for postal savings deposits: *Provided*, That, in applying this regulation, consideration will be given to the legal status of the obligations submitted rather than to the nomenclature employed in designating such obligations: *And provided further*, That this regulation shall not apply to obligations of the United States Government.

Bonds which in all other respects are found to be legally acceptable as security under the postal savings act, and those regulations will be construed, as a matter of law, to conform to these provisions of section 8, paragraphs (c) and (d), respectively, which relate to term of existence and nondefault, under the following conditions:

(1) Bonds issued by or in behalf of any city, town, county, or other legally constituted municipality or district in the United States which was, subsequently to the issuance of such bonds, consolidated with, or merged into, an existing political division which meets the requirements of these regulations, will be deemed to be the bonds of such political division: *Provided*, That such bonds were assumed by such political division under statutes and appropriate proceedings the effect of which is to make such bonds general obligations of such assuming political division, and payable, either directly or ultimately, without limitation to a special fund, from the proceeds of taxes levied upon all the taxable real and personal property within its territorial limits.

(2) Bonds issued by or in behalf of any city, town, county, or other legally constituted municipality or district in the United States which was, subsequently to the issuance of such bonds, wholly succeeded by a newly organized political division, whose term of existence, added to that of such original political division, or of any other political division so succeeded, is equal to a period of 10 years, will be deemed to be bonds of such succeeding political division: *Provided*, That during such period none of such political divisions shall have defaulted in the payment of any part of either principal or interest of any funded debt authorized to be contracted by it: *And provided further*, That such bonds were assumed by such new political division under statutes and appropriate proceedings the effect of which is to make such bonds general obligations of such assuming political

division, and payable, either directly or ultimately, without limitation to a special fund, from the proceeds of taxes levied upon all the taxable real and personal property within its territorial limits.

(3) Bonds issued by or in behalf of any city, town, county, or other legally constituted municipality or district in the United States which, prior to such issuance, became the successor of one or more, or was formed by the consolidation or merger of two or more, preexisting political divisions, the term of existence of one or more of which, added to that of such succeeding or consolidated political division, is equal to a period of 10 years, will be deemed to be bonds of a political division which has been in existence for a period of 10 years: *Provided*, That during such period, none of such original, succeeding, or consolidated political divisions shall have defaulted in the payment of any part of either principal or interest of any debt funded authorized to be contracted by it.

The board of trustees reserves the right to reclassify the securities acceptable for deposits and to change the valuation at which they will be accepted. Under no circumstances will securities of other classes than those above named be accepted.

POSTAL SAVINGS BONDS AND INVESTMENTS THEREIN.

The trustees of the Postal Savings System, under a general authority in the postal savings law (act of June 25, 1910), have arranged to take over at par any of the postal savings bonds that depositors may wish to turn back.

The first investment in these bonds was made on December 9, 1911, when they were quoted in the open market at 92½ cents on the dollar. Under the arrangement made by the trustees they have taken over at par all of the bonds offered by the depositors, and at the close of the fiscal year 1920 the Treasurer of the United States held \$6,573,420 of such bonds, which are registered in the name of the board of trustees.

WITHDRAWAL OF BONDS TO SECURE CIRCULATION.

National banks filed with the Treasurer of the United States applications to sell for their account United States bonds securing circulation as follows:

Quarter ended—	Cases.	Amount.
Sept. 30, 1919.....		
Dec. 31, 1919.....		
Mar. 31, 1920.....	2	\$62,500
June 30, 1920.....		

The Federal Reserve Board did not deem it advisable to allot or to require the Federal reserve banks to purchase any of the bonds offered for sale in the foregoing applications.

Money deposited in the Treasury each month of the fiscal year 1920 for the redemption of notes of banks insolvent, in liquidation, and reducing circulation; also the amount of national-bank notes outstanding.

Month.	Insolvent and liquidating.	Reducing.		National-bank notes outstanding.
		National banks.	Federal reserve banks.	
1919—July.....	\$204,527.50	\$491,750.00	\$720,907,762

June.....	17,150.00	572,695.00	719,037,730
Total.....	5,474,810.00	11,335,577.50	261,600.00

DEPOSITARIES OF THE UNITED STATES.

The Secretary of the Treasury determines the number of such depositaries and the amount of public money required in each for the transaction of the public business, fixes the amount of balances they may hold, and requires the banks thus designated to give satisfactory security, by the deposit of United States bonds and otherwise, for the safe-keeping and prompt payment of the public money deposited with them and for the faithful performance of their duties as financial agents of the Government. All of the national-bank depositaries are required to pay interest at the rate of 2 per cent per annum on the average monthly amount of public deposits held.

The number of bank depositaries (excluding special depositaries appointed under the Liberty loan acts) at the close of the fiscal years 1919 and 1920 are here stated:

	Federal reserve banks.	National banks.	Special.	Total.
June 30, 1919.....	30	807	645	1,482
June 30, 1920.....	33	671	19	723

PUBLIC MONEYS IN DEPOSITORY BANKS.

The depository banks at the close of the fiscal year 1919 held public moneys as follows: Federal land banks, \$500,000; Federal reserve banks, \$55,300,485.16; special liberty loan depositaries, \$905,411,-514.76; national banks, \$52,399,940.18; foreign depositaries, \$22,885,-165.93, and the treasury of Philippine Islands \$9,313,439.48; making a total of \$1,045,810,545.51.

The amount of public moneys held by depositary banks at the close of each quarter during the fiscal year 1920 may be studied in the statement following:

Depositaries.	Quarter ended—			
	Sept. 30, 1919.	Dec. 31, 1919.	Mar. 31, 1920.	June 30, 1920.
Federal land banks.....			\$5,500,000.00	\$5,950,000.00
Federal reserve banks.....	\$170,879,350.69	\$110,399,856.12	115,618,428.84	30,483,519.22
Special liberty loan depositaries.....	741,629,000.00	650,269,000.00	36,884,000.00	273,428,577.33
National banks.....	45,223,449.39	40,042,825.85	23,858,633.18	27,001,368.99
Foreign depositaries.....	32,394,956.78	18,942,838.64	14,578,321.27	8,301,507.40
Treasury of Philippine Islands.....	5,375,579.86	2,687,556.31	3,353,426.29	798,910.54
Total.....	995,502,336.72	822,342,076.92	199,792,809.58	345,963,883.48

The balance in national banks designated as depositaries to the credit of the Treasurer on June 30, 1919, was \$41,123,406.30, and like credit on June 30, 1920, was \$11,863,207.11, making a reduction of \$29,260,199.19 in the balances.

INTEREST ON PUBLIC MONEYS HELD BY DEPOSITARY BANKS.

Interest is collected semiannually from all depositaries of public moneys (except Federal reserve banks) at the rate of 2 per cent per annum on the basis of 181 days to the half year from January 1 to June 30 and 184 days from July 1 to December 31. Each depositary is required to render to the Treasurer semiannually (Jan. 1 and July 1) an interest report showing daily balances held by such bank for the prior six months and the amount of interest due and paid thereon. These reports are checked by the ledgers of this office.

Interest was first collected by the department under the provisions of the act of May 30, 1908, on all special and additional deposits in general depositaries and on all deposits in special depositaries at the rate of 1 per cent per annum. In accordance with instructions contained in letter of the Secretary of the Treasury, dated April 22, 1912, the rate of interest was increased from 1 per cent to 2 per cent per annum, beginning July 1, 1912.

During the fiscal year 1920 the interest collected from depositaries on ordinary balances held was \$2,658,768.71, and from depositaries holding balances arising from sales of bonds, certificates of indebtedness, etc., \$11,431,460.31, making a total of \$14,090,229.02. The total amount of interest collected on depositary balances since May 30, 1908, may be studied from Table No. 8, on page 905 of this report.

GOLD SETTLEMENT FUND, FEDERAL RESERVE BOARD.

The balance to the credit of the gold settlement fund on June 30, 1919, was \$1,416,086,099.10. During the fiscal year 1920 the deposits were \$1,455,066,707.52 and the withdrawals \$1,686,877,254.75, leaving a balance to the credit of the fund on June 30, 1920, of \$1,184,275,551.87.

MONETARY STOCK.

At the close of the fiscal year 1920 the monetary stock of the country amounted to \$7,894,498,099, an increase of \$375,709,099 as compared with that of 12 months earlier. The increase in subsidiary silver coin was \$15,984,801; in Federal reserve notes, \$718,320,135; in Federal reserve bank notes, \$13,558,820, while gold decreased \$332,627,390; standard silver dollars, \$39,288,265; and national-bank notes, \$239,002.

The amount of each kind of money included in the general stock is given in the statement following (this statement represents the monetary stock of the United States as shown by the revised statements for June 30, 1919 and 1920):

Kind.	In Treasury, mints, and Federal reserve banks.	In circulation.	Total stock.
June 30, 1919:

¹ Decrease.

PAPER CURRENCY ISSUED DIRECTLY BY THE GOVERNMENT.

The paper currency issued directly by the Government is of three kinds, viz: United States notes, gold certificates, and silver certificates. The \$1 and \$2 denominations are authorized in the issues of United States notes and silver certificates only. There is constant demand in all parts of the country for these small notes, which, through the process of redeeming and retiring the higher denominations and replacing the same by the smaller bills, has enabled the Treasury to respond in almost full measure to the demands for such denominations.

The amounts of each kind of United States paper currency issued and redeemed, by denominations, during the fiscal year 1920 are set out under the respective headings in the tables following.

UNITED STATES NOTES.

The United States notes are the well-known "greenbacks," or "legal tenders," the first issue of which was authorized by the act of February 25, 1862. The total amount authorized was \$450,000,000, and the highest amount outstanding at any time was \$449,338,902, on January 30, 1864.

The reduction from the original issue of \$450,000,000 to the present amount outstanding, \$346,681,016, was caused as follows:

The act of April 12, 1866, provided that United States notes might be retired to the extent of \$10,000,000 during the ensuing six months, and thereafter they might be retired at the rate of not more than \$4,000,000 per month. This authority remained in force until it was suspended by the act of February 4, 1868. The actual reduction in the amount of said notes in the meantime was \$94,000,000, leaving the outstanding at \$356,000,000. No change was made in the volume of United States notes outstanding until after the panic of 1873, when, in response to popular demand, the Government reissued \$26,000,000 of the canceled notes. This brought the amount outstanding to \$382,000,000, and it so remained until the resumption act of January 14, 1875, provided that whenever

circulating notes shall be issued to existing banking associations or to newly organized banking associations it shall be the duty of the Secretary of the Treasury to redeem the legal-tender United States notes to the amount of 80 per cent of the sum of national-bank notes so issued to banking associations and to continue such redemption as such circulating notes are issued until there shall be outstanding the sum of \$300,000,000 of such legal-tender United States notes, and no more. The process of redemption was, however, again stopped by the act of May 31, 1878, which required the notes to be reissued when redeemed. At that time the amount outstanding was \$346,681,016, and it has not been changed since, though \$546,466,414 of these notes have been redeemed in gold under the provisions of the act of January 14, 1875 (resumption act), and paid out again, a proceeding which was properly designated as "the endless chain." The act of March 14, 1900, modified the operations of the resumption act by requiring that the notes redeemed in gold shall not be paid out again until exchanged for gold, and under this act \$547,391,518 of the notes have been redeemed in and exchanged for gold, making a total of \$1,093,857,932 in gold that has been paid in redemption of United States notes since January 1, 1879, and yet, in spite of these payments, the volume outstanding remains the same as on May 31, 1878.

In order to increase the resources of the Treasury for the issue of small denominations, for which there is constant demand, the Secretary of the Treasury on December 22, 1916, under the provisions of the act of March 4, 1907, authorized the issue of \$1 and \$2 United States notes.

The transactions in this currency, by denominations, during the fiscal year 1920 are shown in the statement following:

Denomination.	Outstanding June 30, 1919.	Fiscal year 1920.		Outstanding June 30, 1920.

TREASURY NOTES OF 1890.

The issue of Treasury notes of 1890 for the purchase of silver bullion began on August 19, 1890, and from that date to November 1, 1893 (the date of the repeal of the purchasing clause of the act), the Government had purchased 168,674,682.53 fine ounces, at a cost of \$155,931,002, for which Treasury notes had been paid.

The amount of Treasury notes redeemed in gold up to the close of the fiscal year 1920 was \$110,714,364. Treasury notes redeemed in standard silver dollars are canceled and retired in accordance with the requirements of the act of 1890, and to the close of the year \$85,000,867 had been so redeemed and retired. Sections 5 and 8 of the act of March 14, 1900, also provide for the cancellation and retirement of Treasury notes to an amount equal to the coinage of standard silver dollars and subsidiary silver coin from the bullion purchased with such notes. The cancellation of notes on account of coinage since March 14, 1900, was \$69,271,135, so that there remained outstanding June 30, 1920, but \$1,659,000, offset by an equal amount of standard silver dollars held in the trust funds for their redemption when presented.

The amount of each denomination issued, redeemed, and outstanding may be observed in the subjoined statement:

Denomination.	Total issued.	Redeemed during year.	Total redeemed.	Outstanding June 30, 1920.
One dollar.....	\$64,704,000	\$3,350	\$64,382,223	\$321,777
Two dollars.....	49,808,000	2,940	49,607,820	200,180
Five dollars.....	120,740,000	19,130	120,323,197	416,803
Ten dollars.....	104,680,000	37,560	104,275,550	404,450
Twenty dollars.....	35,760,000	20,220	35,582,410	177,590

Net.....	735,779,491			584,723,645

SILVER CERTIFICATES.

The act of February 28, 1878, authorized such certificates in denominations of \$10 and above to \$1,000. The act of August 4, 1886, authorized the denominations of \$1, \$2, and \$5. The act of March 14, 1900, provided that thereafter the issue of silver certificates

should be limited to the denominations of \$10 and under, except that 10 per cent of the total volume of such certificates, in the discretion of the Secretary of the Treasury, may be issued in denominations of \$20, \$50, and \$100. The act of April 23, 1918, authorized the Secretary of the Treasury to melt or break up and to sell as bullion not in excess of 350,000,000 standard silver dollars held in the Treasury. Any silver certificates which may be outstanding against such standard silver dollars so melted or broken up shall be retired at the rate of \$1 face amount of such certificates for each standard silver dollar so melted or broken up. Operations under this act have decreased the general stock of standard silver dollars by \$270,121,554, with a resultant diminution in the volume of silver certificates outstanding.

The total amount of silver certificates outstanding, by denominations, at the close of the fiscal years 1919 and 1920 may be observed in the table following:

Denomination.	Outstanding June 30, 1919.	Fiscal year 1920.		Outstanding June 30, 1920.
		Issued.	Redeemed.	
One dollar	\$114,786,888	\$51,156,000	\$105,197,871	\$60,745,017
Two dollars	21,282,049	14,816,000	19,830,724	16,267,325

Less amount held in the Treasury	34,794,705	5,982,517
Net	169,148,295	118,257,883

CHANGES IN DENOMINATIONS.

The extension of habitation into remote districts, multiplication of lines of traffic, and the development of industrial activities are some of the requirements that must be provided for by an annual increase of the smaller denominations of paper money in circulation. The resources of the Treasury for the issue of paper money of such denominations are practically limited to the presentations of the higher denominations which are redeemed and retired and are replaced by the smaller bills. The demand for small denominations is generally urgent during the first half of the fiscal year, but from January to July such notes are usually returned in great numbers to the Treasury for redemption with requests for larger denominations in return.

The changes effected during the fiscal year 1920 in the total amount of United States paper currency of each denomination outstanding may be studied from the comparative statement following:

Denomination.	Outstanding June 30, 1919.	Fiscal year 1920.		Outstanding June 30, 1920.
		Issued.	Redeemed.	
One dollar.....	\$220,709,615	\$233,516,000	\$251,799,006	\$202,426,609

May.....	339,914,837	2,129,780,685	303,179,838	1,858,037,985
June.....	334,550,753	2,104,197,685	299,556,877	1,849,239,985

COST OF PAPER CURRENCY.

The paper used is made by a secret process under Treasury supervision by annual contract under competitive bids. The Bureau of Engraving and Printing, a branch of the department, designs, under the direction of the Secretary, engraves, and prints the notes and certificates complete. This currency is delivered to the Treasurer in packages of 4,000 notes, the product of 1,000 sheets of paper. Such a package is taken as the unit from which to reckon the cost.

With the allowance for every item of expense attending the making, the issue, and the redemption of this paper currency, it appears that the average cost is as follows:

Total average expense of 4,000 notes issued.....	\$52.50
Total average expense of 4,000 notes redeemed.....	8.54

Aggregate average expense of issue and redemption..... 61.04

It appears from the foregoing that the average cost for each note is about 1.526 cents. Calculations based upon these average expenses of issue and redemption indicate results that will be very close to the actual cost of maintenance of the paper currency, and such cost for the fiscal years 1919 and 1920 may be studied from the details set forth in the subjoined statement:

Total expense of issue and redemption.

Fiscal year.	Number of pieces.	Cost per 1,000 pieces.	Total cost.
1919.			
Issued.....	260,333,343	\$13.125	\$3,416,875.13
Redeemed.....	342,789,832	2.135	731,856.29
Total.....			4,148,731.42
1920.			
Issued.....	284,853,221	13.125	3,736,698.52
Redeemed.....	319,844,159	2.135	682,867.28
Total.....			4,419,565.80

United States paper currency outstanding and cost of maintenance.

Fiscal year.	Amount outstanding.	Cost of maintenance.	
		Amount.	Per cent.
1919.....	\$2,103,197,685.00	\$4,148,731.42	0.197
1920.....	1,848,239,985.00	4,419,565.80	.239

In this connection attention is invited to the saving of abrasion on the gold and silver coins held in the Treasury against outstanding certificates and notes, which to all intents and purposes is an offsetting item against the cost of the paper currency issued directly by the Government, though not so treated in the foregoing calculations.

AVERAGE LIFE OF PAPER CURRENCY.

The average length of service, in years, of the different kinds and denominations of paper currency is shown in the statement following:

Estimated length of service of paper currency.

Denomination.	United States notes.	Treasury notes.	Gold certificates.	Silver certificates.	National bank notes.
One dollar.....	1.61	1.78	-----	1.01	4.53
Two dollars.....	2.13	1.91	-----	1.17	4.59
Five dollars.....	2.45	2.99	-----	1.88	2.38
Ten dollars.....	3.58	3.77	2.35	3.35	2.31
Twenty dollars.....	5.95	4.05	3.53	3.89	2.79
Fifty dollars.....	6.18	3.78	3.93	2.84	3.36
One hundred dollars.....	6.16	3.67	4.16	2.81	3.76
Five hundred dollars.....	3.79	-----	3.99	1.89	5.14
One thousand dollars.....	4.21	1.92	3.89	1.42	3.34
Five thousand dollars.....	.32	-----	2.72	-----	-----
Ten thousand dollars.....	.16	-----	1.77	-----	-----
All denominations.....	2.29	2.24	2.81	1.20	2.48

The greater longevity of the Government issues of the denominations of \$10, \$20, \$50, and \$100 is due to the fact that these notes were formerly held from year to year in bank reserves.

The national-bank circulation, it is fair to state, owes its apparent advantage of longevity to the circumstance that the original plan of redemption was found to be practically inefficient. Since the inauguration of the present system of redemption in the office of the Treasurer on July 1, 1874, these notes have been freely retired on becoming unserviceable with a consequent shortening of their life, but the records of the earlier period still affect the calculations based on the whole history of the issue.

PAPER CURRENCY PREPARED FOR ISSUE AND AMOUNT ISSUED.

At the close of the fiscal year 1920 the pieces of United States paper currency outstanding numbered 299,556,877, of the total value of \$1,849,239,985. The Treasury has to maintain this great number of pieces and also to provide for the annual growth in the number of pieces of such denominations as may be in demand. Experience and forethought prompt the preparation of an adequate volume of paper currency of the kinds and denominations authorized by law in advance of putting it in circulation. For many years it has been the practice of the department to keep the reserve vault well stocked with such currency in order that it may be properly seasoned before it is paid out.

The paper currency prepared for issue and the amount issued during each fiscal year from 1910 may be studied from the annexed statement:

Fiscal year.	Prepared for issue.			Paper currency issued.		
	Number of notes and certificates.	Total value.	Average value.	Number of notes and certificates.	Total value.	Average value.
1910.....	235,210,400	\$809,579,600	\$3.441	240,990,922	\$767,115,600	\$3.183
1911.....	268,450,000	957,744,000	3.567	267,207,921	913,540,000	3.418
1912.....	301,302,000	990,096,000	3.286	290,809,347	916,852,000	3.152
1913.....	307,188,000	903,716,000	2.941	318,264,407	1,035,462,000	3.253
1914.....	294,418,000	1,179,280,000	4.005	298,780,482	1,075,308,000	3.598
1915.....	284,436,000	1,214,252,000	4.268	280,174,317	1,164,718,000	4.157
1916.....	359,986,000	1,628,720,000	4.524	358,838,465	1,510,334,000	4.208
1917.....	391,962,000	2,919,228,000	7.447	390,016,642	2,068,356,000	5.303
1918.....	352,523,000	1,028,488,000	2.917	354,519,271	753,124,000	2.125
1919.....	267,264,000	348,824,000	1.305	260,333,387	350,138,000	1.345
1920.....	280,448,000	371,112,000	1.323	284,853,221	398,018,000	1.397

The number of pieces and amount issued monthly for the fiscal years 1919 and 1920 are set out in the table following:

United States paper currency issued during the fiscal years 1919 and 1920.

Month.	Fiscal year 1919.			Fiscal year 1920.

STANDARD SILVER DOLLARS.

The stock of standard silver dollars in the United States at the beginning of the fiscal year 1920 was \$308,145,759. During the year the Secretary of the Treasury allotted to the Director of the Mint \$10,000,000 standard silver dollars for the purpose of providing silver for subsidiary coinage, under provisions of the following act of Congress, viz:

AN ACT To conserve the gold supply of the United States; to permit the settlement in silver of trade balances adverse to the United States; to provide silver for subsidiary coinage and for commercial use; to assist foreign governments at war with the enemies of the United States; and for the above purposes to stabilize the price and encourage the production of silver.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the the Secretary of the Treasury is hereby authorized from time to time to melt or break up and to sell as bullion not in excess of three hundred and fifty million standard silver dollars now or hereafter held in the Treasury of the United States. Any silver certificates which may be outstanding against such standard silver dollars so melted or broken up shall be retired at the rate of \$1 face amount of such certificates for each standard silver dollar so melted or broken up. Sales of such bullion shall be made at such prices not less than \$1 per ounce of silver one thousand fine and upon such terms as shall be established from time to time by the Secretary of the Treasury.

SEC. 2. That upon every such sale of bullion from time to time the Secretary of the Treasury shall immediately direct the Director of the Mint to purchase in the United States, of the product of mines situated in the United States and of reduction works so located, an amount of silver equal to three hundred and seventy-one and twenty-five hundredths grains of pure silver in respect of every standard silver dollar so melted or broken up and sold as bullion. Such purchases shall be made in accordance with the then existing regulations of the mint and at the fixed price of \$1 per ounce of silver one thousand fine, delivered at the option of the Director of the Mint at New York, Philadelphia, Denver, or San Francisco. Such silver so purchased may be resold for any of the purposes hereinafter specified in section three of this act, under rules and regulations to be established by the Secretary of the Treasury, and any excess of such silver so purchased over and above the requirements for such purposes shall be coined into standard silver dollars or held for the purpose of such coinage, and silver certificates shall be issued to the amount of such coinage. The net amount of silver so purchased, after making allowance for all resales, shall

not exceed at any one time the amount needed to coin an aggregate number of standard silver dollars equal to the aggregate number of standard silver dollars theretofore melted or broken up and sold as bullion under the provisions of this act, but such purchases of silver shall continue until the net amount of silver so purchased, after making allowance for all resales, shall be sufficient to coin therefrom an aggregate number of standard silver dollars equal to the aggregate number of standard silver dollars theretofore so melted or broken up and sold as bullion.

SEC. 3. That sales of silver bullion under authority of this act may be made for the purpose of conserving the existing stock of gold in the United States, of facilitating the settlement in silver of trade balances adverse to the United States, of providing silver for subsidiary coinage and for commercial use, and of assisting foreign governments at war with the enemies of the United States. The allocation of any silver to the Director of the Mint for subsidiary coinage shall, for the purposes of this act, be regarded as a sale or resale.

SEC. 4. That the Secretary of the Treasury is authorized, from any moneys in the Treasury not otherwise appropriated, to reimburse the Treasurer of the United States for the difference between the nominal or face value of all standard silver dollars so melted or broken up and the value of the silver bullion, at \$1 per ounce of silver one thousand fine, resulting from the melting or breaking up of such standard silver dollars.

SEC. 5. That in order to prevent contraction of the currency, the Federal reserve banks may be either permitted or required by the Federal Reserve Board, at the request of the Secretary of the Treasury, to issue Federal reserve bank notes, in any denominations (including denominations of \$1 and \$2) authorized by the Federal Reserve Board, in an aggregate amount not exceeding the amount of standard silver dollars melted or broken up and sold as bullion under authority of this act, upon deposit as provided by law with the Treasurer of the United States as security therefor, of United States certificates of indebtedness, or of United States one-year gold notes. The Secretary of the Treasury may, at his option, extend the time of payment of any maturing United States certificate of indebtedness deposited as security for such Federal reserve bank notes for any period not exceeding one year at any one extension and may, at his option, pay such certificates of indebtedness prior to maturity, whether or not so extended. The deposit of United States certificates of indebtedness by Federal reserve banks as security for Federal reserve bank notes under authority of this act shall be deemed to constitute an agreement on the part of the Federal reserve bank making such deposit that the Secretary of the Treasury may so extend the time of payment of such certificates of indebtedness beyond the original maturity date or beyond any maturity date to which such certificates of indebtedness may have been extended, and that the Secretary of the Treasury may pay such certificates in advance of maturity, whether or not so extended.

SEC. 6. That as and when standard silver dollars shall be coined out of bullion purchased under authority of this act, the Federal reserve banks shall be required by the Federal Reserve Board to retire Federal reserve bank notes issued under authority of section five of this act, if then outstanding, in an amount equal to the amount of standard silver dollars so coined, and the Secretary of the Treasury shall pay off and cancel any United States certificates of indebtedness deposited as security for Federal reserve bank notes so retired.

SEC. 7. That the tax on any Federal reserve bank notes issued under authority of this act, secured by the deposit of United States certificates of indebtedness or United States one-year gold notes, shall be so adjusted that the net return on such certificates of indebtedness, or such one-year gold notes, calculated on the face value thereof, shall be equal to the net return on United States two per cent bonds, used to secure Federal reserve bank notes, after deducting the amount of the tax upon such Federal reserve bank notes so secured.

SEC. 8. That except as herein provided, Federal reserve bank notes issued under authority of this act, shall be subject to all existing provisions of law relating to Federal reserve bank notes.

SEC. 9. That the provisions of Title VII of an act approved June fifteenth, nineteen hundred and seventeen, entitled "An act to punish acts of interference with the foreign relations, the neutrality, and the foreign commerce of the United States, to punish espionage, and better to enforce the criminal laws of the United States, and for other purposes," and the powers conferred upon the President by subsection (b) of section five of an act approved October sixth, nineteen hundred and seventeen, known as the "Trading with the Enemy Act," shall in so far as applicable to the exportation from or shipment from or taking out of the United States of silver coin or silver bullion, continue until the net amount of silver required by section two of this act shall have been purchased as therein provided.

Approved, April 23, 1918.

Under the provisions of the foregoing act of Congress the Secretary of the Treasury has disposed of standard silver dollars as follows:

Melted or broken up and sold as bullion.....	\$259, 121, 554
Allotted for subsidiary coinage.....	11, 000, 000
Total.....	270, 121, 554

During the fiscal year 1920, \$29,287,142 in standard silver dollars were withdrawn and exported and 1,123 mutilated silver dollars were bought by the mints and melted.

The general stock of standard silver dollars in the country on June 30, 1920, was \$268,857,494, of which \$134,007,710 were in circulation and \$134,849,784 were held in the Treasury, against which Treasury notes and silver certificates to the amount of \$119,914,110 were outstanding. Standard silver dollars are shipped to depositors therefor at the expense of the consignee for transportation charges when there is demand for the same, but the silver dollars thus sent out remain in circulation only a short time.

SUBSIDIARY SILVER COIN.

The stock of subsidiary silver coin in the United States at the close of the fiscal year 1920 was \$258,855,239, of which \$252,250,145 was in circulation and the balance, \$6,605,094, was held in the Treasury. There is constant demand for such coins and they are shipped to depositors therefor at the expense of the consignee for transportation charges.

The subsidiary silver coins are redeemable in lawful money of the United States by the Treasurer or any assistant treasurer, and such coins are paid over the counter of Treasury offices in exchange for other kinds of money.

MINOR COINS.

The current minor coins are the bronze 1-cent pieces and the nickel 5-cent pieces. They are in great demand and are shipped to depositors therefor at the expense of the consignee for transportation charges, and they are paid over the counter at Treasury offices in exchange for other kinds of money. Such coins are redeemable in the lawful money of the United States when presented in sums or multiples of \$20 to the Treasurer or any assistant treasurer of the United States. The minor coins are not included in the stated stock of money in the country.

The amount of each denomination of minor coin outstanding at the close of the fiscal years 1919 and 1920 is shown in the statement following:

Denomination.	Outstanding June 30, 1919.	Fiscal year 1920.		Outstanding June 30, 1920.
		Coined.	Remelted.

UNITED STATES CURRENCY.

LEGAL TENDER.

Definition of the term "legal tender."—"Money of a character which by law a debtor may require his creditor to receive in payment, in the absence of any agreement in the contract or obligation itself."—Bouvier's Law Dictionary.

Gold coins.—The gold coins of the United States are a legal tender in all payments at their nominal value when not below the standard weight and limit of tolerance provided by law for the single piece, and, when reduced in weight below such standard and tolerance, are a legal tender at valuation in proportion to their actual weight.—Act of Feb. 12, 1873, 17 Stat., p. 426; R. S., sec. 3585.

Standard silver dollars are a legal tender at their nominal value for all debts and dues, public and private, except where otherwise expressly stipulated in the contract.—Act of Feb. 28, 1878, 20 Stat., p. 25.

Subsidiary silver coin.—The silver coins of the United States of smaller denominations than \$1 are a legal tender in all sums not exceeding \$10 in full payment of all dues, public and private.—Act of June 9, 1879, 21 Stat., p. 457.

Minor coin (coins of copper, bronze, or copper-nickel).—Minor coins are a legal tender at their nominal value for any amount not exceeding 25 cents in any one payment.—Act of Feb. 12, 1873, 17 Stat., p. 426.

United States notes (known as legal tender notes, or "greenbacks").—They are a legal tender in payment of all debts, public and private, within the United States, except duties on imports and interest on the public debt.—Act of Mar. 3, 1863, 12 Stat., p. 711; R. S., sec. 3588.

Legal tender cases: Against constitutionality, *Hepburn v. Griswold* (8 Wall., 603).

For constitutionality, *Knox v. Lee* (12 Wall., 457); *Parker v. Davis* (12 Wall., 559).

Demand Treasury notes authorized by the act of July 17, 1861 (12 Stat., p. 259), and the act of February 12, 1862 (12 Stat., p. 338), are lawful money and a legal tender in like manner as United States notes.—R. S. sec. 3589.

One and two year notes of 1863.—These notes, redeemable one year from date and two years from date, bearing interest at 5 per cent per annum, are a legal tender for their face value, exclusive of interest.—Act of Mar. 3, 1863, 12 Stat., p. 710.

Compound interest notes.—These notes were payable at any time after three years from date, and bearing interest not exceeding $7\frac{3}{10}$ per cent, payable in lawful money at maturity, or, at the discretion of the Secretary of the Treasury, semiannually; and such of them as should be made payable, principal and interest, at maturity, to be a legal tender to the same extent as United States notes for their face value, excluding interest.—Act of June 30, 1864, 13 Stat., p. 218.

Treasury notes of 1890 are a legal tender in payment of all debts, public and private, except where otherwise expressly stipulated in the contract, and are receivable for customs, taxes, and all public dues.—Act of July 14, 1890, 26 Stat., p. 289.

Columbian half dollars are a legal tender to the same extent as subsidiary silver coin, i. e., \$10 in any one payment.—Act of Aug. 5, 1892, 27 Stat., p. 389.

Columbian quarters are a legal tender to the same extent as subsidiary silver coin; i. e., \$10 in any one payment.—Act of Mar. 3, 1893, 27 Stat., p. 586.

Gold certificates of the United States, payable to bearer on demand, are a legal tender in payment of all debts and dues, public and private.—Act of Dec. 24, 1919.

NOT LEGAL TENDER.

Gold certificates payable to order are not a legal tender. They are receivable for customs, taxes, and all public dues.—Act of July 12, 1882, 22 Stat., p. 165.

Silver certificates are not a legal tender. They are receivable for customs, taxes, and all public dues.—Act of Feb. 28, 1878, 20 Stat., p. 25.

National-bank notes are not a legal tender. They are receivable at par in all parts of the United States in payment of taxes, excises, public lands, and all other dues to the United States, except duties on imports; and also for all salaries and other debts and demands owing by the United States to individuals, corporations, and associations within the United States, except interest on the public debt and in redemption of the national currency.—Act of June 3, 1864, 13 Stat., p. 106; R. S., sec. 5182.

Trade dollars are not a legal tender. By the act of February 12, 1873 (17 Stat., p. 424), they were a legal tender at their nominal value for any amount not exceeding \$5 in any one payment, but under date of July 22, 1876 (19 Stat., p. 215), it was enacted that the trade dollar should not thereafter be a legal tender.

Fractional currency is not a legal tender. NOTE: It was receivable for postage and revenue stamps, and also in payment of any dues to the United States less than \$5, except duties on imports.—Act of Mar. 3, 1863, 12 Stat., p. 711.

Foreign gold coins are not a legal tender in payment of debts.—Act of Feb. 21, 1857, 11 Stat., p. 163; R. S., sec. 3584.

Foreign silver coins are not a legal tender in payment of debts.—Act of Feb. 21, 1857, 11 Stat., p. 163; R. S., sec. 3584.

Continental currency.—The question has been raised and disputed as to whether what was called the "Continental currency," issued during the War of the Revolution by the old government, was or was not legal tender. The facts appear to be that while the Continental Congress did not by any ordinance attempt to give it that character, they asked the States to do so, and all seemed to have complied except Rhode Island. The Continental Congress only enacted that the man who refused to take the money should be deemed an enemy of his country. ("The National Loans," by Rafael A. Bayley, Treasury Department; prepared for the Tenth Census.)

Federal reserve notes are not legal tender, but are receivable by the Government for all public dues and are receivable on all accounts by all Federal reserve banks, national banks, and other bank members of the Federal Reserve System. They are redeemable in gold coin of the United States by the Treasurer and in gold or lawful money by any Federal reserve bank.—Act of Dec. 23, 1913, 38 Stat., p. 265.

Federal reserve bank notes are identical in all their attributes with national-bank notes.—Act of Dec. 23, 1913, 38 Stat., p. 267.

TRANSFERS OF FUNDS FOR DEPOSITS MADE IN NEW YORK.

The deposits of money in the subtreasury at New York, for which payments are made by telegraph through this office at other subtreasury offices and mints for moving the crops or to meet other demands of business, have at times been considerable in magnitude.

The record of such deposits in New York, by calendar years, and the resultant payments at the several subtreasuries and mints from 1913 to June 30, 1920, may be observed in the statement following:

Transaction.	Gold coin and certificates.	United States notes.	Silver dollars and certificates.	Total.
1913—Receipts.....	\$13,818,958.33			\$13,818,958.33
Paid by the Treasurer, assistant treasurers, and mints of the United States:				
Washington.....	105,000.00			105,000.00

Seattle.....	9,223,588.65	4,329,694.38	4,418,415.74
Salt Lake City.....	42,861.49	11,080.56	16,536.41
Total.....	326,914,864.24	139,645,932.74	226,432,915.10

SHIPMENTS OF CURRENCY FROM WASHINGTON.

During the fiscal year 1920 the currency distributed from the Treasury in Washington to the subtreasuries and to banks amounted to \$428,485,015, against \$492,966,596 during the preceding fiscal year.

The transactions during the past two fiscal years are compared in the statement following:

	Fiscal year 1919.		Fiscal year 1920.	
	Number of packages.	Total amount.	Number of packages.	Total amount.
Total by express.....	13,012	\$127,686,982	4,181	\$40,125,037
Total by registered mail.....	75,801	365,279,614	81,187	388,359,978
Aggregate.....	88,813	492,966,596	85,368	428,485,015

RECOINAGE IN THE FISCAL YEAR 1920.

Gold coins of the United States presented for payment or deposit on any account at the Treasury offices are weighed and if reduced in weight by natural abrasion not more than one-half of 1 per cent below the standard weight prescribed by law, after a circulation of 20 years, as shown by the date of coinage, and at a ratable proportion for any period less than 20 years, shall be received at their nominal value, under such regulations as the Secretary of the Treasury may prescribe for the protection of the Government against fraudulent abrasion or other practices. Gold coins that are below the limit prescribed in the foregoing are discounted at the rate of 4 cents per grain for each grain below the standard weight of the coin. This regulation protects the Government from loss by unnatural abrasion or the "sweating process" practiced by dishonest persons. The subsidiary silver coins and minor coins received are assorted but are not discounted for natural abrasion; when worn so as to be unfit for circulation they are recoinage. The loss resulting from recoinage

is reimbursed from an appropriation made by Congress for the purpose.

The face value, by denominations and kinds, and the loss on the recoinage during the past two fiscal years is compared in the statement following:

Denomination.	Fiscal year 1919.		Fiscal year 1920.	
	Face value.	Loss reimbursed.	Face value.	Loss reimbursed.
Double eagles.....	\$2,138,420.00	\$606,800.00
Eagles.....	3,078,730.00	847,340.00
Half eagles.....	6,562,125.00	1,648,620.00
Three-dollar pieces.....	81.00	3,582.50
Quarter eagles.....	42,672.50	531.00
Dollars.....	223.00	72.00
Total gold.....	11,822,251.50	\$12,882.12	3,106,945.50	\$2,761.89
Half dollars.....	227,815.50	296,059.00
Quarter dollars.....	284,200.00	342,716.00
Twenty-cent pieces.....	23.80	81.40
Dimes.....	165,747.40	162,734.90
Half dimes.....	382.20	356.50
Three-cent pieces.....	131.10	63.20
Total silver.....	678,300.00	50,720.02	802,011.00	57,981.43
Minor coins.....	125,890.00	7,656.32	123,436.18	6,019.52
Aggregate.....	12,626,441.50	71,258.46	4,032,392.68	66,762.84

REDEMPTION OF FEDERAL RESERVE AND NATIONAL CURRENCY.

The net proceeds of currency counted into its cash by the National Bank Redemption Agency during the fiscal year amounted to \$911,414,508.74. Of this sum \$429,174,804.74 was in national-bank notes, \$268,031,428 in Federal reserve notes, \$206,683,922.50 in Federal reserve bank notes, and \$7,524,353.50 in United States currency. Comparative figures as to total redemptions for this and previous years are contained in Table No. 51.

Payments for currency redeemed were made as follows: In Treasurer's checks, \$40,530,245.32; in United States currency, \$45,418,-429.73; by credits to Treasury offices as transfers of funds, \$251,186,-582; by credits to Government depository banks (Federal reserve and national banks) as transfers of funds \$336,059,299.95; by credits to Federal reserve banks and branches as transfers of funds covering remittances by member banks, \$235,795,699.46; by other credits, \$2,424,252.28.

The notes of all issues counted and assorted amounted to \$2,700,-890,637 and were disposed of as follows:

	Amount.	Per cent.
National-bank notes:		
Fit for use returned to banks of issue.....	\$3,324,600.00	0.70
Unfit for use delivered to the Comptroller of the Currency for—		
Destruction and reissue.....	449,278,462.50	94.41
Destruction and retirement.....	23,270,924.50	4.89
	475,873,987.00	100.00

	Amount.	Per cent.
Federal reserve bank notes:		
Fit for use returned to banks.....	\$390,750.00	0.17
Unfit for use delivered to the Comptroller of the Currency for—		
Destruction and reissue.....	228,090,000.00	99.70
Destruction and retirement.....	289,780.00	.13
	228,770,530.00	100.00
Federal reserve notes:		
Fit for use returned to banks.....	30,780,650.00	11.26
Unfit for use delivered to the Comptroller of the Currency for destruc-		
tion.....	242,582,997.50	88.74
	273,363,647.50	100.00
Federal reserve notes, canceled and uncanceled, forwarded by Federal reserve banks and branches:		
Delivered to Comptroller of the Currency for credit of Federal reserve agents.....	1,722,882,472.50	

The canceled and uncanceled Federal reserve notes amounting to \$1,722,882,472.50, sent in by Federal reserve banks and branch Federal reserve banks for credit of Federal reserve agents are settled for between the Federal reserve banks and their agents either direct or by adjustments in their redemption funds, and such notes, therefore, are not taken into the cash account of the agency.

At the beginning of the fiscal year the agency had a cash balance of \$101,929,670.70 in currency still in the process of redemption, also \$269,410,260 in canceled and uncanceled Federal reserve notes sent in by Federal reserve banks and branch Federal reserve banks. These balances were worked off in addition to handling the regular receipts and at the close of the year the agency was current with a cash balance of \$26,043,520.92.

The expenses of the agency for the fiscal year including salaries, transportation and contingent expenses have been assessed upon the Federal reserve and national banks as indicated in Table No. 49.

The relief afforded the agency in the two deficiency bills, one approved July 11, 1919, granting 68 additional employees, and the other approved November 4, 1919, granting an increase of 197, both of which were embodied in a lump sum for the fiscal year 1921, enables the agency to handle the great volume of currency and to keep the balance of cash in process of redemption down to a normal figure. However, a considerable force of money counters was employed by the Federal reserve board and detailed to the agency to assist in counting and sorting the vast accumulation of \$1 and \$2 Federal reserve bank notes. This detail was kept until April 24, 1920, and without this auxiliary force the agency would have been unable to bring its work up to date.

The force provided in the current appropriations is thought to be sufficient to carry on the work and keep it current unless there should occur an unprecedented deflation of currency during the year. The counters and sorters appointed during the last few months are becoming experts in their line of work, and as a whole the agency now has a well-trained and efficient force.

The agency so outgrew its old quarters that it became necessary to put a large force of counters in rooms in the subbasement. By a considerable expenditure of money these rooms were made fairly

habitable and comfortable for workers, but they are below the ground level, and one room in which there are at times from 80 to 100 persons has only three windows. The best obtainable systems of artificial lights and ventilation have been installed, but even with these improvements it is not thought to be a suitable workroom and it is hoped that congestion in the building will be so relieved in the near future as to permit the assignment of rooms more suitable to the agency's needs.

SPECIAL TRUST FUNDS.

The Treasurer of the United States is custodian, under provisions of law or by direction of the Secretary of the Treasury, of several special trusts, consisting of bonds and other obligations.

The kinds of bonds or obligations held on each account and transactions therein during the fiscal year 1920 are set out in the statement following:

Account and kind.	Held June 30, 1919.	Fiscal year 1920.		Held June 30, 1920.
		Deposited.	Withdrawn.	
State bonds belonging to the United States:				
Louisiana State bonds.....	\$37,000.00	\$37,000.00
North Carolina State bonds....	58,000.00	58,000.00
Tennessee State bonds.....	335,666.66 $\frac{2}{3}$	335,666.66 $\frac{2}{3}$
United States bonds held under special provisions of law: Man- hattan Savings Institution.....	75,000.00	\$75,000.00
Held for the District of Columbia: United States bonds for account District of Columbia sinking fund.....	2,282,500.00	\$1,944,000.00	934,000.00	3,292,500.00
Chesapeake & Ohio Canal bonds.....	84,285.00	84,285.00
Board of audit certificates.....	20,134.72	20,134.72
Held for the board of trustees, Postal Savings System: United States bonds.....	30,288,600.00	1,284,820.00	31,573,420.00
Held for the Secretary of War: Captured bonds of the State of Louisiana.....	545,480.00	545,480.00
Obligations belonging to the Lincoln Farm Association....	46,000.00	46,000.00
Held for the Secretary of the Treasury: Panama Railroad notes.....	3,247,332.11	3,247,332.11
Certificates of indebtedness rep- resenting loans to foreign Governments under act of Congress approved Apr. 24, 1917, Sept. 24, 1917, as amended.....	9,311,958,086.66	308,060,056.69	73,751,007.99	9,546,267,135.36
Bonds held subject to the order of— Director General of Rail- roads.....	21,937,000.00	29,409,855.00	10,147,000.00	41,199,855.00
Secretary of Treasury; Transportation act of 1920.....	1,000,000.00	1,000,000.00
Donations to the Government..	3,213.25	625.00	3,338.25	500.00
Bonds held to secure Govern- ment funds in Federal land banks.....	500,000.00	5,950,000.00	500,000.00	5,950,000.00
Farm loan bonds held under act of Congress approved Jan. 18, 1913.....	135,885,000.00	1,000,000.00	136,885,000.00
Farm loan bonds held under act of Congress approved May 26, 1920.....	33,750,000.00	33,750,000.00
Bonds and certificates held in trust for the Alien Property Custodian— Trust account.....	12,861,020.00	6,209,435.25	2,037,476.25	17,032,979.00
Investment account.....	74,773,000.00	87,741,000.00	38,860,000.00	123,654,000.00

Account and kind.	Held June 30, 1919.	Fiscal year 1920.		Held June 30, 1920.
		Deposited.	Withdrawn.	
Held for the Secretary of the Treasury—Continued.				
Bonds received from the Secretary of War on account of sales of surplus War Department property, sold by United States Liquidation Commission.....		\$400,000,000.00		\$400,000,000.00
Coos Bay wagon road grant fund.....		20,000.00		20,000.00
Held for account Secretary of Interior: Indian trust funds.....	\$8,564,650.00	1,625,500.00	\$465,300.00	9,724,850.00
Held for account Employees Compensation Commission.....	5,000.00	5,000.00		10,000.00
Liberty bonds held in lieu of surety bonds, under provisions of Treasury Department Circular No. 154:				
For contracts performed under internal revenue act, 1918....	7,100.00	322,300.00	204,500.00	124,900.00
For Quartermasters Corps.....		40,000.00	40,000.00	
For contracts with the General Supply Committee.....	56,000.00	67,300.00	64,400.00	58,900.00
For use of alcohol for non-beverage purposes.....		196,660.00	70,550.00	126,110.00
For Secretary of Labor Department.....		458,750.00	282,200.00	176,550.00
For internal-revenue taxes.....	406,250.00	267,150.00	601,950.00	71,450.00
For United States Air Service.....	250,000.00	35,914,700.00		36,164,700.00
Total.....	9,604,226,318.40½	915,267,151.94	128,036,722.49	10,391,456,747.85½

The State of North Carolina has authorized and appointed commissioners to take under consideration a plan for settling the indebtedness of that State to the United States, but Congress postponed action on a measure providing for representatives on the part of the Government.

Commissioners representing the Government and the State of Tennessee, under provisions of law, have now under consideration a plan for settling with that State. It is apparent that some progress has been made toward a settlement with the two States named in the foregoing for the unpaid matured bonds of those States belonging to the United States.

The special trust held for the District of Columbia represents, first, investments on account of the sinking fund; and, second, obligations that belong to the District of Columbia.

The special trust held for the board of trustees, Postal Savings System, consists of postal savings bonds, and Liberty loan bonds, representing investments made by said board.

Recommendation has been made to Congress for authority to return to the State of Louisiana the bonds of that State captured at Shreveport by the Union forces during the War of the Rebellion, now held as a special deposit by the Secretary of War.

The special trusts held for the Secretary of the Treasury are composed of notes of the Panama Railroad Co., drawing 4 per cent interest, payable to the United States, and is security for money advanced for the equipment and construction of said railroad; and interest-bearing obligations of foreign Governments payable to the United States, purchased at par from such Governments engaged in war with the enemies of the United States, act of April 24, 1917.

DISTRICT OF COLUMBIA.

During the fiscal year 1920 the District of Columbia 3.65 per cent bonded debt retired amounted to \$96,250, thus reducing the bonded debt of the District of Columbia to \$5,481,250. A net purchase for the sinking fund of \$800,000 in United States obligations was made during the year, making a total of \$3,292,500 of such obligations held in trust as an offset against the outstanding debt of the District of Columbia.

There has been no change in the old securities of the District of Columbia held in the care and custody of the Treasurer, and they are as follows: Chesapeake & Ohio Canal bonds, \$84,285, and board of audit certificates, \$20,134.72; while in the District of Columbia contractor's guarantee fund there is also a cash balance of \$132.51 and premiums account of District of Columbia contract investments of \$386.89, uncalled for.

GENERAL ACCOUNT OF THE TREASURER OF THE UNITED STATES.

The Treasurer receives and keeps the moneys of the United States and disburses the same upon warrants drawn by the Secretary of the Treasury, countersigned by the Comptroller of the Treasury, and not otherwise. He takes receipts for all moneys paid by him and gives receipts for all moneys received by him; and all receipts for moneys received by him are indorsed upon warrants signed by the Secretary of the Treasury, without which warrant, so signed, no acknowledgment for money received into the Public Treasury is valid. He renders his accounts quarterly, or oftener if required, and at all times submits to the Secretary of the Treasury and the Comptroller of the Treasury, or either of them, the inspection of the moneys in his hands.

As a matter of information, it may be said that all public moneys paid into any subtreasury office, national-bank depository, or other depository are placed to the credit of the Treasurer of the United States and held subject to his draft. The public moneys in the hands of any depository of public moneys may be transferred to the Treasury of the United States or may be transferred from one depository to any other depository, as the safety of the public moneys and the convenience of the public service shall require.

The Treasurer is redemption agent for Federal reserve and national bank notes; is trustee for bonds held to secure bank circulation, public deposits in depository banks, and bonds held to secure postal savings in banks; is custodian of miscellaneous trust funds; is fiscal agent for the issue and redemption of the United States paper currency, for the payment of the interest on the public debt and the redemption of matured obligations of the Government, for collecting the interest on public deposits held by banks, and for the collection of semiannual duty on bank circulation; is fiscal agent for paying principal and interest of the land-purchase bonds of the Philippine Islands; is treasurer of the board of trustees of the Postal Savings System; and is ex officio commissioner of the sinking fund of the District of Columbia.

It will be seen from the foregoing recital that the immense financial transactions of the Government imposes on the Treasurer's office the keeping of many and varied accounts with vast responsibilities. In

the performance of these duties, under the system of accounting inaugurated on February 1, 1913, the work is appropriately distributed to eight divisions, to each of which is assigned a clerical force fully equipped with modern machinery for the production of quick and accurate results.

The duties of the several divisions are stated here:

Chief clerk.—Has charge of mail, telegrams, requisitions, and supplies. Keeps record of the personnel, acts for the disbursing clerk of the department in payment of salaries, keeps records in relation to advances on account of "Relief, Protection, and Transportation of American Citizens in Europe." Prepares estimates of appropriations, special reports, and circulars. Has general supervision of the force under the direction of the Treasurer.

The transactions for the fiscal year 1920 follow:

	Number of pieces of—	
	Mail received.	Mail sent.
Ordinary.....	507,941	894,756
Registered:		
Pouches.....	16,851
Packages.....	96,841	32,163
Parcel-post packages.....		85,37

Payment of salaries for disbursing clerk, \$1,050,670.

Cash Division.—Issues all United States paper currency, receives and makes payments of money on account of public revenues, transfers of funds, exchanges, Treasury warrants, interest checks, coupons, disbursing officers, the gold settlement fund of the Federal Reserve Board, and miscellaneous accounts; makes shipments of money in denominations required for use in public disbursements at sub-treasuries and Federal reserve banks, and in return for unfit Federal reserve and national-bank notes and United States currency redeemed; makes collection of drafts and checks payable to the Treasurer for credit in the several accounts; prepares estimates for paper for United States currency and directs the printing of the desired denominations; receives such currency from the Bureau of Engraving and Printing and stores same in the reserve vaults until required for issue.

Transactions for the fiscal year 1920 follow:

	Pieces.	Amount.
United States paper currency:		
Received from bureau.....	280,448,000	\$371,112,000
Withdrawn from reserve and issued.....	284,853,221	398,018,000
Exchanges made by change teller.....		18,424,389
Payments by paying teller.....		351,387,659
Shipped to subtreasuries and banks.....		428,485,015
Items for collection:		
Checks.....	3,395,025	1,648,817,177

Cash received (exclusive of currency issued).....		292,274,903
Coupons paid.....	2,094,632	9,911,544
Treasurer's transfer checks issued.....	33,701	
Checks and warrants drawn on the Treasurer and paid by tellers.....	1,478,500	

Division of Securities.—Has custody of all bonds to secure bank circulation, public deposits, postal-savings funds, special deposits and trust funds; collects semiannual duty on bank circulation; cuts coupons from bonds held in the several trusts as they mature and forwards the same to the bank for whose account they are held; verifies the schedules of paid coupons submitted by Federal reserve banks, branches, subtreasuries, and the cash division; examines checks issued and paid on account of interest on the registered debt of the United States; examines the matured or purchased obligations presented for payment and supervises the computation of interest thereon; states the account of the Treasurer as fiscal agent for the issue and redemption of the paper currency of the United States, and for all disbursements on account of the public debt makes requisition on the Secretary for the reimbursement to the Treasurer. All matters relating to the sinking fund and funded debt of the District of Columbia are kept by a clerk specially designated for the purpose in this division.

The work of the division for the fiscal year 1920 follows:

Class.	Deposited.	Withdrawn.	Balance on hand.
Bonds to secure circulation.....	\$133,100,740	\$36,999,890	\$934,488,600
Bonds to secure deposits.....	16,773,550	32,856,450	37,637,500
Securities for postal savings.....	56,932,300	64,499,155	199,263,584

Interest collected on public deposits.....		26,503,951.44		14,090,229.02

Accounting Division.—The Accounting Division receives daily from the subtreasuries, the Federal reserve banks, their branches, and the national bank depositaries transcripts of their receipts and payments, which are to be entered in the several accounts of the Treasurer. These transcripts are proved against the accompanying certificates of deposit, transfer documents, Treasury warrants, disbursing officer's checks, and interest checks supporting the various entries therein, in such manner that the documents, etc., are assembled by classes, so that a total of each class is obtained for use of the Division of General Accounts in posting to the general ledger accounts in the preparation of the daily cash statement of the Treasury.

All accounts of disbursing officers are kept in the Accounting Division, and the paid checks of each disbursing officer are daily assembled and with the deposits are posted to the debit and credit of the proper accounts. Each check is examined in order that the genuineness of signature may be assured. Statements showing the transactions in each active account are sent to the disbursing officers and copies with the paid checks are sent to the auditors each month.

The Accounting Division conducts all correspondence relative to reclamation of payments in cases of forged checks, forged indorsements, and raised amounts.

The total amount involved and the number of checks, charge documents and deposits handled, the number of disbursing officers and balances to their credit at the close of the fiscal year are compared for the past two years in the statement following:

	Fiscal year—	
	1919	1920
Aggregate amount of checks paid and transfers charged.....	\$90,362,459,775.97	\$59,058,834,964.80
Total number of checks, etc., paid.....	41,313,747	27,157,845
Balances to credit of disbursing officers at close of year.....	\$1,721,990,152.63	\$1,431,470,177.85
Number of disbursing accounts at close of year.....	5,698	5,572
Aggregate amount of deposits credited in the proper accounts....	\$90,967,324,921.89	\$58,388,518,702.00
Total number of such deposits.....	532,420	502,500

Division of Issue.—Receives from the Bureau of Engraving and Printing the completed paper currency of the United States, examines and proves the same in straps of 100 notes each, after which it is put up in packages of 4,000 notes each, wrapped, sealed, and labeled with the kind of money, the denomination and the amount. Daily deliveries are made to the Cash Division of the Treasurer's office.

	Fiscal year 1919.		Fiscal year 1920.	
	Number of notes and certificates.	Total value.	Number of notes and certificates.	Total value.
United States paper currency received from the bureau and delivered to Cash Division.....	267,264,000	\$348,824,000	280,448,000	\$371,112,000

Division of Redemption.—Receives from banks and individuals soiled and mutilated paper currency of the United States sent to the Treasury for redemption; each package of money is numbered in sequence and delivered to a counter, who verifies the amounts, assorts the money by kinds and denominations and puts it up in straps of 100 notes of like kind and denomination, cancels the notes by punching, and makes report of the proceeds, after which payment is made to the remitter by shipment of currency or by directing appropriate credit. The canceled money is then cut in two pieces lengthwise and delivered to the Division of Loans and Currency of the Secretary's office for verification of the count and final destruction of the notes by maceration.

The transactions for the fiscal years 1919 and 1920 are compared in the statement following:

	Fiscal year 1919.		Fiscal year 1920.	
	Number of packages.	Total value.	Number of packages.	Total value.
United States currency received and counted.....	163,240	\$369,078,408	101,554	\$352,676,608
Amount of fit notes returned to circulation.....		166,951		17,055,000
Counterfeits detected.....		2,377		2,507
Number of notes for destruction.....		219,536,677		196,628,154

National bank redemption agency.—The National Bank Redemption Agency, a division in the office of the Treasurer of the United States, receives and handles all national-bank notes and Federal reserve currency sent to the Treasurer for redemption; keeps account of the several redemption funds, the expenses incurred on account of redemptions and apportions the same to the banks of issue in accordance with the number of notes redeemed; delivers to the Comptroller of the Currency the unfit notes redeemed, and returns to banks of issue such notes as are fit for further circulation.

The work of the agency for the fiscal year 1920 follows:

Balance on hand at beginning of year.....	\$100,161,530
Currency received:	
National-bank notes.....	\$429,174,805
Federal reserve notes.....	268,031,428
Federal reserve bank notes.....	206,683,922
United States currency.....	7,524,353
	<u>911,414,508</u>
Total.....	<u><u>1,011,576,038</u></u>

Disposition of currency:

Fit for use and returned to banks of issue—

National-bank notes.....	\$3, 324, 600
Federal reserve bank notes.....	390, 750
Federal reserve notes.....	30, 780, 650

\$34, 496, 000

Unfit for use, delivered to the Comptroller of the

Currency—

National-bank notes—	
For destruction and reissue.....	449, 278, 763
For destruction and retirement.....	23, 270, 625
Federal reserve bank notes—	
For destruction and reissue.....	228, 090, 000
For destruction and retirement.....	289, 780
Federal reserve notes—	
For destruction.....	242, 582, 997

943, 512, 165

United States currency deposited in Treasury..... 7, 524, 353

Total..... 985, 532, 518

Balance on hand June 30, 1920..... 26, 043, 520

The transactions which have been related in the foregoing were conducted with rare accuracy and promptness and offer the best proof of the capacity, fidelity, and efficiency of the officers, chiefs of division, clerks, counters, and employees of every grade in this office. With every year the privilege and duty of bearing this testimony to the character of the work of every member of the force is more grateful and more imperative.

Respectfully,

JOHN BURKE, *Treasurer.*

Hon. D. F. HOUSTON,
Secretary of the Treasury.

ADDENDA TO REPORT OF THE TREASURER.

NOTE.—Rate of expense per \$1,000 to 1915, inclusive, is for all notes. From 1900 to 1916, the rate for national-bank notes was the same for both active and retirement. For 1917 only, a rate of \$0.30183 was established for District of Columbia banks for active notes, both fit and unfit for use to adjust transportation charges.

REPORT OF THE DIRECTOR OF THE MINT.

TREASURY DEPARTMENT,
BUREAU OF THE MINT,
Washington, D. C., September 14, 1920.

SIR: In compliance with the provisions of section 345, Revised Statutes of the United States, I have the honor to submit herewith a report covering the operations of the mints and assay offices of the United States for the fiscal year ended June 30, 1920, being the forty-eighth annual report of the Director of the Mint. There is also submitted for publication in connection therewith the annual report of this bureau upon the production and consumption of the precious metals in the United States for the calendar year 1919.

OPERATIONS OF THE MINTS AND ASSAY OFFICES.

COIN DEMAND.

The fiscal year ended June 30, 1920, was another record year for the Mint Service as regards the number of pieces of coin manufactured, the domestic coinage totaling 733,583,150 pieces as compared with 434,028,458 in the prior year and 714,139,119 in the fiscal year 1917-18, the latter year having made the previous high record. As in other recent years the demand for 1-cent pieces was chiefly responsible for the large output, this year's total being 512,607,000 pieces (over 1,757 tons), compared with 343,070,300 and 445,628,201 pieces in 1919 and 1918, respectively.

The coinage executed for foreign Governments totaled, in the fiscal year under review, 76,125,334 pieces, compared with 103,114,195 and 52,748,341 pieces in 1919 and 1918, respectively. For the first time since 1916 gold coins (other than memorial issues) were executed, the value of the same being \$16,990,000.

PLANT IMPROVEMENTS.

In order to meet the enormous demand for coin made upon the Mint Service during recent years, which demand has not yet shown signs of diminishing, the director has given much time during the past fiscal year to personally devising and supervising installation of improved methods and appliances for increasing the capacity of the coinage mints. These improvements include the use of large capacity electric melting furnaces in lieu of small gas and oil burning furnaces; mechanical conveyors in lieu of hand-propelled, heavily loaded trucks; rearrangement of floor space and of machinery so as to facilitate and expedite operations; and addition of new machinery.

Partial results of these improvements are evidenced by the materially increased output of the Philadelphia Mint, where the coin manufactured exceeded the prior year's product by 46 per cent and

exceeded the output of the year 1917-18 by over 16 per cent. As compared with the 1915 record, that for 1920 gives increase of coinage output, in number of pieces, as follows: Philadelphia Mint, 468 per cent; San Francisco Mint, 904 per cent; Denver Mint, 179 per cent; combined, 446 per cent. At the Philadelphia Mint alone the output during the fiscal year just closed, in number of pieces, exceeded 3.8 times the combined output of all three coinage mints in the fiscal year 1915, the figures compared being 565,549,584 and 148,205,097 pieces, respectively. These increases were made with but 31 per cent increase in number of employees (536 on June 30, 1915, and 704 on June 30, 1920), and operating two shifts—some of the processes running 16 hours daily and others 24 hours—part of the time. At the San Francisco and Denver Mints methods similar to those in use at the Philadelphia Mint are being installed, and improvements are also being made at the New York Assay Office.

SILVER OPERATIONS UNDER PITTMAN ACT.

Subsidiary silver coin demands necessitated melting, under the terms of the Pittman Act of April 23, 1918, an additional 10,000,000 silver dollars at the Philadelphia Mint, which operation was begun December 5, 1919, and completed March 22, 1920. These dollars were allocated or sold to the Director of the Mint at face value; their manufacture into subsidiary silver coin will produce a profit of \$692,068.43. This operation gives a total of 270,121,554 dollars melted under this act.

The repurchase of silver under the terms of the Pittman Act, to replace the dollars melted, was begun the latter part of May, 1920, when the market price of silver dropped below \$1 per fine ounce, the minimum price provided in that act for Government sales and the fixed price provided for Government purchases. By June 30, the end of the fiscal year, 4,087,080 ounces, fine, had been repurchased and stored under the terms of the act. The act provides for the repurchase of the same quantity as contained in the dollars melted, about 208,000,000 ounces, fine.

While the Government will neither gain nor lose on the sale and repurchase of the silver, the producer of domestic silver gets the benefit of the fixed price mentioned above when the market price goes below that point, thus tending to stabilize domestic production.

The price of silver rose with considerable regularity from the beginning of the fiscal year until a price surpassing all definitely known records was reached, in New York, on November 25, 1919, the rise being from \$1.08 to \$1.38½. The maximum price in London, 89½ pence, was reached February 11, 1920. The principal cause for the rise appears to have been the demand in China. The lowest price of the fiscal year for other than product of United States mines was reached, in New York, on June 16, 1920, 81½ cents; in London on June 15, 1920, 44 pence. It is understood, however, that sales were made as high as \$1.42 per ounce in San Francisco.

The coining value of silver, for United States dollars, is \$1.29+ per ounce; and for United States coins below the dollar, \$1.38+ per ounce; therefore the price of silver reached the point where our principal metallic circulating medium was menaced by the prospect of going to the melting pot for realization to the holder thereof of

the profit incident to greater bullion value than face value. At this time, the Treasury, acting in cooperation with the Federal Reserve Board and the Federal Reserve banks, arranged to release silver dollars to be employed in regulating our exchanges with countries having a silver monetary standard. A copy of the public statement announcing these arrangements dated December 6, 1919, is as follows:

Announcement was made to-day that under arrangements made between the Treasury and the Federal Reserve Board, standard silver dollars that are free in the Treasury will until further notice be delivered against other forms of money to the Division of Foreign Exchange of the Federal Reserve Board, which will, through the Federal Reserve Bank of New York, cooperating with the branches of American banks in the Orient, employ such dollars in regulating our exchanges with silver standard countries.

This arrangement does not, of course, affect the redemption of outstanding silver certificates in standard silver dollars.

About 13,000,000 dollars of silver went to the Orient under these arrangements, while from November, 1919, to May, 1920, the silver dollars leaving the country totaled over 29,000,000.

The silver coins of many European and other countries are understood to have practically disappeared from circulation during this period of high silver prices. The price of silver remained above the melting point, for dollars, until early in March, 1920, then gradually receded until, in May, it went below the price of \$1, fixed in the Pittman Act for the purchase of bullion to replace the dollars melted under the terms of that act. The price for other than domestic product remained below \$1 for the remainder of the fiscal year, the lowest point, 81½ cents, being reached June 16, 1920, as stated above.

DEPOSITS OF GOLD AND SILVER.

The number of deposits received during the fiscal year 1920 has exceeded those of the prior year, but increases at New York, Philadelphia, and San Francisco were partially offset by reductions at Denver and Seattle. The increases have probably been due largely to imports, while reductions are doubtless reflections, to a considerable degree, of the decreased production from mines incident to high producing costs and a fixed selling price for gold. The price of \$1 per ounce for domestic silver, established by the Pittman Act, has resulted in the opening of additional silver mines.

REFINERIES.

The New York and San Francisco refineries operated during the entire fiscal year, while the one at Denver remained closed after February, 1920. Beginning with May, 1920, the bullion deposited at the Seattle, Boise, Helena, Salt Lake City, and Deadwood assay offices, which formerly was sent to Denver for refining, was diverted to San Francisco.

PERSONNEL.

Many experienced and valued employees, particularly those with statutory compensation, have been lost to the Mint Service during the past year by reason of the inadequate compensation which it was possible to allow. Patriotism kept them during the war, but the increasing living costs, with but very inadequate increases of compensation, have finally driven them to seek and obtain larger income

in private employ. It has been possible and necessary to make material increases in the pay of per diem employees, but the salaried employees, who were supervising and directing the work of those on a per diem basis, could not be increased beyond the small bonus of \$240 per annum also paid to per diem workers. This situation should be adequately remedied at the earliest practical date to avoid further embarrassment to the service. On June 30, 1920, 117 fewer persons were employed in the mints and assay offices than on the corresponding date of the prior year; since the above date further material decreases in the number of employees have been made.

INSTITUTIONS OF THE MINT SERVICE.

No change has been made for several years in the number of institutions operated—coinage mints at Philadelphia, San Francisco, and Denver; assay office at New York, which has had an unusually large trade in bars of fine gold; mints at New Orleans and Carson City conducted as assay offices; and assay offices at Seattle, Boise, Helena, Salt Lake City, and Deadwood, these being bullion purchasing agencies for the large institutions. Refineries were operated at the New York, San Francisco, and Denver institutions.

GOLD OPERATIONS.

The value of the gold acquired by the Government at the mints and assay offices during the fiscal year 1920 was \$224,431,664.04; United States coin received for recoinage was of value \$5,079,372.59; transfers of gold between Mint Service offices totaled \$8,841,214.55; making an aggregate of gold handled by the Mint Service during the fiscal year 1920 of \$238,352,251.18.

SILVER OPERATIONS.

Silver purchased during the fiscal year 1920 totaled 6,105,541.83 fine ounces, costing \$6,725,014.11, at an average price of \$1.10+ per fine ounce; the silver received for repayment to the depositors thereof in bars bearing the Government stamp totaled 5,654,110.33 fine ounces; the United States silver coin received for recoinage totaled 541,315.12 fine ounces, with recoinage value of \$748,318.81; silver deposited in trust by other Governments totaled 1,469,813.52 fine ounces; the transfers of silver between Mint Service offices totaled 1,838,070.65 fine ounces, making an aggregate quantity of silver handled by the Mint Service during the fiscal year 1920 of 15,608,851.45 fine ounces. The above item of silver purchased includes 4,087,079.91 fine ounces purchased under the terms of the Pittman Act.

COINAGE.

The domestic coinage of the fiscal year 1920 was of value \$46,-446,420, namely, \$16,990,000 in gold, \$19,763,600 subsidiary silver, \$4,566,750 nickel, and \$5,126,070 bronze coin. The coinage other than domestic included 325,000 gold libra blanks for Peru, 300,000 of which were made at the Denver Mint and 25,000 at the Philadelphia Mint; the Philadelphia Mint also manufactured 3,200,000 silver pieces for Venezuela, 6,135,000 silver pieces and 11,100,000 nickel pieces for Cuba, 6,492,000 nickel pieces for Salvador, 16,463,-

334 nickel blanks for Argentina, 150,000 nickel pieces and 700,000 bronze pieces for Nicaragua, and 6,825,000 bronze pieces for Siam, or a total of 51,090,334 foreign pieces made at the Philadelphia Mint. At the San Francisco Mint 14,000,000 silver pieces and 8,235,000 bronze pieces were made for Indo-China, and 2,500,000 bronze pieces for the Philippine Islands.

The seigniorage on United States coinage executed totaled \$12,-115,242.70, of which \$3,896,534.75 was on subsidiary silver coins and \$8,218,707.95 was on nickel and bronze coins. The seigniorage was about 45 per cent greater than that of the previous year, \$8,371,202.33.

STOCK OF COIN AND BULLION IN THE UNITED STATES.

On June 30, 1920, the estimated stock of domestic coin in the United States was \$1,425,767,521, of which \$898,054,788 was gold, \$268,857,494 was silver-dollar coin, and \$258,855,239 was subsidiary silver coin.

The stock of gold bullion in the mints and assay offices on the same date was valued at \$1,794,311,486.20, a decrease over last year of \$8,539,487.52; and the stock of silver bullion was 19,663,305.93 fine ounces, an increase over last year of 2,176,926.23 fine ounces.

PRODUCTION OF GOLD AND SILVER.

The production of gold and silver in the United States during the calendar year 1919 was as follows: Gold, \$60,333,400, a reduction from last year of over \$8,000,000; and silver, 56,682,445 fine ounces, a reduction from last year of over 11,000,000 fine ounces.

INDUSTRIAL ARTS.

The amount of gold consumed in the industrial arts during the calendar year 1919 was \$75,490,349, of which \$56,135,951 was new material. Silver consumed amounted to 32,700,521 fine ounces, of which 26,237,519 fine ounces were new material.

EXPORT OF GOLD COIN.

The net export of United States gold coin for the fiscal year ended June 30, 1920, was \$333,134,489.

ESTIMATES FOR THE FISCAL YEAR 1922.

Total appropriation estimates for the Mint Service for the fiscal year 1922, including the office of the Director of the Mint, amount to \$1,603,200. The appropriations for the year 1921 amount to \$1,754,180.

APPROPRIATIONS, EXPENSES, AND INCOME.

The appropriated amounts available for Mint Service uses during the fiscal year 1920 totaled \$2,022,433.04; reimbursements to appropriations for services rendered amounted to \$273,844.72, making an available total of \$2,296,277.76.

The expenses chargeable to appropriations were \$2,213,632.67; those chargeable to income, \$162,913.91; total, \$2,376,546.58.

The income realized by the Treasury from the Mint Service totaled \$12,900,604.24, of which \$12,115,242.70 was seigniorage.

ADDITIONS AND IMPROVEMENTS.

NEW ASSAY OFFICE BUILDING AT NEW YORK.

The new assay office building at New York, begun last year after many years' delay, has been completed. The building is four stories high and occupies the entire frontage at 30-32 Wall Street, with the exception of an alleyway on the west side, next to the subtreasury building, for access to loading platforms. This building will very materially relieve the unsatisfactory conditions so long prevailing at the institution, as it permits moving the administrative, clerical, and assaying divisions from the factory building, first occupied in 1911, into quarters designed and suitably equipped for their use, while much needed additional space for the melting and refining operations thereby becomes available in the older building. The new building is equipped with pneumatic tubes for carrying papers from department to department, has complete system of intercommunicating telephones, is well lighted throughout, and is designed generally to centralize the various departments.

The greatest relief afforded by the new building is in rendering available for use the splendid new bullion vaults. These large and modern vaults provide ample space and facility for safeguarding the large quantity of gold bullion, now exceeding a billion dollars in value, stored at this institution. In construction and arrangement they embody every safeguard and device that the best experts could evolve. They extend five stories beneath the street floor, a distance of some 70 feet beneath the surface and 40 feet below the water line. Access is gained by a special elevator, opening into each floor. These floors are designated as A, B, C, D, and E, from the top down; floors A, B, and C are divided into steel compartments, with shelves for distribution of bars, each compartment having a capacity of \$10,000,000 worth of gold bullion. The shelf capacity of each of these three floors is \$150,000,000. Floors D and E are undivided by compartments and will provide bulk storage for approximately \$500,000,000 each, in gold. Part of floor A will be used by the cashier as an auxiliary working vault, and floors A and B will be required for current business.

The basement floor contains, in addition to the vault approach, considerable storage room for materials; also recovery tanks for drainage from the assay and other departments.

The deposit receiving department is conveniently placed on the main or street floor, the public corridor of which faces Wall Street. This department has ample floor space, is well lighted and well arranged. Here all deposits of bullion are received, either from the public corridor or from the loading platform. A loading and receiving platform under a glass roof has been constructed in the space between the Pine Street and the new Wall Street buildings (with a movable platform for the alleyway) so arranged as to permit the most expeditious and efficient handling therefrom of all receipts not delivered by hand to the deposit weigh room, thus eliminating all unnecessary hauling of deposits. Convertible heavy wire-mesh partitions are provided for this loading platform, so that metal can be packed or unpacked fully protected and without interruption and yet under full observation of the proper officials.

The cashier's department, with a modern working vault, also faces the public corridor on the street floor. For the first time in many years these departments are adequately housed, in quarters appropriate in appearance, and with working space to correspond with the importance of the work performed. The beautiful and convenient corridor, also for the first time, affords the public access to the office through an entrance way commensurate with the dignity and importance of the office.

The second and third floors contain the offices of the superintendent, his secretary, the chief clerk, the superintendent of the melting and refining department, the accounting department, and the general office clerical force. They also contain a well-furnished office for the Director of the Mint and settlement officers.

The fourth floor is occupied entirely by the assay department, which is moved in its entirety from the old building. The equipment of this department has been brought up to date; the floor was designed specifically for the assay department, and the laboratories and weigh rooms have the very best of light, with ample space. The department, as a whole, in its physical equipment and working conditions, is very markedly improved.

Plans have been completed and will be immediately carried into execution for making the space vacated in the older Pine Street building, by the administrative, clerical, and assay departments, available for the very necessary rearrangement and improvement of the deposit melting room and the melting and refining departments.

The eighth floor of this building will be devoted entirely to the gold refinery. The present small and unsatisfactory laboratory is being removed to the fifth floor. The platinum refining cupboards are being removed, and the various refining and reducing processes for the platinum metals, heretofore carried on in the same room as the gold refinery, will be carried on elsewhere. This will permit the extension of the gold cells in such units as the future may make necessary, and also segregate the gold operations, necessary both from the standpoint of safety and of efficient operation.

The silver refinery will continue to be operated on the seventh floor, where little change will be necessary except for the removal of considerable stored material, lockers, etc., which have resulted in cramped space for the refining operations.

The sixth floor has been occupied by the machine shop, the carpenter shop, and the storeroom. It has also contained the rolls for the manufacture of gold cathode strips and the electric generators for the whole building. The result has been a very crowded and difficult working space for each of these activities. This floor is to be turned over entirely to the machine shop, including, in the space formerly occupied by the storeroom, adequate space for the manufacture of platinum ware (now grown to considerable volume), for various research departments of the Government. The change necessitates considerable alteration in the way of removal of partitions, resetting of machinery, etc.

The fifth floor was formerly entirely occupied by the assay department. The refinery laboratory, formerly on the eighth floor, will be installed in the former weigh room on the fifth floor, giving more commodious quarters, better light, and better conditions generally. It will be possible to establish and maintain here a complete refinery

laboratory, where the important research work carried on can be efficiently performed under proper working conditions. For many years the refinery laboratory force has been compelled to work under most discouraging physical conditions, and in quarters inconvenient in arrangement and absolutely unfitted for the careful and most important work carried on. This rearrangement alone will be of very great assistance and value to the melting and refining department. The remaining portion of this fifth floor (formerly occupied by the assay laboratories) will be devoted to the operations on metals of the platinum group. Heretofore, owing to crowded conditions, these important operations have been scattered throughout the building. This necessarily affected the efficiency of the operations, as well as increased the possibility of loss. The concentration of these operations (with the exception of manufacture of platinum ware) in this one space adjacent to the refinery laboratory, platinum-melting furnaces, and all other processes having to do with these valuable metals, will very greatly increase the efficiency of this work and eliminate much of the danger and possibility of loss that the old conditions created.

The removal of the superintendent's, chief clerk's, and book-keeping offices to the new building makes the fourth floor available for use as the make-up room for the melting and refining department. Formerly this division was compelled to use a part of the third floor, adjacent to the refinery melting room, where conditions as to heat and space were about as bad as could be. To fit this floor, it is necessary to remove existing office partitions, as well as the shower baths and lockers now used by the melting departments; also to remove from the second floor and install on this fourth floor the vault formerly used by the cashier. The rolls formerly in the machine shop on the sixth floor are also being installed here, thus concentrating the work of this division, so far as possible, on one floor. These changes will make a very great improvement over previous conditions.

The third floor will be used entirely by the melting room of the melting and refining department, which heretofore has been restricted to inadequate and most uncomfortable and badly arranged quarters, owing to use of part of the space by the make-up room. The furnaces, which are now built in a square around the central stack, making impossible the constant supervision of all the workers at them, will be rearranged along the sides of the room, leaving an open working space in the center. By this arrangement supervision of the work will be more easily had, the extremely bad conditions due to heat from the close proximity of one furnace to the other will be relieved and better working conditions generally secured. The vault formerly used by the make-up room will be available for use for metal in process, eliminating trucking and handling on two floors. To make these changes, it will be necessary to remove the partition wall between the two rooms into which this floor has heretofore been divided.

On the second floor the storeroom, carpenter shop, shower baths, and locker rooms for the men will be located. This floor formerly was occupied by the deposit weigh room, the cashier's, and calculators' offices. The former entrance to the building, facing Pine Street, was on this floor; this entrance will be closed and the vault

removed to the new make-up room on the fourth floor. There will also be constructed a drying room for the men's clothes. Heretofore lockers and shower baths have been scattered throughout the building wherever space would permit. This new arrangement will place the storeroom on the same floor on which goods are received, thus saving transportation to the sixth floor. The installation of a proper locker room and showers and drying room will add greatly to the comfort of the employees, and eliminate the necessity of their entering other departments than those in which they are employed. The closing of the Pine Street entrance will require that all employees enter and leave by the always guarded Wall Street door.

The sweep cellar is being improved by the installation of automatic conveyors for carrying the material from its storage place and automatically feeding it to the mill. This work was formerly performed by hand with shovels. The new process will eliminate much hard physical labor, will feed the mill more regularly, and reduce the time of operation.

Plans are under consideration for installation on the ninth floor of a more efficient system for condensation of values from furnace gases going through the stack. Heretofore the only method in use has been to intercept these discharges through a hole opening into a small room on the ninth floor, the recoveries being only such as automatically fastened themselves on the walls, ceilings, or floors of this room. The Cotrell system, with others, is now being investigated. It is certain that by the installation of a more scientific system much larger recoveries could be had than at present.

Proper ventilation for both the deposit and refinery melting rooms is a very pressing problem in connection with the changes now being made. Conditions in these two rooms are at times well-nigh intolerable. Every means to utilize the stack for this purpose have been tried, with the result of materially lessening its efficiency as a stack and not to a satisfactory extent relieving the situation so far as ventilation is concerned. The problem here is made more difficult by the close proximity of adjoining and surrounding buildings of greater height than the assay office. This problem is being studied with a view to its being solved in connection with the other changes now being made.

Nichrome muffles have been used in the assay department throughout the year and have given satisfaction, the average life being about eight months. Slight alterations being tried are expected to extend the life of the muffles.

A new stoneware flue for the boiling table has taken the place of that made from alberene stone, which had become much decomposed by the acid fumes.

PHILADELPHIA MINT IMPROVEMENTS.

My report for the last fiscal year referred to improvements under construction which would reduce labor costs, as well as facilitate the handling of metal, ingots, strips, and blanks. The ingot and strip conveying systems have been installed and in operation for some months. By this system ingots are conveyed from the melting room to the breakdown rolls 500 feet distant on the floor below. This same system is used to carry the broken-down ingots to the finish

rolls on the second floor, delivering them at a point within a few feet of the finish rolls. Since the installation of this system all hand trucking has been eliminated, the new system being economical as well as much more efficient. In this operation a labor saving of 40 per cent as compared with the old method of hand trucking has been effected.

The machinery of the rolling room has been rearranged. Under the old method the rolling mills were operated separately, requiring two men to each roll. Six mills have now been arranged in a row and connected by means of channels, through which the strips pass from one roll to another. When the strip has passed through the six rolls, it is finished and ready for the cutting presses, which are conveniently located to the last roll. This operation is handled by 3 men, against 12 in the old method of rolling. Considerable difficulty was experienced in adjusting the speed of the six rolls, as each one is driven by an individual motor. The speed of the succeeding roll, beginning with No. 2, must be slightly in excess of the one behind in order to accommodate the elongated strip. It was also necessary to perfect a flexible channel top which would, if necessary, permit of the strip bulging and at the same time prevent buckling. Bulging is principally caused by the speed of the roll ahead slightly decreasing or by a gain in speed of the roll behind, due mainly to fluctuating power. In order to avoid one strip overtaking another, we have devised a light signal which advises the operator when the strip is beyond the possibility of being overtaken. By arduous work and study of the conditions surrounding this method, all of the difficulties have been overcome, and we are now obtaining 15 per cent increase in finished strips at reduced labor costs of 75 per cent.

All other machinery in the rolling room has also been rearranged so that the metal is passed from one operation to another with the least possible handling. Shearing machinery is located convenient to the point where the strips are discharged from the rolls, and the disc-cutting presses are lined up a few feet further on. An attachment designed and built in this mint has been placed on each cutting press, which cuts the punched strips into lengths of 12 to 14 inches. Heretofore it was necessary to have a man behind each cutting press to receive and bend 8-foot punched strips into lengths suitable for the baling press. This machine automatically cuts them the desired lengths. By eliminating the old bending method one man now cares for the punched strips from all five cutting presses at a labor saving of 80 per cent.

A bucket conveying system has been installed and is operating between the rolling and cleaning rooms. This conveyer is in close proximity to the cutting presses and riddle. After being riddled the blanks are dumped into hoppers connected with the conveyer, from which they are picked up and conveyed to the annealing and cleaning room, where they are stored in elevated bins located above the annealing furnaces. These bins are connected with the furnaces by a system of tubes through which the blanks are fed to the furnaces, the feed being controlled by gate valves. After passing through the annealing furnaces the blanks are discharged into colanders which are picked up by an electric hoist and emptied into the tumbling barrels. After being cleaned they are delivered into the centrifugal driers. The old method of hand trucking has been entirely elimi-

nated in these processes at a saving of about 40 per cent in labor. When the drying process is complete the blanks are drawn from the driers into boxes which are placed on platforms. These platforms when loaded are raised with lifting trucks and taken to the milling machines. The use of these platforms obviates the necessity of unloading the blanks, as they remain on them until taken off to be milled. Hand trucking between the first and second floors in this operation has been eliminated, and the assembling of the milling machines in the east corridor in line close together, so that one operator is able to operate three machines instead of one, as was the case under the old method, has effected a labor saving of 66 per cent.

The time-consuming as well as expensive method of selecting blanks has been changed by making the selection at the cutting press by the operator who feeds the same, thus eliminating the employment of 12 operators previously engaged wholly on this work, at a saving of about \$12,000 per annum.

When milled the blanks are emptied into large platform bins. They are then passed over platform scales by use of the lifting truck, and the net weight of the blanks determined by deducting the known weight of the tare. After being weighed the bin of blanks is trucked to the coining room, where it is placed at a convenient point for coining operations, the blanks being drawn out as required through a sliding door at the bottom of the bin.

There has been installed in the coining room by our machinists an overhead carrying system, the tracks of which are run conveniently to the presses, reviewing tables, scales, and counting machines. Over the tracks of this system trucks are operated which carry large hoppers. Blanks are placed in these hoppers, which are easily conveyed from one press to another. They are fed directly to the hopper feed of the press through a slide door and tube attached to the hopper. The same system is used for gathering the finished coins and delivering to the reviewing tables, scales, and counting machines, thus obviating the necessity of handling the product in a number of small boxes as previously required.

All hand trucking and scooping blanks and coin have also been eliminated under these new processes, at a saving of 50 per cent in labor.

We have in operation six new-design electrically driven automatic counting machines with capacity of 2,000 pieces of coin per minute. Each machine is attended by one operator instead of two, as previously required in the hand counting-board method. Under this new method of counting coins a saving of 50 per cent in labor is effected over the old counting-board method, as well as an increased output of counted coin of 15 per cent.

It has been the custom for many years past to weigh all minor coinage metals, clippings, and blanks on large troy balances in drafts of 10,000 ounces each (about 600 pounds). This system has been eliminated, and we are now using platform scales delicately adjusted, on which we weigh drafts in excess of 2 tons at one time. Blanks and clippings are placed in specially constructed and weighed containers. By this means it is an easy matter to ascertain the weight of a large quantity of metal without handling it over a 10,000-ounce balance twice, as was necessary under the old method.

The seven automatic weighing machines for weighing individual blanks and coins have been transferred from the second floor to the west corridor of the first floor outside the rolling room, so arranged that one man feeds two machines instead of one. The corridor has been inclosed and a wooden floor placed over the cement to reduce the vibration to a minimum. After blanks are milled they are delivered to these scales only a few feet distant from the milling machines, which obviates the necessity of trucking them to the second floor, as they were handled heretofore, at a saving of 30 per cent labor costs.

The new 16-inch roll has been erected in the break-down rolling room and has increased the capacity of this room by 50 per cent. The two similar rolls have, up to this time, been inadequate to supply sufficient broken-down strips to keep the new chain of finishing rolls in operation. That difficulty has now been eliminated.

While the full effect of all the improvements noted in this report is not shown in the production of coin for the past fiscal year, because of the fact that many of them were not installed until late in the year, it is evident that while they were in operation their efficiency is reflected, as the domestic coinage for the year totaled 514,459,250 pieces of coin, the largest number of pieces coined in any one year in the history of the mint. The minor coinage production was the largest in the history of the mint, exceeding last year's production by 152,628,000 pieces of coin. In addition to the domestic coinage, 51,090,334 pieces of coin and blanks were executed for foreign Governments. To produce this vast coinage, the mint operated on the basis of 24 hours the greater part of the year, and even then it was unable to keep up with the demands made upon it. It is therefore necessary that every improvement which will make for increased production be made.

Improved procedure for handling copper from time of receipt until it reaches the melting furnaces has eliminated hand trucking across an open courtyard in all kinds of inclement weather, as well as other inefficient methods. As the copper comes in, it is weighed upon the yard platform scales, which are under cover; the driver then turns his truck and stops under a special elevator, which is lowered to within easy reach of men on truck to do the unloading. The bars of copper are placed on the gravity conveyer, which carries them into storage room below make-up room. From storage room there is another special elevator which will deliver the bars in make-up room, at side of scales. Here there has been installed a platform scale, and upon a truck platform bar melts are prepared for electric furnaces. Over this scale and also serving the 6-foot balance in this room is another section of overhead track. The purpose of this track is to serve the furnaces with bar metal as made up on the platform scale, and also to provide a storage supply of made-up melts under track, ready to be lifted by 1-ton chain hoists to trolley for conveyance to position near furnace for charging at a moment's notice. These improved methods and appliances have the effect of releasing men from this department for activities in other departments, thereby increasing the output of finished coin.

The installation of Northrup induction electric furnaces in the deposit melting room was ready for partial operation in March. The

complete installation consists of two 8-kilowatt and two 16-kilowatt furnaces, operating on two-phase circuit.

The smaller units have melting chambers 7 inches inside diameter by 12 inches high; the larger ones accommodate crucible capacity of about 4,000 ounces of fine silver. The 8-kilowatt units have been operating daily since March 20 on small deposits, two small crucibles being used to each furnace, which practice has been followed on the combustion furnaces for years past. The furnaces are now supplied with General Electric condensers, which hold up well to their rated capacity; since starting the furnaces there have been no delays due to condensers breaking down. Unless the character of deposits makes it necessary to flux heavily in the crucibles, the life of crucibles used in these furnaces may safely be said to be twice that of those used in gas-fired furnaces. The melting capacity per 8-kilowatt furnace on small deposits will average 100 ounces per hour, with a maximum of 1,000 ounces per eight-hour day. This would mean a total capacity of 2,000 ounces of small and what we call "good" melts per day—that is, melts not requiring fluxing or fire refining—an amount well above the present day's average. On the 16-kilowatt units we made test runs only because these furnaces were not supplied with proper condensers and equipment adapted to our special needs. The results of a test run, melting fine silver bars, were as follows: Total amount melted, 13,478.50 ounces; total time consumed, seven hours; total current used, 156.50 kilowatt-hours; pounds melted per kilowatt-hour, 5.905; average load per phase, $12\frac{1}{2}$ kilowatts. The results will be greatly improved when the capacity of furnaces is reached by having full quota of condensers (which are now being installed) using 16 kilowatts per phase instead of $12\frac{1}{2}$. The fuel cost at the rate of consumption shown above compares favorably with gas.

The Northrup induction furnace being an entirely new development, it may be well to give a general explanation as to just how the electric current is used. Connections from 3-phase, 13,000-volt city lines are made to a bank of two 40-kilo-volt-ampere static transformers, changing the service to 2-phase, 212 volts. This 2-phase current is carried by heavy cables 150 feet to the deposit melting room. Here connections are made to transformers which raise the voltage to about 6,000, at which pressure the furnaces are operated. By leading this 60-cycle current at 6,000 volts through a bank of condensers and a mercury spark gap, specially devised, the frequency of the current is raised to about 12,000 cycles. This high-frequency current is led through a copper pipe coil surrounding melting zone of furnace. Water is circulated through this coil for cooling purposes, as electricity is for heating purposes. The heating effect, however, instead of being within the metal with which the coil is composed, is induced within a conductor inside the circle of the coil. In the case of this furnace, the conductor adopted is pure graphite. A crucible of Acheson graphite is placed inside the copper helix; when the current is turned on, the crucible becomes incandescent and all materials within it are subjected to fusing temperatures. The effect of this high-frequency current is to produce extremely high temperatures, which in the case of these furnaces reaches well above $1,200^{\circ}$ C. The furnaces under operation show

no fire or heat until the two lids are raised, hence are immeasurably more comfortable to work around than any combustion fire could be.

Experts are, at date of writing, placing the last part of apparatus pertaining to the larger units, and regular, continuous service is expected soon. It is believed that there has been installed here the most modern and wonderful induction electric furnace known to science and, being a crucible furnace, its adaptation to mint work on precious metals is advantageous.

In September, 1919, we started operating the new 1-ton Rennerfelt electric furnace. The design of this furnace called for concrete columns to support the axis of tilt, which axis, being on a line with spout, permits direct pouring from furnace. The columns had formed part of the half-ton furnace design as originally installed here, but experience on this furnace showed how very much in the way these columns were. Consequently, when the new 1-ton furnace was erected, instead of these concrete supports, cast-steel overhanging frames were used, making a better mechanical design and a wonderful improvement.

Considering the manufacture of bronze ingots, this 1-ton electric furnace is the equivalent of seven gas furnaces which required for operation and care of product seven melters and four helpers. On the new 1-ton furnace, as used, we require three melters and six helpers for melting, preparing, and delivering metal to coining department. In the delivery of ingots, due to the gravity and power conveyers, all labor of trucking from melting room to scales has been eliminated. The saving by the installation and careful operation of these indirect arc furnaces, considering refractory cost, labor, and material, amounts to over 35 per cent.

The past year has brought about marked changes in the melting department as regards the handling of the metal from furnace mouth to storage in coining department. The improvements that have been installed have coordinated this part of the work with the increased melting capacity of the electric furnaces, and the system for manufacturing and handling ingots is now at once flexible, quick, labor-saving, and in line with good up-to-date practice.

The method now used for making ingots of 30 pounds is as follows: The molten metal is received from furnace in a special lined, under-surface-pouring, welded-steel ladle, in shank. The shank rests in a bale carried on a chain hoist which is hung from an eight-wheel carrier on a track above. The track forms part of the overhead carrying system, which enables ladles to be taken quickly from mouth of furnace and conveyed to pouring position by the side of each set of molds on turntables. The track installation is arranged with switches in order that ladles may be diverted from one turntable to another, or back to furnace without interfering with melters pouring into molds. Ladle shanks are now used with one butt end, in order that a single operator can negotiate his pot of molten metal from furnace to molds, and control hoist unattended by an additional man as previously. The ingots are taken from the molds and placed on a gravity roller conveyer, which taps convenient points of the pouring zone, and they are conducted to a cooling tank, through which they are carried by a power slat conveyer; after emerging from the water they are delivered by the conveyer to a point within reach of two machines, one for cutting off heavy shrink head, the other for trim-

ming fins off edges and bottom or point of ingot, one man caring for both of these machine operations, instead of a man for each machine. After this shearing the ingots are placed on a bench at the side of filers who remove by filing the loose rough edges, and place the ingots on a gravity conveyer within reach, starting them on their way to coining department, at the other end of the building. The ingots are carried the length of the building on an endless belt, until it reaches the final chute or gravity delivery to rolling room below. Here ingots are received and piled upon trucks, these trucks being held for transfer from the melting to the coining department over platform scales weighing in pounds rather than ounces, after which weighing the ingots are piled near by for stock. Since the installation of the conveying system and platform scales (weighing up to 2 tons) the work of delivering minor coinage ingots to the coining department and receiving clippings therefrom has been cut in half, with a corresponding saving of labor charge.

The changes in old and installation of new machinery during the past fiscal year have pushed the machine shop of this mint to the utmost. Many of the improvements were designed and built in the shop, and, as before stated in this report, the overhead-carrying systems in both the melting and coining rooms were completely installed by the machinists employed here. In order to increase facilities for taking care of heavy work such as coining presses, large gear wheels, roll housings, turntables, and molds, there has been installed a new 48-inch planer and a new 60-inch lathe. There has also been installed a new cutting-off saw, which cuts six bars of die steel at one cut, as compared with one bar on the old machines. The machine thus facilitates the cutting of steel for dies, the demand for which has increased tremendously for both medals and coin.

SAN FRANCISCO MINT IMPROVEMENTS.

During the latter part of the fiscal year this mint was visited by the Director of the Mint, who immediately took up the matter of interior structural changes to the building necessary for the installation of an electric furnace and a general conveyer system in the operative departments. Embodied in his plans was the idea of providing more floor space in the working rooms wherever possible so as to allow for additional equipment and expansion in the future. The work proceeded rapidly under his daily supervision and the results as set forth below have in every way confirmed his visualization of the needs of the institution.

The removal of the south wall gave to the press or coining room the space formerly occupied by a lavatory, while the removal of the west wall added what was originally part of the main corridor. These changes gave to the pressroom additional floor space amounting to 700 square feet. The cutting of an arch 14 feet wide and 13 feet high in the wall between the pressroom and the coining-department make-up room now practically throws these two rooms into one.

The removal of the vault in the northeast corner of the rolling room and the cutting of an arch 13 feet wide and 13 feet high between the rolling and the cutting rooms gave a clean sweep along the length of these two rooms after two cast-iron columns in the cutting room had been moved to the south for a distance of 5½ feet. To provide

vault space a small vault was built in the southeast corner of the rolling room.

In the old strip-annealing room the removal of four cast-iron columns made it available for use as the whitening or brightening room, and this change left the old whitening room for use as a minor coinage ingot and clipping weigh room after the door to the adjoining melting room had been enlarged to 8½ feet.

In the melting room just referred to it was necessary to also remove four cast-iron columns so that space could be found for the electric furnace.

The telephone room at the south end of the main corridor was moved to the hall immediately overhead, and a partition run across the corridor; then the cutting of an arch 14 feet wide by 13 feet high from the corridor to the melting and refining department weigh room gave additional floor space to this room of 276 square feet. The desks for the clerks were moved into adjoining offices and the room cleared for actual mechanical operations. In order to house the melting and refining department clerks, the counter in the cashier's office was shortened and swung across to the wall about the middle of the office, thus providing the necessary additional desk room for the abstract clerk in that portion of the cashier's office which formerly was used by the warrant and computing clerks.

In the basement a space was bricked off for sweeps ready for sale, and this allowed room in the sweeps cellar (where the sweeps had formerly been stored) for the building of an incinerator and the installation of a chili mill, both of which had been in another room. This last-mentioned room, being cleared, is now used as a minor coinage metal store and make-up room. The door is within 5 feet of an elevator which stops at the electric melting room on the floor above.

The electric furnace installation and the conveyer system to be installed are well under way, and a detailed account will be rendered with the next annual report.

During the fiscal year two General Electric centrifugal air compressors and a loop system of piping were installed for use in connection with the oil and gas melting furnaces. Each air compressor is direct connected to a high-speed 220-volt direct-current electric motor and has a full-load rating of 1,900 cubic feet of free air per minute, compressed to 2.5 pounds. The motors are provided with a speed-regulating rheostat to vary the speed from 2,800 to 3,850 revolutions per minute, giving an air pressure regulation from 1.5 to 2.5 pounds per square inch, with a proportionate increase or decrease of air volume delivered. The system as installed gives practically constant pressure at each furnace under all conditions of load and has eliminated the use of four belt-driven blowers with their attendant troubles and low efficiency.

Two motor-driven bottle shakers were purchased from the Philadelphia Mint for humid work in the assay department.

DENVER MINT IMPROVEMENTS.

During the fiscal year 1920 several improvements were made in the sweeps cellar. The Elspass mill was removed and a ball mill installed, with a settling tank and copper plate. Under this system the sweeps will first be run through the crusher and from there

through the ball mill into the settling tank and over a copper plate on to the Wilfley table. A new rotary dryer has also been purchased and will be installed in place of the old flat plate used for the last 10 years. These changes will make a very efficient up-to-date sweeps cellar.

Two tumbling barrels and a new centrifugal dryer have been purchased and will be installed at once in the annealing room, adding to the efficiency and capacity of that room.

INCOME AND EXPENSES OF THE FISCAL YEAR 1920.

		INCOME.	
Earnings:			
Credited to appropriations—			
Charges on foreign coinage executed.....	\$247,841.54		
Charges for manufacture of special medals.....	17,946.77		
Charges for work done for other institutions, etc.....	8,052.49		
Total earnings credited to appropriations.....		\$273,840.80	
Credited to revenues—			
Mint charges on bullion.....	383,876.25		
Proceeds of medals and proof coins sold.....	6,465.33		
Receipts from special assays of bullion and ores.....	3,772.00		
Total earnings credited to revenues.....		394,113.58	
Total earnings.....			\$667,954.38
Profits:			
Gain on bullion shipment to refineries....	\$1,874.89		
Less contra losses.....	698.89		
	1,176.00		
Surplus bullion recovered.....	50,786.44		
Proceeds of sale by-products (platinum, etc.).....	63,968.51		
Proceeds of sale of old materials...	1,473.78		
Commission on telephone calls....	2.43		
Total profits other than seigniorage.....		117,407.16	
Seigniorage on subsidiary silver coinage.....		3,896,534.75	
Seigniorage on minor coinage—			
Nickel.....	4,154,069.63		
Bronze.....	4,064,638.32		
Total seigniorage.....		12,115,242.70	
Total profits.....		12,232,649.86	
Total income.....		12,900,604.24	

EXPENSES.

Chargeable to appropriations:

Compensation of employees—

Mint Bureau, salaries appropriation.....	\$23, 208. 37
Mint Bureau, increase compensation appropriation.....	2, 548. 66
Mints and assay offices, salaries appropriations.....	237, 837. 57
Mints and assay offices, wages appropriations.....	1, 130, 654. 99
Mints and assay offices, increase compensation appropriation.....	218, 450. 71

Total compensation of employees..... \$1, 612, 700. 30

Equipment, stores, and other expenses—

Mint Bureau, contingent appropriation.....	5, 199. 27
Mints and assay offices, contingent and permanent appropriations (including \$14,164.99 wastage of gold and silver in operative departments and \$5,711.27 loss on assay value of operative sweeps sold).....	585, 135. 49
Transportation of bullion and coin between mints and assay offices, freight appropriation.....	10, 597. 61

Total miscellaneous expenses chargeable to appropriations..... 600, 932. 37

Total expenses chargeable to appropriations..... 2, 213, 632. 67

Chargeable to revenue:

Seigniorage on minor coinage—

Expenses of distributing minor coin to Treasury offices.....	158, 018. 57
Wastage of minor metals in operative departments.....	4, 895. 34

Total chargeable to revenue..... 162, 913. 91

Total expenses..... 2, 376, 546. 58

Net income of the Government from the mint service..... 10, 524, 057. 66

Total..... 12, 900, 604. 24

DEPOSITS, INCOME, EXPENSES, AND EMPLOYEES, BY INSTITUTIONS,
FISCAL YEAR 1920.

The number and value of deposits, the income (including seigniorage), the expenses of the fiscal year 1920, and the number of employees on June 30, 1920, at each institution follows:

Institution.	De- posits.	Rede- posits.	United States coining value of gold and silver received at each institution.	Income.	Expenses from appro- priations. ¹	Transpor- tation of bullion and coin.	Em- ployees June 30, 1920.

OPERATIONS OF THE MELTING AND REFINING AND OF THE COINING DEPARTMENTS, FISCAL YEAR 1920.

The aggregate quantity of metals operated upon in the above-mentioned departments of the coinage mints and assay office at New York during the fiscal year ended June 30, 1920, was 12.2 million fine ounces of gold and 68.4 million fine ounces of silver. There were also operated upon at the coinage mints 169.3 million ounces of minor coinage metal. The figures in the table following are based on the figures obtained at the settlements of the accounts.

Legal limits of wastage on the whole amount delivered by the superintendent to operative officers, as prescribed in section 3542, Revised Statutes, are as follows: Melter and refiner—gold, 0.001; silver, 0.0015; Coiner—gold, 0.0005; silver, 0.001.

WASTAGE AND LOSS ON SALE OF SWEEPS.

The value of metals wasted in the operative departments during the fiscal year ended June 30, 1920, was \$19,060.33. A loss of \$5,711.27 occurred from the difference between the assay value of the bullion contained in sweeps sold and the amount received for the same; details are given below:

Item.	Mint at—			Assay office at New York.	Total.
	Philadel- phia.	San Francisco.	Denver.		
Gold wastage:

ENGRAVING DEPARTMENT.

The engraving department at the Philadelphia mint has again been called upon for a record quantity of work.

Nearly 10,000 dies were made during the fiscal year ended June 30, 1920, averaging more than 30 dies for every working day.

To meet the great demand for domestic coins, 6,960 dies were supplied to the mints in Philadelphia, San Francisco, and Denver.

The number of dies used for foreign coinage was 1,304, Cuba, Indo-China, Salvador, and Venezuela taking the larger part of this number.

The number of medal dies made the past year has been very unusual. The War Department ordered 5,000,000 Victory medals to be made by contractors in various parts of the country, and the Fine Arts Commission prepared a design for the medal, at the same time insisting that all the dies be made at the mint in Philadelphia. This recognition of the engraving department of the Mint Service is a source of satisfaction, although the increased amount of work was very great. The making of the dies presented many difficulties which were not easily overcome and the number of dies required by the medal makers exceeded all expectations.

The demand for miniature medals for the War and Navy Departments necessitated making reductions of many of the award medal dies.

The preparation of dies for insignia and collar ornaments has again this year been an important item.

At the Philadelphia mint 357,000,000 cents were coined during the year; the average per pair of dies is more than 450,000 pieces. This result stands alone in our records, and such an average can only be obtained by the most painstaking care in the selection of the steel and in every succeeding operation until the dies are set in the coining presses.

PROGRESS OF THE NUMISMATIC COLLECTION.

Additions to the numismatic collection for the fiscal year consisted of coins, ancient and modern, medals, and decorations. In the acquisition of coins the practice has been followed of utilizing a small portion of the purchase fund for buying specimens of ancient issues. The examples of Greek coins thus acquired belong to the best period of Greek art, while the Roman bronze and silver pieces were issued, for the most part, in the first century A. D., which is the period of chief numismatic as well as historical interest.

Besides many other interesting medals there have been acquired numerous additional World War medals, so that the several hundred examples now in the cabinet furnish almost a complete medallic record of that historic struggle. The group also includes a large number of propaganda medals, both serious and satirical, and thus furnishes imperishable and unalterable material for a history of the sentiments developed and the aspirations that accompanied the operations of the war on land and sea.

The decorations acquired belong to a number of European orders whose long and notable history is now likely to come to an end. While interesting in themselves as specimens of beautiful design and for that reason of special value for such a collection as this, they are even more important as relics of those great orders.

EMPLOYEES.

The total number of persons employed in the institutions of the Mint Service on June 30, 1920, was 875.

The number of employees in each of the various departments of the principal institutions is given below:

NUMBER OF EMPLOYEES, BY DEPARTMENTS.

Institution.	General.	Engraving.	Assaying.	Coining.	Melting and refining.	Total.

ORE ASSAYS.

A comparative statement of ore assays made at the minor assay offices since 1915, shows increased use of our facilities by the mining industry as the result of reducing our charge for this service to a nominal sum. The reduction in number of ore assays in the past three years is probably due to the adverse effect on prospecting and on small producers, of increased costs without corresponding increase in returns on gold bullion, the price of which remains constant at \$20.67+ per fine ounce.

Fiscal year.	Ore assays made.	Amount of charges collected.
1915.....	1,404	\$885.65
1916.....	2,318	1,678.00
1917.....	2,842	1,931.75
1918.....	2,530	1,644.00
1919.....	1,877	1,528.00
1920.....	1,938	1,579.00

LABORATORY OF THE BUREAU OF THE MINT.

From the domestic coinage of the calendar year 1919 the assayer of this bureau tested 618 silver coins, all of which were found within the legal requirements as to weight and fineness.

The greatest deviation in fineness of silver coins above standard (the limit being 3 above or below) was 2.4, while the greatest deviation below was 2.8.

The following table summarizes the silver coins:

Fineness.	Number of silver coins.				Fineness.	Number of silver coins.			
	Phila- del- phia.	San Fran- cisco.	Den- ver.	Total.		Phila- del- phia.	San Fran- cisco.	Den- ver.	Total.
897.2.....	1			1	900.7.....	23	5	6	34
898.0.....			1	1	900.9.....	27	2	5	34

900.4.....	28	9	9	46	Average.....	899.981	899.911	899.819	899.930

Philippine coins to the number of 25 were examined, all being within the legal requirements. The work of testing certificate bar assaying throughout the service was continued, and a conference of service assayers was held at the Philadelphia Mint beginning October 21, 1919, at which a unified method for making such assays was adopted.

PROCEEDINGS OF THE ASSAY COMMISSION, 1920.

The following-named ladies and gentlemen were designated by the President as commissioners to examine and test the weight and fineness of the coins reserved at the several mints during the calendar year 1919, pursuant to the provisions of section 3547 of the Revised Statutes of the United States: Representative William A. Ashbrook; Hon. J. Edward Barry, Cambridge, Mass.; Mr. John Stewart Bryan, Richmond, Va.; Col. Richard Burgess, El Paso, Tex.; Senator Arthur Capper, Kansas; Hon. George H. Dern, Salt Lake City, Utah; Mrs. Kellogg Fairbank, Chicago, Ill.; Mr. Louis Fischer, Bureau of Standards; Hon. T. V. Gregory, Emlenton, Pa.; Dr. J. M. Henderson, Columbus, Ohio; Dr. A. R. Johnston, Reevesville, S. C.; Mr. Sedgwick Kistler, Lock Haven, Pa.; Mrs. B. B. Munford, Richmond, Va.; Mr. Joseph H. O'Neil, Boston, Mass.; Representative John M. Rose, Pennsylvania; Mr. Harry Scheeline, Reno, Nev.; Mr. Till Taylor, Pendleton, Oreg.; Mr. Samuel W. Traylor, Allentown, Pa.; Mr. R. A. Underwood, Plainview, Tex.; Mr. Garland E. Vaughan, Lynchburg, Va.; Representative Albert H. Vestal, Indiana; Mr. N. B. Wescott, Olney, Va.; Hon. Charles E. Wright, Montpelier, Idaho. The Comptroller of the Currency, the judge of the District Court for the the Eastern District of Pennsylvania, and the assayer, United States assay office, New York, were ex officio members.

The commission met at the mint at Philadelphia, Wednesday, the 11th day of February, 1920, and Hon. William A. Ashbrook was elected chairman.

The chairman, with the approval of the commission, appointed the following committees:

Committee on counting: Hon. Arthur Capper, chairman, and Mrs. Munford, Messrs. Vestal, Johnston, O'Neil, Barry, Dern.

Committee on weighing: Maj. Louis Fischer, chairman, and Mrs. Fairbank, Messrs. Vaughan, Scheeline, Henderson.

Committee on assaying: Mr. George R. Comings, chairman, and Messrs. Williams, Traylor, Rose, Underwood.

Committee on resolutions: Representative John M. Rose, chairman, and Mrs. Fairbank, Mrs. Munford, Mr. O'Neil.

Mrs. Virginia H. Carpenter was designated as secretary of the commission.

COMMITTEE ON COUNTING.

The committee on counting reported that the packages containing the pieces reserved by the several mints for the trial of coins in accordance with section 3539 of the Revised Statutes were delivered to them by the superintendent of the mint at Philadelphia, and upon comparison with the transcript kept by the Director of the Mint and the count of coins from packages selected at random from deliveries of each month at each mint, were found to be correct.

The verification of the packages being completed, they were delivered to the committees on weighing and on assaying.

The table following gives the number of pieces and value of coins counted by the committee on counting:

Denomination.	Philadelphia.		San Francisco.		Denver.		Total.	
	Pieces.	Value.	Pieces.	Value.	Pieces.	Value.	Pieces.	Value.
Silver:								
Half dollar.....	300	\$150. 00	476	\$238. 00	408	\$204. 00	1, 184	\$592. 00

Total.....			1, 722	407. 20			1, 722	407. 20

COMMITTEE ON WEIGHING.

The committee on weighing reported that they had weighed the coins shown in the list below and had found the same to be within the tolerance established by law. The coins were selected at random from those reserved for the annual assay by the mints at Philadelphia, San Francisco, and Denver.

The coins were directly weighed against a set of sealed coin weights which were accompanied by a certificate signed by the Director of the Bureau of Standards, Department of Commerce, and which gave the value of the weights in terms of the United States standard. The weighings were made on a Troemner balance supplied by the Philadelphia Mint, which was tested by the committee as to the equality of the arms, and as to its sensibility, which was entirely satisfactory.

The Philippine coins were compared with a set of weights which were first tested against the coin weights referred to above.

As a further check upon the work of the Philadelphia Mint, the set of troy weights used as standard by this mint, from 500 ounces to 0.0001 of an ounce, were carefully intercompared with one another and found to be in agreement within negligible quantities.

RESERVED COINS WEIGHED.

Denomination.	Philadelphia.		San Francisco.		Denver.		Total.	
	Pieces.	Value.	Pieces.	Value.	Pieces.	Value.	Pieces.	Value.

Total.....			30	10. 60			30	10. 60

COMMITTEE ON ASSAYING.

The committee on assaying reported that from the coins reserved from the United States mints at Philadelphia, San Francisco, and Denver samples for assay had been taken representing all denominations coined at each mint during each month of the year.

The results of assays made of the individual coins and of samples from larger numbers massed and melted are given in the schedules. From these it is seen that—

The highest assays upon the silver coinage of the different mints (the limit of tolerance being three one-thousandths) are at Philadelphia, 900; San Francisco, 900.7; Denver, 900.

Disregarding the assays upon the three low Denver coins mentioned hereafter, the lowest assays upon the silver coinage of the different mints (the limit of tolerance being three one-thousandths) are at Philadelphia, 898.4; San Francisco, 898.9; Denver, 898.4.

The highest and lowest assays upon the Philippine silver coinage at San Francisco are 750.2 and 749.2.

The committee has tested the acid used in the humid assay of silver and found it to contain only a trace of chlorine.

The balances used were also tested and found to be correct, and the committee deems the assays exhibited in the following schedules to be entirely correct:

In three deliveries, No. 3, January 14; No. 6, January 21; and No. 23, March 5, from the Denver Mint, all quarter dollars, the coins first selected by the committee, assayed below the legal tolerance. The assays were twice repeated with similar results, the assays showing 896, 896.3, 896.3.

The committee then obtained three additional coins from each of these delivery envelopes and each coin was assayed in triplicate, the results being as follows: No. 3, 899.2; 898.6; 898.6. No. 6, 899.8; 898.4; 898.5. No. 23, 899.6; 899.5; 898.5.

The committee therefore considers that the deliveries may fairly be passed as within the legal tolerance, the low fineness of the three coins originally assayed possibly being attributable to segregation in the ingot.

ASSAYS OF SILVER COINS MELTED IN MASS.

United States coins:

Philadelphia—

Mass melt—

290 dimes.....
64 quarter dollars.....

} Fineness, 900.

14 half dollars.....

San Francisco—

Mass melt—

15 50-centavos.....
30 20-centavos.....
40 10-centavos.....

} Fineness, 749.4.

COMMITTEE ON RESOLUTIONS.

The following report submitted by the committee on resolutions was unanimously adopted:

Whereas the United States Assay Commission of 1920, appointed by the President of the United States, met at the United States mint, in the city of Philadelphia and State of Pennsylvania, on the 11th, 12th, and 13th days of February, 1920, for the purposes set forth in said appointment, and in accordance with the provisions of the statutes of the United States in such case made and provided; and

Whereas the members of said commission have discharged all of the duties imposed upon them under such appointment; and

Whereas during the continuance of the meeting of the commission the members were escorted throughout the mint, and given full and free permission to inspect the equipment and observe the conduct of the vast number of employees who have so largely contributed to the successful operation of the mint; therefore, upon the completion of the duties assigned the commission, the committee on resolutions met and adopted the following for your consideration:

Resolved, That the thanks of the commission are hereby tendered to Hon. Raymond T. Baker, Director of the Mint, whose lively interest in the welfare of all employees is worthy of special mention and commendation; to Hon. A. M. Joyce, superintendent, and to Mrs. Virginia H. Carpenter, secretary, for the uniform kindness and courtesy extended at all times to the members of the commission.

Resolved, That the Director of the Mint and all officials and employees under his supervision are worthy of commendation for the excellent condition in which we found the building, the equipment, and the sanitary conditions surrounding all of the men and women who are employed in and about the building.

Resolved, That the spirit of content manifest among the employees, their willingness to perform their full duties is but an indorsement of the management of the mint and an outstanding evidence of the value of cooperation.

Resolved, That as statistics show the output of the Philadelphia mint exceeds that of all other mints combined, more space for the delicate and intricate machinery employed should be provided; this should be done in the interest of efficiency and safety to employees.

Your committee beg to suggest that the peculiar kind of service rendered by the employees of the mint commands a greater return for the skill demanded, and we recommend that the schedule of wages and salary, which in some instances has remained the same for a period of more than 37 years, be submitted to the proper authorities with a view of providing a basis of pay commensurate with the service rendered.

Resolved, That we extend our thanks to the splendid body of men and women who are employed in the mint for their kindness in assisting the members of the commission in acquiring some knowledge of the modern methods employed in the coinage of silver and gold.

In expressing his pleasure in serving on the commission, Chairman Ashbrook announced that he had served six times as a member of the Assay Commission and that he had never enjoyed a meeting more, which might be due to the fact that there were two ladies on the commission, in response to which Mrs. Fairbanks and Mrs. Munford each expressed their pleasure at being selected as members of the commission, the work of which they had found interesting and instructive, in addition to which it was a gratification to know that women were to share in men's work as well as in their pleasure, and hoped the innovation would be carried out in future commissions.

ASSAY COMMISSION MEDAL.

The Assay Commission medal, made in the engraving department of the mint at Philadelphia, was designed by the engraver, Mr. George T. Morgan. The obverse bears the portrait of the President of the United States. The design for the reverse is a seated figure, showing dignity with conscious power and repose. In her right hand she has a sword and in her left an olive branch. The legend is Victory and Peace.

Each member was presented with one of these medals, which bear the usual inscription denoting that the medal is made to commemorate the meeting of the Annual Assay Commission, the name of the recipient being engraved on the periphery.

The foregoing report, covering the operations of the mints and assay offices of the United States for the fiscal year ended June 30, 1920, is respectfully submitted.

RAYMOND T. BAKER,
Director of the Mint.

HON. DAVID F. HOUSTON,
Secretary of the Treasury.

Salvador changed Jan. 1, 1920, from silver peso to gold colon with value of \$0.50.

VALUES OF FOREIGN COINS.

The following values, calculated by the Director of the Mint, were proclaimed by the Secretary of the Treasury under the provisions of section 25 of the act of August 27, 1894, as the basis for estimating the value of foreign merchandise exported to the United States during the quarter beginning October 1, 1920:

Country.	Legal standard.	Monetary unit.	Value in terms of United States money.	Remarks. ¹	
Argentine Republic....	Gold.....	Peso.....	\$0.9648	Currency: Paper, convertible at 44 per cent of face value; exchange rate, gold \$0.8450.	
Austria-Hungary.....	..do.....	Krone.....	.2026	Exchange rate about \$0.0044=1 krone.	
Belgium.....	Gold and silver.	Franc.....	.1930	Member Latin Union; gold is actual standard; exchange value \$0.0705.	
Bolivia.....	Gold.....	Boliviano.....	.3893	12½ bolivianos equal 1 pound sterling; exchange rate about \$0.3175	
Brazil.....	..do.....	Milreis.....	.5462	Currency: Government paper; exchange rate about \$0.1775 to the milreis.	
British Colonies in Australasia and Africa.	..do.....	Pound sterling.....	4.8665		
Canada.....	..do.....	Dollar.....	1.0000	Exchange rate about \$0.9025.	
Central American States:					
Costa Rica.....	..do.....	Colon.....	.4653	Exchange rate \$0.2666=1 colon.	
British Honduras.....	..do.....	Dollar.....	1.0000		
Nicaragua.....	..do.....	Cordoba.....	1.0000	Exchange rate \$0.98.	
Guatemala.....	} Silver	Peso.....	.6864	{ Guatemala: Currency, inconvertible paper. Honduras: Currency, bank notes.	
Honduras.....					
Salvador.....	Gold.....	Colon.....	.5000	Exchange rate about \$0.4807.	
Chile.....	..do.....	Peso.....	.3650	Currency: Inconvertible paper; exchange rate about \$0.1612.	
China.....	Silver.....	Tael.....	Amoy.....	1.1252	The tael is a unit of weight, not a coin. The customs unit is the Haikwan tael. The values of other taels are based on their relation to the value of the Haikwan tael. The Yuan silver dollar of 100 cents is the monetary unit of the Chinese Republic; it is equivalent to 0.644+ of the Haikwan tael.
			Canton.....	1.1218	
			Cheefoo.....	1.0762	
			Chin Kiang.....	1.0992	
			Fuchau.....	1.0408	
			Haikwan (customs).....	1.1449	
			Hankow.....	1.0528

¹ Gold and silver certificates not included, as they represent these metals, dollar for dollar.

² State bank figures only.

³ Fluctuates with price of silver.

⁴ All except \$4,246,000 are German marks.

⁵ Monetary standard not established.

⁶ Shanghai stock only.

⁷ Government Currency Department only.

NOTE.—Figures given represent each country's stock at the end of the year, except where otherwise indicated. Population figures are from the Statistical Abstract of the United States, 1917. Blanks indicate no figures available, rather than no stock. Gold held abroad as follows, not included in above figures: Argentina, \$96,062,428; British Honduras, \$250,000; Ecuador, \$4,986,545; Netherlands, \$18,626,670; Roumania, \$95,289,973; Egypt, \$15,831,811; France, \$393,160,300; Haiti, \$500,000; Straits Settlements, \$21,479,267.

Monetary stocks of the principal countries of the world—Continued.

END OF CALENDAR YEAR 1919.

[Stated in United States dollars.]

¹ Average price, per ounce 1.000 fine, of bar silver in New York.

Production of gold and silver in the world since the discovery of America.

[From 1493 to 1885 is from a table of averages for certain periods, compiled by Dr. Adolph Soetbeer; for the years since, the production is the annual estimate of the Bureau of the Mint.]

Period.	Gold.		Silver.		Percentage of production.			
	Annual average for period.		Total for period.		By weight.		By value.	
	Fine ounces.	Value.	Fine ounces.	Value.	Gold.	Silver.	Gold.	Silver.

REPORT OF THE REGISTER OF THE TREASURY.

TREASURY DEPARTMENT,
OFFICE OF REGISTER OF THE TREASURY,
Washington, September 30, 1920.

SIR: I have the honor to submit the following report of the Register's office for the fiscal year ended June 30, 1920.

While no great war loans were floated during the fiscal year 1920, as in previous years, the number and amounts of transactions in this office on account of United States securities reached enormous figures. Prior to February 9, 1920, the Register's office handled all outgoing securities on account of the public debt as well as all incoming securities after the same had been handled by the Division of Loans and Currency. Subsequent to the date named, incoming securities only have been physically handled by this office. Outgoing securities have been handled since February 9, 1920, by the Division of Loans and Currency only, after their receipt from the Bureau of Engraving and Printing. This was in pursuance of the Secretary's order of January 6, 1920, which is adverted to more fully on another page of this report.

The figures showing the retirements of securities reflect in accurate measure the enormous transactions which have been and are now taking place in the department on account of the war debt of the United States. The tabulated statements which form a portion of this report set forth these matters in detail.

The securities issued by the United States and later redeemed, including bonds, notes, certificates of indebtedness, war-savings certificates and interest coupons are not finally paid until they reach the Register's office and receive appropriate examination. All such securities, whether paid by the Treasurer of the United States direct or through Federal reserve banks, are charged against the Treasurer's account, and the amounts are included in his monthly statement of account covering payments on the public debt. After examination of the securities the Register executes a certificate setting forth the classes and amounts thereof and forwards it to the Auditor for the Treasury Department. Securities so retired (except interest coupons) effect a reduction in the principal of the public debt and may be divided into five general classes: (a) Those which have matured and are payable on presentation; (b) those which have been purchased by the Secretary of the Treasury under provisions of law for the sinking fund or other retirement account; (c) those received on account of estate or inheritance taxes under the provisions of the act of Congress approved September 24, 1917, as amended; (d) those which are payable before the designated maturity date at the option of the holder, as in the case of war-savings stamps attached to war-savings certificates; (e) those which are surrendered for the benefit of the United States, as in cases where United States bonds, etc., are received by the department as donations or as contributions on account of conscience.

BONDS REDEEMED.

United States matured bonds received on redemption account during the past fiscal year, amounted to \$441,170.

It may be interesting to note that \$2,080 belonged to old loans issued many years ago during the Civil War period. Notwithstanding the lapse of time the Government is still receiving bonds or certificates of many of the old loans for redemption. In some cases the accrued interest on these securities to maturity is greater than the principal amount.

BONDS AND NOTES PURCHASED BY THE SECRETARY.

Liberty bonds and Victory notes purchased by the Secretary of the Treasury under the act of September 24, 1917, as amended, and examined in this office during the fiscal year, aggregated \$1,220,852,000 as compared to \$550,916,700 in 1919 and \$76,641,500 in 1918. Full details of these purchases, showing loans and denominations may be found in subsequent pages of this report.

WAR-SAVINGS CERTIFICATES.

War-savings certificates, bearing one or more war-savings stamps, are redeemable at post offices upon demand after 10 days' notice, according to the regulations of the Treasury Department. Treasury savings certificates (war-savings certificates in the denominations of \$100 and \$1,000) are redeemable at the Treasury Department before maturity, in accordance with the regulations. The tabulated figures show that war-savings certificates to the value of \$198,225,425.81 were redeemed during the fiscal year 1920, while \$133,757,849.56 were redeemed in 1919 and \$2,971,967.80 in the fiscal year 1918. There is also given on another page a table showing redemptions of war-savings securities by States. War-savings certificates have been issued in three series; one series for each of the calendar years 1918, 1919, and 1920.

War-savings certificates are divided into two classes, registered and nonregistered. The figures compiled by this office show 31.6 per cent of the certificates redeemed in the fiscal year 1920 to have been in registered form. Under the department procedure, registered war-savings certificates are separated from nonregistered certificates. The former are canceled and placed in a permanent file for reference, while the nonregistered certificates are canceled and set aside for early destruction.

TREASURY CERTIFICATES OF INDEBTEDNESS.

The redemptions of certificates of indebtedness are shown in detail on another page. Altogether 65 regular issues of certificates have been sold, the first issue in April, 1917, which bore 3 per cent interest, and the last issue of the fiscal year 1920, in June, 1920, which bore 6 per cent. The tabulation in this report shows that the certificates of indebtedness retired on redemption account during the year amounted to 1,205,822 pieces and aggregated at face value \$15,588,704,458.53. Some of these were accepted in payment of

income and profits taxes, while others were received in payment for Victory notes or other certificates of indebtedness. In such cases the retired certificates were treated as an ordinary cash redemption, except that the proceeds were applied immediately in payment for other interest-bearing obligations, or in payment of taxes, as the case might be.

BONDS AND NOTES RECEIVED ON ACCOUNT OF ESTATE OR INHERITANCE TAXES.

The act of September 24, 1917, as amended, authorized the acceptance, at par, of certain Liberty bonds in payment of estate and inheritance taxes, where the decedent had owned such bonds for at least six months before his death. Under the act approved March 3, 1919, this provision was extended to 4½ per cent Victory notes. This office received \$3,189,400 of bonds and notes during the last fiscal year on this account. Of this amount, \$2,873,850 were in coupon form and \$315,550 in registered form. Details as to loans, etc., and comparative figures of the previous years are found on a subsequent page.

PAID INTEREST COUPONS.

Following the issue of millions of the various Liberty bonds and Victory notes in coupon form, the department has been paying large numbers of interest coupons from these bonds and notes since the first coupon of the first Liberty loan matured on December 15, 1917. The first coupon on the last of the five great war loans (the Victory Liberty loan) matured December 15, 1919, so that in the fiscal year 1920 the department has felt the pressure of incoming coupons from all of these loans. The total number of coupons paid in the past year aggregate 132,428,930 pieces, with a total redemption value of \$792,412,576.64. This compares with 90,076,522 pieces amounting to \$415,166,709.12 in 1919 and 18,733,629 pieces and \$104,930,277.84 in 1918. The enormous increase in coupons received may best be illustrated by recalling that the total number received for the fiscal year ended June 30, 1917, was 445,764 pieces, and the aggregate value \$2,207,124.90. The total number of coupons redeemed from December 15, 1917 (the date of the first Liberty loan coupon), was 241,009,515 pieces, aggregating \$1,311,127,062.50.

TOTAL SECURITIES PAID.

The total securities of the United States redeemed and retired on account of the principal of the public debt during the fiscal year 1920, and examined and filed in this office, aggregate \$17,013,309,244.34, or 48,064,441 pieces. Of these securities, \$7,824,325,908.84 were in registered form, while \$9,188,983,335.50 were in coupon or bearer form. It should be noted that the greater part of these retirements comprised certificates of indebtedness.

SECURITIES RECEIVED FOR CREDIT TO FISCAL AGENCY ACCOUNTS.

In handling the enormous transactions incident to financing the war, the Treasury Department has utilized the Federal reserve banks as fiscal agents of the United States. The Federal reserve banks

make exchanges of coupon bonds of one denomination for those of another, and accept Liberty bonds and Victory notes for conversion, in order to meet the convenience of their member banks and the general public and facilitate transactions. They also transmit to the department coupon bonds tendered for exchange into registered bonds and registered bonds submitted to them for transfer of ownership or exchange for coupon bonds. The securities received by them from the public in exchange for other bonds paid out (or to be issued) are forwarded by them to the department for credit to appropriate fiscal agency account. Such securities have been received in large amounts during the past fiscal year. Upon verification of such remittances the Federal reserve banks receive credit in their fiscal agency account for the amounts returned. During the year 23,598,233 pieces, aggregating \$1,955,689,500, were sent in for credit on denominational exchange account; 5,543,797 pieces, or \$1,635,296,600, for credit on conversion account, and 2,528,735 pieces, or \$2,536,895,500, on account of returned stock—that is, unused securities no longer required by the banks in their transactions.

EXCHANGE OF TEMPORARY BONDS FOR PERMANENT BONDS.

The Federal reserve banks were authorized by the Secretary to receive from member banks and others temporary coupon bonds of the Liberty loans and to deliver in exchange therefor permanent bonds according to the regulations of the department. The effective date for beginning these exchanges was set for March 15, 1920. Upon receipt of these temporary bonds, Federal reserve banks cancel and forward them directly to this office, where they are verified and credit given in temporary exchange account. The number of temporary coupon bonds outstanding on March 15, 1920, was approximately 48,100,000, with an aggregate face value of more than \$11,000,000,000. The total number of temporary bonds received by the banks and returned to the department up to June 30, 1920, aggregated 9,899,615 pieces, or \$2,307,468,800. The amount of work yet to be done in this particular line may be estimated from these figures.

War-savings stamps and thrift stamps and certificates of indebtedness as well as interim certificates issued on account of the first Liberty loan are received for credit from Federal reserve banks, while war-savings stamps and thrift stamps are also received from post offices. Interest coupons are received from Federal reserve banks for credit in cases where they have been detached in adjusting interest on exchanges or conversions of bonds. Data as to these items will be found on a subsequent page.

The total of all securities handled during the fiscal year for credit to fiscal agency accounts aggregated \$9,745,089,327.25 face value, or 85,482,910 pieces, excluding interest coupons and canceled registered bonds delivered by the Division of Loans and Currency.

TOTAL SECURITIES RECEIVED FOR ALL ACCOUNTS.

The total securities of all classes (except interest coupons) received by the Register's office during the fiscal year 1920 from all sources and for all accounts amounted to \$27,698,312,936.59, or 134,942,389

pieces. This may be compared to the fiscal year 1919, when \$23,408,359,244.56 and 122,695,774 pieces were received, and the fiscal year 1918, when the receipts amounted to \$12,561,755,532.80, or 6,285,405 pieces.

SECURITIES IN THE FILES.

All securities on file in the custody of this office are properly safeguarded and the various vaults are under the joint control of two employees of the office in each case.

IMPROVED METHODS IN THE PUBLIC-DEBT WORK.

Mention has been made heretofore of the changes made pursuant to the Secretary's order of January 6, 1920, in the methods of handling public-debt securities. A brief review of this matter may be of interest.

Prior to the reorganization of the public-debt work, as directed in the Secretary's order, the physical examination of all outgoing securities was made in the Register's office as well as in the Division of Loans and Currency, which division made deliveries to the Federal reserve banks and in some cases direct to the public. Likewise all incoming securities were first handled by the Division of Loans and Currency and afterwards by the Register. These incoming securities included all bonds, etc., redeemed or received for credit to fiscal agency accounts. As all outgoing securities are examined by the Bureau of Engraving and Printing and by the Division of Loans and Currency immediately after receipt from the bureau, it was found that if the Register's examination were eliminated there would still remain two independent examinations. The third examination it was noted rarely found any discrepancy and introduced the risks incident to a third handling. On the other hand, as all incoming securities were examined before shipment by the Federal reserve banks, it was seen that an examination by the register would insure for all such securities at least two independent examinations before credit was passed in any case. The efforts of the Division of Loans and Currency and the register's office at that time were chiefly directed toward the duplicated handling of outgoing securities. On incoming work both offices were greatly behind.

Following the Secretary's order, the handling of outgoing securities was discontinued in the Register's office on February 9, 1920, while the handling of incoming securities was abolished in the Division of Loans and Currency. Preparation had been made to employ 500 additional clerks in the Register's office in order to handle the public-debt work. By reason of the changes above noted, the department was able to avoid any additional employments for the public-debt work. Instead, 496 clerks engaged in handling work relating to incoming securities in the Division of Loans and Currency were transferred to the Register's office with their work. Simultaneously a force of 120 clerks engaged in handling outgoing work in the Register's office was transferred to the Division of Loans and Currency, where their services were required. This cutting out of duplication resulted in the saving of the salaries of more than 500 employees and greatly accelerated the movement of both outgoing

and incoming securities. Efficiency has been promoted in both offices by the changes made. At the same time it is felt that no necessary safeguards have been sacrificed in connection with the handling of the public-debt securities.

The Secretary's order provided that the Register's office should keep controlling accounts of coupon bonds prepared for issue and of registered bonds issued, based on reports from two independent organizations having to do with these issues. In addition the Register receives and files (under the order referred to) all registered and coupon bonds against which other registered bonds are issued. These canceled bonds are verified in this office and checked against the reports of new issues.

In December, 1919, the Secretary approved a change in the methods of handling paid interest coupons.

Under the old system, the coupons paid in any particular month were arranged according to loans, denominations, and serial numbers, and then entered, piece by piece, in a numerical register. The latter process was very slow, the average number of coupons entered daily being less than 2,000 per clerk. Under the new method, the arrangement is carried a step further and permits the arrangement of all coupons of a given loan and denomination and their inclusion in a numerical file. Immediately after audit, and before arrangement, however, the coupons are passed through an electric stamping machine which stamps on the back of each coupon the data previously entered in the numerical registers, namely: Paying agency (Federal reserve bank or subtreasury), and the date of payment. In addition, the word "Paid," in large letters, is stamped on the coupon by the same operation. There are 10 of these machines in operation at this time. Each machine with an operator and one assistant will stamp 50,000 coupons per day, or, as many coupons as could be registered under the old system by 25 clerks. The coupons are filed in numerical sequence, and are readily referred to for any information as to their payment. Upon approximate completion of the file, the coupons are destroyed after recordation is made of missing numbers. Under the old system, reference was first made to the numerical register, and in most cases it was necessary also to refer to the particular coupon concerning which information was sought.

The new method, besides being more economical, gives promise of greater speed in handling coupons than was possible under the old system, and every effort is being made to bring this part of the public-debt work to a current status as soon as possible.

Since December 1, 1919, an up-to-date system of accounts has been installed in the Register's office. In addition to putting in controlling accounts as directed by the Secretary, and heretofore referred to, adequate bookkeeping records have been installed in each division and section of the office. From these books it will be possible at all times to furnish accurate and up-to-date information as to the retired securities of the Government.

With the Secretary's approval, a complete reorganization of the office, begun in January, was completed in April, 1920, and the office divided into the following administrative units—eight divisions, namely: Chief clerk, accounts, paid securities, canceled securities,

interest coupons, numerical records, registered files, vaults and files, and two independent sections, inquiries and efficiency records.

Constant effort has been made since I assumed my present duties to promote cordial cooperation between this office and other fiscal units of the Treasury Department, especially those having to do with the public-debt work. I am gratified to report that by reason of the splendid spirit manifested in other units of the public-debt service as well as by the personnel of this office, the outlook for greater efficiency and more effective work in this branch of the department is most encouraging.

It is only fair to state in connection with the improvements made in methods of handling public-debt transactions, that the credit, in large measure, for working out the changes, before they were submitted for the Secretary's consideration, belongs to Mr. William S. Broughton, formerly Chief, Division of Loans and Currency and now Commissioner of the Public Debt.

STATUS OF WORK IN THE REGISTER'S OFFICE.

The work of the office is in a favorable position, excepting the arrangement and filing of interest coupons and the posting of the numerical records of coupon bonds. Indeed, the other lines of work may be said positively to be on a current basis. Authority has been granted for the maintenance of a force for two months, from October 1, of 150 clerks in excess of the estimated permanent requirements in order that special help may be available on the work in arrears. Prior to November, 1919, when the Register's office moved to its present location (119 D Street NE.) the office did not have sufficient space nor clerks for the successful prosecution of the work assigned to it. Some of the work was in arrears, and during the stress of the war period no annual report had been made for the fiscal years 1918 and 1919. Following the Secretary's instructions, reports for these years were prepared and submitted as early as practicable after I assumed charge of the office. They will be published as addenda to the 1920 report.

In preparing the reports for 1918 and 1919, the long-standing practice was followed of reporting only securities received by the Register within the fiscal year. This necessitated the closing of the accounts before all items included in the Treasurer's public-debt account and the fiscal agency accounts for the year had been received. In the 1920 report the accounts in this office were held open until all items that had been properly included by other fiscal offices up to June 30, 1920, had been received and audited. The result is that the Register's books have been closed in harmony with other bureaus having to do with the public-debt work. In comparative tables covering previous fiscal years revised figures for those years have been used instead of the partial figures which necessarily appear in some instances in the former reports owing to the early closing of the fiscal year accounts as above explained.

The figures in this report are final audit figures and agree with the reports of forwarding offices, except where necessary deductions or adjustments have been made and securities returned for correction or repayment.

RECOMMENDATION.

Under the law as construed by the Attorney General in 1878 no relief can be granted to persons whose interest coupons are destroyed after having been detached from the United States bonds to which they belong. Destroyed coupon bonds are replaced or redeemed upon receipt by the department of proper proof and an approved bond of indemnity. In the event the bond appears in the department for payment reimbursement through the bond of indemnity is secured. Numerous requests reach the department from owners of United States bonds, who seek relief for coupons alleged to have been lost or destroyed. I believe that a more liberal policy in this connection, looking toward relief on account of detached destroyed coupons, would be of great interest and benefit to the public and would result in little risk of loss to the Government. It is assumed, however, that action by Congress would be necessary.

OFFICE FORCE.

On June 30, 1919, there were 440 employees in the Register's office; on June 30, 1920, there were 1,092 employees. At the outbreak of the war the entire force consisted of 19 persons. This increase of personnel is due entirely to the great volume of public-debt transactions, and the increase of force, great as it has been, is not at all comparable to the enormous increase in the work of the office.

During the period of my incumbency, from November 21, 1919, to the date of this report, the chiefs of divisions and other supervisors and the employees in the office of every grade have been diligent, painstaking, and efficient in the performance of responsible tasks assigned to them. It is a duty as well as a sincere pleasure to record my appreciation of their support.

Respectfully,

W. S. ELLIOTT,
Register of the Treasury.

Hon. DAVID F. HOUSTON,
Secretary of the Treasury.

STATISTICAL STATEMENTS.

ADDENDA.

A.

TREASURY DEPARTMENT,
OFFICE OF REGISTER OF THE TREASURY,
Washington, April 3, 1920.

SIR: In accordance with directions contained in the letter of Hon. Carter Glass, Secretary of the Treasury, dated November 22, 1919, I have the honor to submit the following report of the Register's office for the fiscal year ended June 30, 1918.

The year, which began less than three months after the declaration of war against Germany, was marked by the two greatest achievements in war finance ever undertaken by the United States up to that time—the flotation of the second Liberty loan in November, 1917, and the third Liberty loan in May, 1918. This office completed and delivered to the Division of Loans and Currency for distribution 15,948,000 coupon bonds, amounting to \$4,622,000,000 par value of the second Liberty loan during the fiscal year, and 22,896,000 coupon bonds aggregating \$4,429,200,000 of the third Liberty loan. First Liberty loan $3\frac{1}{2}$ per cent coupon bonds completed and likewise delivered during the year amounted to 4,903,000 pieces, aggregating \$1,474,300,000. Other Liberty loan bonds (4 per cent and $4\frac{1}{4}$ per cent) prepared for conversion account made the total coupon bonds completed and delivered by this office 51,204,000 pieces, aggregating \$11,785,300,000. United States bearer certificates of indebtedness completed and delivered for issue in anticipation of bond payments and internal-revenue payments were 1,045,836 pieces, aggregating \$7,082,653,000. Registered bonds examined, sealed, and delivered for issue to subscribers amounted to 834,445 pieces and \$719,578,700. Canceled coupon bonds of the Liberty loans received for audit and file during the fiscal year amounted to 326,877 pieces, a total par value of \$57,314,500. Paid interest coupons received from the Treasurer of the United States totaled 5,978,846 pieces, amounting to \$29,413,056.44. The total number of coupons on file June 30, 1918, was 21,145,601 and the face value thereof \$94,727,983.40. Details relative to these and other matters connected with public-debt transactions are set forth in Tables I to XVII submitted herewith.

Possibly it would not be inappropriate to mention certain changes made during the year 1918 in the methods of handling the paid public debt securities. Prior to the war all such securities (except interest checks) including interest coupons, bonds, and certificates of indebtedness were forwarded to the Auditor for the Treasury Department by the Treasurer of the United States for examination, in settlement of the Treasurer's monthly public debt account. Interest checks were forwarded to the Register for the so-called administrative examination, after which they were sent to the auditor. From the auditor

the securities (except interest coupons and interest checks) were forwarded to the Division of Loans and Currency for examination and thence to the Register for final examination and file. The coupons were forwarded direct to the Register by the auditor. Owing to the enormous volume of coupons to be presented from the Liberty bonds, the question of eliminating the auditor's handling of them was considered. A plan, agreed to by the auditor (with the approval of the Comptroller of the Treasury), the Register, and the Treasurer, was approved by the Secretary and provided that the coupons should be sent by the Treasurer direct to the Register, who should examine them and certify as to the amounts and classes thereof, the auditor to accept the Register's certificate in lieu of actual coupons in settling the Treasurer's account.

The new order became effective in December, 1917, upon the maturity of the first Liberty bond coupon and has saved the salaries of a large force of clerks, who otherwise would have been necessary in the auditor's office, besides hastening the final filing of the coupons in the Register's office. Likewise, with the Secretary's approval, it was determined that paid interest checks should be delivered direct to the auditor and the examination by the Register should be discontinued. It would appear proper to state that this new arrangement, which also involved considerable changes in the method of handling these vouchers in the Division of Loans and Currency and in the Treasurer's office, resulted in the elimination of much work in these two offices, as well as in the office of the Register of the Treasury, with a small increase, relatively speaking, of the auditor's work. The effective date of this change was May, 1918.

It was also determined that all paid securities representing the principal of the public debt should be delivered by the Treasurer direct to the Chief of the Division of Loans and Currency, who, after examination, should send them to the Register for final examination and file, the two officers to execute a certificate for the auditor's use in settling the Treasurer's public debt account. This certificate was used in lieu of the actual physical handling of these securities by the auditor. This order, with the Secretary's approval, became effective as of April, 1918, and subsequent redemptions of securities by the Treasurer have been handled in this manner.

The changes above enumerated, while contrary to the long-established usage, proved effective and satisfactory and the result is a saving of several hundred thousands of dollars annually in the cost of handling public debt securities.

At the outbreak of the war the Register's office consisted of 19 employees. On June 30, 1918, the force had increased to 270, and was even then inadequate to handle the large and increasing volume of important work being placed upon the office by reason of the enormous public debt transactions.

Respectfully,

W. S. ELLIOTT,
Register of the Treasury.

Hon. DAVID F. HOUSTON,
Secretary of the Treasury.

STATEMENTS.

- I. Liberty loans: United States coupon bonds examined, sealed, recorded, and delivered to the Division of Loans and Currency during the fiscal year 1918.
- II. Liberty loans: United States registered bonds examined, sealed, signed, and delivered to the Division of Loans and Currency during the fiscal year 1918.
- III. Certificates of indebtedness received, examined, recorded, and sealed during the fiscal year 1918.
- IV. Special certificates of indebtedness received, examined, sealed, and signed during the fiscal year 1918.
- V. Loans other than Liberty loans: New issues—bonds and notes received, examined, sealed, and signed during the fiscal year 1918.
- VI. Loans other than Liberty loans: Amount of bonds and notes received, examined, sealed, and signed during the fiscal year 1918.
- VII. Liberty loans: Canceled coupon bonds received, audited, and filed during the fiscal year 1918.
- VIII. Loans other than Liberty loans: Transactions of coupon bonds, notes, and certificates during the fiscal year 1918.
- IX. Loans other than Liberty loans: Amount of bonds received, examined, and canceled during the fiscal year 1918.
- X. Loans other than Liberty loans: Redemptions of loans current in fiscal year 1918.
- XI. Loans other than Liberty loans: Coupon bonds of active loans outstanding June 30, 1918.
- XII. Loans other than Liberty loans: Registered bonds and notes of active loans outstanding June 30, 1918.
- XIII. Loans other than Liberty loans: Coupon and registered bonds of active loans outstanding June 30, 1918.
- XIV. Debt on which interest has ceased.
- XV. Paid interest coupons of United States bonds and notes delivered to Register of the Treasury by Treasurer of the United States.
- XVI. Paid interest checks on registered bonds received from the Treasurer of the United States, given an administrative examination and forwarded to the Auditor for the Treasury Department during the fiscal year 1918.
- XVII. Paid interest checks received from the Auditor for the Treasury.

TREASURY DEPARTMENT, OFFICE OF REGISTER OF THE TREASURY, *Washington, April 6, 1920.*

SIR: In compliance with the letter of Hon. Carter Glass, Secretary of the Treasury, under date of November 22, 1919, directing that certain fiscal-year reports be prepared and submitted, I have the honor to submit the following report of the Register's office for the fiscal year ended June 30, 1919.

The enormous public-debt transactions of the Government as they touch this office are reflected in the Tables I to XXVI, hereto attached. The figures, both as to securities prepared for issue and those received for redemption and cancellation, show large increases over figures on like account for the previous year. Like the previous year, the fiscal year 1919 was marked by the flotation of two great loans on account of the war against the Central Powers of Europe. The fourth Liberty loan, which was the largest of all the great Liberty loans, was carried "over the top" in October, 1918, while the Victory Liberty loan was placed in April-May, 1919. On account of the fourth Liberty loan this office completed and delivered to the Division of Loans and Currency for distribution the enormous total of 35,340,000 coupon bonds, with an aggregate face value of \$7,108,500,000. Of this number, 20,000,000 pieces were of the \$50 denomination. On account of the Victory Liberty loan there were prepared during the fiscal year, including both the $3\frac{3}{4}$ and the $4\frac{1}{2}$ per cent issues, 17,195,600 pieces with a total par value of \$5,202,400,000. Coupon bonds prepared for issue on account of previous Liberty loans, including those on conversion account, brought the total coupon bonds prepared for issue to 71,392,800 pieces, with a total face value of \$16,776,800,000. Registered bonds of the fourth Liberty loan examined, sealed, and transmitted to the Division of Loans and Currency for delivery amounted to 2,067,995 pieces, or nearly two and one-half times as many registered bonds as were prepared during the previous fiscal year on account of all the Liberty loans then outstanding. The total number of registered bonds of the Liberty loans prepared for delivery to subscribers during the fiscal year 1919 was 4,369,470, with an aggregate par value of \$2,299,903,250.

Certificates of indebtedness examined, sealed, and prepared for issue during the fiscal year amounted to 2,881,456 pieces, or \$16,527,323,500. Of these, 636,312 pieces, with a value of \$3,670,306,000 were prepared on account of the 1919 series of tax issues. United States securities received on redemption or cancellation account were greater in volume than in any previous year. Canceled coupon bonds of Liberty loans received by this office, audited and filed, totaled 12,404,671 pieces, or \$3,147,532,800. Canceled certificates of indebtedness in bearer form received, examined, and filed amounted to 2,049,149 pieces, or \$13,770,522,000. United States coupons received from the Treasurer of the United States aggregated 51,531,790 pieces, with a total par value of \$229,315,007.02.

Detailed figures relative to special certificates of indebtedness, war savings certificates, and interest checks are shown in the appropriate tables which are a part of this report.

The number of employees in the Register's office increased during the year from 270 on July 1, 1918, to 440 on June 30, 1919.

Respectfully,

W. S. ELLIOTT,
Register of the Treasury.

Hon. DAVID F. HOUSTON,
Secretary of the Treasury.

STATEMENTS.

- I. Liberty loans: United States coupon bonds and notes, examined, sealed, recorded, and delivered to Division of Loans and Currency during the fiscal year 1919.
- II. Liberty loans: Registered issue June 30, 1919, number and amount of registered bonds received, examined, sealed and signed.
- III. Certificates of indebtedness: Received, examined, signed, and sealed during the fiscal year 1919.
- IV. Special certificates of indebtedness: Received, examined, sealed, and signed during the fiscal year 1919.
- V. Loans other than Liberty loans: New issues-bonds, notes, and certificates received, examined, sealed, and signed during the fiscal year 1919.
- VI. Loans other than Liberty loans: Amount of bonds, notes, and certificates received, examined, sealed, and signed during the fiscal year 1919.
- VII. Liberty loans: Coupon bonds and notes received, examined, and canceled for reissue by exchange, interchange, and conversion during the fiscal year 1919.
- VIII. Liberty loans: United States registered bonds retired on account of conversion, transfer, and exchange during the fiscal year 1919.
- IX. Liberty loans: Canceled coupon bonds received and audited during the fiscal year 1919.
- X. Liberty loans: Canceled coupon bonds on file June 30, 1919.
- XI. Liberty loans: Coupon bonds surrendered in payment of estate and inheritance tax during the fiscal year 1919. Audited and on file.
- XII. Liberty loans: Coupon bonds purchased during the fiscal year 1919. Audited and on file.
- XIII. Canceled paid special certificates of indebtedness: Audited and filed during the fiscal year 1919.
- XIV. Certificates of indebtedness: Canceled on account of allotment credit. Received and audited during the fiscal year 1919.
- XV. Certificates of indebtedness: Canceled on account of exchange during the fiscal year ended June 30, 1919.
- XVI. Canceled paid certificates of indebtedness: Received, audited, entered in numerical registers, and filed during the fiscal year 1919.
- XVII. Paid war-savings stamps certificates: Received and audited during the fiscal year 1919.
- XVIII. Loans other than Liberty loans: Transactions of coupon bonds, notes, and certificates during the fiscal year 1919.
- XIX. Loans other than Liberty loans: Redemptions of loans current in fiscal year 1919.
- XX. Loans other than Liberty loans: Amount of bonds and notes received, examined, and canceled during the fiscal year 1919.
- XXI. Loans other than Liberty loans: Coupon bonds and certificates of active loans outstanding June 30, 1919.
- XXII. Loans other than Liberty loans: Registered bonds and notes of active loans outstanding June 30, 1919.
- XXIII. Loans other than Liberty loans: Coupon and registered bonds and certificates of active loans outstanding June 30, 1919.
- XXIV. Debt on which interest has ceased.
- XXV. Paid interest coupons of United States bonds, notes, and certificates of indebtedness delivered to Register of the Treasury by Treasurer of United States.
- XXVI. Paid interest checks: Received from the Auditor for the Treasury.

Liberty loans.

REPORT OF THE COMPTROLLER OF THE CURRENCY.

TREASURY DEPARTMENT,
OFFICE OF COMPTROLLER OF THE CURRENCY,
Washington, December 6, 1920.

SIR: In conformity with the requirements of section 333 of the Revised Statutes of the United States, I have the honor to submit herewith the Fifty-eighth Annual Report of the Comptroller of the Currency relating to the operations of the bureau for the 12 months which ended October 31, 1920.

Although the fiscal year which has just closed has subjected the strength and stability of management of our national banks, and of our banking and currency system, to test and strain beyond all precedent; and although during this period many unforeseen difficulties have been encountered and many new and vexing problems have presented themselves, I have the pleasure of reporting that the record of the national banks for this period has been especially gratifying and productive of assurance for the future.

NATIONAL BANKS AT HIGHEST POINT.

During this fiscal year the number of national banks in operation has reached the highest point. On October 31, 1920, there were 8,157 national banks in operation or authorized to do business.

Since March 14, 1900, 2,828 State banks, trust companies, and private banks, with capital of \$183,554,800, have been converted into, or reorganized as national banks, and the movement toward nationalization is proceeding steadily. During the past year ending October 31, 1920, the 361 new national banks chartered were distributed through 40 different States and the District of Columbia. The 14 States in which the largest number of national banks were chartered are Minnesota, 32; California, 30; New York, 26; Texas, 22; Oklahoma, 21; Kansas, 19; Illinois, 17; Pennsylvania and Ohio, 14 each; New Jersey, Virginia, and Colorado, 13 each; Washington, 12; Idaho, 11.

NUMBER OF DEPOSITORS EXCEEDS ALL RECORDS.

In the number of depositors or deposit accounts in national banks all previous records were exceeded, official reports showing that on June 30, 1920, there were 20,520,177 deposit accounts in all national banks. This was an increase of 2,279,877 over June 30, 1919. There is now approximately one depositor in the national banks for every five of our population.

NATIONAL BANK FAILURES NEAR ZERO. IMMUNITY UNPARALLELED.

In the matter of immunity from failure, the showing for the past 12 months has been the best in about 40 years, with the sole exception of the fiscal year of 1919. The total capital of the five small national banks which failed during the year was \$225,000, or seventeen one-thousandths of 1 per cent of the total capital of all national banks. This percentage is about 16 times better than the average for the entire period of 57 years, from the inauguration of the national banking system to the present.

EARNINGS FOR 1920 FAR AHEAD OF ALL FORMER YEARS.

The earnings of the national banks, both gross and net, have surpassed all previous years. The net earnings for the 12 months ending June 30, 1920, amounted to \$282,083,000, an increase of \$41,717,000 over the year preceding; and the increase which has taken place in the *net earnings* of the national banks in the past seven years has exceeded by 18 million dollars the total increase in earnings shown for the 43-year period from 1870 to 1913.

BANK RESOURCES SURPASS ALL PREVIOUS FIGURES.

During this last fiscal year, the resources of the national banks reached the highest point in their history, being reported on January 1, 1920, at \$22,711,375,000. This was an increase, as compared with the report for January 1, 1919, of \$2,669,151,000. In the six months following January 1, 1920, the resources of national banks declined to \$22,196,737,000, at which figure they stood on June 30, 1920.

In the 7-year period from June, 1913, to June, 1920, the resources of national banks increased \$11,159,817,000, which is more than the total increase which took place in the entire 50 years from the inauguration of the national banking system in 1863 to the year 1913.

RETROSPECT AND OUTLOOK AT HOME AND ABROAD.

The immediate effect in this country of the outbreak of the European war was a general paralysis of trade, industry, and finance. The suspension of business on the stock and other exchanges and the prompt declaration of moratoriums aided in securing stabilization, and the financial measures which were immediately put into effect by the Treasury Department were instrumental in preventing a commercial crisis and a financial crash. Confidence in the ability of this country to meet its obligations abroad, however vast they seemed at that time, was soon established; and before the expiration of 12 months, fear, stagnation, and confusion had given way to confidence and renewed business activities; and by the latter part of 1915 the upward swing was well under way. The year 1916 was one of feverish activity, and our foreign trade, which in the year 1914 amounted to less than 4 billion dollars, nearly doubled, and amounted, for the calendar year 1916, to approximately 8 billion dollars. The balance of trade in our favor for 1916 exceeded 3 billion dollars, and was approximately *ten times* as great as the favorable balance of the year 1914.

GROWTH IN RESC

The above Chart sh
the preceding 50 years f

The above Chart shows, both in Deposits and in Total Resources, there has been a greater growth in the past seven years than during the preceding 50 years from the beginning of the National Banks.

PERCENTAGE OF CAPITAL OF
BANKS EACH YEAR TO TO
CAPITAL OF ALL NATIONAL

The above state
the total capital of all
elapsed since 1882.

GREATLY INCREASED SAFETY OF NATIONAL BANKS.

PERCENTAGE OF CAPITAL OF FAILED
BANKS EACH YEAR. TO TOTAL
CAPITAL OF ALL NATIONAL BANKS

PERCENTAGE OF CAPITAL OF FAILED
BANKS EACH YEAR. TO TOTAL
CAPITAL OF ALL NATIONAL BANKS

The above statement shows that for the fiscal year 1920, the ratio of the capital of National Banks which failed to the total capital of all National Banks was sixteen times more favorable than for the preceding 38 years which have elapsed since 1882.

NET EARNINGS OF THE NATIONAL BANKS FOR THE PAST HALF A CENTURY.

The above Chart shows the National banks of the United States for the past six years have shown an average annual increase of \$22,135,472 in net earnings as compared with an average annual increase during the preceding 44 years of \$2,069,365.

The increase in the past six years has amounted to \$41,760,776, more than the total increase which was shown in the preceding 44 years.

ARTICLE IN FULL

With our declaration of war against Germany early in the year 1917, the business of this country—farming, manufacturing, commercial, mining, and everything else—was given additional impetus. Commodity prices soared to unprecedented heights, and were finally restrained only by Government mediation and price fixing. The prices, however, which producers and traders were allowed by the Government to charge yielded unprecedented profits in well-nigh every branch of industry; and inflation was stimulated further by the importation in the years 1916 and 1917 of huge sums of gold from abroad. Our imports of gold in 1916 and 1917 amounted actually to \$1,238,444,608, our exports to \$527,676,811, leaving a net excess of imports of gold over exports for the two years of \$710,767,797, which, with the excess of imports over exports for the year 1915 provided a net surplus of gold imports for the three years of 1915, 1916 and 1917, of \$1,131,296,469.

The urgent and unguarded buying of American products by the Allies in the early days of the war had driven the prices of our products to unprecedented figures; and it became difficult, subsequently when a more orderly system of buying was instituted, both for our own Government and for the Allies to return to anywhere near normal prices. It has been estimated that the profits and increments accruing to the people of this country during the last year of the war amounted, approximately, to 50 billions of dollars; and that the surplus income over and above the living expenses of the people, despite the extravagant rate at which they were living, approximated 15 billion dollars for that year.

After the armistice, the demands for war materials of course ceased, but the cries from the impoverished countries of Europe for foods continued, and the demands for materials for reconstruction and rehabilitation developed rapidly.

The profits which South America, China, and Japan had also realized in supplying the products of those respective countries to the Allies had brought about a condition of high prosperity and activity in all of those countries, and their peoples had acquired a taste for luxuries and for the products of other countries which we were called upon to supply in huge quantities.

The demands made upon the United States for steel and iron products, machinery, agricultural implements, fabrics, foods, automobiles, and specialties of all kinds gave to our business men visions of unchecked and limitless prosperity; and our exports of merchandise for the year 1919 following the war exceeded by nearly 1 billion dollars our total exports for the war year 1918. Imports into this country of merchandise from every quarter of the globe also broke all records, and amounted for the year 1919 to \$3,904,000,000, nearly 1 billion dollars more than the maximum amount of imports ever before brought in.

TURN OF THE TIDE.

The turning of the tide in the world delirium and inflation came in the spring of 1920, with the financial and industrial collapse which took place in the Empire of Japan. The Japanese had profited hugely from the supplies which they had furnished to the Allies, and from the operation of their merchant marine, the profits of which during the war were enormous. This great business had brought

about the creation and flotation of numerous new financial, manufacturing, and trading corporations throughout Japan; and in the flotation of these companies a spirit of reckless speculation had been developed which pervaded every section of the population of that country—farmers, merchants, professional men, bankers, and public officials.

The efforts which were made primarily in this country to bring about an orderly deflation, and the curbing of reckless speculation, began to make themselves felt, not only here but in all the countries with which we had been dealing. The apparently insatiable demand which America had developed for such luxuries as silks had tremendously stimulated the silk industry of Japan. The prices of raw silk had advanced in the space of a year or two approximately 400 per cent, maximum prices having been reached in January and February of 1920.

A rather sudden curtailment or suspension of the American demand for silks had an immediate effect upon the Japanese market. The collapse in the prices of raw and manufactured silks was followed by the prostration of the Japanese market for cotton goods, which in recent years has become one of the great industries of that country. The closing down of numerous other industries followed in the wake of the financial panic, which had resulted in the suspension of some of the largest banks and business houses in the Empire, and an acute depression in business set in, and still continues.

As the crisis which followed the turning of the tide in Japan is typical of conditions in many other countries of the world with which we have been trading and with which we are still doing business, it may be illuminating to reproduce here the following extract from an article by a leading and well-informed Japanese banker and business man, the president of the Tokio Bankers' Association, printed in the latest issue of a prominent and ably edited Japanese (Tokio) magazine:

The outbreak of (World War) hostilities saw the economic world of Japan, which had been inured to peace, paralyzed by the suddenness of the conflict. All business came to a standstill. This general depression was immediately followed by a state approximating panic. Industry was hard hit, and the money market was completely tied up. There was no knowing where the downward tendency would stop. It was fortunate, however, that the closing of exchanges and suspension of specie payment were not experienced here as in European countries. In other respects the economic condition of Japan was quite as depressed as that of Europe.

When Japan entered the war with the object of reducing the German fort in the Far East, it was difficult to form any idea of the extent to which her intervention would affect her internal affairs. The minds of the people became uneasy. Business and industry sank into the depths of depression. With the progress of the conflict, however, Japan became gradually adjusted to war conditions. The people became engrossed in the manufacture of munitions for their army and for supplying the demands of the allied countries. Factories which had hitherto turned out only merchandise eagerly took up the production of munitions of war.

By encouraging production and by extending shipping facilities, Japan was able not only to keep her own needs supplied, but she was able to meet the requirements made of her by her allies. Shipping companies were feverishly engaged in transporting munitions to the ports of allied countries. Industries which were once on the verge of extinction were now busy and working overtime. The Government, in cooperation with the people, never hesitated to take measures that were thought necessary for the successful prosecution of the conflict, even though these involved sacrifices on the part of the industrialists. While supplying Russia with war funds, Japan, on the other hand, raised domestic loans for the benefit of England and France.

Not only was Japan called on to assist the other powers in these ways and by keeping the Pacific and Indian Ocean routes safe for transport of troops and supplies, thus preserving the peace of the Far East, but she was offered what was at the same time

an opportunity and a duty to supply those oriental markets which were suffering by reason of the temporary stoppage of European and American trade. In order to relieve the situation Japan sent her products in rapidly increasing quantities to these markets. Factories were kept busier than ever turning out commodities for export overseas. and always there was a call for more goods and for more factories to make more goods.

The various phases through which the Japanese economic world has passed since 1914 fall into three periods—first, a period of stagnancy, then transition, and finally a period of prosperity. And now we are in the midst of another time of transition.

With the conclusion of a treaty of peace at Versailles, Japan found herself faced with the necessity of returning to prewar conditions. Exports, which during the war exceeded imports by considerable amounts, * * * began to dwindle, and soon the normal prewar condition of an excess of imports followed. Japan's trade balance had been consistently unfavorable during the two decades preceding the war, the average import excess between 1893 and 1915 being about 46,000,000 yen (a yen is equal to about 51 cents in United States currency). This condition was, of course, reversed during the war years, a favorable balance first appearing in 1915. This excess of exports increased in 1916 and again in 1917, amounting to nearly 600,000,000 yen in the latter year. Then came a drop in 1918, and the excess of exports gave way to excess of imports in 1919, following the prewar order of an excess of imports during the first half year which the excess of exports of the latter half was unable to overcome. It may be noted that the reason for the unfavorable balance of the earlier months of the year is the heavy importation of American and Indian cottons, while the change during later months is brought about by shipment of raw silk to the American market.

It is pleasing to note, however, that late official forecasts point to a rice crop this year which will be the largest in our history. The estimate is above 63,000,000 koku (a koku is approximately 5 bushels), which is 4 per cent greater than last year's crop, which was the largest up until that time, and 12 per cent above the average for the last several years. This condition is attributable to the favorable weather thus far and the depressed state of the silk market at the planting time. Farmers this year are giving more attention to rice and less to cocoons, and it is estimated that there will be a reduction of 15.6 per cent for the total cocoon crop of the three seasons as compared with the total of last year. This is the greatest decrease experienced in recent years.

Japan is still an agricultural country in spite of her remarkable recent industrial advancement. About 55 per cent of the families of the nation are of the farmer class, and rice is by far the most important crop of the country. As in other agricultural lands, good crops may be taken as an indication of good times, for what benefits the farmers as a class benefits the nation as a whole.

Along with various other problems brought upon us by the war, the labor question came to occupy an important place, this question being made still more pressing by complications with other social problems. Unemployment has been greatly increased by the general industrial depression and the consequent suspension and curtailing of factory operations. The position to-day is that unless some harmonization and unification of aim and effort is effected between capital and labor, the further sound development of industry can not be expected.

Especially at the time of transition from war to peace conditions, when a great change occurred in the relations of demand and supply, Japan was compelled to readjust her industries and to change the nature of her financial machinery. It has already been noted how the reckless spirit of speculation, brought about by the sudden change of Japan's economic position, contributed to her confusion. Japan to-day is faced with the necessity of adopting such a policy as will enable her to change from expansion to retrenchment. She is once again treading the path of change and transition.

At present two opposite opinions are expressed regarding Japan's economic future, one pessimistic, the other optimistic. The careful student will take both these views into consideration and will weigh the facts and conditions on which they are based. It is my opinion that the worst of the present business depression is now past. Some accentuation of financial stringency is expected to be felt at the time of the general New Year's settlements, but it must not be forgotten that business is naturally dull at the beginning of the year. And above all, it must be remembered that behind our scattered cases of misfortune and failure the country as a whole is financially sound and strong.

Great wealth has been accumulated during prosperous years, and that wealth has not been wiped out of existence. That business that has been firmly established and conducted on sound principles will survive, and all will be the better off when speculative and mushroom enterprises leave the field clear for sturdier growth. It is my hope and belief that by next spring, or next summer, at the latest, our general economic world will have recovered its normal stability and activity.

The story of Japan's industrial and financial experience is largely similar to the experience of South American and European countries—some of them our allies, and others neutral. Some of these countries are now going through a business cataclysm similar to that through which Japan has so recently passed.

In our own country we have been thus far fortunate enough—thanks largely to the splendid efficiency and stabilizing influence of the Federal reserve system—to avoid the financial crises and complete disorganization which have made havoc elsewhere. We have passed with comparative safety through exceedingly troubled and nerve-racking times; but difficult and dangerous problems remain to be solved, the solution of which will demand clear heads and steady nerves.

In the period of feverish business excitement accompanying the war, some of our business men and heads of great industries became accustomed to enormous profits which they vainly hoped might be perpetuated.

VAIN EFFORTS TO MAINTAIN EXCESSIVE PROFITS.

This tendency was particularly conspicuous in the steel and iron and coal industries. By closing down mills and mines the output of steel and iron was reduced, approximately one-fourth the year following the armistice, in order that manufacturers and miners might obtain, because of the insistent and peremptory demand, the exorbitant profits realized during the war rather than the more moderate profits they would have had to accept if a maximum output had been maintained. While the profits of steel manufacturers and coal operators were swollen, the country became poorer from the lack of production brought about by the unnecessary closing down of mills and mines and the incidental idleness of labor.

Neither this country nor foreign countries can afford to continue to pay the inflated prices which steel and iron manufacturers continue to demand for their products. As steel and iron are so largely at the very foundation of industrial activity and business developments it is essential that the prices of these fundamentals should come down to a fair, just, and normal basis if we are again to attain the prosperity for which we hope.

The increase which has taken place in wages since the war does not excuse present prices for steel and iron products. A careful analysis which was made of the reports of one of the largest and most important steel and iron companies shows that that company in the last year of the war, 1918, charged, on an average for every ton of steel which it produced, at least \$25 per ton in excess of a price which would have enabled the company to pay full dividends upon its very large capital stock. The report of the same corporation shows, furthermore, that its net earnings were so enormous that the company could have paid its accustomed dividends upon its shares even if it had paid its employees wages 100 per cent higher than the wages it actually did pay.

The coal operators who, prior to the war, eagerly sought for large contracts for coal on a margin of 10 to 20 cents per ton, have in some cases during the past year exacted prices to yield them a profit of \$10 per ton or more. This means that their net profits in some

instances have amounted to 100 times as much per ton of coal as those which they were willing and glad to accept before the war; and it is also painfully clear that the highest prices paid for coal have been exacted from buyers who could least afford to pay the extortionate rates, namely, our allies, whose sacrifices in the great World War, in both men and money, so greatly exceeded our own.

DEFLATION BECOMES WORLDWIDE.

The deflation which, as we have seen, took place so precipitately in Japan has made headway in every country, civilized and uncivilized, from the Arctic Ocean to the tropical jungles; and most of the products of human labor and human enterprise in nearly every country on the globe are now obtainable for a fraction of the prices which prevailed a year ago. The raw silks of Japan are quoted at one-fourth to one-fifth of last January's prices. The raw cotton from our own Southern States is selling at one-third the price of last summer. Rubber from the valley of the Amazon or the Congo forests, vegetable oil from the far East, wool from Australia, hides from the Argentine, coffee from Brazil, sugar from Java and Cuba, all may now be purchased at prices from one-fourth to one-half of those paid since the armistice.

The shrinkage in prices during the last year in the products of our own country, and in the products of other countries, purchased at high prices by our merchants and business men, if applied to our crops, and the products of our mines, forests, and factories, would represent an apparent loss sufficient to stagger the boldest imagination. For example, the shrinkage of, say, a dollar a bushel from the high price of a year or so ago to the present farm values of corn would, if multiplied by a crop of $3\frac{1}{4}$ billion bushels, represent an apparent loss to the corn growers, as compared with their expectations, of $3\frac{1}{4}$ billion dollars.

On the same principle of calculation the cotton grower figures a loss on raw cotton and cotton seed of 2 billion dollars more. The wheat grower, who had hoped for \$3 per bushel, feels that he has lost another billion and a half dollars.

Hundreds of millions of dollars additional have been swept away by the collapse in the prices of wool, of hides, of leather, of furs; and the losses which have been sustained from the collapse in the sugar market from 23 cents to 5 cents per pound have been wholly without precedent in the sugar trade.

SHRINKAGE ESTIMATED AT TWELVE TO EIGHTEEN BILLIONS.

It is probable that the shrinkage in the past year in the market or salable value of the products of our fields and forests, of factories, mills, and mines, in this country alone, as compared with the high level from which they have descended, amounts to between twelve and eighteen billion dollars.

This melting away of property values is reflected, but only partially, in the decline which has taken place in the market value of the shares of industrial corporations listed on the New York Stock Exchange. A computation recently made shows that the depreciation which has taken place from the high prices of last year and this to the

low prices of the current year in the stocks of industrial corporations alone listed on the New York Stock Exchange amounts to between three and four thousand million dollars. This is irrespective of the shrinkage which has occurred in the shares of many railroad corporations which have reached this year the lowest prices in their history.

A serious shrinkage of values was foreseen and predicted more than a year ago by those who studied conditions and considered the history of past wars. It has come faster and more violently than heretofore, presumably because more rapid communication and transportation expedite the succession of inevitable effect on cause. Thus far results have not only come more quickly than after our former severe wars, but have been less calamitous. There is every reason to believe that the same facts that hasten disaster will hasten recovery; and that the people of different countries and classes, being more intimately in touch with each other than ever before, will more promptly understand each other's rights and requirements and realize that it is to the interest of all to work together for fair readjustments.

The precipitate decline which has already been witnessed in so many leading commodities encourages the belief that in most cases we are near the bottom, the fall, in some instances, having been already excessive and abnormal and really not justified by actual conditions. Despite the tremendous decline in the prices of the raw materials for the articles upon which the cost of living is based—food, clothing, and the cost of shelter or housing—the private citizen is not yet receiving the full benefit of the drop; but he is required to pay a tax in the shape of middlemen's profits, which, in many cases, is inexcusable and unwarranted. We need not imagine that we have reached a firm and stable foundation until *excessive profits* are further deflated; until the private citizen is able to acquire, at the expenditure of \$1 of his hard-earned money, something approximating the quantity and quality which that dollar commanded in prewar times.

One of the chief blessings growing out of the war has been the movement toward equalization and the decided raising of the wages of the working people to a fairer and more equitable basis. This is for the permanent betterment of the country. Yet wages have not been altogether equalized; in some cases the advance has been insufficient; in others it has been excessive.

Many industries will find it impossible to continue the present high wages when competition with foreign countries again begins in earnest, as it will, and when commerce with all parts of the world will have been again speeded up, as it will be presently, through the agency of our enormously developed merchant marine.

We can not meet this foreign competition if our miners, mechanics, and laborers loaf three days in the week and demand wages for the other three days equal to those they formerly received for six days' labor. If this country is to prosper and grow and keep pace with the reawakened world—to say nothing of leading that world—it will be necessary for our people to work full time and intensely, and to proceed with all the skill and intelligence of which they are capable.

The nations with which we must compete have huge populations, with modern and scientifically equipped mills, factories, and workshops, and are determined to get on their feet again and achieve prosperity; and they know that they can succeed only by energy, thrift, and sacrifice.

We need not depart from the eight-hour day, nor relinquish any of the legitimate benefits which the laboring man has won and is now enjoying in the shape of improved environment and working conditions, in order to keep this country on the highest plane of prosperity and on a basis which will enable it to compete with any other country. The important thing is that waste shall be eliminated as quickly as possible: that all prices shall be brought down to a sound and healthy level; that excessive and exorbitant profits shall be dropped, and that we go ahead at full speed to produce.

REMEDIES FOR ILLS; A PATHWAY TO PROSPERITY.

Reiteration of certain indisputable basic facts and deductions may be useful in helping to drive into the minds of the business community and our people generally the fundamental and only remedies for existing hindrances and assurances for renewed stability and prosperity.

The prices of many basic commodities and leading raw materials have already returned to a prewar basis, while some articles are now below the prices of 1914. It now remains for the middleman to adjust his profits to the new prices before the ultimate consumer will receive the benefit of the reduced cost of living.

The laboring man will soon be in a position where he must determine whether he prefers a shut-down and idleness to a lower wage scale, which must take into consideration the lower living charges. Unless manufacturers can turn out their products at prices at which the public will buy and can afford to buy, the mills and factories can not afford to run; but obviously it is better for manufacturers to operate and produce goods *at cost* or at a *very narrow margin* of profit rather than close down entirely. The attention of this office was directed some time since to the case of a large steel manufacturer employing many thousands of men who threatened to close his factories and throw his employees out of work unless certain large consumers of steel and iron products would place their orders at prices which would yield him a profit three times as great as the normal or average profit. Such an attitude, of course, is wholly indefensible and is deserving of the severest public condemnation.

Even with the help of tariffs intended to prevent foreign-finished products from being imported, if we try to maintain a wage scale which does not square with the revised costs of living, we will be unable to sell our products abroad in competition with those of other countries whose manufacturing powers are well developed and whose wages are much below our own. It is clearly far better for workingmen, as the cost of living declines, to agree to a readjustment of wages on a basis which will permit factories to run and the wheels of industry to revolve, rather than to hold out for wages which it will be impossible for employers to pay when obliged, as they will be, to meet keen competition at home and abroad.

It is hoped and believed that our working people and manufacturers will both appreciate these simple and economic realities and that arrangements will be perfected with the owners of mills and factories which shall secure to the laborer his full share of the profits and that he will be allowed to participate with capital in whatever earnings may be realized over and above a fair return on the capital invested.

Only on this principle can we expect to restore business, bring about renewed industrial activity, and establish a permanent and country-wide prosperity and contentment.

INFLATION WITH REDUCED PRODUCTION BRING HARD TIMES.

In the report of the Comptroller of the Currency a year ago attention was directed to the grave dangers incident to the then prevalent reckless expansion in prices, accompanied by a reduced production of commodities and articles representing real wealth, and warning was given as to the inevitable consequences. In discussing the general business and financial situation at that time, I said:

"While the volume of transactions, as expressed in dollars and cents, has exceeded all previous records, the unpleasant fact remains that in the past 12 months, when the obvious duty which confronted our whole people was to bend every effort toward not only continuing at full speed at the high point of production previously reached for all essential products, but where possible to *increase our output* to supply the needs of other countries, we have in some directions *slowed down and radically reduced the output of mines and factories*. It is no part of my duty to determine the causes or undertake to place the blame. I am expected to assemble and put before you and the public facts bearing on our financial and commercial situation, even at the risk of reiterating what may have been presented by others."

Presenting at that time actual figures showing the huge falling off in the production of pig iron, steel, coal, cotton, copper, and other basic elements of wealth, I said:

"By producing less and charging our own people two or three prices for the lessened output, we may appear to be growing richer, but are we not somewhat in the position of the man who tried to lift himself by his own boot straps? * * *

"It is clear that no country can be enriched by merely increasing prices of products produced and consumed by its own people. If the output of field and mine and factory are doubled and the prices paid by consumers remain stable and the surplus is saved or sold abroad, the country thrives. If the production remains the same but the prices for products are doubled and paid by the people of our own country, there is obviously no increase in the sum total of wealth.

"This country would for the moment appear to prosper if we could receive payment in gold or in goods at the former or normal prices; but it is very evident that we make no net profit when we sell a cargo of steel or machinery at an advance of a hundred per cent and accept in payment thereof a cargo of silk or a cargo of coffee also at a hundred per cent advance. * * *

"Our bankers, however, have not been able to restrain, except in a very limited way, the individual extravagance and indulgence, luxury, and display which constitute the most serious peril to us, and which have reached proportions which, in our present conditions, amount to crime with the majority of our citizenship guilty. Nor have the banking forces or any other exponents of our real business sense been able to limit the crazy rapacity developed in some of our leading industries among men who should know better, but who apparently have become wildly intoxicated by special opportunities for exorbitant profits. * * *

PAVING THE WAY FOR A NEW ADVANCE.

"Let us hope that the wise conservatism and foresight of the great banking power will prove to be a powerful influence to lessen or remove these dangers to ourselves and the world. They may be able to impress on the great body of our commercial and industrial leaders the truth they have learned, that in a time like that through which we are passing the old policy of 'live and let live' is the wisest possible; and that for the long run an assurance of future permanent and substantial profit can be had only by reducing present profits to the thinnest reasonable margin and limit earnings, dividends, and additions to surplus to the most modest figures consistent with safety."

The deflation which at that time was obviously inevitable has come, and the country is now in many respects on a sounder basis, economically, than it has been for years.

When conditions abroad become more settled or stabilized, and when at home much-needed adjustments are effected in the costs to consumers of steel and iron products, which are still quoted at about twice their prewar prices, and when coal, for which the Government itself has paid in recent months as much as four times the prewar price, and certain other commodities, which are now being kept up artificially or as a result of monopolistic control far above the prewar figures, get back to normal level, our country, resting on a solid foundation, will be prepared to enter upon a new and, let us hope, long-enduring era of prosperity and healthy progress.

OUR BANKING POWER NOW TEN TIMES AS GREAT AS IN 1890.

The banking power of the United States as expressed by the aggregate of the capital, surplus, deposits, and circulating notes of its National, State, and Federal Reserve Banks has now reached the huge total of \$50,981,900,000, as shown by the figures of June, 1920. This is an increase over June, 1919, of \$5,225,600,000.

In 1890 the banking power of this country as estimated by Mulhall was only \$5,150,000,000, so that our total banking power to-day is nearly 10 times as great as it was only 30 years ago.

The following table shows the capital, surplus and profits, deposits, and circulation of the banks of the United States, National, State, and Federal Reserve as of June 30, 1920, or report date nearest thereto.

Banking power of the United States, June 30, 1920.

[Money columns in millions.]

	Number of banks.	Capital paid in.	Surplus and profits.	Deposits. ¹	National bank circulation, Federal reserve notes, and Federal reserve bank notes.	Total, June 1920.	Total, June, 1919.	Increase over 1919.
National banks.....	8,030	1,224.1	1,533.2	14,311.4	688.2	17,756.9	16,090.1	1,666.8
Reporting State banks, savings banks, trust companies, etc.....	22,109	1,478.5	1,853.4	23,694.4	27,026.3	23,810.7	3,215.6
Nonreporting private banks (estimated).....	837	14.0	17.3	177.8	203.1	610.2	² 401.1
Total.....	30,976	2,716.6	3,403.9	38,183.6	688.2	44,992.3	40,511.0	4,481.3
Federal reserve banks.....	³ 12	94.5	120.1	2,472.7	3,302.3	5,989.6	5,245.3	744.3
Grand total.....	30,988	2,811.1	3,524.0	40,656.3	3,990.5	50,981.9	45,756.3	5,225.6

¹ Includes also dividends unpaid, postal savings, and United States deposits, certified checks and cashiers' checks outstanding to banks, except in case of reserve deposits of member banks with Federal reserve banks, but not amounts due to other banks.

² June 25.

³ Decrease. (The number of nonreporting private banks has heretofore been estimated approximately. The reduction in the number of such banks and their capital, etc., is accounted for in this instance by reason of the fact that the total number of private banks reported by the Bankers' Directory on or about June 30, 1920, is used as a basis for this calculation, deducting the number of reporting banks as indicated by reports received by this office. Only such institutions as are performing the functions of a bank are included in the total number of private banks. Concerns whose business is confined to the selling of investments are not included in the list of private bankers.)

OUR HUGE CREDIT BALANCES ABROAD.

Our foreign trade, both inward and outward, has continued during the past year at gigantic figures, the total of our imports and exports of merchandise amounting to \$13,507,000,000. This is an increase in exports of \$307,574,010 and in imports of \$1,374,635,068, resulting in a net credit balance in our favor for the year of \$2,949,000,000, as compared with an excess of exports over imports of the previous year of \$4,016,061,058. For the seven years ending December 31, 1920 (December approximated), the total value of our imports of merchandise was \$21,126,643,639, against exports valued at \$40,674,859,593, bringing the total balance of trade in our favor for this period up to the enormous total of \$19,548,215,954.

Of this huge credit arising from the sales abroad of our products of field and farm and of mill and factory, approximately \$10,000,000,000 is accounted for by the loans which our Government made to the European countries during and succeeding the war. Payment of approximately \$4,000,000,000 or \$5,000,000,000 more was made by reselling to this country the various issues of our securities which the investors of Europe have been accumulating during the past half of a century. In addition to buying back our own securities, we have purchased from different foreign countries, principally Europe, several billion dollars' worth of other securities of various kinds—Government, municipal, railroad, industrial bonds and shares, leaving a credit balance still due to us at this time from Governments, banks, business houses, and individuals in various foreign countries which is estimated at from \$3,000,000,000 to

\$4,000,000,000 in addition to the \$10,000,000,000 due the United States Government.

At the time of the European war in 1914 the financial situation as regards the balance of trade with Europe was precisely reversed. At that time we owed to Europe several hundred million dollars on open account, and those countries held from \$4,000,000,000 to \$5,000,000,000 of our securities, and many of our bankers and business men were deeply concerned for fear of the demoralization that would ensue if Europe should demand prompt settlement. In an address to an association of bankers on September 29, 1914, the writer said:

"We and our business machinery will be required to work not only for ourselves, but for the world. The task is enormous, but it is in conjunction necessarily. In protecting our own stability, we protect the world's finance and commerce. In conserving the interests of other nations, we conserve our own and improve the opportunities that practically are forced upon us. Along with illimitable responsibilities, the prospect of illimitable expansion confronts us. Just now and because of the sudden halting of our delivery service and closing of the markets, we are a debtor people. We are taking days of grace because we have assets with which to pay and know that they will be needed desperately and soon.

"Europe is believed still to hold several billions of our securities. Exactly what amount, it is quite impossible to determine accurately.

"If we opened the stock exchanges and allowed this indefinite mass to be unloaded on us with the frantic purpose to get our gold at any cost, no one can quite foretell what the consequences would be. There are only three methods by which our international debts can be paid—by shipments of gold or silver, by shipments of merchandise, or by the sales abroad of securities. If American securities owned abroad should amount to, say, \$4,000,000,000 and all holders should offer them for sale and demand gold for them, our entire gold supply of one and seven-eighths billion dollars, by far the largest gold holdings of any nation on earth, would be insufficient to pay for half of them. Therefore it is preposterous to talk of taking them back at once and settling for them now in gold.

"It is equally idle to talk of paying for them by the sale abroad of other securities. Therefore it is evident that if Europe wants to send back to us our securities, she must take payment in merchandise, in the equivalent of gold. When the European countries bought our securities, they did not pay for them in actual gold; they paid for them in merchandise, and should take merchandise in payment when they sell them back.

"My study of the problem has led me to the conclusion that we will not find it difficult to adjust ourselves to buy back in the course of a few years—if they should be offered to us—and pay for all the American securities that Europe has or which it may desire to sell. We have in abundance the raw material for the food and the clothing that Europe, Asia, and Africa must buy. With these and other products needed and demanded by the world, we can cancel our obligations and redeem our securities at fair prices to their holders instead of sacrifice and panic prices."

That forecast made six years ago was a prophecy which has been abundantly and literally fulfilled. Europe will in course of time be able to liquidate her huge debts to us, but they can not be paid in

gold, for the total amount of all the gold in the world, outside of the United States, is not sufficient to pay much more than about one-half of the indebtedness to us of the European countries alone.

It is imperative that the energy of the idle millions of human workers in Europe be utilized and that we supply them, as far as may be necessary, with raw materials. It is hoped and believed that the machinery which is now being provided through foreign trade corporations and other instrumentalities will be useful agencies in accomplishing this tremendously important task.

The value of our exports and imports of merchandise, by years, for the past seven years, and the excess of imports over exports (December being estimated) is given in the following table.

IMPORTS AND EXPORTS OF MERCHANDISE, CALENDAR YEARS 1914, 1915, 1916, 1917, 1918, 1919, AND 1920.

	Imports of merchandise.	Exports of merchandise.	Excess of exports over imports.
1914.....	\$1,789,276,001	\$3,113,624,050	\$1,324,348,049

NATIONAL BANK CONDITION NOV. 15, 1920, COMPARED WITH MAR. 4, 1919, FOLLOWING THE ARMISTICE.

An analysis of the reports of condition of all national banks as of November 15, 1920, as compared with their condition on March 4, 1919, four months after the armistice, suggests that there has been far less inflation of credit and loans, at least as far as the national banks are concerned, than is popularly supposed, and some of the criticisms which have been made as to the alleged financial inflation, so far as they are concerned, is hardly justified. The generally conservative instincts and prudent management of most of our bankers have been a healthy and restraining influence to the orgy of extravagance and speculation which raged during the 18 months period succeeding the armistice.

The loans and discounts of all national banks on March 4, 1919, plus the United States Government securities owned (but exclusive of United States bonds held to secure circulation), which may be regarded in the light of loans to the Government, amounted to \$12,694,050,000, as compared with \$13,749,926,000 on November 15, 1920. This was an increase in loans and discounts and United States Government securities held during the past 20 months of only \$1,055,876,000, or less than 9 per cent. It should be taken into consideration that during this period of 20 months the Government sold and collected \$4,500,000,000 of Victory notes, the majority of which were sold and collected for through our national banks.

Another study which is of interest in this connection is the analysis of the money borrowed by the national banks through bills payable and rediscounts on March 4, 1919, as compared with November 15, 1920. It may also be allowable to consider in this connection the amount of money borrowed by the national banks for these same periods in the shape of United States Government deposits, which are in effect demand loans from the Government secured by collateral.

On March 4, 1919, bills payable and rediscounts of all national banks aggregated \$1,451,223,000, while Government deposits on the same date amounted to \$591,318,000, making a total of borrowed money, plus Government deposits (secured by collateral), of \$2,002,541,000. On November 15, 1920, the total amount of bills payable and rediscounts was reported at \$2,390,633,000 and United States Government deposits at \$147,239,000, making a total of loans and discounts, plus money from the Government as deposits, of \$2,537,872,000, representing a total increase in bills payable and rediscounts and United States Government deposits during this 20 months' period of \$495,331,000.

It was during these 20 months, as stated above, that the \$4,500,000,000 of Victory notes were subscribed and paid for, and the national banks were necessarily called upon to carry hundreds of millions of those bonds for their customers in addition to the Victory bonds which they subscribed to for their own account.

The strong position of the national banks is further apparent when we consider that the amount of United States Government bonds which they hold (exclusive of those held to secure circulation), plus the loans made by these banks on the security of Government bonds, is practically as much as the aggregate of their bills payable and

rediscounts, including money borrowed from the Federal reserve banks and from all other banks.

We therefore find that if the national banks should sell their United States Government bonds to investors and collect the money which they are now advancing on United States Government bonds they could, as a whole, without drawing upon their reserves, pay back every dollar they owe to the Federal reserve banks, whose earnings would as a result of such collections be reduced approximately \$150,000,000 per annum unless they should find other means for employing their funds. Approximately 90 per cent of all the rediscounts of the national banks are obtained from the Federal reserve banks.

An analysis of the reports of the national banks in each of the 12 Federal reserve districts tells us that in nearly every district a large reduction took place in the holdings of Government securities between March 4, 1919, and November 15, 1920, despite the flotation of the \$4,500,000,000 of new Victory notes in this period; and the money released by the sale of Government securities held by the national banks was generally used to increase the sum total of their loans and discounts.

The figures below give for each Federal reserve district the aggregate of loans and discounts, plus United States Government securities, held by all national banks November 15, 1920, and the increase as compared with March 4, 1919:

Loans and discounts, plus United States securities, Nov. 15, 1920.

	Total.	Increase.	Per cent.
Boston Federal reserve district.....	\$978, 478, 000	\$138, 857, 000	1

Total.....	13, 744, 385, 000	1, 054, 490, 000

¹ Less than 1 per cent.

It is also of interest at this time to compare the changes in each of the 12 Federal reserve districts between March 4, 1919, and November 15, 1920, in the matter of money borrowed by the national banks on bills payable and rediscounts, plus Government deposits, which are in effect demand loans obtained from the United States and secured by collateral.

In the following statement there are given the figures of November 15, 1920, as to the total bills payable and rediscounts and Government deposits held by all the national banks in each district and the increase or reduction as compared with March 4, 1919:

Total bills payable and rediscounts, including United States deposits, Nov. 15, 1920.

	Total.	Increase (+) or decrease (—).	Per cent.
Boston Federal reserve district.....	\$117,406,000	—\$73,842,000	38.61
New York Federal reserve district.....	813,648,000	+95,982,000	13.37
Philadelphia Federal reserve district.....	144,313,000	—69,108,000	32.38
Cleveland Federal reserve district.....	87,072,000	—32,254,000	27.03
Richmond Federal reserve district.....	142,755,000	+5,425,000	3.95
Atlanta Federal reserve district.....	135,018,000	+55,320,000	69.41
Chicago Federal reserve district.....	399,688,000	+241,797,000	153.14

Cleveland Federal reserve district.....	1,710,384,000	+170,492,000	11.07
Richmond Federal reserve district.....	938,147,000	+123,559,000	15.17
Atlanta Federal reserve district.....	541,292,000	+2,997,000	.56
Chicago Federal reserve district.....	2,138,286,000	+25,756,000	1.27
St. Louis Federal reserve district.....	639,341,000	+30,525,000	5.01
Minneapolis Federal reserve district.....	806,929,000	—611,000	.08
Kansas City Federal reserve district.....	1,153,378,000	+53,799,000	4.89
Dallas Federal reserve district.....	701,659,000	+178,203,000	34.04
San Francisco Federal reserve district.....	1,349,183,000	+289,000,000	27.00
Total.....	16,954,140,000

As shown above, the heaviest percentage of increase in deposits was in the Dallas district; the next largest was in the San Francisco district.

The total increase in all deposits in all national banks in the country between March 4, 1919, and November 15, 1920, was approximately 11 per cent during the 20 months.

Exclusive of Government deposits, the total deposits of the national banks at this time are within about 3½ per cent of the maximum deposits shown at the time of the December 31, 1919, call, when the highest figures were reached.

The total loans and discounts of all national banks for November 15, 1920, have shown an actual contraction of \$104,000,000 since September 8, 1920, and a reduction as compared with June 30, 1920, of \$85,000,000.

MONEY IN THE UNITED STATES.

The stock of coin and paper currency in the United States has increased in the past six years, or since June 30, 1914, shortly before the inauguration of the Federal reserve system, from \$3,738,000,000 to \$7,894,500,000, on June 30, 1920, the percentage of increase being 111.18. The increase in the circulating medium has been mainly due to gold imports, and the issuance of Federal reserve and Federal reserve bank notes. On July 1, 1915, the amount of Federal reserve notes issued was \$84,260,500, while on July 1, 1920, the amount of these notes had reached the high point of \$3,405,877,120, and Federal reserve bank notes had been issued to the extent of \$201,225,800. Gold coin, including bullion in the Treasury, increased from \$1,890,678,304 on July 1, 1914, to \$2,693,963,700, on July 1, 1920. National bank notes outstanding declined from \$750,671,899 on July 1, 1914, to \$719,037,730 on July 1, 1920.

The circulating medium—Coin and paper currency, July 1, 1920.

Population of continental United States estimated at..... 107,155,000
Circulation per capita..... \$56.81

¹ Includes gold held in the Treasury for the redemption of outstanding gold certificates (\$584,723,645 and Federal reserve gold settlement fund \$1,184,275,551.87 on July 1, 1920), and standard silver dollars held in the Treasury for the redemption of outstanding silver certificates and Treasury notes of 1890 (\$119,914,110 on July 1, 1920). Amounts of Federal reserve bank notes and national bank notes are amounts issued by Treasury to banks.

² Includes the gold reserve fund held against issues of United States notes and Treasury notes of 1890 (\$152,979,025.63 on July 1, 1920), and the gold or lawful money redemption funds held against issues of national bank notes, Federal reserve notes, and Federal reserve bank notes (\$272,644,786.51 on July 1, 1920). Does not include deposits of public money in Federal reserve banks, national banks, and special depositaries (\$353,060,017.86 on July 1, 1920), nor does it include funds held in trust in the Treasury for the redemption of outstanding gold and silver certificates and Treasury notes of 1890. (See column I, ante.) For a full statement of Treasury assets and liabilities see daily statement of the United States Treasury and monthly financial statement.

³ Includes the gold reserve held by banks against issues and gold or other funds deposited by banks with agents to retire Federal reserve notes in circulation and own Federal reserve notes held by Federal reserve banks.

⁴ Amounts of various kinds of money in circulation determined by deducting from the appropriate item in the general stock of money (column I, ante) the amount held in the Treasury as assets of the Government (column II, ante) and the amount held by Federal reserve banks or Federal reserve agents against issues of Federal reserve notes (column III, ante). Gold and silver certificates and Treasury notes of 1890 in circulation are represented in the general stock of money by equal amounts of gold coin or bullion and standard silver dollars held in Treasury for their redemption. (See column I, ante.) Amounts of Federal reserve bank notes and national bank notes are amounts of issues by Treasury to banks less amounts held in Treasury as assets of the Government.

⁵ Includes \$801,867,360 credited to Federal reserve agents in the gold settlement fund deposited with Treasurer of the United States.

⁶ Includes \$382,408,191.87 credited to Federal reserve banks in the gold settlement fund deposited with Treasurer of the United States.

⁷ Includes own Federal reserve notes held by Federal reserve banks.

In order that a comparison may be made between the amount of the circulating medium of the country immediately before the war, or say on July 1, 1914, and the figures shown above for 1920, we include the following table taken from official reports:

Circulation statement showing coin and paper currency July 1, 1914.

	General stock of money in the United States.	Held in Treasury as assets of the Government. ¹	Money in circulation.
Gold coin (including bullion in Treasury).....	\$1,890,678,304	\$195,381,761	\$614,321,674
Gold certificates ²		45,520,740	1,035,454,129
Standard silver dollars.....	565,834,263	4,670,087	70,314,176

Total.....	3,738,620,345	319,451,977	3,419,168,368

Population of continental United States July 1, 1914, estimated at 99,927,000
 Circulation, per capita..... \$34.53

¹ This statement of money held in the Treasury as assets of the Government does not include deposits of public money in national bank depositaries to the credit of the United States, amounting to \$93,388,665.72. For a full statement of assets see Public Debt Statement.

² For redemption of outstanding certificates an exact equivalent in amount of the appropriate kinds of money is held in the Treasury, and is not included in the account of money held as assets of the Government.

From the table on the preceding page we find the total money in circulation on July 1, 1920, reported at \$6,087,555,087.

These figures, however, do not convey a full comprehension of the complete facts of the case in regard to the money "in circulation," for the money really *in circulation* will be found to be materially less than the figures shown in the foregoing statement if we give full weight to certain other factors which should be considered.

In the above official statement the amount of *Federal reserve notes* outstanding is reported at \$3,119,604,061. It is necessary to consider, however, that as these Federal reserve notes were issued from time to time, large amounts of gold and gold certificates were received in exchange for them and were thus withdrawn from circulation, and deposited with the Federal reserve agents and the reserve banks *in trust*, as security for the redemption of Federal reserve notes. This gold and the gold certificates so deposited are not, therefore, in the hands of the people or of the commercial banks of the country and can hardly be properly regarded as being actually "in circulation."

Furthermore, while the foregoing statement shows \$1,061,093,056 of gold held by the Federal reserve banks and reserve agents against the Federal reserve notes which are in circulation, there is also an *additional* amount of gold held by the Federal reserve banks, which may also be properly considered *as not in circulation*. Therefore, *if we deduct* this additional gold, say, \$548,000,000 held in the reserve banks, from the \$6,087,555,087, of money classed by the Government reports as being "in circulation," and also *deduct* the silver, United States notes and other currency *held by the Federal reserve banks* on July 1, 1920 (as well as the total amount of gold held by both the Reserve agents and Federal reserve banks), the net amount of money actually *in circulation* on July 1, 1920, would only be \$5,380,852,000.

This would indicate an increase or expansion since July, 1914, of \$1,962,000,000 in money *in circulation*.

It is true that a part of the gold reserve held by the Federal reserve banks represents gold formerly held by national and other member banks, which was part of the "circulation" reported as outstanding on July 1, 1914. But if we bear in mind that the function of gold held by the Federal reserve banks is quite different from that held in their vaults by the commercial banks of the country, the criticism or suggestion, that this money which was properly classed as "in circulation" in 1914, when held by commercial banks, should *not* now, when held by Federal reserve banks, be classed as gold "in reserve" (and not therefore "in circulation") can not well be sustained.

Of the \$5,380,852,000 of money thus classed as being "in circulation" on July 1, 1920, there was held:

In vaults of national banks.....	\$450, 351, 000
In vaults of banks and trust companies under State supervision.....	626, 027, 000
By Federal reserve banks, exclusive of gold pledged as reserve (\$1,061,-093,000) against Federal reserve notes outstanding.....	960, 178, 000
Balance in tills, cash registers, and in the pockets of the people (including money hoarded, in safe-deposit boxes, stockings, etc.), also including a considerable amount of our paper money circulating in Cuba and other foreign countries.....	3, 344, 296, 000
Total.....	5, 380, 852, 000

It is believed that hundreds of millions of dollars of the above money supply are hoarded and hidden away, which would doubtless be deposited in the banks if a bank guaranty law such as has heretofore been recommended to the Congress should be enacted.

FULL GUARANTY OF BANK DEPOSITS FOR \$25 PER MILLION OF DEPOSITS.

During the past six years of stress and strain the losses to national bank depositors from failure have been reduced to such unprecedentedly low figures that an annual charge on all deposits of $2\frac{1}{2}$ ten-thousandths of 1 per cent of deposits would have been more than sufficient to cover all such losses accruing to the depositors of our national banks for this period. It is believed that it would be preferable at the outset, as heretofore recommended, to begin with a guarantee of deposit balances of \$5,000 or less, and the guarantee plan can then be developed in accordance with the lessons of actual experience.

If the excellent record made by the national banks in the past six years in the matter of immunity from failure should be maintained the Government could meet all such losses arising from the guarantee of national bank deposits from 1 per cent of the annual profits which it will receive as a franchise tax from the operation of the Federal reserve banks, if we assume that these reserve banks in the future should only make one-half of the net earnings which they have made in the past 12 months.

No better way can be suggested for bringing into life and getting back into circulation the enormous amount of money which is now hidden and stored away and kept out of banks by timid and nervous owners. The guarantee of all deposits in national banks of \$5,000

and less would give complete security for their money to more than 19,000,000 depositors whose deposits in the national banks at this time are estimated at about six thousand million dollars. The remaining individual deposits in national banks, about eight billion dollars, stand to the credit of depositors whose balances exceed \$5,000 and those larger depositors aggregate in number, according to the latest estimates, considerably less than 5 per cent of the total number of depositors.

NO REAL INFLATION IN OUR CURRENCY.

PROPORTION OF MONEY IN CIRCULATION TO TOTAL BANK RESOURCES SMALLER NOW THAN BEFORE THE EUROPEAN WAR.

A study of the above figures shows that between July 1, 1914, and July 1, 1920, there has been an actual reduction in the amount of gold "in circulation," outside of the Treasury and reserve banks, of \$974,230,000 (due to the issue of Federal reserve notes in lieu of gold) while there has been an increase, or rather a new issue, of Federal reserve note" circulation of \$3,121,241,000, following the inauguration of the new reserve system.

The net increase since July 1, 1914, in money of all kinds in actual circulation, *outside of money in the Treasury and Federal reserve banks*, is shown to be only \$1,962,000,000, and is accounted for by the issue of Federal reserve notes which are themselves backed by close to 50 per cent in gold, accumulated by the reserve banks as they issued their notes, and this gold is now held by reserve banks and reserve agents and is *exclusive* of the reserve which the reserve banks are required by law to hold against deposits.

The money in circulation in the United States at the close of the Government's fiscal year represents a distinctly conservative amount, when we compare it with the total resources of the banks of the country. The advance in prices and the increase in the resources of our banks can not be properly ascribed to "inflation" in our currency. On July 1, 1914, the proportion of the *money in circulation* to the total *resources* of all banks, both national and State, was 13 per cent. On July 1, 1920, the money in circulation outside of the Treasury and reserve banks was only 10 per cent of the total resources of national and State banks. The *percentage* of money in circulation to total resources of all banks was, therefore, 30 per cent higher in 1914 than the percentage shown at the end of the last fiscal year.

The proportion of money in circulation to total deposits of all banks (national and State, including trust companies, savings banks, etc.) in July, 1914, was 16.4 per cent. In July, 1920, the proportion was slightly less than 13 per cent.

In the six years which have elapsed since January 1, 1915, following the outbreak of the European war, our total imports of gold have exceeded our exports, according to the official figures (December, 1920, estimated) by \$967,618,197.

The gold produced by the mines of this country for the same period (1920, estimated) has amounted to approximately \$500,000,000.

If we assume that one-half of this gold has been used in the arts and industries, the increase in gold imports and gold from our own

mines available for coinage will have increased our available stock of gold money during this period by not far from \$1,250,000,000.

During the six years since January 1, 1915, there has been a large excess of exports of silver over silver imports, but this is largely offset and compensated for by the production of our silver mines during the period.

In conclusion, it appears that since about the time of the outbreak of the European war in 1914, the net increase in the stock of gold in the United States, coined or available for coinage, has amounted to about \$1,250,000,000, which is equal to about two-thirds of the net increase which has taken place in this period in the "money in circulation," including *gold, silver, and paper money*, the increase in which from July 1, 1914, to July 1, 1920, on the foregoing basis, was about \$1,962,000,000.

The total stock of money in the United States, the amount held in the Treasury as assets, the amount in reporting banks, the amount not in the Treasury, or in the banks, and the amount in circulation, exclusive of Treasury holdings, is shown in the following table for the years ended June 30, 1892 to 1920, inclusive:

Stock of money in the United States, in the Treasury, in banks, and in circulation, 1892 to 1920.

Year ended June 30—	Coin and other money in the United States.		Coin and other money in Treasury as assets. ¹		Coin and other money in reporting banks. ²		Coin and other money not in Treasury or in banks.			In circulation, exclusive of coin and other money in Treasury as assets.

¹ Public money in national bank depositaries to the credit of the Treasurer of the United States not included.

² Money in banks of island possessions not included.

³ Figures for June 25.

⁴ Population estimated at 105,869,000 in 1918, 106,123,000 in 1919, and 107,155,000 in 1920.

WORLD'S SUPPLY OF GOLD, SILVER, AND PAPER MONEY.

The monetary stock of gold, silver, and paper money in all the principal countries of the world as of the latest dates obtainable is shown in the following table¹ taken from the recently published report of the Director of the Mint. From the nature of the case it is impossible to obtain accurate figures or estimates and the figures used should be understood to be merely approximations. In some countries official reports do not discriminate and show separately the several forms of metallic currency, whether of gold, silver, or copper, and in other countries, such as Russia, it is obviously impossible to obtain statements that can be relied upon.

If we should assume that the "unclassified" metallic stock reported by the Director of the Mint as \$294,368,000 is mainly gold, and add this to the estimates reported of the total stock of gold, \$7,594,557,000, the aggregate of gold stock would be \$7,888,925,000, but other estimates as to the actual supply of gold in the world range from these figures up to 11 or 12 billion dollars. Perhaps \$10,000,000,000 is as near to the actual stock of gold in the world at the present time as can be approximated.

If we assume these latter figures to be correct and deduct the amount of gold which we have in this country from the above total, the gold supply of the world outside of the United States would be approximately \$7,000,000,000, so that if all the gold in the world, outside of what is held in the United States, should be gathered together in one vast aggregate it would be only sufficient to pay about one-half of the debt which foreign countries, their banks, and business houses owe at this time to the United States and to our banks and merchants and individuals.

¹ Table omitted here, but to be found on p. 1038 of this volume.

RESOURCES OF THE CENTRAL BANKS IN FOREIGN COUNTRIES.

The following statement shows the assets of the principal central banks in various foreign countries as of July 1, 1920, as expressed in the local currencies of the respective countries:

TOTAL ASSETS OF PRINCIPAL CENTRAL BANKS ABOUT JULY 1, 1920.

[In thousands of local currency and dollars.]

These assets are also shown as converted into dollars at the par rate of exchange and in another column their value is shown as based on the rate of exchange about July 1, 1920.

From this statement it will be seen that the total value of the assets of all these foreign countries on July 1, 1920, at the prevailing rate of exchange amounted to only \$16,433,683,000, which is about 70 per cent of the resources, including rediscounts, of the national banks alone in the United States, which, on July 1, 1920, amounted to \$23,411,253,000.

TWENTY YEARS OF UNPRECEDENTED GROWTH.

As will be seen from the subjoined table, the resources of our national banks now amount to 433 per cent of the figures at which they stood in 1900. In 1900 the deposits of the national banks amounted to slightly more than five times their capital. At the time of the September, 1920, call their deposits amounted to nearly 13½ times their capital. Their surplus and undivided profits for this 20-year period have shown an increase of \$1,066,598,000, or 273 per cent.

COMPARISON OF RETURNS FROM NATIONAL AND STATE BANKS.

A provision of section 333, United States Revised Statutes, requires the Comptroller of the Currency to incorporate in his annual report to Congress a statement with reference to the resources and liabilities of the several classes of banks under State supervision. This office, therefore, has compiled, and now presents herewith, by classes of banks, and in detail form (so far as the returns, which in some instances were received in incomplete form, will permit), information showing the condition of State banks, savings banks, private banks, and loan and trust companies, as of June 30, 1920, or the dates nearest thereto, and on subsequent pages of the report of the Comptroller other statistical data relative to these institutions will be found.

INCREASE IN RESOURCES OF NATIONAL AND STATE BANKS IN FIVE-YEAR PERIODS.

In the five-year period ended June 30, 1920, the resources of national banks increased 88.18 per cent, while the resources of banks other than national increased 85.83 per cent. The total resources of the two classes of banks, together with the amount of increases in the resources, is shown in the following table:

Total resources of all national banks, State banks, savings banks, and trust companies in 1915 and 1920.

Banks.	June, 1915.	June, 1920.	Increase.	Per cent.

STATE BANK FAILURES IN 1920.

From reports made to the Comptroller of the Currency by the chief national bank examiner of each Federal reserve district for the fiscal year ended October 31, 1920, it appears that there have been failures of 66 banks, other than national, including 54 State banks—45 commercial, 2 savings, and 7 trust companies—and 12 private banks, with combined liabilities of \$44,287,000, excluding 7 whose liabilities have not yet been ascertained. The failures reported were distributed among 27 States. The number in each State was as follows:

Arkansas.....	4	Montana.....	1
Florida.....	2	Nebraska.....	2

NATIONAL AND STATE BANKS IN SIX-YEAR PERIOD.

NATIONAL-BANK DEPOSITS INCREASED 100.32 PER CENT; INCREASE IN BANKS UNDER STATE SUPERVISION, 91.92 PER CENT.

A comparison between the increase which has taken place within the past six years in the deposits and resources of the national banks of the country, as compared with the increase for the same period of the deposits and resources of the banking institutions under State supervision, is instructive.

From the following table it will be seen that for the past six years, between June 30, 1914, and June 30, 1920, the national banks of the country showed an increase of deposits of 100.32 per cent, while the increase for the same period of State banks, private banks, loan and trust companies was 91.92 per cent.

In the matter of total resources, the national banks of the country showed an increase, between June 30, 1914, and June 30, 1920, of 103.89 per cent against an increase in resources for the same period of banking institutions under State supervision of 91.54 per cent.

The average amount of all deposits in each national bank on June 30, 1920, was \$2,136,416. The average amount of deposits of each State banking institution as of the same date was \$1,110,799.

The average amount of deposits per State bank June 30, 1914, was \$665,077, and the average deposits of national banks at the same time amounted to \$1,138,040.

The increase in average deposits per national bank from 1914 to 1920 was 87.73 per cent. The increase in the amount of deposits of banking institutions under State supervision for the same period was 67.02 per cent.

¹ Includes rediscounts, amounting to \$1,214,516,000.

A SEVEN-YEAR COMPARISON BY STATES.

The following table shows the increase which took place in the resources of the national banks of the United States between the autumn call for report of condition in 1913 as compared with the corresponding call in 1920.

For the entire country the increase in the resources of all the national banks was \$12,298,932,000, or 113.07 per cent.

The State whose national banks showed the greatest percentage of increase in this period was the State of South Carolina, where the increase was 257.37 per cent. The next highest percentage of increase was shown by the national banks in Oklahoma, 251.93 per cent, The third largest percentage was reported by the banks in Wyoming, 239.77 per cent. In Idaho the percentage of increase was 202.59, The smallest percentage of increase was reported in Rhode Island,

45.56 per cent. The national banks of Hawaii increased 91.21 per cent in the seven-year period.

Comparative statement of the total resources of all national banks as shown by reports of condition as of the date of the fourth calls in the years 1913 and 1920.

CLASSIFICATION OF CERTAIN DEPOSITORS IN AND BORROWERS FROM
NATIONAL BANKS ENGAGED IN SPECIFIED OCCUPATIONS, ARRANGED
GEOGRAPHICALLY BY RESERVE CITIES AND COUNTRY BANKS.

The Comptroller of the Currency requested all national banks of the United States to submit as of November 15, 1920, statements to show, first, the aggregate amount of deposits held by them to the credit of various classes of depositors according to the nature of the business engaged in; and, second, a statement showing the amount of loans and accommodations granted by them to certain classes of borrowers arranged according to the occupation. The returns have been classified and the results are shown in the accompanying tables.

The individual deposits, exclusive of United States deposits and exclusive of amounts due to other banks and bankers, amounted on November 15, 1920, to \$13,719,996,000. This aggregate was made up as follows:

Public funds, States, counties, cities, etc.....	\$629,470,000
Railroad companies, steam.....	286,227,000
Steamship, steamboat, and express companies.....	82,357,000
Electric railway, electric light and power companies.....	95,148,000
Coal companies, firms, and individuals engaged in the mining of coal..	156,063,000
Corporations, firms, individuals, or associations engaged in the mining or manufacturing of iron and steel.....	172,809,000
Oil producing and refining corporations, or firms, individuals, or associations engaged in the business of oil production.....	200,726,000
Other individual deposits (including postal-savings deposits).....	12,097,196,000
Total of all deposits other than bank and United States de- posits.....	13,719,996,000

Of the total railroad deposits (\$286,227,000) held by national banks, \$59,518,000 were held in the national banks in New York City, \$28,245,000 in Philadelphia, \$16,915,000 in Pittsburgh, \$8,696,000 in Chicago, \$7,282,000 in St. Louis, and \$13,182,000 in St. Paul and Minneapolis. In Kansas City the balance amounted to \$7,036,000. In no other reserve city did the railroad deposits in national banks aggregate as much as \$6,000,000.

The total amount of railroad deposits held by all the national banks outside of the reserve cities was \$59,239,000. The only States in which the railroad company deposits in the country national banks aggregated over \$2,000,000 were Pennsylvania, \$7,733,000; North Carolina, \$5,013,000; Virginia, \$4,871,000; Ohio, \$4,471,000; Texas, \$3,824,000; New York, \$2,659,000; New Jersey, \$2,415,000; West Virginia, \$2,327,000; Indiana, \$2,257,000; Illinois, \$2,080,000.

The reserve city national banks holding the principal deposits for the coal companies or concerns engaged in the coal business were New York City, \$29,215,000; Philadelphia, \$16,745,000; Pittsburgh, \$10,242,000.

Of the deposits carried by corporations, firms, individuals, et al., engaged in the manufacture of steel and iron, the national banks in New York City led with \$48,596,000; Pittsburgh came next with \$41,119,000; Philadelphia, \$11,693,000. The only States whose country national banks reported balances to the credit of steel and iron interests in excess of \$1,000,000 were: Pennsylvania, \$9,928,000;

Ohio, \$6,498,000; Minnesota, \$2,482,000; West Virginia, \$1,999,000; Illinois, \$1,522,000; New York, \$1,427,000.

Among those cities whose national banks held the largest balances to the credit of the oil-producing and refining interests were: New York City, \$57,800,000; Tulsa, Okla., \$26,155,000; San Francisco, \$8,613,000; Chicago, \$7,733,000; Pittsburgh, \$6,989,000; Denver, \$5,927,000; Houston, \$5,633,000; Philadelphia, \$3,903,000; Oklahoma City, \$3,277,000; Fort Worth, Tex., \$3,055,000; Los Angeles, \$2,456,000; Boston, \$1,794,000; Cleveland, \$1,773,000; St. Louis, \$1,588,000; Dallas, \$1,486,000.

In no other reserve city did these oil deposits aggregate as much as a million dollars. The States whose country national banks held the largest balances to the credit of the oil producers and refining interests were: Oklahoma, \$9,365,000; Wyoming, \$8,858,000; Texas, \$8,814,000; Pennsylvania, \$7,708,000; Kansas, \$4,946,000; Kentucky, \$2,144,000.

DISTRIBUTION OF LOANS ACCORDING TO OCCUPATION OF BORROWERS.

Total loans and discounts, including rediscounts of national banks, November 15, 1920, amounted to \$13,764,721,000. According to the reports of the national banks, \$9,707,798,000 were made under the following classifications:

To farmers, agriculturalists and live-stock raisers.	\$1, 998, 993, 000
To manufacturing corporations and firms, individuals, and associations directly engaged in manufacturing.	2, 862, 506, 000
To merchants and mercantile corporations, firms, and individuals engaged in the jobbing business of trading, wholesale, etc.	3, 581, 462, 000
Bond and stock brokers and dealers in investment securities.	664, 010, 000
Railroad companies, shipping companies, electric railway, light, and heat and power companies.	225, 389, 000
Professional men, including doctors, lawyers, clergymen, teachers, chemists, engineers, etc.	375, 438, 000
Percentage of total loans and discounts.	70. 53

Of the total loans to farmers and agricultural interests, 83.25 per cent were made by the country banks; 16.75 per cent by the banks in reserve and central reserve cities.

Of the loans to the manufacturing interests, 72.06 per cent were made in the reserve and central reserve cities and 27.94 per cent by the country banks.

Of the total loans made to merchants, mercantile corporations, firms, and individuals engaged in the jobbing business, including trading companies, etc., reserve cities advanced 59.73 per cent; country banks, 40.27 per cent.

To the bond and stock brokers and dealers in investment securities the national banks in reserve and central reserve cities advanced \$533,323,000, and the country banks, \$130,687,000.

Deposit balances with national banks of corporations, firms, individuals, etc., engaged in certain specified kinds of business on Nov. 15, 1920.

[In thousands of dollars.]

	A.	B.	C.	D.	E.	F.	G.		
	Public funds, other than United States Government and postal savings deposits.	Railroad companies—steam.	Steamship, steamboat, and express companies. EARNINGS OF NATIONAL BANKS BY STATES AND CITIES.

The accompanying tables show in detail the earnings, expenses, and dividends of the national banks of the United States for the 12 months ended June 30, 1920, which year was the most successful in their entire history.

From this table it will be seen that during the past year our national banks collected for interest and discount the huge sum of \$1,011,619,000, which represents 91.21 per cent of their total gross earnings, which amounted to \$1,109,116,000.

From exchange and collection charges, their receipts were \$27,481,000, or 2.48 per cent of the gross earnings.

The commissions received from insurance premiums and the negotiation of real estate loans aggregated \$1,417,000, or 0.13 per cent, while miscellaneous earnings show a total of \$68,599,000, or 6.18 per cent of gross earnings.

Despite the great concern which has been displayed during the past year by some of the smaller banks in certain districts as to their exchange and collection charges, we find that less than $2\frac{1}{2}$ per cent of the total gross earnings of the banks are derived from that particular source.

The total expenses of the national banks for the year amounted to \$736,390,000, of which there was paid in salaries and wages \$175,452,000, being 23.83 per cent of total expenses. Interest and discount on borrowed money amounted to \$82,720,000, or 11.23 per cent, and the payments for interest on deposits amounted to \$287,637,000, or 39.06 per cent of the total.

The national banks of the country paid for taxes during the year a total of \$79,484,000, or 10.79 per cent of total expenses. Other expenses amounted to \$111,097,000, or 15.09 per cent.

The amount charged off for losses on account of loans and discounts during the year was \$31,284,000; and on account of depreciation of bonds, securities, etc., \$61,790,000. Miscellaneous losses amounted to \$21,481,000.

The net earnings of the national banks for the year, after payment of expenses of losses (but including \$23,912,000 recoveries on charged-off assets), amounted to \$282,083,000; out of which dividends amounting to \$147,793,000 were paid, leaving a surplus over and above dividends of \$134,290,000.

The net earnings amounted to 23.09 per cent on the entire capital of the banks, or 12.78 per cent on both capital and surplus. The dividends paid during the year amounted to 12.10 per cent on their capital stock.

HEAVY EARNINGS ON NATIONAL-BANK CAPITAL IN LARGE CITIES.

During the 12 months ending June 30, 1920, the national banks in New York City (exclusive of Brooklyn and the Bronx), after deducting expenses and losses, earned upon their capital stock $37\frac{1}{2}$ per cent, and upon both capital and surplus 15.45 per cent. The actual net earnings for the year amounted to \$54,288,000.

In Philadelphia the national banks earned 33.51 per cent on capital and 11.20 per cent on capital and surplus.

The earnings of the national banks in Atlanta upon their capital amounted to 38.84 per cent and upon capital and surplus 18.59 per cent.

In Chicago (central reserve city) they earned upon capital 24.12 per cent and on capital and surplus 13.36 per cent.

The net earnings for the year on capital stock of the national banks in the other eight Federal reserve cities were as follows:

	Per cent.		Per cent.
Boston.....	23.34	Richmond.....	20.66
Cleveland.....	24.60	Dallas.....	30.23
Minneapolis.....	21.46	Kansas.....	17.21
St. Louis.....	17.49	San Francisco.....	18.25

The State where country national banks showed the largest earnings on their capital stock was Louisiana, which reported a percentage earned of 28.49 per cent; the State of Washington came next, 27.90 per cent; and Alabama third, 27.08 per cent. The reserve city whose national banks reported the largest percentage earned on capital stock was Pueblo, Colo., 55 per cent; the next largest earnings were reported from Birmingham, Ala., 39.77 per cent; followed by Atlanta, Ga., 38.84 per cent.

Abstract of reports of earnings, expenses, and dividends of national banks for the year ended June 30, 1920.

¹ Mar. 1, 1906, to July 1, 1907; thereafter years ended July 1.

**EARNINGS, EXPENSES, AND DIVIDENDS OF NATIONAL BANKS FOR
FISCAL YEARS 1919 AND 1920.**

The returns for the 12 months ended June 30, 1920, show gross earnings to the amount of \$1,109,116,000. This is an increase over the year ended June 30, 1919, of \$198,356,000. Of the aggregate amount of gross earnings reported during the year ended June 30, 1920, \$1,011,619,000 was collected for interest and discount, \$27,481,000 represented exchange and collection charges, while commissions and earnings from insurance premiums and the negotiation of real estate loans and other miscellaneous earnings totaled \$70,016,000.

The net addition to the profits of national banks during the year ended June 30, 1920, was \$282,083,000 as compared with \$240,366,000 added to the profits of these banks during the year ended June 30, 1919. The total dividends declared during the year amounted to \$147,793,000, or \$12,205,000 in excess of dividends declared during the year ended June 30, 1919. Based upon the paid-in capital stock, the dividends averaged 12.10 per cent, while the net addition to the profits of these banks averaged 23.09 per cent of paid-in capital as compared with 21.55 per cent the preceding year.

In the following statement the capital, surplus, gross and net earnings, and dividends declared by national banks in the 12 months ended June 30, 1920, are compared with similar data for the year ended June 30, 1919:

Earnings and dividends of national banks for fiscal years ended June 30, 1919 and 1920.

[In thousands of dollars.]

LEGISLATION ENACTED RELATING TO NATIONAL BANKS.

At the last session of the Sixty-sixth Congress and subsequent to the issuance of the Comptroller's report of December 1, 1919, legislation was enacted amending section 5182 of the Revised Statutes relating to signatures on national-bank circulation; section 14 of the Federal reserve act as amended relating to discounts to be charged by the Federal reserve banks, and of the act of October 15, 1914, "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," relating to bank directorates.

Section 5182, United States Revised Statutes, as amended January 13, 1920, is as follows:

FOR WHAT DEMANDS NATIONAL-BANK NOTES MAY BE RECEIVED.

337. SEC. 5182 (as amended 1919). Any association receiving circulating notes under this title may, if its promise to pay such notes on demand is expressed thereon, attested by the written or engraved signatures of the president or vice president and the cashier thereof in such manner as to make them obligatory promissory notes payable on demand at its place of business, issue, and circulate the same as money. Such written or engraved signatures of the president or vice president and cashier of such association may be attached to such notes either before or after the receipt of such notes by such association. And such notes shall be received at par in all parts of the United States in payment of taxes, excises, public lands, and all other dues to the United States, except duties on imports; and also for all salaries and other debts and demands owing by the United States to individuals, corporations, and associations within the United States, except interest on the public debt, and in redemption of the national currency.

Subparagraph (d), section 14 of the Federal reserve act, was amended by act of April 13, 1920, to read as follows:

To establish from time to time, subject to review, and determination of the Federal Reserve Board, rates of discount to be charged by the Federal reserve banks for each class of paper, which shall be fixed with a view of accommodating commerce and business and which, subject to approval, review, and determination of the Federal Reserve Board, may be graduated or progressed on the basis of the amount of the advances and discount accommodations extended by the Federal reserve bank to the borrowing bank.

The act of May 26, 1920, amended the proviso at the end of the second clause of section 8 of the act known as the "Clayton Act" to read as follows:

And provided further, That nothing in this act shall prohibit any private banker or any officer, director, or employee of any member bank, or class A director of a Federal reserve bank, who shall first procure the consent of the Federal Reserve Board, which board is hereby authorized, at its discretion, to grant, withhold, or revoke such consent, from being an officer, director, or employee of not more than two other banks, banking associations, or trust companies, whether organized under the laws of the United States or any State, if such other bank, banking association, or trust company is not in substantial competition with such banker or member bank.

The consent of the Federal Reserve Board may be procured before the person applying therefor has been elected as a class A director of a Federal reserve bank or as a director of any member bank.

CHANGES RECOMMENDED IN BANK ACT.

Section 333 of the Revised Statutes of the United States provides that the Comptroller of the Currency shall include in the annual report which he is required to make to the Congress at the commencement of the session his recommendations as to "any amendments to the laws relative to banking by which the system may be improved

and the security of the holders of its notes and other creditors may be increased."

Pursuant to this requirement of law, I have the honor to include in the report for the current year, a number of new recommendations as to certain changes and revisions in the national bank act and to repeat a number of recommendations made in my reports in previous years upon which the Congress has as yet taken no action.

Of the new recommendations, the one which is believed to be the most important at this time is for an amendment which would make it possible for banks, in times of emergency, to obtain discounts, under carefully guarded restrictions, on paper which is not eligible for rediscount under the law as it now stands.

This recommendation is, I believe, in accord with the views of all of the 12 chief national bank examiners who are in immediate and direct touch with the condition and needs of the banks, both large and small, in all parts of the country. I am confident that a study of the situation and all the facts will carry conviction that adoption of such an amendment as is here recommended would do much towards relieving the existing tension and apprehension, would promote confidence, and would aid in establishing stability throughout the country.

TO ENABLE A NATIONAL BANK TO OBTAIN RELIEF IN EMERGENCY BY USE OF THEIR OTHER ELIGIBLE PAPER OR U. S. BONDS.

Largely through the aid and excellent functioning of the Federal Reserve System, the business and banking interests of the country have passed successfully through the perils of inflation and the strain and losses of deflation without panic and without the demoralization which has been produced in the past at various times from far less serious and racking causes. Those banking and other interests which at the outset so vigorously opposed the Federal Reserve System are now among its warmest advocates.

The several amendments which, since its passage in 1913, have been made to the law as a result of experience have materially added to its use and efficiency, and it is natural to expect our banking laws to receive such further revision and modifications as actual experience from time to time shall suggest, but the fundamentals and essentials of this great piece of constructive legislation will long endure if the welfare of all the people continues to govern legislation.

Under existing laws no national bank can obtain funds lawfully from its Federal reserve bank, however urgent the need, except upon the security of United States obligations or upon paper of a certain character and description shown to be eligible under the regulations of the reserve board.

There are many national banks throughout the country, including some of the largest and most ably and conservatively managed which include in their assets large amounts of securities of a high character, including State and municipal bonds, prior lien railroads, mortgages and industrial mortgage bonds of unquestioned merit and value, and also a large amount of good obligations of business houses, but which have on hand only a comparatively small proportion—in

many cases less than 25 per cent—of their total assets in paper or securities eligible for rediscounts or loans at reserve banks. If banks in this condition should have the misfortune to be subjected to a run upon their deposits they would be unable to obtain loans or advances from their reserve banks except to the extent of the eligible paper which they may have on hand.

In times such as we have been through in the past few years they would also find it impossible or impracticable to convert even their high-class securities into money except at a grave sacrifice, if at all, and attempts to realize upon large blocks of securities might precipitate further trouble on such markets as we have sometimes had in the past.

The suspension of a large and sound national bank because of inability to realize promptly on high-grade securities and loans in order to meet a run might precipitate a panic and financial crisis which it would be difficult to stem. For the protection of national banks in such an emergency and to prevent the demoralization which, under certain conditions, the failure of important banks might precipitate, I respectfully recommend to the Congress that there be an amendment to the bank act that shall make it possible, under proper safeguard, for a national bank which is found to be in sound and solvent condition to obtain in an emergency funds from its reserve bank upon its obligations when secured by *other collateral than United States Government securities or "eligible" paper*, when such loans shall be recommended by the reserve bank of the district, and approved by not less than three-fourths of the members of the Federal Reserve Board (including the Secretary of the Treasury), when such relief may be deemed by the reserve board to be necessary to prevent suspension or failure of the member bank.

Authority to make such advances upon collateral other than the security of the class provided for by the present law should be safeguarded with the utmost care and should be exercised only as an emergency act and upon abundant security. There should be provided on such advances a margin of at least 20 or 25 per cent in excess of the amount loaned, and at an appropriate rate of interest, and the time of such advances should be strictly limited. It may also be desirable to stipulate that in such an emergency relief shall not be granted to the same institution oftener than once or twice.

I believe that the enactment of such an amendment to the national bank act making such relief to national banks possible would prove distinctly salutary and would largely dispel the nervousness which sometimes arises in financial circles because of the possible dangers of the situation as the law now stands, and would inspire increased confidence in our whole banking situation. With such an amendment to the law as is here recommended it is believed that a suspension or failure of an honestly and capably conducted national bank would be made practically impossible.

State bank or trust company members of the Federal Reserve System are not included in these recommendations as suggestions to the Congress as to changes in the law affecting them should come from the Federal Reserve Board rather than from the Comptroller of the Currency.

NATIONAL BANK OFFICERS SHOULD NOT BORROW FROM THEIR OWN BANKS.

The experience of the past shows that one of the greatest elements of danger and loss to national banks has been the excessive loans which have been granted by banks to their own officers and directors and to their affiliated enterprises. Such loans have been a prolific cause of bank failures in the past, and it is important for the protection of the depositors and shareholders in the banks that this abuse be remedied. While the large majority of our national banks are not open to criticism in this respect, there are entirely too many banks, both large and small, whose success and progress, and in many cases, whose safety is jeopardized by the excessive and unjustifiable extension of credit and funds to insiders.

The evil effects of these loans are manifold. Even where they may be safe and well secured, they often result in tying up too large a proportion of the bank's resources, thereby preventing other customers of the bank from receiving accommodations which they naturally expect and to which they are entitled. Officers of the bank also too frequently borrow from their own bank on inadequate collateral or security of a class which would be unavailable at other banks, and experience shows that the lending bank frequently loses heavily from such loans. When the executive officers of national banks borrow funds from their own banks for speculative uses, they set an unfortunate precedent to junior officers and employees who, by the example of their senior officers, are often tempted into speculative schemes which divert their minds and energies from their own important duties, impair their usefulness, and sometimes subject the lending banks to serious loss.

When the senior officers of national banks engage habitually in syndicate operations and participations and underwriting engagements which are handled often through their own banks as depositary or transfer agents or registrar for the new issue of securities, the junior officers and clerks frequently ask for participations; and the senior officers having themselves subscribed to the syndicate, often borrowing from the bank in doing so, have not the courage to refuse to give their clerks and junior officers also the privilege to participate.

Cases from time to time come to light where important banks to which are entrusted millions of dollars of the funds of depositors are found lending the funds of the bank in large sums to practically all their senior and junior officers—president, vice presidents, cashier, and assistant cashiers—and while they are extending these large and excessive accommodations to their own officers, largely for speculative ventures, the banks are themselves borrowing heavily from the Federal reserve banks of their district. Such conditions and practices are indefensible and should not be tolerated or permitted by directors and stockholders.

The New York Stock Exchange has rigid rules to restrict members of the stock exchange from buying and selling stocks and from carrying speculative accounts for the *clerks and minor employees* of banks; but there are at present no laws which prevent the *senior and junior officers* of national banks from using the funds of their own banks in speculative and hazardous ventures. Instances are sometimes brought to

the attention of this office where practically *all* of the senior officers of national banks have been found to be actually engaged in speculative operations and lending to themselves the funds of the banks for carrying their accounts. In some cases national banks were also found to be lending large sums to the officers of other banks on slow and doubtful securities, while the officers of these other banks were in return borrowing on stocks and securities in large amounts from the national bank whose officers their own banks had accommodated with loans.

To overcome these evils, I respectfully recommend that the national-bank act be so amended as to prevent all active salaried officers and employees of national banks from borrowing money from the banks by which they are employed.

PENALTIES FOR GRAFTING BANK OFFICERS.

A growing tendency has been manifested on the part of the management of certain banks in this country to depart from the safe and long-honored traditions and the primary purposes of legitimate banking, which is to protect and safeguard deposits, and to extend credit and lend money safely for the legitimate uses of industry, of agriculture and commerce, while keeping their resources reasonably liquid and in motion.

The record shows that bank officers too frequently yield to the temptation to tie up the funds of commercial banks in experimental enterprises and in schemes necessitating the use of capital for long periods for construction work and for capital loans which result in heavy losses ultimately; and not infrequently the officers of the banks which participate in these flotations are sensibly or insensibly influenced to approve such loans because of the profits and commissions, or bonuses, received by them, directly or indirectly, or because of the opportunity afforded them to acquire securities in the new enterprises at prices materially below the value at which they are given to the public.

The law should be strengthened so as to definitely prevent, under heavy penalty, a salaried officer of a bank from profiting personally through such control and use or misuse of the funds of the bank.

"SECURITIES COMPANIES" AS ADJUNCTS TO NATIONAL BANKS OFTEN A MENACE.

Some "securities companies" operating in close connection with, and often officered by, the same men who manage the national banks with which they are allied, have become instruments of speculation, and headquarters for promotions of all kinds of financial schemes. Many of the flotations promoted by the "securities corporations" which are operated as adjuncts to national banks have proven disastrous to their subscribers, and have in some instances reflected seriously not only upon the credit and standing of the "securities companies" by which they are sponsored but also in some cases have damaged the credit and reputation of national banks with which the "securities companies" are allied.

It has been established clearly by decisions of the United States Supreme Court that a national bank can not, *except* as authorized by the Federal Reserve act, hold the stock of other national banks

or the stock of other corporations; but these adjunct or auxiliary companies whose stockholders are identical with the stockholders of the national banks with which they are connected by various ties and devices frequently deal actively in stocks, and they also sometimes acquire the ownership or control of other banks, national and State, through their stock purchases.

In times of rising prices and active speculation some of these auxiliary corporations have made large profits through their ventures and syndicate operations, but their losses in other periods have been heavy, and they have become an element of increasing peril to the banks with which they are associated. The business of legitimate banking is entirely separate and distinct from the kind of business conducted by many of these "securities corporations," and it would be difficult, if not impossible, for the same set of officers to conduct safely, soundly, and successfully the conservative business of the national bank and at the same time direct and manage the speculative ventures and promotions of the ancillary institutions. These varying institutions demand a different kind of ability and experience on the part of those who manage them, and the two types of business when combined with one management are likely to be operated to the advantage of neither.

A national bank lends not only its own capital but the money of its depositors, and in doing this is not expected to tie up its funds in long-time and unliquid loans in doubtful ventures. The "securities companies" theoretically invest and speculate with their own funds—that is to say, the funds supplied by their own stockholders—not with the funds of depositors; but as a matter of fact, experience shows that "securities companies" often draw and absorb large sums of money from the allied national banks, and sometimes also borrow heavily from other national banks which operate other "securities companies," and so on, in an endless chain of reciprocal borrowing and mutual lending for the accommodation of speculative cliques.

These ancillary companies are being used with increasing frequency for promotion of speculation and for dealings in bonds and stocks, often those of new and unseasoned issues, and which are attended with improper hazard risk, and as a means of enabling banks to do, indirectly through their instrumentality, things which they can neither safely nor lawfully do directly.

BANKS EXERCISING TRUST POWERS HAD BEST AVOID HAZARDOUS CONNECTIONS.

The new and enlarged powers which have been conferred upon national banks under the provisions of section 11 of the Federal reserve act, by which they are given authority to act as executor, trustee, administrator, guardian, etc., and in other fiduciary capacities, make more than ever imperatively important the safest and most conservative management and avoidance of the dangers attending speculative ventures and the promotions of new and untried enterprises.

Many different devices and methods have been resorted to for the purpose of circumventing the law and of tying up and aligning with national bank "securities companies." The operations and practices of these "securities companies" as now conducted are often directly

opposed to the elementary principles of sound banking, and for the protection of the 500,000 shareholders of the national banks, of their more than 20,000,000 depositors and of the trust estates committed to them as executor, guardian, or trustee and otherwise, I recommend that the Congress enact such protective legislation as the facts, obvious tendencies, and equally obvious perils of the future so clearly demand.

If the stockholders of national banks desire to invest their funds in "securities companies" for the purpose of promoting new enterprises or for speculation, these corporations should be operated separate and apart from the national banks. The certificates of stock in such corporations should not be tied up with the stock certificates of national banks, and the management of the bank and of the securities corporation should be entirely distinct, even when the stockholders of the one are the stockholders of the others.

DESIRABLE THAT ACTIVE OFFICERS OF LARGE NATIONAL BANKS BE NOT DIRECTORS IN OTHER CORPORATIONS.

The records of the Comptroller's bureau show that the efficiency and management of some large national banks have been greatly impaired because of a lack of proper attention and direction from their active executive officers, whose time, although they receive large salaries, has been largely diverted from the bank on account of their directorships or trusteeships in various corporations and commercial and industrial enterprises. The position of important banks has been jeopardized and grave losses have been sustained because of this lack of attention from officers whose time has been diverted by other interests; and sometimes heavy losses have arisen from unjustifiable loans to companies in which the bank officers were directors and stockholders. Bank officials should not place themselves in a position where decisions and their judgment may be governed or controlled, consciously or unconsciously, by outside pecuniary interests rather than by the interests of the banks they are employed to serve.

I therefore respectfully recommend that the national-bank act be so amended as to prevent the active and salaried executive officers of national banks, whose resources may be in excess of some reasonable amount, say \$3,000,000 or \$5,000,000, from holding positions as directors, trustees, or officers of other business, industrial, railroad, or other commercial corporations or associations.

SALARIES OF OFFICERS OF LARGE NATIONAL BANKS.

An analysis has been made of the reports received from all national banks in the United States whose total resources, after deducting bills payable and rediscounts, amounted to as much as \$20,000,000 or more in order to compare the salaries paid by these banks to their principal executive officers. The accompanying statement shows the salaries paid to the officers of these banks by groups. These groups contain all banks in all parts of the country whose resources come within the figures mentioned. The classification is not according to geographical districts, and in listing the banks in each respective group they are not listed alphabetically or according to size.

The figures disclose a very wide variation in salaries paid by different banks. In some instances large and successful institutions are pay-

ing comparatively small salaries, and in other cases comparatively small banks are paying to their executive officers very high salaries.

These inequalities would probably exist to a much less extent if the stockholders of all banks were informed as to the salaries paid to their executive officers, but, unfortunately, it is the exception rather than the rule for the majority of the stockholders of the bank to be informed as to the salaries paid to executives. This condition, however, applies to many other corporations as well as to national banks.

Salaries paid to chairman of board, president, vice president, cashier, and assistant cashier by all national banks in United States whose net resources, exclusive of bills payable and rediscunts, were in excess of \$20,000,000 on Nov. 15, 1920.

Z1.....	2 25,000	1 5,600	8,000	2 9,200	47,800

2 President.

There would seem to be no good reason why national banks should not be required to mail to all of their stockholders, after each annual meeting, first a condensed statement of the assets and resources of the bank; second, the profit and loss statement for the year; third, statement as to the salaries paid to their principal officers; fourth, total number of employees and the average salary paid to all employees other than the aforesaid officers. The stockholders of the banks, who are their owners, are entitled to have this information, and I respectfully recommend to the Congress legislation to this end.

RECOMMENDATIONS OF PREVIOUS YEARS AGAIN URGED.

The experience of this bureau from year to year emphasizes the importance of the recommendations which I had the honor to make in my annual report for last year, and in previous reports, in advocacy of certain amendments and additions to the national-bank act which are deemed necessary for the protection of depositors and stockholders, and for the benefit and welfare of the banks themselves, their clients, and the communities which they serve. I, therefore, beg leave to again recommend that the following matters of legislation receive early consideration and action by the Congress:

TO PROHIBIT OFFICERS OF BANKS FROM BORROWING FROM THEIR OWN BANKS.

First. That the officers of a national bank be prohibited from borrowing funds of the banks by which they are employed.

TO LIMIT DIRECT AND INDIRECT LOANS TO ONE INDIVIDUAL, FIRM, OR CORPORATION.

Second. That a conservative and proper limitation be placed upon the aggregate amount of money any one person, company, corporation, or firm may obtain from a national bank through the discounting of commercial paper and bills of exchange. The limitation of 10 per cent of the capital and surplus under section 5200, United States Revised Statutes, does not apply to "bills of exchange

drawn in good faith against actually existing values and the discount of commercial or business paper actually owned by the person negotiating the same."

It is recommended also that a specific penalty be provided for violations of section 5200, enforceable against the officers and directors of the bank responsible for the violation, in addition to the statutory penalty for forfeiture of charter for violation of the national-bank act.

TO PROVIDE SUITABLE PENALTY FOR MAKING OF EXCESSIVE LOANS.

Third. That the penalty for an excessive loan be the disqualification of the officer making or granting the loan, or the imposition of a suitable fine, or both, in addition to the civil liability incurred by reason of making such loan.

A fruitful source of loss and often of failure to banks has been the making of excessive loans, and yet the only penalty provided under the present law for this offense is the forfeiture of the bank's charter, which, if resorted to, would result in most cases in a hardship to the bank and its shareholders quite out of proportion to the offense

TO AUTHORIZE THE COMPTROLLER TO BRING PROCEEDINGS AGAINST DIRECTORS FOR LOSSES SUSTAINED BY BANK THROUGH VIOLATION OF THE NATIONAL-BANK ACT.

Fourth. That the Comptroller of the Currency be authorized to bring proceedings against directors of a national bank for losses sustained by the bank through violations of the provisions of the national-bank act or the Federal reserve act.

Section 5239, United States Revised Statutes, provides as follows:

"If the directors of any national banking association shall knowingly violate, or knowingly permit any of the officers, agents, or servants of the association to violate, any of the provisions of this title, all the rights, privileges, and franchises of the association shall be thereby forfeited. Such violations shall, however, be determined and adjudged by a proper circuit, district, or Territorial court of the United States, in a suit brought for that purpose by the Comptroller of the Currency, in his own name, before the association shall be declared dissolved. And in cases of such violation every director who participated in or assented to the same shall be held liable in his personal and individual capacity for all damages which the association, its shareholders, or any other person shall have sustained in consequence of such violation."

Banks often have sustained large losses as a result of the willful and persistent disregard by its directors of the clear provisions of the national-bank act. These losses, resulting from violation of the law by directors, fall upon the stockholders. The directors who have occasioned these losses by involving the bank in unlawful transactions to facilitate or promote schemes or enterprises in which the directors may be concerned, are found sometimes to be holders or owners of but a few shares of the stock of the bank the affairs of which they are directing and the funds of which they frequently have tied up in the promotion of their own private schemes.

AUTHORITY FOR REMOVAL OF DIRECTORS GUILTY OF PERSISTENT VIOLATIONS OF THE NATIONAL-BANK ACT.

Fifth. That the Comptroller of the Currency shall be empowered, after one hearing, with the approval of the Secretary of the Treasury or the Federal Reserve Board, as Congress shall deem best, to require the removal of a director or directors or any officer of a bank guilty of persistent violations of any of the more important provisions of the act, and to direct that suit be brought in the name of the bank by the Comptroller against such director or directors, after they cease to be connected with the bank, for losses sustained by their malfeasance or misfeasance in office.

PREVENT DELAYS IN TAKING DIRECTOR'S OATHS.

Sixth. That the law provide that if a director when elected does not qualify and forward his oath to the Comptroller within 30 days after his election a vacancy shall be declared immediately, to be filled by the remaining directors, as provided by section 5148, United States Revised Statutes, and the derelict director be ineligible for reelection as director for that year.

ESTABLISHMENT OF APPROPRIATE PENALTIES FOR VIOLATIONS OF LAWS AND REGULATIONS.

Seventh. That the Comptroller's office be empowered to penalize by the imposition of appropriate fines, all infractions and violations of the law and the regulations of this office made in pursuance of the provisions of the national-bank act, and that these fines be imposed upon the offending officers as well as upon the bank.

Experience has also made it very clear that violations of certain sections of the law should be punishable with imprisonment, as well as fine, suits to enforce such penalties, of course, to be instituted by the Department of Justice in the United States courts.

TO PROVIDE THAT SUITS AGAINST USURERS BE BROUGHT BY DEPARTMENT OF JUSTICE.

Eighth. That an amendment be adopted authorizing and directing the Department of Justice to bring suit against national banks guilty of usury upon information furnished either through the Comptroller of the Currency or through other sources.

TO AUTHORIZE SPECIAL INTEREST CHARGES FOR SMALL LOANS.

Ninth. That section 5197, United States Revised Statutes, be so amended as to authorize a national bank to make an interest charge of 25 cents on any loan, even though that charge might exceed the legal rate authorized by law. The amendment should be so framed, however, as to make it impracticable for a bank to evade the intent of the law by requiring customers to make a multitude of small notes and then charge 25 cents for each note.

Such an evasion of the law against usury might be prevented by providing that if a charge of 25 cents shall have been made to a customer on any particular day, and this charge shall be in excess

of the legal rate of interest, no similar minimum charge shall be made the same day to the same customer on any other note, if in excess of the legal rate. This would prevent a bank from requiring a customer who might want to borrow \$100 for 30 days from giving 20 notes for \$5 each, to be charged 25 cents on each note, which would amount to \$5, or 60 per cent per annum for the accommodation.

TO PREVENT OR LIMIT OVERDRAFTS.

Tenth. That the laws of the respective States in regard to overdrafts be made applicable to national banks in those States, and that the individual liability prescribed by section 5239, United States Revised Statutes, shall be made applicable to any violations of this provision, and also that the officers of the national bank shall be required to bring before the directors, in writing, at each directors' meeting, a list of all overdrafts made since the previous meeting of the board.

In some States directors, officers, and employees of banks who knowingly overdraw their accounts are guilty of felony and may be imprisoned.

TO LIMIT INTEREST PAID ON DEPOSITS.

Eleventh. That the rates of interest which any national bank may pay on its deposits shall not exceed 4 per cent per annum unless the highest rate for time commercial paper fixed by the Federal reserve bank of the district shall be more than 4 per cent, in which event the rate of interest that may be paid may equal but not exceed such discount rate charged at that time by the Federal reserve bank of the district: *Provided, however,* That if the laws of a State fix the maximum rate of interest that may be allowed on bank deposits, the rate so fixed for State banks be applicable also to national banks in that State.

LIMITATION OF DEPOSITS TO 8 OR 10 TIMES CAPITAL AND SURPLUS.

Twelfth. That the total deposits which a national bank may receive shall be limited to 8 or 10 times the unimpaired capital and surplus of the bank.

The experience and observation of this office during the past year strongly emphasize the importance of such legislation, the reasons for which have been presented in a previous annual report

TO PREVENT "WILDCAT" BANKING IN THE DISTRICT OF COLUMBIA.

Thirteenth. That the laws of the District of Columbia be amended to prevent the irregularities and loose methods which arise from the establishment in the District of savings banks and building and loan associations organized in different States and whose charters do not contain the restrictions and provisions which are necessary for the sound and safe conduct of the banking business

It is recommended that an act be passed providing specifically for the incorporation of savings banks in the District, and prohibiting the establishment of any savings bank or building and loan association not incorporated under the laws of the District for the purpose of carrying on its business in the District of Columbia.

TO REQUIRE OFFICERS AND EMPLOYEES TO GIVE SURETY BONDS.

Fourteenth. That all officers of a national bank having the custody of its funds, money, or securities, and all officers, tellers, or other employees of the bank engaged in the handling of its money shall furnish surety bonds, preferably the bonds of an established surety company. In view of the frequent and heavy losses which banks have sustained from unfaithful officials this recommendation is important.

TO REQUIRE CERTIFICATES OF DEPOSIT TO BE SIGNED BY TWO OFFICERS.

Fifteenth. That all certificates of deposit must be signed by two officers of the bank, and a penalty provided for the issue of any such certificate not signed by two officers.

The records of the office show how heavy and needless losses have been sustained by banks for failure to observe this safeguard.

TO PREVENT ERASURES ON THE BOOKS OF A BANK.

Sixteenth. That no officer or employee of a national bank shall erase or cause to be erased or removed, either by acid or abrasion, any entries on the books of any national bank.

Where entries have been made inadvertently or erroneously and it is desired to correct them, they should be canceled by having three lines drawn across them in black or red ink in such a manner as to indicate its cancellation, but not to make it impossible to decipher the original entry.

National banks have suffered serious losses from erasures and changed entries by dishonest bookkeepers and officers to conceal or to falsify transactions.

STANDARDIZATION OF BY-LAWS.

Seventeenth. That authority be given to standardize the by-laws of national banks and provide, inter alia, for the annual meetings of stockholders and for the submission to shareholders of definite reports as to the bank's operations and earnings and general condition.

Stockholders frequently have occasion to complain bitterly of the scant information laid before them by their officers in charge.

RECHARTERED BANKS SHOULD BE ALLOWED TO USE BANK-NOTE PLATES OF ORIGINAL BANK.

Eighteenth. That rechartered national banks be authorized to continue the use of the old bank-note plates. The repeal of the act of July 12, 1882, to that extent is recommended, as its enforcement merely subjects both the banks and the Government to needless expense.

The rechartered banks also should be permitted to utilize the notes of the original bank which may have been prepared by the Bureau of Engraving and Printing, with the proviso that these notes shall be given a mark of identification, to distinguish them from the notes issued prior to the rechartering of the bank, the old plates also to be

given an appropriate mark of identification. Because of the present provisions of the law \$23,833,190 of unissued currency belonging to banks whose charters were renewed was destroyed during the three fiscal years ending October 31, 1920.

TO AUTHORIZE NATIONAL BANKS TO ESTABLISH BRANCHES IN THE UNITED STATES.

Nineteenth. That national banks, with the approval of the Comptroller of the Currency, shall be allowed to establish and maintain branches within certain limits, for example, within city or county lines, but not without the boundaries of the State in which the parent bank may be located, and if such State be partly within one Federal reserve district and partly in another Federal reserve district such branches shall be established only in that portion of the State which is in the same Federal reserve district as the parent bank.

No national bank should be permitted, however, in this country, to have more than 12 branches. The capital of the parent bank should be increased, with the establishment of each branch in the town in which the bank is located, in an amount equal to not less than 50 per cent of the minimum capital which would be required for the organization of a national bank in the city wherein the parent bank is located, and the capital of the parent bank shall be increased with the establishment of each branch outside the city where the parent bank is located in an amount equal to the capital now required by the national-bank act for the organization of a national bank in the place where the proposed branch is to be located.

TO PERMIT BRANCH BANKS IN ALASKA AND INSULAR POSSESSIONS.

Twentieth. That national banks be permitted to establish branches in Alaska and in the insular possessions of the United States.

TO PROVIDE A PENALTY FOR MAKING FALSE FINANCIAL STATEMENTS FOR THE PURPOSE OF OBTAINING CREDIT FROM NATIONAL BANKS.

Twenty-first. That the Criminal Code be so amended as to provide that any person, firm, or corporation obtaining a loan or credit from a national bank based on a false statement, wilfully made, of the financial condition of the borrower, shall be guilty of a felony and that appropriate penalties be provided.

TO PROVIDE PUNISHMENT FOR BREAKING AND ENTERING A NATIONAL BANK FOR THE PURPOSE OF THEFT OR ROBBERY.

Twenty-second. It is recommended that the breaking or entering of a national bank or any place or building occupied by such bank, for the purpose of theft or robbery, shall be made a Federal crime to be prosecuted in the proper district court of the United States.

The penalties provided by the criminal statutes of the various States for housebreaking and burglary vary, and it frequently happens that criminals guilty of such offenses, if apprehended, are not adequately punished.

TO LIMIT INVESTMENT IN BANK BUILDING.

Twenty-third. It is respectfully recommended that section 5136 be amended to provide that no national bank shall be permitted to tie up by investment in an office or bank building an amount in excess of the paid-in capital of the bank. This provision should apply also to trust companies and banking institutions doing business in the District of Columbia. A further limitation based on total resources would be advisable.

Section 5136, United States Revised Statutes, at present permits a national bank to invest its funds in a bank building for its own use but there is no limitation upon the amount of money which a national bank may tie up in this manner. The records of this office show various instances where banks have been brought to grief and where their creditors have sustained serious losses because of the tying up of an excessive proportion of their resources in elaborate, ostentatious, and unnecessary bank buildings.

TO AUTHORIZE THE COMPTROLLER OF THE CURRENCY TO SELL BONDS
SECURING CIRCULATION 30 DAYS AFTER A BANK GOES INTO LIQUIDATION.

Twenty-fourth. Under section 5222, United States Revised Statutes, a national bank going into voluntary or involuntary liquidation is given six months in which to settle its circulation liability before the Comptroller of the Currency is authorized to sell the bonds securing the circulation.

As there is, however, no provision in the law by which a bank in liquidation can be forced to maintain its 5 per cent redemption fund, and as the Treasurer is required by law to redeem all bank notes as presented, it is respectfully recommended that the Comptroller of the Currency be authorized to sell the bonds securing circulation at any time after the expiration of 30 days from the date on which the bank goes into liquidation.

TO REQUIRE TWO SIGNATURES TO ALL "CHARGE TICKETS."

Twenty-fifth. That provision be made whereby no national bank shall have the right to make a charge against the account of a depositor except on a charge ticket or order signed by at least two officers of the bank.

The ease and freedom with which certain bank officers are permitted to sign "charge tickets" and "debit slips" against the credit balances of depositors has been much abused and has led to serious frauds and defalcations.

TO PROVIDE FOR VACATIONS AND ROTATION OF BOOKKEEPERS, ETC.

Twenty-sixth. That the Comptroller's Office be given authority to require national banks to shift their bookkeepers and other employees from time to time from one desk or service to another, so as to make it more difficult, if not impossible, for employees of banks to hide their defalcations or to manipulate the books.

TO REQUIRE LONG DORMANT BALANCES TO BE DEPOSITED IN UNITED STATES TREASURY.

Twenty-seventh. That the Congress consider the desirability of passing a law requiring all national banks to pay into the Treasury of the United States all sums of money held by them to the credit of depositors who have not checked against their account or who have not added to their balance by new deposits (exclusive of items which may have been credited to those accounts by the bank itself on account of interest or other collections not made directly by the depositor) for a period of seven years or more, such sums when transferred to the Treasury by the national banks to be accompanied with all information which the bank may possess as to the whereabouts or last known address and next of kin of the depositor. It may be well to require banks, before thus turning over these dormant balances, to publish a list of them twice in a daily newspaper, in or nearest to the city or town in which the bank is located.

Reports made to this office show that the national banks held on March 5, 1917, \$27,000,000 of money on inactive accounts belonging to 736,000 customers who have made no deposits and who have drawn no checks on their accounts for a period of five years or more.

TO ALLOW BANKS TO DEDUCT UNITED STATES BONDS FROM TAXABLE ASSETS.

Twenty-eighth. That section 5219, United States Revised Statutes, be so amended as to provide that in determining the value of the shares of national banks for the purposes of taxation by State authorities the par value of any bonds or other interest-bearing obligations of the United States Government owned by a national bank, and unpledged, shall be deducted from its assets, provided said banks shall have been the owner of such bonds for not less than six months prior to the time for assessing the bank for taxes. This is desirable in order that the ownership of United States Government bonds by national banks may secure to these banks the benefit of the same exemption that the ownership of certain State securities in the hands of State banks gives.

The passage of such an amendment would furthermore greatly increase the desirability, from an investment point of view, with all national banks, of United States Government bonds.

TO INSURE OR GUARANTEE ALL DEPOSITS OF \$5,000 OR LESS.

Twenty-ninth. That legislation be enacted to provide for the Federal insurance or guarantee of bona fide deposits of national banks where the balance to the credit of any one individual amounts to a sum not exceeding \$5,000, and upon which interest not exceeding 3 per cent per annum is paid. It is also recommended that it be made discretionary with the national banks as to whether or not they shall take advantage of the provisions of such a law.

The main arguments in favor of the adoption of such a plan as this are—

First. That it would bring from hiding places many millions of dollars of money hoarded in all parts of the country.

Second. That such a guaranty law would afford complete security to some 16,000,000 depositors in the national banks whose balances amount to \$5,000 or less.

Third. That such a law would largely prevent in the future runs on national banks, with the disturbances and panics which they sometimes precipitate.

Fourth. That the application of this law would contribute more to the unification and solidarity of the entire banking system than anything else that could be done at this time.

FORM SUGGESTED FOR CERTAIN AMENDMENTS TO BANK ACT.

The following amendments to sections of the national-bank act would effect the changes noted in the foregoing recommendations, Nos. 6 and 18. An amendment is also suggested to the consolidation act of November 7, 1918. The proposed new matter in each section is in italics.

EXTENSION OF CORPORATE EXISTENCE OF NATIONAL BANKING ASSOCIATIONS.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That sections 1 to 7, inclusive, of the Act of July 12, 1882, be amended to read as follows:

"SECTION 1. That any national banking association organized under the Acts of February 25, 1863, June 3, 1864, and February 14, 1880, or under sections 5133, 5134, 5135, 5136, and 5154 of the Revised Statutes of the United States, *or any national banking association, the corporate existence of which may have been extended under the Act of July 12, 1882, or reextended under the Act of April 12, 1902,* may, at any time within *one year* next previous to the date of the expiration of its corporate existence under present law, and with the approval of the Comptroller of the Currency, to be granted, as hereinafter provided, extend its period of succession by amending its articles of association for a term of not more than twenty years from the expiration of the period of succession named in said articles of association, and shall have succession for such extended period, unless sooner dissolved by the act of shareholders owning two-thirds of its stock, or unless its franchise becomes forfeited by some violation of law, or unless hereafter modified or repealed.

"SEC. 2. That such amendment of said articles of association shall be authorized by the *vote* of shareholders owning not less than two-thirds of the capital stock of the association, *the vote to be taken at a meeting of the shareholders duly called by giving thirty days' notice, either by publication or by mail, said meeting to be held at any time within the twelve months next preceding the date of expiration of the corporate existence of the association under present law;* and the board of directors shall cause such *vote* to be certified under the seal of the association, by its president or cashier, to the Comptroller of the Currency, accompanied by an application made by the president or cashier for the approval of the amended articles of association by the Comptroller; and such amended articles of association shall not be valid until the Comptroller shall give to such association a certificate under his hand and seal that the association has complied with all

the provisions required to be complied with, and is authorized to have succession for the extended period named in the amended articles of association.

"SEC. 3. That *subsequent* to the receipt of the application and certificate of the association provided for in the preceding section, the Comptroller of the Currency shall cause a special examination to be made, at the expense of the association, to determine its condition; and if after such examination or otherwise it appears to him that said association is in a satisfactory condition, he shall grant his certificate of approval provided for in the preceding section, or if it appears that the condition of said association is not satisfactory, he shall withhold such certificate of approval. *The association shall cause the certificate of the Comptroller, issued under this section, to be published in each issue of some daily or weekly newspaper, published in the city or county where the association is located, for at least thirty days next after the issuing thereof; or if no newspaper is published in such city or county then in the newspaper published nearest thereto, and such proof of publication shall be furnished as may be required by the Comptroller. Notice and date of extension of the corporate existence of the association shall be sent by the association to each shareholder of record, by registered mail, within five days after the receipt of the certificate of the Comptroller authorizing the extension.*

"SEC. 4. That any association so extending the period of its succession shall continue to enjoy all the rights and privileges and immunities granted and shall continue to be subject to all the duties, liabilities, and restrictions imposed by the Revised Statutes of the United States and other acts having reference to national banking associations, and it shall continue to be in all respects the identical association it was before the extension of its period of succession: *Provided, however,* That the jurisdiction for suits hereafter brought by or against any association established under any law providing for national banking associations, except suits between them and the United States, or its officers and agents, shall be the same as, and not other than, the jurisdiction for suits by or against banks not organized under any law of the United States which do or might do banking business where such national banking associations may be doing business when such suits may be begun: And all laws and parts of laws of the United States inconsistent with this proviso be, and the same are hereby, repealed.

"SEC. 5. That when any national banking association has amended its articles of association as provided in this act, and the comptroller has granted his certificate of approval, any shareholder not assenting to such amendment may give notice in writing to the directors, within thirty days from the date of the certificate of approval, of his desire to withdraw from said association, in which case he shall be entitled to receive from said banking association the value of the shares so held by him, to be ascertained by an appraisal made by a committee of three persons, one to be selected by such shareholder, one by the directors, and the third by the first two; *the expenses of such appraisal to be borne equally by the dissenting shareholder and the bank;* and in case the value so fixed shall not be satisfactory to any such shareholder, he may appeal to the Comptroller of the Currency, who shall cause a reappraisal to be made, which shall be final and binding; and if said reappraisal shall exceed the value fixed by said

committee, the bank shall pay the expenses of said reappraisal, and otherwise the appellant shall pay said expenses; and the value so ascertained and determined shall be deemed to be a debt due, and be forthwith paid, to said shareholder from said bank; and the shares so surrendered and appraised shall, after due notice, be sold at public sale, within thirty days after the final appraisal provided in this section: *Provided*, That in the organization of any banking association intended to replace any existing banking association, and retaining the name thereof, the holders of stock in the expiring association shall be entitled to preference in the allotment of the shares of the new association in proportion to the number of shares held by them respectively in the expiring association.

"SEC. 6. *That any association so extending the period of its succession shall not be required to deposit lawful money for its outstanding circulation by reason of said extension and may continue to issue circulating notes of the same design as theretofore issued, said outstanding circulation and notes subsequently issued to be redeemed as provided by existing law. And any gain that may arise from the failure to present national bank circulating notes for redemption shall inure to the benefit of the United States.*

"SEC. 7. *That national banking associations whose corporate existence has expired or shall hereafter expire, and which do not avail themselves of the provisions of this Act, shall be required to comply with the provisions of sections 5221 and 5222 of the Revised Statutes in same manner as if the shareholders had voted to go into liquidation, as provided in section 5220 of the Revised Statutes; and the provisions of sections 5224 and 5225 of the Revised Statutes shall also be applicable to such associations, except as modified by this Act; and the franchise of such associations is hereby extended for the sole purpose of liquidating their affairs until such affairs are finally closed. And all laws and parts of laws in conflict with the provisions of sections 1 to 7, inclusive, of this Act, and the act approved April 12, 1902, be and the same are hereby repealed."*

OATH OF DIRECTOR OF NATIONAL BANK.

SEC. 5147. Each director, when appointed or elected, shall take an oath or affirmation that he will, so far as the duty devolves on him, diligently and honestly administer the affairs of such association, and will not knowingly violate, or willingly permit to be violated, any of the provisions of this title, and that he is the owner in good faith, and in his own right, of the number of shares of stock required by this title, subscribed by him, or standing in his name on the books of the association, and that the same is not hypothecated, or in any way pledged, as security for any loan or debt. Such oath, or affirmation, shall be taken before a notary public or other officer having an official seal and authorized to administer oaths and shall be immediately transmitted to the Comptroller of the Currency and shall be filed and preserved in his office for a period of at least ten years. Any director elect who fails to take the required oath or affirmation within thirty days next succeeding his election shall be deemed to have vacated his place, and any vacancy so created shall be filled by appointment by the remaining directors as provided by section 5148, United States Revised Statutes.

CONSOLIDATION OF NATIONAL BANKS.

503a. That any two or more national banking associations located within the same county, city, town, or village may, with the approval of the Comptroller of the Currency, consolidate into one association under the charter of either existing banks, on such terms and conditions as may be lawfully agreed upon by a majority of the board of directors of each association proposing to consolidate, and be ratified and confirmed by the affirmative vote of the shareholders of each such association owning at least two-thirds of its capital stock outstanding, at a meeting to be held on the call of the directors after publishing notice of the time, place, and object of the meeting for four consecutive weeks in some newspaper published in the place where the said association is located, and if no newspaper is published in the place, then in a paper published nearest thereto, and after sending such notice to each shareholder of record by registered mail at least ten days prior to said meeting: *Provided*, That the capital stock of such consolidated association shall not be less than that required under existing law for the organization of a national bank in the place in which it is located: *And provided further*, That when such consolidation shall have been effected and approved by the comptroller any shareholder of either of the associations so consolidated who has not voted for such consolidation may give notice to the directors of the *consolidated* association within twenty days from the date of the certificate of approval of the comptroller that he dissents from the plan of consolidation as adopted and approved, whereupon he shall be entitled to receive the value of the shares so held by him, to be ascertained by an appraisal made by a committee of three persons, one to be selected by the shareholder, one by the directors, and the third by the two so chosen; and in case the value so fixed shall not be satisfactory to the shareholder he may within five days after being notified of the appraisal appeal to the Comptroller of the Currency, who shall cause a reappraisal to be made, which shall be final and binding; and if said reappraisal shall exceed the value fixed by said committee, the bank shall pay the expenses of the reappraisal; otherwise the appellant shall pay said expenses, and the value so ascertained and determined shall be deemed to be a debt due and be forthwith paid to said shareholder from said bank, and the share so paid shall be surrendered and after due notice sold at public auction within thirty days after the final appraisal provided for in this Act.

SEC. 2. That associations consolidating with another association under the provisions of this Act shall not be required to deposit lawful money for their outstanding circulation, but their assets and liabilities shall be reported by the association with which they have consolidated. And all the rights, franchises, and interests of the said national bank so consolidated in and to every species of property, personal and mixed, and choses in action thereto belonging, shall be deemed to be transferred to and vested in such national bank into which it is consolidated without any deed or other transfer, and the said consolidated national bank shall hold and enjoy the same and all rights of property, franchises, and interests in the same manner and to the same extent as was held and enjoyed by the national bank so consolidated therewith.

TRUST COMPANIES AND BANKS IN THE DISTRICT OF COLUMBIA.

The Code of Laws for the District of Columbia contains no specific provision for the punishment of criminal violations of the banking laws on the part of officers or employees of trust companies and banks other than national doing business in the District of Columbia.

In the comptroller's annual reports for the years 1905 and 1906, attention was called at length to the necessity for legislation regulating banking in the District of Columbia in order to secure to depositors in banks organized under authority of State laws and doing business in the District the same measure of protection that is afforded depositors in banks organized under the national bank act.

In addition to the six trust companies, with deposits exceeding \$55,000,000, there are now 25 banks organized under State and District of Columbia charters and operating in the District of Columbia having aggregate deposits of nearly \$25,000,000. The States under the laws of which these banks were organized and the number of banks organized in each State are as follows: Alabama 1, Arizona 9, Virginia 5, West Virginia 6. Four of the twenty-five banks were organized under the Code of Laws for the District of Columbia as amended by the act of June 30, 1902.

It is therefore recommended that section 713, subchapter X, of the Code of Laws for the District of Columbia, be amended to provide that the provisions of section 5209, United States Revised Statutes, as amended, be made applicable to all banks and trust companies doing business in the District of Columbia.

In the following table is shown the name of each bank and trust company in the District of Columbia, together with amount of capital, deposits, and aggregate assets, on September 8, 1920, and the name of the State etc., in which each savings bank was incorporated:

Savings banks and loan and trust companies in the District of Columbia.

SAVINGS BANKS.

Name of bank.	Capital stock.	Total deposits.	Aggregate assets.	Incorporated in—
Anacostia Bank.....	\$25,000	\$849,460.56	\$896,466.30	W. Va.

DUTIES AND LIABILITIES OF NATIONAL-BANK DIRECTORS.

One of the most important factors in improvement of the condition of national banks in the past few years has been the earnest and conscientious attention given them by their directors and the aroused sense among those officers of the real responsibility of their positions.

Apathy and neglect of directors had in the past been responsible for many bank failures, as the vigilance and fidelity of other directors kept many other banks safe and sound and steered them clear of dangers, hidden or visible. As results of neglect of their responsibilities or attempts to evade them, directors and officials of banks from time to time have been required to restore to banks large sums lost as an incident of such derelictions.

The Comptroller's Bureau for several years past has made a special point of informing the directors of national banks of their duties and responsibilities, and these efforts have found a response so ready as to prove that the class of men composing bank directorates need only, as a general proposition, to be reminded of the importance of official duties to assure their diligence and vigilance.

Three or four years ago national-bank examiners were instructed to read to the directors of national banks at the time of examination a circular letter prepared by this office giving extracts from the law relating to the duties of national-bank officers and directors and decisions of courts bearing upon their liability. The effect of this order has been very salutary and beneficial.

A revised edition of a publication by this office relating to the duties and liabilities of directors of national banks and members of the Federal reserve system, and setting forth the provisions of law defining duties of directors and prescribing penalties for neglect of such duties, has just been prepared by this bureau and is printed as Appendix A, Volume I, in the report of the Comptroller of the Currency for this year.

BANK OFFICERS AND EMPLOYEES CONVICTED OF CRIMINAL VIOLATIONS OF LAW DURING THE YEAR ENDED OCTOBER 31, 1920.

The Department of Justice has furnished the following statement relating to the officers and employees of national banks who were convicted of criminal violations of the national banking laws and sentenced during the year ended October 31, 1920. The offenders convicted include 3 bank presidents, 8 cashiers, 7 assistant cashiers, and 23 others. Their terms of imprisonment ranged from 1 day to 6 years, with varying fines.

Criminal cases under the national banking laws resulting in conviction during the year ended Oct. 31, 1920.

DIGEST OF COURT DECISIONS IN BANK CASES.

In the appendix of the report of the Comptroller of the Currency will be found a syllabus of the cases affecting banks reported during the past 12 months.

Special attention is called to the decision of the Supreme Court of the United States in *Evans v. National Bank of Savannah* (251 U. S., 108) defining what constitutes usury; decision of the Supreme Court of the United States in *Bates v. Dresser*, relative to the degree of care required of directors and officers of national banks; the decision of the Supreme Court of the United States in *Corsicana National Bank v. Johnson*, relative to the liability of directors for assenting to excessive loans and the decision of the United States District Court in *Fidelity National Bank and Trust Co. v. Enright*, State banking commissioner, upholding the right of the Comptroller to permit the use of the words "trust company" as a part of the title of a national bank which has received a permit from the Federal reserve board authorizing it to exercise fiduciary powers.

WHAT CONSTITUTES USURY.

The Supreme Court of the United States held in *Evans*, receiver of the Citizens & Screven County Bank *v. National Bank of Savannah*, 251 U. S., 108, that—

under the national banking act, which expressly empowers national banks to discount commercial paper and permits them to "take, receive, reserve, and charge on any loan or discount made * * * interest at the rate allowed by the laws of the State * * * where the bank is located, and no more," such banks in discounting short-time notes in the ordinary course of business may retain an advance charge at the highest rate allowed for interest by the State law, even though such advance taking would be usurious under the State law in the cases to which it applies.

To discount, *ex vi termini* implies reservation of interest in advance.

LIABILITY OF DIRECTORS OF NATIONAL BANKS—DEGREE OF CARE REQUIRED.

The Supreme Court of the United States in *Bates v. Dresser*, 251 U. S., 524, held as follows:

1. That directors, serving gratuitously, who were without knowledge of the cashier's negligence or of the possibility of such a fraud, and who had assurance from the president, as from the bank examiners' reports, were not negligent in accepting the cashier's statements of liabilities, like his statements of assets, which always were correct, and were not bound to inspect the depositors' ledger or call in the pass books and compare them with it, although there was a by-law, nearly obsolete, calling for examinations by a committee semiannually.

2. That the president, who, besides being a large depositor, was habitually at the bank, in control of its affairs, with immediate access to the depositors' ledger, and who had received certain warnings that the bookkeeper was living fast and dealing in stocks, was guilty of negligence in failing to make an examination.

One who accepts the presidency of a national bank accepts the responsibility for any losses the bank may suffer through his fault.

LIABILITY OF DIRECTORS FOR ASSENTING TO EXCESSIVE LOAN.

The Supreme Court of the United States held in *Corsicana National Bank v. Johnson*, 251 U. S., 68, that where a loan was made by a national bank to two persons jointly, or in form one-half to each, but in substance as a single loan, it violated the national bank act

if in excess of the limit set by Revised Statutes, section 5200. The court further held as follows:

A director's liability for knowingly participating in the making of a loan in excess of the limit prescribed by Revised Statutes, section 5200, is not affected by the supposed standing of the borrowers, the propriety of his motive, the continued prosperity of the bank, its failure to sue other officers or directors, or to sue him until after a change in the stockholding interest or control, or by the fact that incoming stockholders purchased their shares with knowledge of the loan and of his alleged liability and may profit by a recovery against him.

The liability imposed upon the director under Revised Statutes, section 5239, is direct, not contingent or collateral; the cause of action and the damages are complete when the money is loaned; and while the damages may be diminished by what the bank collects from the borrowers, it is not obliged to proceed primarily against them.

The excessive loan being unlawful in toto, the bank's damage in such cases is not measured by the part in excess of what might have been lent lawfully, but by the whole amount plus interest and less salvage.

USE OF WORDS "TRUST COMPANY" AS PART OF TITLE OF NATIONAL BANK.

When the Fidelity Trust Co. of Kansas City was converted into a national bank under the title "Fidelity National Bank & Trust Co. of Kansas City," the right to use the words "trust company" as a part of its title was disputed by the State bank commissioner of Missouri, and in a suit brought by the bank against Enright, State bank commissioner (264 Fed. Rep., 236), the United States district court held:

Where a national bank has been authorized by the Federal Reserve Board, under the power conferred by act December 23, 1913, section 11, subdivision (k), as amended by act September 26, 1918, section 2 (Comp. St. Ann. Supp., 1919, sec. 9794), and not in contravention of the laws of the State, to act as trustee, and in other fiduciary capacities, and its name as a bank and trust company has been approved by the comptroller, its right to use the name and to exercise such functions can not be impaired by any action of the State or its officers.

LETTERS OF CREDIT AND GUARANTIES CONNECTED THEREWITH BY NATIONAL BANKS.

The attention of the Comptroller's office has been called to a recent practice of certain national banks by which letters of credit are issued to their customers in amounts largely in excess of 10 per cent of the banks' capital and surplus, with the agreement on the part of said banks to accept drafts drawn on the issuing bank to the extent of the credit.

If the drafts drawn and acceptances made are at no time in excess of the limit prescribed by section 13 of the Federal reserve act, such transactions may be technically legal, but the practice is attended with danger.

There is no guaranty that the drafts will be kept within this limit, and should the customer fail to provide funds to take up the acceptances at or before maturity, which is always possible, especially where the dealing is with commodities on a fluctuating or falling market, and the accepting bank would have to protect the drafts by taking them up, they would become subject to the limitations of section 5200, United States Revised Statutes. In such instances it is possible that the bank would have to rely on the depreciated commodity attached to the draft for reimbursement.

If this practice is continued, it is strongly recommended that the banks should restrict such credits to a gross amount within the legal

limitations prescribed by the Federal reserve act and should require in addition to the security afforded by the ordinary undertaking and attached documents such guaranty or collateral as will furnish unquestionable security in the transaction.

Another and more reprehensible practice has also recently come to the attention of this office by which certain national banks, in order to accommodate their customers, request other banks or banking companies to issue letters of credit to the customer for large amounts, in some cases for millions of dollars, the bank making the request either uniting with the customer in the undertaking that funds will be provided for protection of the drafts drawn by virtue of the credit on the accepting bank or giving a separate guaranty to such bank that funds will be so provided and that the customer's agreement will be faithfully fulfilled and performed at the time and in the manner provided in his undertaking.

This practice, in addition to the objections heretofore named, is ultra vires and illegal on the part of the bank making the request and executing the guaranty. National banks can only exercise the powers expressly granted by the national-bank act and those necessarily incidental thereto. (*Logan County National Bank v. Townsend*, 139 U. S. 67.) They are specifically granted the power to lend money and accept drafts drawn on them under the provisions and subject to the limitations provided by section 13 of the Federal reserve act, but they are not otherwise authorized to lend their credit to another or to guarantee the undertaking of a customer. *Morse on Banking*, section 65, states the doctrine as follows:

Neither as included in its powers nor incidental to them is it a part of a bank's business to lend its credit. If a bank could lend its credit as well as its money, it might if it received compensation and was careful to put its name only to solid paper, make a great deal more than any lawful interest on its money would amount to. If not careful, the power would be the mother of panics, and if no compensation was received, there is the additional reason, if any is needed, that such a power is in derogation of the rights and interests of stockholders, and at all events could only be exercised with the consent of all. * * *

This text is fully sustained by numerous court decisions. (*Bowen v. Needles*, 94 Fed. 925; *Commercial National Bank v. Pirie*, 82 Fed. 799; *Lewis v. Citizens National Bank*, 183 Pac. 34; *Bank of Valdosta v. Baird*, 165 Fed. 645. See also *Thompson on Corporations*, 5721.)

In *Bowen v. Needles*, supra, decided by the Circuit Court of Appeals of the Ninth Circuit, the court said, in part:

It may be said in general that no banking corporation has the power to become the guarantor of the obligation of another, or to lend its credit to any person or corporation, unless its charter or governing statute expressly permits it. * * *

DIRECTORS PERSONALLY REIMBURSE \$500,000 IN ULTRA VIRES TRANSACTION.

Transactions of this character should no longer be engaged in or permitted by national banks.

In one recent instance a very successful national bank which indulged in this practice now faces a loss of \$500,000 or more, which loss, at the instance of this office, the officers and directors of the bank are arranging to reimburse to the bank from their own personal resources.

EXORBITANT INTEREST RATES BY NEW YORK BANKS.

RENEWAL RATES FOR HUNDREDS OF MILLIONS OF WALL STREET LOANS BY VIRTUALLY ALL NEW YORK CITY BANKS ARE ARTIFICIALLY FIXED DAILY BY SMALL COTERIE OF STOCK EXCHANGE BROKERS IN SECRET MEETING—MONEY ENTICED TO NEW YORK FROM THE INTERIOR TO AID SPECULATION.

During the past year the difficulties of the general business situation have been aggravated by the artificial manipulation of interest rates by banking institutions in New York City acting in concert with the so-called informal "money committee" of the New York Stock Exchange. The effect of these operations and the excessive interest rates exacted on call loans secured by collateral has been far-reaching in disturbing influence both at New York and throughout the country. Large sums of money needed in the agricultural and producing sections of the country have been withdrawn from mercantile, industrial, and agricultural uses to loan out in "Wall Street" at rates fixed by the Stock Exchange "committee," and sometimes at rates even higher.

This whole subject was discussed comprehensively in several statements given to the press by the Comptroller of the Currency, with the hope that the evil might be lessened by exposure and warning during the past few months, and these statements are believed to be of sufficient public interest to be reproduced and made part of the permanent record, here.

Toward the end of July there was in financial circles an increasing feeling of uneasiness, and fears were being expressed that the banks would be unable to supply farmers and business men with the funds usually needed at that time to move crops, which, reports of the Department of Agriculture indicated, were unusually bountiful.

To put the actual facts of the situation before the public and relieve anxiety as to the probable ability of the banks to meet legitimate demands, the comptroller's office under date of July 31, 1920, gave out the following statement:

JULY 31, 1920.

NATIONAL BANKS STRONG AND WELL FORTIFIED—ABUNDANTLY ABLE TO MEET ALL DEMANDS FOR CROP MOVING OR OTHER LEGITIMATE BUSINESS PURPOSES—LIQUIDATION OF UNESSENTIAL LOANS PROGRESSING—FEDERAL RESERVE BANKS' UNUSED LENDING POWER, \$750,000,000; AND BY REDUCING RESERVE REQUIREMENTS ON NOTES AND DEPOSITS 10 PER CENT THE UNUSED LENDING POWER COULD BE INCREASED, IF NEEDED, TO 2½ BILLION DOLLARS.

Official reports to this office from all national banks under the call of June 30, show that in 42 of the 66 reserve and central reserve cities of the country there has been a general tendency toward liquidation and reduction in bank loans since May 4; New York City national banks, however, increased their loans \$114,010,000; Boston, \$16,284,000; Philadelphia, \$15,175,000; Pittsburgh, \$6,235,000; Cincinnati, \$5,647,000; Cleveland, \$4,263,000; San Francisco, \$14,259,000. The aggregate of INCREASES in the other 17 reserve and central reserve cities which reported increases was \$14,847,000.

The reserve and central reserve cities reporting a reduction in loans included Chicago, \$14,528,000; St. Louis, \$913,000; Albany, \$10,574,000; Washington, \$3,027,000; Richmond, \$4,033,000; Atlanta, \$1,815,000; New Orleans, \$1,698,000; Dallas, \$2,943,000; Milwaukee, \$5,554,000; Minneapolis, \$6,035,000; Los Angeles, \$7,614,000. Thirty-one other reserve cities reported an aggregate reduction of \$27,920,000.

The reduction in loans in about two-thirds of the reserve cities has naturally been accompanied by a decline in deposits in those cities, but a large increase of \$340,810,000

of deposits in the New York City banks has more than offset the deposit reduction of \$125,175,000 shown in all other reserve and central reserve cities, so that the net INCREASE IN DEPOSITS in all reserve and central reserve cities, including New York, since May 4, amounts to \$312,647,000. Nearly every reserve city in the South (except Louisville, in the Central West (except in the Cleveland district), and in the West and Southwest, show REDUCTIONS in deposits.

Aside from the disturbed and alarming state of affairs in parts of the Old World, for which, I am convinced, this country's refusal to ratify the Peace Treaty is largely responsible, there is absolutely no justification for the spirit of pessimism and uneasiness prevalent in business and financial circles in many sections of the United States to-day.

The action of the Federal reserve banks in restricting extension of credit for unessentials and luxuries and in encouraging increased production of commodities most needed, has been distinctly beneficial, and has, it is believed, been a material influence in reducing the high cost of living far and wide. Although the application of the brakes seems to have had a jarring effect upon some nervous systems, and has occasioned unfounded fears of a money panic and commercial crisis, there are in our country abundant reasons for confidence and encouragement as to the future.

Those inclined to pessimistic views as to our financial situation probably do not know, or do not appreciate the immensely significant fact that our Federal reserve banks have at this time an unused lending power of 750 million dollars, and that if occasion required the board could, by waiving reserve requirements on deposits and notes only 10 per cent, increase the unused lending power to $2\frac{1}{2}$ billion dollars, which is twenty-five times as much as all the national banks of the country (which constitute a large majority of the membership of the reserve system) were ever borrowing at any one time on bills payable and rediscounts prior to 1913, the maximum of such borrowings at any time up to 1913 having been only 100 million dollars.

In the face of such figures and facts as these the fear expressed in some sections that there may not be money enough available to move the crops seems manifestly absurd. It will be recalled that in 1913, before the establishment of the Federal reserve system, the stringency and uneasiness which prevailed at crop-moving time was instantly relieved by the announcement of Secretary McAdoo that the Government was prepared to deposit 50 million dollars of cash in the banks in the South and West to help move the crops. The Federal reserve banks can, at this time, as I have shown above, based upon their present gold reserve, supply fifteen times as much as the 50 million dollars which was so effective in 1913, wholly without waiving or reducing their reserve requirements.

It is also reassuring to know that this unused lending power of the Federal reserve banks is twice as great as the aggregate amount of all the emergency currency issued in 1914, upon the outbreak of the European war, involving the greatest financial crisis in the world's history. Such figures as these ought to be sufficient to allay fears entertained by pessimists as to the financial condition of this country at this time.

With a sane settlement of present labor troubles and the restoration of the old-time efficiency of labor, and the stabilization which it is hoped the forthcoming rate decision of the Interstate Commerce Commission, together with more scientific administration and less stock juggling in railroad management will bring about, the business outlook for this country will be extremely bright.

I will also add that there is not, and has not been, in my judgment, the least justification for the excessive and burdensome interest rates, running up to 10, 12, and 15 per cent and higher which have been exacted by some of the banks in New York City, the principal financial center of our country. New York is the only city of consequence in the world where such interest rates exist and are tolerated. They do not prevail in London or Paris, Berlin or Rome, Peking, Hongkong or Tokio, or in any of the leading cities of our own country, San Francisco, St. Louis, Kansas City, New Orleans, Atlanta, Dallas, Chicago, Minneapolis, Cleveland, Richmond, Baltimore, Philadelphia, or Boston.

These excessive interest rates and the publicity given them have increased the uneasiness in financial circles and have been a contributing cause rather than a consequence of the upsetting of security values, and of the excessive and unjust rates which corporations and others have been required to pay for money in recent months. The banks which have charged their customers these excessive rates—at times as high as 15 per cent or more—have themselves at the same time been liberally accommodated with millions of dollars by the Federal reserve banks at average rates of considerably less than 6 per cent.

Under date of August 10, 1920, the Comptroller of the Currency gave to the press the following supplementary statement relative to excessive rates in New York:

AUGUST 10, 1920.

As there seems to be some confusion in the public mind as to the amount of demand or call loans in New York City banks which have been and are subject, more or less, to the excessive and oppressive interest rates which have been exacted from time to time during the past six or eight months, the following figures may be instructive to the public:

The total amount of call or demand loans made by all national banks in New York City as of the date of the last call June 30, 1920, was approximately.....	\$500, 000, 000
It is assumed that the amount of money which New York City State banks and trust companies were lending on call loans, plus demand loans placed by New York City banks for outside correspondents, amounted on same date to more than.....	500, 000, 000

Making a total of such demand loans of over..... 1, 000, 000, 000

The total amount of time loans in all national banks in New York City June 30, 1920, exclusive of "acceptances" was reported at 2,205 million dollars, of which 430 million dollars were secured by stocks and bonds. The aggregate of the loans (both demand and time) which the New York City national banks had placed for their correspondent banks, was reported to this office as of February 1, 1920, at more than 635 million dollars.

Interest at 1 per cent on \$1,000,000,000 of call loans would amount to 10 million dollars per annum, or about \$30,000 per day. Therefore, whenever banks in New York City raise the rate on all call loans under their control 1 per cent, it adds to the net profit of the lending banks about \$30,000 per day or more.

An advance of 6 per cent in the call rate from 6 per cent to 12 per cent would, therefore, amount to an additional profit to the banks of \$180,000 per day; and if the interest rate on all call loans should be made 16 per cent instead of 6 per cent the increase in interest charges for each day would be \$300,000; while a 20 per cent call money rate would mean a net profit per day of \$600,000, which means enormous earnings to the lending banks, but a burdensome if not a ruinous exaction upon borrowers.

It is not believed, however, that the interest rates on all call loans in New York City are affected by the daily changes in the call money rate; but it is unquestionably true that the change in the call money rate has affected and does affect scores of millions of dollars of demand loans and has imposed a heavy and wholly unnecessary burden on legitimate borrowers.

Unquestionably the general banking community of New York deserves the warm gratitude and admiration of the country for the loyal generosity with which it stood by and cooperated with the Government in time of crisis. That is history. With the fading of the appeal of war and danger to our patriotism there has developed, among some members of that community, a tendency to take advantage of situations to force inordinate profits for themselves regardless, perhaps, of effects upon the general welfare of the country.

I do not know yet how many of these cases there are, nor what proportion of the bankers they represent. I hope they are few by comparison with the great number of really farseeing and conservative bankers who realize the sound wisdom of "live and let live" and consistently abstain from snatching all the possibilities of temporary gain that may appear. It is my function and duty to use what power is given me to restrain, as far as I may within the law, the exaction of improper profits which endanger general business and which, if unrestrained, would threaten our financial structure.

It is a case of "let the galled jade wince." Bankers who have refrained—and I know many who have—from extorting exorbitant rates of interest, have no cause for complaint against what I have said. To the contrary, they have every reason, both on business and ethical principles, to approve. Able and thinking business men know that exorbitant interest rates mean destruction in the end, to the detriment of all, and that stability and permanent prosperity can be assured only by fair and reasonable methods of the financial powers. If the number of those who have yielded to the temptation to exact unreasonable interest rates be few, as I see some newspapers quote bankers as saying—and I hope earnestly is true—the opportunity to have the general body of New York bankers cleared of blame and vindicated before the public should be welcomed.

I am trying to get the facts and truth and put the reproach for practices which all admit to be unjust and especially improper in the midst of the process of restoration and readjustment, where it belongs. I submit that nobody should, or properly can, object to this.

I will emphasize, in conclusion, what I stated a few days ago, that I am convinced that the unjustifiable and excessive interest rates maintained in New York City in the past 10 months covered by my request for data, and which I am informed have in some cases gone as high as 15 and 20 per cent or more, have been one of the potential causes, rather than the result, of the unsettling of values in our securities market, and of the burdensome rates which our railroad and industrial corporations and other concerns and individuals, of the highest credit, have been required to pay for new capital essentially needed for the country's development and well-being.

NOTE.—The New York City national banks referred to here are the central reserve city banks and do not include the outlying districts of Greater New York.

Upon the publication of the foregoing statements some newspapers raised the question as to whether the banks referred to had made loans for any considerable amount at the exorbitant rates stated and said various bankers, none of whom permitted their names to be used, claimed that loans at the high interest rates were exceptional and rarely made.

On September 11, 1920, the comptroller made public the following additional statement in regard to interest rates in New York, which explains itself:

SEPTEMBER 11, 1920.

A leading New York paper, in its financial columns to-day, criticizes the statements made this week by Senator Owen relative to the excessive interest rates which have been charged by certain banks in New York City during the past year, and says that bankers "point out that when Senator Owen charges that 500 million dollars has been loaned at rates up to 30 per cent he is speaking without the record." Continuing, the press article says:

"That high figure obtained on the Stock Exchange for about 10 minutes one afternoon the middle of last November and probably as much as 1 million dollars was loaned at that rate."

That criticism by the unnamed "bankers" is misleading, and in justice to Senator Owen it is proper to say that the Senator's public statements on this subject, as printed in the press dispatches which have been brought to my attention, are substantially correct, and in view of actual facts are moderate and conservative.

During the past year the burdensome and oppressive interest rates to which the Senator refers have been exacted, not in "one or two possible insignificant instances," as one New York paper expressed it, and not, as to the "high figure," as another paper expressed it, "for about 10 minutes one afternoon the middle of last November," but in thousands of instances, at numerous times, and upon call loans aggregating hundreds of millions of dollars.

The information on this subject called for as of August 5 from all of the New York City banks has been supplied by nearly all of them and is now being compiled; but in anticipation of a more complete statement which will be available later, it may be interesting to the public to know that the amount of demand loans, upon which two or three of the banks, only (exclusive of various others which were charging the same rates), were exacting 20 per cent or more per annum interest—in some instances as high as 25 and 30 per cent—was—

On November 13, 1919, about.....	\$50,000,000
On November 14, 1919, about.....	40,000,000
The new call loans at the rate of 25 per cent per annum made by one of these banks at the end of 1919, on Dec. 29, 30, and 31, aggregated about.....	20,000,000
On Jan. 2, 1920, these same two or three banks were lending at 18 per cent, 20 per cent, and 25 per cent interest about.....	75,000,000
On Jan. 3, 4, and 5, at 18 per cent interest from \$60,000,000 to.....	70,000,000
On Feb. 6, 1920, at 20 per cent and 25 per cent interest, over.....	40,000,000
On Feb. 9, 1920, at 20 per cent interest, about.....	40,000,000

As late as the end of June it appears that interest as high as 14 per cent per annum was being demanded by these banks on millions of dollars of call loans.

These illustrations are from the official records of only two or three of the thirty-odd national banks in New York City, but they are sufficient, I think, to show the unfair-

ness and incorrectness of the criticisms of Senator Owen's just condemnation of the excessive interest rates which for some time past have been a distinctly disturbing factor in the business and financial situation.

I am pleased to confirm the statement I made some time ago that although the aggregate amount upon which unjust and oppressive interest rates have at times been exacted by some banks is very large, a majority of the national banks in New York City have made a comparatively small proportion of their loans at these indefensible rates.

To obtain definite and complete reports as to the usage and practices of the New York national banks in the matter of excessive interest rates, the comptroller, under date of August 5, requested all central reserve city national banks in New York to send to this office, under oath, statements showing, by months, the amounts of money they had loaned from October, 1919, to July, 1920, at rates in excess of 6 per cent, and up to 15 per cent and more. Each bank was also requested to answer, under oath, a number of questions in regard to their loans to regular customers and to others.

Among those questions was the following:

"Has it been the practice of your bank during the past six months to mark up or down, from day to day according to the fluctuations of the New York call money market, the interest rates on demand or call loans secured by bonds or stocks, made to borrowers who are *not depositors* in your bank?"

With the exception of two or three qualified answers, practically every national bank in New York City replied in the affirmative, namely, that they did change the rate on such loans from day to day according to the fluctuation in the call money market.

The same inquiry also included the following question:

"How, or on what basis, do you discriminate among borrowers, if at all, in raising or lowering interest rates on demand or call loans made to *nondepositors*, or is it your practice to make rate changes on *all* such loans simultaneously?"

The answers of the 31 national banks to the latter question were as follows:

Bank No.

1. Changes are made on all in accordance with renewal rate of day.
2. All changes made simultaneously.
3. Rates are changed on all loans simultaneously.
4. Only to loans to brokers, at the rate which is fixed daily by the New York Stock Exchange.
5. The * * * bank handles our street call loans, and they mark them according to market fluctuations.
6. All changes in rates are made simultaneously.
7. Changes made simultaneously.
8. We do not discriminate among borrowers and make rate changes on all such loans simultaneously.
9. We generally make rate changes on all such loans simultaneously.
10. No discrimination.
11. Do not discriminate.
12. No discrimination.
13. No discrimination.
14. We do not discriminate.
15. No discrimination.
16. No discrimination.
17. Brokers' loans—no discrimination. Rate changes on all such loans simultaneously.
18. No discrimination. All changes made simultaneously on call loans. We carry some demand loans for firms or individuals who are not brokers which do not follow call rates.
19. Mark rates to brokers depending on call money rates; treat others as we do our own depositors.

20. No discrimination. Rates are raised or lowered simultaneously.
21. On street call loans, we follow demand loan rates on New York market. Loans to others we have not increased above 6 per cent.
22. All call loans to nondepositors at same interest rate. Rate changes on all such loans made simultaneously.
23. All.
24. Yes.
25. Yes.
26. Yes, in case of call loans or other demand loans, rate is made at the time loan is granted.
27. As practically all business is on a straight 6 per cent basis there is no discrimination as to rates ordinarily except in the cases of loans to New York Stock Exchange brokers, which are governed according to published daily rate, there being a few cases where an advance of perhaps one-fourth of 1 per cent or one-half of 1 per cent per annum, paid in consideration of odd lots as collateral and frequent substitutions.
28. Eliminating bought paper, we make no loans to nondepositors except as such may result from loans made at the request of the money committee of the Stock Exchange.
29. We do not discriminate on loans to nonborrowers (stock exchange and bond houses) who are not depositors. All changes made simultaneously.
30. Do not make practice lending to nondepositors, except to brokers on call.
31. None.

While these reports were coming in from the national banks, the Comptroller of the Currency addressed certain inquiries to the president of the New York Stock Exchange to determine on what authority and by whom the so-called "renewal rate" was established from day to day, which rate seemed to operate automatically in practically all the national banks in New York City in raising and lowering the interest rate charged from day to day on hundreds of millions of dollars of Wall Street loans, secured by the collateral of bonds and stocks.

The following letters which passed between the president of the New York Stock Exchange and the Comptroller of the Currency, are self explanatory.

TREASURY DEPARTMENT,
Washington, September 2, 1920.

WM. H. REMICK, Esq.,
President, New York Stock Exchange,
New York City.

DEAR SIR: National Bank Examiner Freeman has written me of his recent conference with yourself and President ———, of the ——— National Bank, concerning the fixing of rates for call or demand loans in New York City.

According to his report to me, it appears that money brokers, members of the New York Stock Exchange, meet on the floor of the exchange each morning, compare notes as to the amount of money which the different banks have authorized to be loaned on call, make their own estimates of the probable amount which will be required by brokers to enable them to settle their purchases of the preceding day, and then exercise their judgment in agreeing upon what the renewal rate on loans shall be for that particular day. They then make their recommendations to you, as president of the stock exchange, for the renewal rate.

I understand that under your authority this rate is then posted on the floor of the exchange at 11 o'clock, and that all banks which do not wish to continue their call loans at that rate are expected to notify borrowers before 12 o'clock to pay their loans and obtain their money elsewhere.

The examiner states that you informed him that you do not direct or fix the renewal rate thus arrived at: that you merely post the rate of the stock exchange; and that the banking institutions in New York are thereupon generally governed as to the rates on their demand loans by the notice so posted.

May I respectfully inquire whether the chief national bank examiner is correct in his understanding of the situation as above set forth?

May I also ask how many money brokers are usually concerned or take part in the fixing of the rate?

Is the rate fixed on a vote of the majority of these brokers? If not, how is the rate fixed in the event there should be a disagreement among them and the opinion should not be unanimous?

Do the brokers engage in the fixing of the rate limit their business to the placing of loans, or do they also engage in the execution of orders for purchases and sales of securities?

Are these brokers the representatives of any particular bank or banks; and do the different banks usually place their loans through any particular broker or brokers; or is it the custom for the banking institution having funds to lend merely to notify some stock exchange official of the amount of money which it desires to put out that day at some particular rate or rates so that the stock exchange official may pass the order on to the money brokers?

Are records kept by the stock exchange of the amount of money loaned from day to day, and the rates at which such loans are made?

Your prompt and courteous attention to this inquiry will be much appreciated.

Faithfully, yours,

JOHN SKELTON WILLIAMS.

NEW YORK STOCK EXCHANGE,
PRESIDENT'S OFFICE,
September 9, 1920.

JOHN SKELTON WILLIAMS, Esq.,
Comptroller of the Currency,
Washington, D. C.

DEAR SIR: Receipt of your communication of September 2 was delayed in reaching me by reason of absence from the city.

In response to your communication, I beg to advise you that a consultation between myself or some of the members of the board of governors and those brokers who may be available and who are more actively engaged as mediums through which banks, bankers, trust companies, and other lenders of money loan their money upon the exchange, takes place after the opening of the exchange either by telephoning or meeting when necessary.

The amount of money needed from day to day is never a known factor at that time.

As a renewal rate is merely an expression of opinion of this coterie of brokers as to what would be a fair renewal, and as it is not binding either on the lending or borrowing brokers, there has never been any material divergence of opinion which would give rise to an arbitrary decision being necessary.

All of the brokers who act as intermediaries in the lending of money execute orders in securities as well.

The money loaned by the banks usually comes through various brokers and not to officials of the exchange, but I do not know whether the individual banks confine themselves to any one broker as an intermediary.

The transactions of the members are not recorded by the exchange.

Very truly yours,

WM. H. REMICK,
President.

TREASURY DEPARTMENT,
Washington, September 10, 1920.

WM. H. REMICK, Esq.,
President New York Stock Exchange,
New York City.

DEAR SIR: I thank you for your letter of the 9th instant in reply to mine of the 2d.

May I inquire whether I am correct in my understanding that, after the renewal rate for call money is agreed upon by yourself or some other member of the board of governors and "those brokers who may be available and who are more actively engaged as mediums through which banks, bankers, trust companies, and other lenders of money loan their money upon the exchange," this rate is formally posted upon the floor of the exchange?

May I also respectfully ask how many of the brokers referred to are usually consulted in the fixing of the rate?

Yours very truly,

JOHN SKELTON WILLIAMS,
Comptroller.

NEW YORK STOCK EXCHANGE,
PRESIDENT'S OFFICE,
September 13, 1920.

HON. JOHN SKELTON WILLIAMS,
Comptroller of the Currency,
Washington, D. C.

DEAR SIR: I am in receipt of your favor of September 10, and in response thereto beg to say that the renewal rate is formally posted at the money post of the exchange.

The number of brokers consulted in regard to this question vary from four to eight, or more.

Trusting that this gives you the desired information, I remain,

Very truly yours,

WM. H. REMICK,
President.

TREASURY DEPARTMENT,
CHIEF NATIONAL BANK EXAMINER,
UNITED STATES CUSTOM HOUSE,
New York, October 4, 1920.

HON. JOHN SKELTON WILLIAMS,
Comptroller of the Currency,
Washington, D. C.

SIR: I called upon Mr. Wm. Remick, president of the New York Stock Exchange, with further reference to the brokers who fix the rates for call money. He told me that there is no formal meeting or authorization for the meeting; that any member of the stock exchange may become a money broker by simply beginning the business—no formalities are required—and that any member of the exchange may attend the meetings, but usually there are only four to eight brokers in the conference. He also said that the meeting of the brokers was merely to obtain an expression of opinion; that different brokers attended at different times; that no action was taken which would bind anyone; and that, he repeated, the meeting was purely for the purpose of obtaining an expression of opinion.

This still seems rather vague to me, but it is apparent that if any more formal action occurs than Mr. Remick states, he does not desire to disclose the facts.

I shall make some inquiries among the banks as to the number of money brokers, and as to what the banks know about the fixing of the call rates and advise you what is ascertained.

Respectfully,

D. C. BORDEN,
Acting Chief Examiner.

TREASURY DEPARTMENT,
Washington, October 9, 1920.

MR. WILLIAM H. REMICK,
President, New York Stock Exchange, New York City.

DEAR SIR: In your letters of the 9th and 13th ultimo you advised me that the renewal rate for call loans in New York was determined daily through consultation between yourself or some of the members of the board of governors and a coterie of brokers more actively engaged as mediums through which the banks loan their funds on the exchange; and that the brokers thus engaged in fixing the rate were in number from "four to eight or more."

If you have no objection to doing so—and I assume you have not, as the conferences, of course, are not secret—I will be obliged if you will give me the names of the brokers, or the firms represented by the brokers, who usually attend or confer in the fixing of the renewal rate.

As the fixing of this renewal rate is an important act and has far-reaching consequences, I would be glad to obtain a little more light on this subject.

Respectfully, yours,

JOHN SKELTON WILLIAMS.

NEW YORK STOCK EXCHANGE,
PRESIDENT'S OFFICE,
October 14, 1920.

HON. JOHN SKELTON WILLIAMS,
Comptroller of the Currency, Washington.

DEAR SIR: I am in receipt of your favor of October 9, and in response thereto beg to give you below a memorandum of the gentlemen who are consulted most frequently from time to time in the matter referred to.

Very truly, yours,

WM. H. REMICK,
President.

(On the bottom of the letter President Remick listed the names of eight brokers, members of the New York Stock Exchange firms, as those usually concerned in the fixing of the money rates. These names are omitted here.)

Having obtained definite and more complete information regarding the methods used in raising and lowering interest rates in New York City and of the amount of loans affected by these advances and reductions, the Comptroller, on October 19, 1920, gave to the press the following statement:

NEW YORK CALL MONEY RATES HIGHEST IN THE WORLD—UNJUSTIFIABLE INTEREST EXACTED ON DEMAND LOANS AGGREGATING BILLIONS AN ACTIVE CONTRIBUTING CAUSE OF EXORBITANT RATES FOR NEW CAPITAL CHARGED CITIES, RAILROADS, INDUSTRIAL, AND OTHER PUBLIC AND PRIVATE ENTERPRISES AND FOR THE HUGE SHRINKAGE DURING THE PAST YEAR IN ALL SECURITY VALUES—"RENEWAL" RATES FIXED DAILY BY SMALL "COTERIE" OF STOCK EXCHANGE BROKERS GOVERN INTEREST CHARGED ON BROKERS' LOANS IN NEARLY ALL NEW YORK BANKS.

In a statement given to the press on July 31, 1920, I expressed the opinion that there was no justification for the excessive and burdensome interest rates "running up to 10, 12, and 15 per cent and higher, which had been exacted by some of the banks in New York City, the principal financial center of our country."

It is no part of my business to discuss now the morality or the ethics of these transactions. It is my imperative duty to take close cognizance of them so far as they may have effect on the general banking and commercial interest of the country. I realize clearly the inestimable and indisputable value to our own country and the world of the great money center popularly known as "Wall Street"; and have no purpose or wish to stir prejudice against it, or to do or say anything to impair its usefulness or to injure any institution or individual connected with its activities. I do intend, strictly in the line of official duty, to put before the public and the newspapers facts of which both are uninformed and to point out evils already existing and dangers threatened because of those facts.

In the statement of July 31, I called attention to the fact that New York was the only city of consequence in the world where such interest rates existed or are tolerated, and I expressed the belief that the exaction of these rates, and the publicity given them, had increased the uneasiness in financial circles and had been an active contributing factor rather than a consequence in the upsetting of security values, and that they had operated to force railroads and industrial corporations to pay burdensome and costly rates in providing fresh capital for the industries and business of the country. I also pointed out that the banks which had been charging their customers these excessive rates, "at times as high as 15 per cent or more, have themselves at the same time been liberally accommodated with millions of dollars by the Federal Reserve Banks at average rates of considerably less than 6 per cent."

This press statement was vigorously attacked in the columns of the New York papers in interviews with various anonymous bankers and financiers who refused, however, to permit their names to be used. One leading journal, for example, quoted bankers as saying: "It is unfair to attempt to defame the whole New York banking community just because of one or two possible insignificant instances of abuse."

Another leading New York paper declared that the high rates quoted on the Stock Exchange applied only to "a small amount of money relatively speaking."

The investigation which I have made since my public statement on this subject completely confirms the views expressed and proves that they were, if anything, too conservative.

In order that the public might be fully informed, and know the exact facts in regard to the money situation in New York, the national banks in New York City were requested by the Comptroller of the Currency, under date of August 5, 1920, to furnish, under oath, a report of the number and amount of all demand loans secured by bonds and stocks made monthly by them between October 1, 1919, and July 31, 1920, upon which they had exacted interest *in excess* of 6 per cent per annum. The banks generally, including the largest bank in New York City, complied with the request, but three banks demurred, claiming that it would be impracticable for them to furnish the data called for as to various loans made by them at excessive interest rates by months as requested. They were, thereupon, requested to furnish information as to the loans made by them for about eight days in each month since October 1, 1919,

these eight days including, generally, the high money periods in each month. It should be understood, therefore, that in the statement which follows, three of the larger banks have included only a portion, and not all, of their loans made at the high rates.

The banks were requested, in submitting their statements, to count as a new loan each change in the interest rate on their existing call loans. If a loan, for example, should be made for \$100,000 to a brokerage firm by a certain bank at 10 per cent, and the rate changed five times in 30 days, this loan would be regarded as six loans with an aggregate of \$600,000. Therefore, these demand loans embraced in this statement should be considered as running from one day upward. It should also be explained that, in the case of one of the three banks which reported its loans for only a portion of the period, call loans are included which were made by this one bank for outside banks as well as for itself. These outside loans sometimes amounted to more and sometimes to less than the call loans made by the bank for its own account.

The sworn reports to this office show that during the period from October 1, 1919, to August 1, 1920, there were made by the national banks in New York City more than 4,000 loans at rates of 15 per cent, 20 per cent, 25 per cent, and 30 per cent per annum, and that the amount of these loans, including only a portion of those made during this period at the above rates in three of the largest banks, aggregated over \$600,000,000.

The records also show that the total loans outstanding upon which interest at 15 to 30 per cent was being charged by a portion of these banks on 42 different days, for which reports were received from them, aggregated over \$1,100,000,000. It will be remembered that in my statement of July 31, the banks were charged with making loans at "10 per cent, 12 per cent, and 15 per cent." The actual facts, therefore, in view of the loans made at 15 per cent, 20 per cent, and 30 per cent, indicate that my statement was extremely conservative.

The records also show that the amount of loans made during the same period at rates in excess of 10 per cent and up to but not including 15 per cent amounted to over \$1,400,000,000, there being over 11,000 of such loans.

In addition to the above the aggregate of the loans upon which a portion of the banks reported that they were charging, on 81 different days, interest in excess of 10 per cent, and up to but not including 15 per cent, was about \$900,000,000. The "brokers" or "street" loans upon which the New York banks, during the period referred to, were charging more than 8 per cent per annum and up to 10 per cent, reach, in the aggregate, some billions of dollars additional in amount and tens of thousands in number.

It should be understood that these loans (except in the case of one bank) represent the money loaned by the banks for their own account, and the figures do not include the loans made for their correspondent banks.

As a result of persistent inquiries among the banks, brokers, and stock exchange authorities, this office is now, for the first time, able to inform the public as to how the so-called "renewal" rate is made from day to day in the New York call money market, and the extent to which this money rate is observed by the New York banks in making their charges on ordinary Wall Street or brokers' loans.

Under the New York banking law, it is lawful for a lender to charge any rate of interest which may be agreed upon with the borrower on a demand loan for \$5,000 or more secured by stocks, bonds, or other securities. This provision of the New York statute enables lenders to escape penalties for usury which exist in most of the other States.

From information furnished this office, through different sources, it appears that every business day a coterie of brokers, members of the New York Stock Exchange, get together for consultation on the floor of the exchange, or by telephone, and determine what, in its view, is the proper rate for the renewal of all street or brokers' call loans for that day. As soon as the rate is agreed upon the president of the stock exchange is notified, and the rate is posted on the floor of the stock exchange at, say, 11 o'clock.

This rate is then sent over the "ticker" to all the banks in New York City and these banks thereupon mark up or down, as the case may be, the rate of interest upon practically all their Wall Street or so-called brokers' loans. Some banks take the precaution to notify their customers by card, sent by mail or otherwise, of the change in interest rate on their loans, while other banks do not. They claim that the posting of the renewal rate on the floor of the stock exchange serves automatically to raise or lower the rate of interest on this character of loans, held by all the New York banks, or themselves or their out-of-town correspondents, and their customers are charged the rate so posted, unless they make special arrangements with the bank to the contrary, or pay the loan.

In the questionnaire sent by the Comptroller of the Currency to all the national banks under date of August 5, 1920, each bank was asked the following question:

"Has it been the practice of your bank, during the past six months, to mark up or down, from day to day, according to the fluctuations of the New York call money market, the interest rates on demand or call loans, secured by bonds or stocks, made to borrowers who are not depositors in your bank?"

In reply to that question every national bank in New York City with two or three exceptions answered "Yes," and two of these stated that they, too, under certain conditions, also charged the "call money" rate.

It is fair to say, however, that nearly all of these banks with a few prominent exceptions stated that it had not been customary with them, in making advances in rates, to increase the rates on demand or call loans made to their own regular customers who kept deposit accounts with their banks, and that these regular customers were treated differently from the ordinary brokers or Wall Street borrowers. It is also worthy of note that demand loans, secured by stocks and bonds, made by banks to their own officers and to the officers of other banks are also generally exempted from the high-interest rates.

It is also fair to state that the reports in this office show that despite the huge volume of loans made at fancy rates, less than one-half of the national banks in New York City, reported that the demand loans made for their own accounts at rates of 15 per cent or more aggregated for each bank over 10 million dollars between October 1, 1919, and July 31, 1920.

In their reports to this office of September 8, 1920, the national banks of New York City reported that they were lending *on demand*, on bond and stock collateral, over \$348,000,000.

The national banks in New York City also reported that on August 1, 1920, the amount of money which they were loaning on demand, on bond and stock collateral in New York City for account of customers and correspondents was \$524,000,000.

It is fair to assume that the trust companies and State banks in New York City were lending on demand on stocks and bonds as much as the national banks.

The stock exchange authorities state that the posting of the "renewal" rate on the floor of the stock exchange does not make it compulsory with the banks to charge such "renewal" rate. Attention, however, must be called to the fact that nearly every national bank in New York City has admitted that when the rate is posted the rates charged on "brokers" or "street" loans are changed to conform to the prevailing call money rate, and the only alternative for a borrower is to *pay his loan* or be charged the posted or current rate. As nearly every bank in New York charges the so-called "renewal" rate on what are known as Wall Street or "brokers" loans, it would be vain, obviously, for a borrower to hope to obtain the money in New York at a lower rate by shifting his loan to some other bank.

Despite the statement of the banks generally that the interest rates on brokers' loans are raised or lowered simultaneously with the fluctuations in the New York call money market, many instances of apparent discrimination were developed which show wide differences in the rates charged on demand loans equally well secured. For example, when the "renewal" rate for a certain day within the last 12 months was posted on the stock exchange at 16 per cent the report of one particular New York bank showed that on that date this bank was charging on loans for itself and correspondents:

- 7 per cent on \$4,900,000.
- 8, 9, 14, and 15 per cent on \$1,428,000.
- 18 per cent on \$750,000.
- 20 per cent on \$42,100,000.
- 25 per cent on \$3,550,000.
- 30 per cent on \$900,000.

The coterie of brokers who fix the "renewal" rate which appears to have such binding force upon the banks in New York City in the case of brokers' loans does not limit its activities to loans, but these brokers also execute orders for stocks and bonds on the floor of the exchange. Inquiry of the stock exchange as to the number of brokers who are usually concerned in the fixing of the money rate brought the reply that there were, as a rule, "four to eight or more," the stock exchange being usually represented by either the president or "one or more" of its governors in the consultations where the rate is fixed.

On November 10, a year ago, this brokers' committee announced that the renewal rate on call loans would be 12 per cent. The following day, November 11, they raised it to 14 per cent. On November 13 the rate was raised to 16 per cent; November 14 it dropped to 14 per cent; on November 21 it was made 8 per cent, although other loans were made as low as 6 per cent. On December 18 it was 6 per cent; December

23 it was raised to 10 per cent, on the 29th to 12 per cent, on the 30th to 15 per cent, and remained at that rate until January 5, when it was lowered to 10 per cent. On January 31 the renewal rate was 12 per cent, the next day, February 1, it was advanced to 18 per cent, dropped to 14 per cent on February 2, advanced to 17 per cent on February 5, and remained at 17 per cent until February 9, when it was reduced to 14 per cent. On February 17 it was 6 per cent, raised again on February 26 to 10 per cent, and continued at 10 per cent until March 4, when it was reduced to 9 per cent. On April 16 the renewal rate was again 10 per cent. In May the highest renewal rate was 9 per cent. In June the rate was 9 per cent from the 25th to the 30th. July opened with a 10 per cent renewal rate. It was lowered during the month, but returned again to 9 per cent on the 16th, 17th, and 27th. It is gratifying to note that since the publication of the comptroller's statement of July 31 regarding excessive interest rates the "renewal" rate does not appear to have been advanced again as high as 10 per cent.

It seems clear from the figures submitted that the amount of demand or call loans in the national and State banks and trust companies in New York City, plus the loans placed by them for their correspondent banks, which are effected by the rate fixed by this committee of the stock exchange, probably exceeds 1,000 million dollars. As I pointed out in a previous statement, on this basis an advance in the "renewal" rate from 6 per cent to 18 per cent for one day would add \$360,000 to the net profits of the lending banks for that day. In the first part of January of this year, for example, the 15 per cent "renewal" rate exacted for six successive days meant, on this basis, a net interest profit of about \$3,000,000 or more for those six days.

The raising or lowering of the "renewal" rate on the exchange is frequently accompanied by upward or downward movements in stocks and securities, and those responsible for the fixing of the rate therefore have the opportunity, whether exercised or not, of profiting largely by operations on the stock market, which is so often and directly affected by the call money situation. I do not, of course, undertake to say that this informal "money committee" does take improper advantage of their foreknowledge, but there are critics who severely censure the existing arrangements. Certainly all prudent and thinking business men will agree that there is danger in the concentration of such opportunity and power in the hands of a few persons. Temptations to use this power for individual profit must arise, and human nature is not changed by high position in the financial world.

Mr. Lincoln's axiom that God never made a man good enough to be intrusted with unlimited power over another man may be supplemented with the suggestion that no four, or six, or eight men are strong and pure enough to be intrusted with unlimited power over the finances of a great country without direct responsibility and accounting for their acts to the public or some other potent and intelligent authority. Power to fix money rates for all or nearly all of the banks of New York City and to change them daily is a grip on the heart of our commerce. It permits such interferences as fallible human judgment, whim, or interest may direct with the natural and orderly movements of money, the life-blood of business. Many of us complain bitterly when we fear that the two Houses of Congress, State legislatures, or State or Federal administrators, acting in the open and after debate and public hearings, have interfered with natural laws of trade. We condemn radical writers and speakers who advocate such interferences and regard them as public enemies. Yet the matter of arbitrarily fixing money rates at the money center, possibly reversing the natural and healthy flow and affecting, directly or indirectly, billions of dollars of security values and other property, is left to a small and varying number of private citizens without official responsibility, deciding in a moment and in secret.

The evils and dangers of such methods could be recited indefinitely. They reach to the remotest corners of the Union and its possessions, and touch harmfully every class of people. The direct tendency is to reverse one of the fundamental purposes of the Federal reserve act, which is to promote orderly distribution of money through the country to meet the needs of commerce and agriculture. Excessive interest rates offered in New York artificially draw money away from outside communities through their banks and often leave legitimate enterprises starved or pinched, while feeding speculative movements which may be adding nothing to real industrial or commercial wealth.

I reiterate the statement previously made that the excessive rates on call money, arbitrarily fixed and tolerated in New York, in my opinion, have been a potent influence in depressing seriously the prices of all investment bonds and standard shares, the shrinkage in which in the past twelve months has amounted, including the depreciation in Liberty bonds to several billion dollars.

It is no part of the function of a Government official to moralize on speculative operations. My attention is demanded when such operations produce conditions

retarding the development of the country and endangering the stability of its business. Corporations, individuals, and investors generally are drawn away from legitimate investments in new enterprises and in the shares and bonds of existing enterprises by the prospect of 10 per cent to 20 per cent interest.

The effect of these rates is seen when the general managers or executives of railroads or other large corporations visit New York to raise money necessary for the redemption of retiring loans or for the extension and promotion of new business. The bankers and bond houses solemnly point to the high rates paid for "call money" and corporations whose credit abundantly justified a 5 per cent or 6 per cent interest basis, have been forced to pay 7 or 8 or 10 per cent on loans for one year, three years, or five to ten years; and are sometimes persuaded by the bankers through whom they obtain the funds that they are doing well to get money even on such terms, because money on call has been advanced, often artificially, to 12 or 15 or 20 per cent, for a few days at a time.

The sophistical argument that a high rate for call loans is a justification for a long time loan at 8, 10, or 12 per cent by a strong and solvent corporation is transparent, but many excellent corporations have, during the past 12 months, been forced to accept loans at exorbitant rates of interest for terms of years which will inevitably, in some cases, prove, a serious embarrassment and handicap in their future operations.

The same cause that cripples and hampers a great railroad system or a municipal government also deprives and injures or ruins a country storekeeper, a small farmer, or the owner of a large or little manufacturing enterprise.

The argument that these high money rates prevent panics by enticing call money from banks and others in the interior to New York will not bear analysis. The facts are that much of the money drawn from the interior and loaned on call in New York at fancy rates would, but for the temptation of the high rates and the fear which they instill as to the future of the security market, be used by investors and banks and corporations who have these idle funds in the purchase of standard railroad and other bonds; which would thus furnish funds to the New York market normally and naturally.

The high rates for call money in New York have thus shut off a large part of the investment demand for securities, which, during the past 12 months, largely because of these disturbing conditions, have been forced down to the lowest prices reached in 40 years.

It is my belief that if the call money rates in New York had been maintained at 6 per cent or at the maximum rates which are charged in other money centers, as I believe could have been done with a reasonable degree of cooperation upon the part of the New York banks, the unprecedented shrinkage in security prices in the past 12 months would not have taken place and the apparent loss of billions of dollars in values would have been avoided.

My hope for the present is that, with the public in possession of the facts, sentiment will be strong enough to bring about reforms. Money rates should not be raised or lowered or manipulated arbitrarily or in secret. New York bankers and financiers have tremendous responsibilities to the general public, and all can be induced to realize and respect them, as some honestly and conscientiously do now. Bankers throughout the country should have impressed upon them that they owe direct and distinct duties to their customers and communities, in preference to earning excessive and questionable profits for stockholders and themselves by pouring money into New York for interest exactions which inevitably must injure or destroy somebody. The best banking is the broadest and most foreseeing—that based on the conviction that the real, permanent, stable profit in business is in building up, encouraging, and developing in their respective spheres; not in starving the productive elements of communities in the hope of grabbing large profits from the speculative.

Reports showing the extent to which, as referred to in my statement of July 31, banks in New York City and elsewhere have, during the past year, been obtaining funds from the Federal reserve banks at rates varying from $4\frac{1}{2}$ to 6 per cent and have loaned these funds in New York at the excessive rates referred to, running, in some instances, as high as 20, 25, and 30 per cent, are now being compiled. A statement concerning these transactions will be made later.

The foregoing was published widely, but no definite or responsible denial of the accuracy of the comptroller's statements was made. The newspapers again quoted anonymous "bankers" and other individuals who refused to permit their names to be given as attacking the statement, but furnishing no evidence whatsoever to support their assertions.

On October 22, 1920, the Comptroller of the Currency supplemented his statements of October 18 by giving to the press the following:

BILLION DOLLARS OF NEW YORK LOANS CONSTANTLY AFFECTED BY RATES ARTIFICIALLY FIXED—ADDITIONAL EXAMPLES OF LOANS ON WHICH 20 AND 25 PER CENT ARE CHARGED—INTEREST AND DISCOUNT COLLECTED BY NEW YORK NATIONAL BANKS, SIX MONTHS ENDING JUNE 30, 1920, WAS ABOUT \$100,000,000, WHICH, AS COMPARED WITH SAME PERIOD IN 1917, IS AN INCREASE OF ABOUT \$50,000,000 IN INTEREST COLLECTED.

Criticisms on the statement given out by this office for the newspapers of Monday last seem to me to be rather vague and feeble as well as anonymous. I hoped they would be strong, illuminating, and constructive. I am constrained to believe that they do not express the thought of the bankers of the country or of New York, who certainly are men of ability, with intelligence and courage to speak clearly and frankly when they wish to speak.

One of the functions of this office is to do all possible to maintain and increase the good will and confidence of the public in the banks of the country. To that end continual labor, frequently troublesome to all concerned, has been applied to make sure that the management and conduct of all banks should be such as to deserve good will and confidence. Following along that same line, I think it right to reiterate some expressions included in the statement referred to, but unfortunately omitted by many newspapers which published portions of it. These are, that there is no purpose in this office to stir or cater to any prejudice against that great and useful part of our financial system popularly known as "Wall Street"; that there was and is no purpose to hold up the New York City bankers or any other bankers for special condemnation. It is my duty to discover and oppose what I believe to be evils and dangers threatening or impeding the business of the country. There has been no attack on individuals or individual interests. The criticism from this office has been against a system and method. The first step toward correction of any wrong must be discovery and exposure.

Statements of the existence of extortionate interest rates in New York, affecting the operations of the whole country, made by me some weeks ago, were met by sneering denials through newspapers. Thereupon it became necessary to present confirmatory specifications and evidence. This has been done. Anonymous and indefinite denials are not contradictions. Statements of facts and figures, sworn to by the banks themselves, can not be met by excited rhetoric or general denunciation, or unsustained accusation of improper motive.

In my previous statement I showed that the aggregate of these demand or call loans secured by bonds and stocks handled by the New York banking institutions for their own account and for account of their correspondents, upon which interest rates varying from 7 to 30 per cent have been charged, has probably averaged throughout the past year more than 1 billion dollars.

The assertion by anonymous critics that the exorbitant interest rates were rare and applied to insignificant sums will not weigh against official reports made to this office under oath. We find for example, one national bank declaring that loans made by it in the period covered by my statement at rates in excess of 10 per cent per annum aggregated \$448,000,000, including \$186,000,000 (1,426 loans) at rates of 15 per cent and over. On a certain day within this period another bank reported that, on loans for itself and correspondents, it was charging 15 per cent on \$55,895,000, and 18, 19, and 20 per cent on \$3,600,000 additional. The same bank admitted exacting on another day 18 per cent on \$57,183,000, 20 per cent on \$1,400,000, and 25 per cent on \$14,055,000. On three days early in January the amount on which this bank was charging 18 per cent, exceeded \$63,500,000.

Another New York national bank reported that it was charging on a certain day on loans made for its account, 16 per cent on \$23,500,000, while two days previously it was loaning at 14 per cent, \$27,100,000 and at 16 and 18 per cent \$315,000 more; another day this bank reported that loans at 17 to 20 per cent exceeded \$17,000,000. On December 31 last, the same bank made 11 new loans for over \$2,000,000 at 25 per cent, and on January 2 it made 53 new loans aggregating \$10,000,000 at 15 per cent, in addition to some millions already out at 15 per cent.

Still another bank reports that, on a particular date during the past year, it was charging on loans for its own account, 25 per cent on \$2,150,000, 13 per cent on \$300,000, 15 per cent on \$10,900,000. On another date the same bank was charging 22 per cent on \$2,000,000 and 11 to 16 per cent on \$8,200,000 additional, with other loans at the same time bearing 7, 8, 9, and 10 per cent. This particular bank has through this period been lending, as have other banks, many millions more at exorbitant rates for

correspondent banks. The foregoing figures relate to only 4 of the 34 national banks in New York City, and they are matters of record.

It is of interest to the public that most of those New York banks, a few of whose loans are given above, while lending at these very indefensible rates, sometimes 25 and 30 per cent, were being accommodated at the same time at $4\frac{1}{2}$ to 6 per cent by the Federal reserve bank of New York with sums as great or greater than their loans recited above. They were, therefore, occasionally charging borrowers 20 to 25 per cent more interest than the rates they paid the reserve bank.

The amount actually collected for interest and discount by the 34 national banks in New York City for the six months ending June 30, 1920, exceeded all previous records, and amounted to approximately \$100,000,000, which was nearly \$50,000,000, or nearly 100 per cent, in excess of similar receipts for the corresponding period in 1917.

In February last, the "renewal" rate in New York City for the whole month averaged above 10 per cent. This was more than double the normal average for call money.

While nearly every national bank in New York City has admitted that its rates on the so-called "street" or "brokers" loans are marked up or down automatically from day to day according to the fluctuations of the call money rate, yet reports from some banks show a marked discrimination, and that they exact on some of the well-secured loans rates considerably in excess of the so-called daily "renewal" rate, while other banks adhere quite closely to that rate.

As to the large amount of call loans held by national banks for account of correspondents (over \$500,000,000) it may be of interest to state that the New York banks, for their services in handling these loans, make varying charges, sometimes a fractional commission is charged; sometimes in view of the deposit balances carried, no charge is made, while at other times the New York bank and its outside correspondents divide evenly the interest collected in excess of 6 per cent per annum.

New York, as I have stated before, is the only city of any importance in the world where such interest rates as these exist or are tolerated. They have, in my opinion, been most costly to the entire country and can not be justified on any basis of economics or ethics.

The plainly indisputably proper course is change of policy and reformation of abuses which have come almost imperceptibly, not loose and wholesale criticism of the man trying to heave the lead line and give warning of shoals. The point is not the qualities or intentions of the official, but whether the shoals are there. My work is to report them and prove where they are. My strong faith is that the bankers of the country will find and apply cure for the evil that has been shown. They have on them now some of the heaviest and most difficult responsibilities which ever rested on a financial body. The welfare not only of their own country but of the world depends in a great measure on their wisdom and character. I believe they will meet the test. The most important part of the comptroller's work is to help them, as he may. There is no better way to help than to detect and point out obstacles and perils in their path toward performance of the tremendous work they have to do.

The official records show that the banks that during the past 12 months have been accommodated by the Federal reserve bank of New York with sums amounting in individual cases to more than \$100,000,000 at one time, have, at the same time, been exacting from borrowers rates of interest sometimes as high as 15, 20, 25, and 30 per cent per annum. The records also show that banks in many parts of the country have borrowed large sums from the Federal reserve banks in their respective districts and have sent these funds on to New York to be loaned on Wall Street at exorbitant rates.

To illustrate how money during the past year has been drawn from interior banks to New York City to be loaned in Wall Street at the higher rates of interest, the following statement is submitted showing the average amount of money which three of the larger trust companies in Washington, D. C., were lending on bonds and stocks in New York City during each of the six months from March, 1920, to August, 1920, both inclusive:

Call loans in Wall Street (average for month).

March.....	\$10,550,000	June.....	\$8,197,000
April.....	11,349,000	July.....	7,448,000
May.....	10,353,000	August.....	7,731,000

During this period money in Washington for legitimate business, for the building of homes, and for other purposes for which trust companies customarily extend credit was scarce and hard to obtain. The offerings of the high rates in New York simply drew away from Washington, as from many other cities and towns, the funds which could have been otherwise used for local development and legitimate business and enterprise. It should be added, however, that the three trust companies which were lending these funds in New York report that they were not at the same time borrowing from the Federal reserve bank.

The following figures, however, show how one of the national banks in Washington was borrowing during the same period large sums from the Federal reserve bank of Richmond at moderate rates of interest, 5 to 6 per cent, *at the same time* that it was lending millions of dollars in Wall Street on speculative securities at excessive or fancy rates. This bank claims, as an excuse, that its accommodations were gotten from the Federal reserve bank of Richmond to enable it to subscribe to Government securities without calling in the demand loans which it was lending in Wall Street and for which it was receiving the excessive interest rates, the profits from which it was unwilling to forego.

	Borrowings from reserve bank (average for month).	Call loans in Wall Street (average for month).		Borrowings from reserve bank (average for month).	Call loans in Wall Street (average for month).
March.....	\$476,000	\$2,580,000	June.....	\$2,693,000	\$3,693,000
April.....	1,074,000	2,178,000	July.....	3,199,000	3,129,000
May.....	2,288,000	3,183,000	August.....	3,373,000	1,351,000

RECOMMENDATION.

If the security for these loans was so precarious as to justify such rates of interest, no bank had the right to risk on it the money of its depositors. If the security was good, the rates were cruelly extortionate, exactions from the necessities of borrowers, demoralizing to business, destructive of values, hindrances to prosperity, and dangerous to the public peace and welfare.

I respectfully recommend to the Congress the consideration of an amendment to the National Bank act which shall provide that member banks borrowing from a Reserve bank shall be prohibited from charging their customers more than a fair and reasonable advance over and above the interest rate they pay to their Federal reserve banks.

During the past year, banks borrowing from the Federal reserve bank at from 5 to 6 per cent have been lending funds to their customers sometimes at from 15 to 30 per cent—from three to five times as much as they pay the reserve bank. There can be no possible excuse for such rates as have been exacted at times during the past year by banks in New York City. These exorbitant rates have no parallel in any other civilized country, and can not be defended in New York.

DIFFICULTY IN GETTING DATA REGARDING HIGH-INTEREST RATES.

It is appropriate, in connection with this vitally important subject, to give a specimen correspondence between the comptroller's office and an important New York bank and a memorandum of an official interview with an officer of that bank as illustrative of the difficulties encountered in securing information necessary for understanding of situations so that dangerous or injurious practices may be noted and, if possible, stopped. For obvious reasons names are omitted.

Reading of these letters will show that the officials of this bank failed to comprehend the purport and purposes of the questions asked, or were determined to evade direct answers as far and as long as possible. Unhappily, their misapprehensions, or policy, are not altogether exceptional.

TREASURY DEPARTMENT,
Washington, D. C., August 25, 1920.

——— NATIONAL BANK OF NEW YORK,
New York, N. Y.

DEAR SIR: I regret that you seem to have found it impracticable, up to this time, to furnish this office with the information in regard to loans and the rates of interest thereon requested in the letter from the office of August 5, 1920.

If it is impracticable to furnish at this time the complete data called for in the report referred to, you are requested to furnish meanwhile a special report giving the following information:

1. Aggregate amount of call or demand loans secured on stock or bonds made initially by you for your own bank and for customers or correspondents, *on each of the days named in the table annexed hereto*; showing the rates of interest charged for all such loans when the interest charged exceeded the rate of 6 per cent per annum; giving the aggregate amount of loans at *each particular rate*, if different rates of interest were charged on different loans on same day.

2. Of the aggregate amount of loans made for each day, please show the total amount for your own bank and total amount for the account of customers or correspondents.

3. *Loans already in bank* (not made initially on dates given). Aggregate amount of call loans *already in your bank*, secured on stock or bonds on each of the dates named in the annexed table, and the interest rate or renewal rate charged for each day on said loans, showing on what proportion of said total loans interest was charged at *each different rate* of interest on said dates. (This refers to loans on which interest charged exceeded 6 per cent per annum.)

4. Please also show what proportion of the total call loans referred to in paragraph 3 carried on each date named was for account of *your bank* and what proportion was for account of your *customers and correspondents*.

5. Please explain precisely what compensation or commission your bank receives for placing and handling demand or call loans placed by you in New York City on bond and stock collateral for account of your customers and correspondents.

Respectfully,

JOHN SKELTON WILLIAMS,
Comptroller of the Currency.

——— NATIONAL BANK,
New York, August 31, 1920.

HON. COMPTROLLER OF THE CURRENCY,
Washington, D. C.

DEAR SIR: Referring to your favor of the 25th instant, we send you herewith the special report called for, and remain,

Yours, very truly,

(Signed)

———
President.

TREASURY DEPARTMENT,
Washington, September 1, 1920.

——— NATIONAL BANK,
New York, N. Y.

DEAR SIR: I have your letter of the 31st ultimo, inclosing statement in response to my request of August 25, and thank you.

In your statement you report that, of the aggregate amount of call loans *already in your bank* on November 12, 1919, secured by stocks and bonds, upon which interest was charged in excess of 6 per cent per annum, you charged interest upon \$4,900,000 of such loans at only 7 per cent, while upon \$42,515,000 of loans you charged 15 per cent, and upon \$2,475,000, held on the same day, you charged interest at the rate of 25 per cent per annum. Please advise why there was this discrimination.

In your sworn statement submitted on date of August 19, in response to our letter of August 5, you stated that it has been the practice of your bank during the past six months to mark up or down, from day to day, according to the fluctuations of the New York call money market, the interest rates on all demand or call loans secured by bonds or stocks, made to borrowers who are not depositors in your bank, and you also stated that it was the practice of your bank to make changes in interest rates on all demand or call loans to nondepositors as well as to depositors without discrimination.

I note that, on February 5, 1920, upon \$1,415,260 of loans already in your bank on that date, you charged a rate of 14 per cent, while upon \$1,000,000 of similar loans on the same date you charged 25 per cent, and, upon the same date, on \$37,932,000 other loans of the same character you charged 15 per cent.

I also note that, upon June 30, on loans already in your bank on that date, you charged 9 per cent on \$1,165,350, 10 per cent upon \$41,787,023, and 14 per cent upon \$800,000—all loans apparently of the same character.

Are not these varying charges in conflict with your statement that changes are made simultaneously on all call loans in your bank secured by bonds or stocks according to the fluctuations of the New York call money market?

In your reply I would be obliged if you will give me the names of borrowers, and the character of collateral, to whom, on November 12, 1919, you loaned \$2,475,000 at 25 per cent, and similar information as to those to whom you loaned, on the same date, \$4,900,000 at 7 per cent.

I would also be obliged if you would give me the same information in regard to the \$900,000 loaned by you on November 13, 1920, at 30 per cent, and loans of \$250,000 on which you charged on the same date 8 per cent. The loans in neither of these cases were made initially by you on that date, but all of them are reported by you as being already in your bank on the dates named.

In response to my question as to the proportion of the total call loans referred to in paragraph 3 of my letter of August 25 which were being carried on each date named for account of your bank, and the proportion of total loans which were carried for customers and correspondents, you state that on October 8, 1919, the total of such loans for your own account was, \$21,064,000; for customers, \$23,318,000; making a total of \$44,382,000.

Please explain why this total does not agree with the amount of call loans already in your bank, secured by bonds and stocks, which, on page 6 of your statement, you report as aggregating, on October 8, 1919, \$48,777,240 as follows:

At 12 per cent interest.....	\$3, 300, 000
At 10 per cent interest.....	44, 366, 400
At 8½ per cent interest.....	410, 840
At 7 per cent interest.....	700, 000

48, 777, 240

The apparent discrepancy amounting to..... \$4, 395, 240

Respectfully,

JOHN SKELTON WILLIAMS,
Comptroller.

——— NATIONAL BANK,
New York, September 2, 1920.

HONORABLE COMPTROLLER OF THE CURRENCY,
Treasury Department, Washington, D. C.

SIR: In reply to your letter of September 1:

The difference in rates is occasioned by the demand and supply of money as well as the exercise of our best judgment, and are not in conflict with previous statements

for the reason that rates are governed by the rates which prevail at the time loans are made.

We inclose schedules containing information desired with respect to loans on certain specified dates, excepting item "\$4,900,000 at 7 per cent," the detailed memoranda having been destroyed or mislaid.

The difference between figures of total call loans given in reply to paragraphs 3 and 4 of yours of August 25 is that in the former you ask for "loans already" in the bank on October 8 in excess of 6 per cent, whereas in the latter you ask for the "total call loans" on that date. As a consequence, loans already in the bank mean at the close of business October 7, whereas the total amount of loans held by us on October 8 is the total at the close of that day.

Respectfully,

President.

Call loans already in the bank Nov. 12, 1919, at 25 per cent.

A.....	\$325,000	H.....	\$100,000
B.....	300,000	I.....	100,000
C.....	200,000	J.....	100,000
D.....	100,000	K.....	250,000
E.....	300,000		
F.....	500,000		
G.....	200,000		
(Names omitted; all in New York City.)			2,475,000

Call loans already in the bank Nov. 13, 1919, at 30 per cent.

A.....	\$100,000	E.....	\$100,000
B.....	100,000		
C.....	100,000		900,000
D.....	500,000		
(Names omitted; all in New York City.)			

Call loans already in the bank Nov. 13, 1919, at 8 per cent.

A.....	\$250,000
--------	-----------

List of loans outstanding Nov. 12 at 7 per cent amounting to \$4,900,000 as requested by the Comptroller of the Currency in his letter dated Sept. 1, 1920.

(Then followed a list of 23 loans from \$100,000 to \$1,000,000 each to sundry brokers.)

Brokers' loans (nondepositors) on the date of November 12, 1919, secured by stock exchange collateral.

Vice President.

TREASURY DEPARTMENT,
Washington, September 8, 1920.

—— NATIONAL BANK,
New York, N. Y.

DEAR SIR: I have your letter of the 2d instant.

In our letter of September 1 we called your attention to the wide variation in rates charged on loans which were "Already in your bank" for November 12, 1919, the rates varying from 7 per cent to 30 per cent. You had informed us, in response to our inquiry of August 5, that it was your practice to mark up or down from day to day according to the fluctuations in the New York call money market the interest rates on brokers' loans or loans to nondepositors in your bank.

In your letter of September 2, in an explanation of the widely varying rates charged on call loans which were "already in your bank" on November 12, 1919, and which were not made that day, you say:

"The difference in rates is occasioned by the demand and supply of money as well as the exercise of our best judgment, and are not in conflict with previous statements for the reason that rates are governed by the rates which prevail at the time loans are made."

May I respectfully submit that if your statement that "rates are governed by the rates which prevail at the time loans are made" is correct, your previous statement

to the effect that your loans already made to nondepositors are marked "Up or down from day to day according to the fluctuations of the New York call money market" should be revised, unless it should happen that all loans made below the renewal rate are to be understood as being loans to depositors in your bank.

Even should that be true, it is not clear upon what basis your changes are made when the rates on loans "Already in your bank" vary so widely, as, for example, on December 31 the rate on \$56,000,000 of your loans was marked at 15 per cent, on \$1,400,000 at 20 per cent, and on \$12,660,000 at 25 per cent.

In addition to the old loans already in your bank, on that date you made \$4,385,000 of new loans at 25 per cent and \$965,000 of new loans at 18 per cent.

I, of course, understand how you lend a large amount of new money on a particular date at varying rates of interest, but I should like to be informed as to the principle on which you fix the rate on, say, \$60,000,000 of loans which have been brought over from previous days at eight or nine different interest rates, as was done on November 13, when you were lending over \$54,000,000 at nine different interest rates, 7, 8, 9, 14, 15, 18, 20, 25, and 30 per cent.

Will you not be so good as to inform me what principles govern you in determining your judgment in an instance like that, keeping in view your statement that it is your custom to charge for brokers' loans already in your bank the call-money rate of the particular day, which I assume means the "renewal" rate for that day and not the highest or lowest rate for the day.

We note your statement in regard to our request for information as to loans of \$4,900,000 upon which you were charging, on November 12, interest at the rate of 7 per cent, to the effect that the loan card for this loan or these loans has been destroyed or mislaid.

Although you find yourself unable to advise us of the collateral securing the loan, I assume that you will be able to furnish this office with the name of maker or makers, which we will thank you to furnish.

Meanwhile, as throwing light upon the subject, I will be obliged if you will advise me the reasons which governed you in making the rate of interest on the call loan of ——— of \$250,000 at 8 per cent at the same time that you made the rate of interest on the \$600,000 loaned to ——— and ——— 30 per cent, neither of these loans having been initially made on that date, but both having been carried over from some previous date. These were both brokers' loans, and we had understood from your sworn statement of August 19, 1920, that the rates on brokers' loans were raised simultaneously without discrimination.

Yours, very truly,

JOHN SKELTON WILLIAMS,
Comptroller.

——— NATIONAL BANK,
New York, September 9, 1920.

HON. COMPTROLLER OF THE CURRENCY,
Washington, D. C.

DEAR SIR: Replying to your favor of the 8th instant, would it not be agreeable to you, if you are not expecting to visit New York in the near future, to have one of our officers who is thoroughly familiar with the operation of our loan department call upon you in Washington at a time which may suit your convenience, when the explanations you desire and the methods we follow can be more clearly set forth than by correspondence?

Yours, respectfully,

———,
President.

SEPTEMBER 11, 1920.

——— NATIONAL BANK,
New York, N. Y.

DEAR SIR: I have your letter of the 9th instant, and will be pleased to see, at the Treasury, your duly accredited representative at any time, and to receive from him the explanation which you suggest submitting in connection with the operation of your loan department. It may be well for you to arrange the appointment by telegraph a day or two in advance.

Meanwhile, I hope it will be agreeable to you to expedite the data heretofore requested.

Respectfully,

JOHN SKELTON WILLIAMS,
Comptroller.

[Treasury Department, telegram.]

11 WU H 21

CO NEW YORK, N. Y., 10.56 a. m., *Sept. 13, 1920.*

COMPTROLLER OF THE CURRENCY,

Treasury Dept., Washington.

Vice president ——— will call at your office Tuesday morning, September fourteenth, at ten o'clock, if that be agreeable to you.

——— NATIONAL BANK.

11.33 a. m.

MEMORANDUM.

WASHINGTON, *September 14, 1920.*

Mr. ——— of the ——— National Bank, New York, called to-day to explain why it seemed impracticable for that bank to furnish fully the information called for in special report of August 5. He stated that, owing to the special manner in which call loan records were kept, under which in some cases a loan will be made to ——— by the national bank, duly entered upon the loan card, subsequently transferred to a correspondent bank by book entries and also by pencil memorandum on the loan card, a few days later might be taken back by the national bank for its own account and the pencil memorandum of transfer erased; it would be impracticable for him to state the exact amount of call loans and the exact rate of interest charged thereon for particular days. He states that the memorandum which he furnished this office under date of August 31, 1920, shows on page 4 the total amount of all call or demand loans made by this bank as of the dates indicated for its own account and for its customers, but that these demand loans include not only the brokers' loans but also all other demand loans secured by bonds or stocks made on the days specified for the bank and for its customers. He stated that page 9 of the same statement shows only the total amount of call loans made to brokers which are substantially all governed by the renewal rate.

In regard to the methods of fixing the money rates on the New York Stock Exchange, ——— states that it is his understanding and belief that there are seven or eight brokers, members of the exchange, who meet daily to discuss the money situation and fix a renewal rate for the day; that these brokers, while specializing in loans, he supposes are also engaged in the execution of orders for securities. It is his understanding that these money brokers place funds for different banking institutions making the brokers' loans, that his own bank usually loans the money through one of these houses, but he does not know whether the same broker also acts for other banks or not. I asked him what the effect would be if the same broker should get orders from four different banks to place a million dollars apiece and the broker should subsequently place the money at four different rates of interest. He said that he does not know how the loans would be apportioned in such an event as that, as he had never had that experience, but that it is the custom of his bank, in placing money, to name the rate at which the broker shall place it and not leave it to the discretion of the broker.

——— states that when the renewal rate is posted on the exchange it acts, he assumes, automatically with all the banks and all the borrowers in fixing the rate of interest on all brokers' loans where there may not be special arrangements, although any bank has the right, if it is not satisfied with the renewal rate, to call all or any portion of its loans, and the borrowers also have the right to pay all or any portion of their loans, it being understood that calls and payments must be made before 1 o'clock, although there may be exceptions for sufficient reasons as to requiring the transactions to be closed by 1 o'clock.

——— states, however, that while this applies to the great volume of their brokers' loans, that there are exceptional cases where brokers' loans are not raised or reduced upon the posting of the renewal rate, but in the case of these exceptions notices are always given to the borrowers unless there is a definite understanding with the borrower that the rate is not to be changed.

——— states that in addition to the brokers' loans which his bank carries for its own account and for customers, and which amounted on June 30, 1920, to \$48,170,000, his bank carries what might be called a regular line of demand loans secured by stocks and bonds made to borrowers other than brokers, the rates upon which are not governed by the stock exchange renewal rate and which are fixed by the bank at the end of every quarter—December, March, June, and September—and upon these loans he states the rate has not exceeded, to the best of his recollection, 6 per cent per annum.

He also states that his impression and belief is that it is the custom of all the banking institutions in New York to raise or lower the rate of interest upon the so-called brokers' loans secured by bonds or stock each day as the renewal rate is posted on the exchange. I informed him that the records of this office, I thought, could confirm his impressions on this subject as to national banks.

I called his attention to the fact that one national bank has indicated that money for brokers' loans was being supplied by certain banks upon request or demand from "the money committee of the stock exchange" from time to time "to relieve the situation." I asked him what committee of the stock exchange exercised this authority of calling upon the banks for funds, and he advised me that he was not informed on the subject and that he had never heard of such a committee since the time of the war, when there was a formal committee of which ——— was chairman. He says no committee of the stock exchange, in the past year, has called upon his bank to furnish funds, as far as he knows, although his broker sometimes calls him up and inquires whether his bank can and will furnish funds to supply an urgent demand. He has never understood such requests or communications from his money broker as having any weight or being in any way official.

I asked ——— why it was that his records show that, on loans already in the bank, eight or nine different rates of interest were being charged sometimes, calling his attention, for example, to November 6, 7, 12, and 13, December 31, and January 2 and 3.

He stated that he would look up the records and see why these rates should have varied so greatly, as he assures me he has no reason to doubt that the loans were all satisfactorily secured.

I mentioned to ——— that I deprecated the exaction of these high money rates in the New York market and thought that they had exercised an influence upon the general situation, and had been an active contributing factor to the great decline which has taken place in securities values, especially in the past 12 months. I mentioned to him instances of well-informed and eminent bankers who heartily concurred with these views. I told him that I seriously questioned, in view of the great shrinkage which had taken place in securities, whether his own institution had, as a net result, profited by the high interest rates in which it has participated. He replied that he could very well see the force of the argument.

(The next paragraph is omitted, as its publication might disclose the identity of the bank.)

I stated to ——— that, under the conditions as they appeared to exist, the posting of a renewal rate on the stock exchange meant the automatic establishment of that rate as the renewal rate for the great body of brokers' loans in New York. ——— replied that, generally speaking, that is correct.

I pointed out, in conclusion, that, under these conditions, it would be virtually impossible for brokers to borrow elsewhere in New York new money with which to pay off their loans if they were dissatisfied with the rate.

JOHN SKELTON WILLIAMS,
Comptroller.

The above memorandum was dictated in the presence of Mr. ———, vice president of the ——— Bank, who after suggesting a few revisions which are included above declared the memorandum to be correct.

——— NATIONAL BANK,
New York, September 20, 1920.

HONORABLE COMPTROLLER OF THE CURRENCY,
Washington, D. C.

SIR: Referring to the question raised by you in the course of our conversation on September 14 with respect to rates of interest on loans on certain specified dates, we have to report on November 6, 7, 12, 13, December 29, 30, and 31, 1919, we held loans not initially made, the rates on which exceeded our renewal rate.

On January 2 and 3, 1920, we held no loans the rates on which exceeded our renewal rate.

Respectfully,

———, *Vice President.*

TREASURY DEPARTMENT,
Washington, September 22, 1920.

———, Esq.,
National Bank, New York City.

DEAR SIR: I have your letter of the 20th instant in which you say, "with respect to rates of interest on loans on certain specified dates, we have to report on November 6, 7, 12, 13, December 29, 30, and 31, 1919, we held loans not initially made the rates on which exceeded our renewal rate."

I fail to understand the meaning of that statement, and will be obliged if you will explain the thought intended to be conveyed.

You also say "On January 2 and 3, 1920, we held no loans the rates on which exceeded our renewal rate."

The statement furnished this office by you some time ago shows that on January 2, 1920, the loans already in your bank, not initially made on the dates given, which were secured by stocks and bonds, were as follows:

At 25 per cent.....	\$14,055,000
20 per cent.....	1,400,000
18 per cent.....	57,183,000
15 per cent.....	1,455,000

Does your statement above quoted, as to January 2 and 3, mean that your only renewal rate on January 2 was 25 per cent, for you say you held no loans on which your rate exceeded "our renewal rate;" yet you had loans on that date of \$1,400,000 at 20 per cent, \$57,000,000 at 18 per cent, and \$1,455,000 at 15 per cent.

On that same day the renewal rate on the call money market was 15 per cent and the market closed at 6 per cent; yet on that day your statement shows you were lending over \$62,000,000 at from 15 to 25 per cent.

I will be obliged if you will make your letter a little more clear.

Yours, very truly,

T. P. KANE, *Deputy Comptroller.*

TREASURY DEPARTMENT,
Washington, October 25, 1920.

----- NATIONAL BANK,
New York City, N. Y.

DEAR SIRS: In connection with correspondence which this office had with you early in September, you asked permission to send one of your officers to Washington to explain the call money situation in New York as it related to your bank. Upon being advised that we would be pleased to have you do so, your vice president, ----- called at the Treasury on September 14 and described prevailing practices in some detail.

He stated, *inter alia*, that it was his understanding that when the renewal rate fixed from day to day by certain brokers on the stock exchange was posted on the exchange it acted "*automatically*" with all so-called "brokers" or "street" loans already in the banks, and with all the borrowers as fixing the rate of interest for the day on all such loans where there were no special arrangements to the contrary.

In the report, however, which your bank has furnished, which purports to show loans held for your own account and for your correspondents on some eighty-odd days between October 1, 1919, and July 31, 1920, it appears that the so-called "renewal" rate, established as explained by your vice president, was *not* applied to all the loans carried by your bank on those particular days, but that on the contrary the rates charged by you on numerous dates on the larger *part* of such loans, already in your bank were greatly in excess of the "renewal" rate, which your vice president stated it was his understanding was applied automatically by all banks and all such loans in the absence of special agreement to the contrary.

As examples of wide deviations from what you advised me was the general rule and practice, I ask your attention to the following:

Your report shows that on October 8, 1919, the renewal rate reported was 9 per cent. On that date you show *no loans* upon which the renewal rate was charged, but of the \$48,777,000 of loans on hand at that time you report that you charged 7 and 8½ per cent on \$1,110,000, 10 per cent on \$44,366,000, 12 per cent on \$3,300,000.

The following day the renewal rate was 8 per cent; on that day you charged 10 per cent on \$41,071,000.

Upon the remainder of your loans that day upon which over 6 per cent was being charged, which amounted to less than a million dollars, you charged 7 per cent and 8½ per cent.

On November 7 the renewal rate as fixed was 12 per cent, but on that date your report shows that you charged 15 per cent on \$55,895,000, 17 per cent and 18 per cent on \$1,400,000, 19 and 20 per cent on \$2,620,000.

The renewal rate of 12 per cent was only charged on \$1,101,000. You also reported that you had that day \$250,000 out at 8 per cent and \$4,900,000 at 7 per cent.

On November 10 the renewal rate was only 12 per cent. Upon that date your loans were marked as follows: 15 per cent on \$48,820,000, 19 per cent on \$100,000, 20 per cent on \$1,579,000, and the loans over 6 per cent upon which you were charging less than 15 per cent amounted to \$5,150,000 at 7 and 8 per cent.

On November 14 the renewal rate as fixed by the exchange authorities was 14 per cent. Yet on that date you were charging 16 per cent on \$1,330,000, 20 per cent on \$36,284,000, 25 per cent on \$1,750,000, 30 per cent on \$6,000,000.

On January 2, 1920, although the renewal rate on that date was 15 per cent your sworn statement to this office shows that for that date the loans already in your bank were marked as follows: 15 per cent (the renewal rate) on \$1,455,000, 18 per cent on \$57,183,000, 20 per cent on \$1,400,000, 25 per cent on \$14,055,000.

While we find occasionally you report outstanding loans marked less than the renewal rate, yet we find that in the larger number of cases if there is any change from the renewal rate it is generally an advance materially above the renewal rate rather than the other way. In fact, the rate charged on the volume of your "brokers" loans appears to have been above the renewal rate more than ten times as often as it was below. As it is understood that the variations in rate were not due to the collateral securing them, and as they are all payable on call or demand, I respectfully ask that you send this office a special report explaining the principle or basis upon which these discriminations in the rates were or are made, as per section 5211, United States Revised Statutes.

Vice President ——— stated that on loans for correspondents your bank, in some instances, charged a certain percentage of the interest received as the compensation for handling the loans and collateral, and that in other cases your bank divided evenly with your correspondent the amount received for interest in excess of 6 per cent per annum.

In the special report which you have herein been requested to send to this office, please include a statement showing the highest, lowest, and average rates charged during the past 12 months on loans made for account of the correspondent or customer for whom you have placed in this period the largest amount of money on the basis of dividing with such correspondent the interest charged or collected in excess of 6 per cent per annum, and also show in the statement the dates, rates and amounts of all such loans made for account of that customer on which interest at 12 per cent per annum or more was charged.

Respectfully,

JOHN SKELTON WILLIAMS,
Comptroller.

——— NATIONAL BANK,
New York, November 1, 1920.

SIR: Please find inclosed special report requested in your letter of October 25.

Respectfully,

(Signed) ———,
Cashier.

HONORABLE COMPTROLLER OF THE CURRENCY,
Treasury Department, Washington, D. C.

——— NATIONAL BANK,
New York, November 1, 1920.

Special report requested in letter of Comptroller of the Currency dated October 25, 1920.

1. Explanation of "principle or basis upon which these discriminations in the rates were or are made." What the comptroller terms discrimination is the exercise of the best business judgment of the officers of this bank. To borrowers of good standing on satisfactory collateral, money is offered without knowledge who will accept. On a given day loans are made at different rates at different times due to fluctuations in the money market, determined by supply and demand.

2. Statement regarding loans for account of customer for whom largest amount has been loaned on "basis of dividing with such correspondent the interest charged or collected in excess of 6 per cent per annum." No loans are made on the above basis. Assuming request for report has reference to loans made on basis of dividing with the correspondent the excess of street renewal rate over 6 per cent, then during past 12 months the highest street renewal rate affecting such customer's loans was 17 per cent; lowest, 5 per cent; average, 8.09 per cent. Street renewal rates of 12 per cent and over affecting this customer's loans were: November 6, 7, 8, 9, 10, 17, 18, 19, 1919, 12 per cent on \$6,000,000; November 11, 12, 14, 15, 16, 1919, 14 per cent, same amount; November 13, 1919, 16 per cent, same amount; December 29, 1919, 12 per cent on \$9,000,000; December 30, 1919, to January 4, 1920, 15 per cent, same amount; January 30, 31, February 1, 1920, 12 per cent, same amount; February 2, 3, 4, and 9, 1920, 14 per cent, same amount; February 5 to 8, 1920, 17 per cent, same amount.

I, ———, cashier, swear the above is true to the best of my knowledge and belief.

[SEAL.]

(Signed) ———,
(Signed) ———,
Notary Public, Kings County.

Certificate filed New York County Clerk's; New York County Register's Office.

TREASURY DEPARTMENT,
Washington, November 4, 1920.

— NATIONAL BANK,
New York City, N. Y.

DEAR SIR: I have your letter of the 1st instant, inclosing special report in reply to my request of October 25.

In my letter of the 25th ultimo I had said:

"In the report, however, which your bank has furnished which purports to show loans held for your own account and for your correspondents on some eighty-odd days between October 1, 1919, and July 31, 1920, it appears that the so-called "renewal" rate, established as explained by your vice president, was *not* applied to all the loans carried by your bank on those particular days, but that on the contrary the rates charged by you on numerous dates on the larger *part* of such loans already in your bank were greatly in excess of the "renewal" rate which your vice president stated it was his understanding was applied automatically by all banks and all such loans in the absence of special agreement to the contrary."

I then quoted from your special report of August 25, 1920, showing that although the renewal rate established from day to day was charged on a portion of the loans which were already in your bank on certain days, exclusive of new loans made by you on those days. I frequently noticed upon the bulk of your loans on particular days you did not mark them up to the renewal rate but you marked them up to rates greatly in excess of the renewal rates established by the stock exchange for those particular days.

For example, I called your attention to the fact that in your sworn report of August 25 you had marked over \$36,000,000 of your loans at 20 per cent, \$1,750,000 at 25 per cent, and \$600,000 at 30 per cent, although on that very day the renewal rate was only 14 per cent, and you had informed me that the renewal rate applied "automatically to call loans already in the bank, secured by stocks and bonds" unless there should be special arrangements made to the contrary.

In my letter to you of October 25 I had said:

"While we find occasionally you report outstanding loans marked less than the renewal rate, yet we find that in the larger number of cases, if there is any change from the renewal rate it is generally an advance materially above the renewal rate rather than the other way. In fact the rate charged on the volume of your "brokers" loans appears to have been *above* the renewal rate more than *ten times* as often as it was *below*. As it is understood that the variations in rates were not due to the collateral securing them, and as they are all payable on call or demand, I respectfully ask that you send to this office a special report explaining the principle or basis upon which those discriminations in the rates were or are made, as per section 5211 United States Revised Statutes."

It is obvious from the foregoing that the explanation offered in your letter of November 1, 1920, does not explain the variations to which I referred. In your special report you say:

"Explanation of 'principle or basis upon which these discriminations in the rates were or are made.' What the comptroller terms discrimination is the exercise of the best business judgment of the officers of this bank. To borrowers of good standing on satisfactory collateral money is offered without knowledge who will accept. On a given day loans are made at different rates at different times due to fluctuations in the money market, determined by supply and demand."

Please note that my inquiry did not apply to new loans made, as you say, "on a given day at different rates at different times due to fluctuations of the money market." I have not referred to the loans made during each day, but to the loans which were already in your bank.

The heading over those loans already in your bank, as shown on page 6 of your special report of August 25, 1920, was as follows:

"Loans already in bank (not made initially on dates given). Aggregate amount of call loans already in your bank secured by stocks or bonds on each of the dates named in the annexed table, and the interest rate or renewal rate charged for each day on said loans, showing on what proportion of said total loans interest was charged at each different rate of interest on said dates. (This refers to loans on which interest charged exceeded 6 per cent per annum)."

As your special report of November 1 obviously does not apply to the loans about which I inquired, namely, the loans already in your bank, but appears to refer to new loans "on a given day," I will thank you to furnish, without unnecessary delay, the report heretofore asked for concerning the loans already in your bank upon which interest rates were sometimes charged at rates varying the same day all the way between 7 and 30 per cent.

On November 14, for example, when the renewal rate was 14 per cent, you charged on the bulk of your call loans outstanding in excess of 6, 15, 16, 18, and 25 per cent, and on November 13, when the call money rate was 16 per cent, you marked the bulk of your loans outstanding in excess of 6 per cent up to 18, 20, 25, and 30 per cent.

In reply to the second inquiry in my letter of the 25 ultimo, you say:

"Statement regarding loans for account of customer for whom largest amount has been loaned on 'basis of dividing with such correspondent the interest charged or collected in excess of 6 per cent per annum.' No loans are made on the above basis. Assuming request for report has reference to loans made on basis of dividing with the correspondent the excess of street renewal rate over 6 per cent, then during past 12 months the highest street renewal rate affecting such customer's loans was 17 per cent; lowest, 5 per cent; average, 8.09 per cent. Street renewal rates of 12 per cent and over affecting this customer's loans were: November 6, 7, 8, 9, 10, 17, 18, 19, 1919, 12 per cent on \$6,000,000; November 11, 12, 14, 15, 16, 1919, 14 per cent, same amount; November 13, 1919, 16 per cent, same amount; December 29, 1919, 12 per cent on \$9,000,000, December 30, 1919, to January 4, 1920, 15 per cent, same amount; January 30, 31, February 1, 1920, 12 per cent, same amount; February 2, 3, 4, and 9, 1920, 14 per cent, same amount; February 5 to 8, 1920, 17 per cent, same amount."

Please advise me how it was that on November 13, 1919, you divided with one of your customers the difference between 6 per cent and the street renewal rate for that day of 16 per cent, when your report to this office of August 25 shows that you had no loans outstanding on that day whatsoever upon which the rate of 16 per cent per annum was charged. The total amount of new loans which you made that day at 16 per cent was only \$52,112.50, but on the same day the renewal rate was, as you say, 16 per cent, you were charging 20 per cent on \$42,000,000, 25 per cent on \$3,500,000, and 30 per cent on \$900,000.

Yours, very truly,

JOHN SKELTON WILLIAMS,
Comptroller.

— NATIONAL BANK,
New York, November 10, 1920.

SIR: 1. In your letter of November 4 you request "report heretofore asked for concerning the loans already in" this bank. Paragraph 1 in report November 1 applies to renewal rate on old loans as well as to rate on new loans. Our renewal rate may or may not follow the street renewal. If it is unsatisfactory to borrowers on old loans, they are privileged to borrow from other banks adopting the street renewal rate and pay our loans.

2. You instruct: "Please advise me how it was that on November 13, 1919, you divided with one of your customers the difference between 6 per cent and the street renewal rate for that day of 16 per cent when * * * you had no loans outstanding" at 16 per cent. We did so in accordance with agreement with customer, which determined customer's return by street renewal rate, and no other.

Respectfully,

(Signed) _____,
Cashier.

HONORABLE COMPTROLLER OF THE CURRENCY,
Treasury Department, Washington, D. C.

In the above letter the bank takes the position "*that our renewal rate may or may not follow the street renewal.*"

It must be noted that this statement is not in accord with the representations of the vice president of the bank, who, in his interview in Washington on September 14, stated plainly that call loans made to brokers "*are substantially all governed by the renewal rate.*" In the same interview he said that when the renewal rate is posted on the exchange he assumed that "it acted automatically with all the banks and all the borrowers in fixing the rate of interest on all brokers' loans where there may not be special arrangements, although the bank has the right, if it is not satisfied with the renewal rate, to call in a portion of its loans."

In the same interview the vice president of the bank reiterated his belief that "it is the custom of all the banking institutions in New York to raise or lower the rate of interest upon the so-called brokers'

loans secured by bonds and stocks as the renewal rate is posted on the exchange."

In the bank's reply of August 5 to the comptroller's inquiry as to whether there was *discrimination* among borrowers or whether in raising or lowering interest rates on call loans made to nondepositors it was the practice of the bank to make rate changes on all such loans *simultaneously*, this bank stated, under oath, "changes made simultaneously," and that it was the practice of the bank to mark these loans up or down from day to day according to the fluctuations of the New York call-money market.

The record seems to show conclusively that despite the statements quoted above this bank's loans *were* raised quite arbitrarily; that changes were *not* made "simultaneously"; that there was marked "discrimination" in the matter of rates among borrowers on equally good collateral on the same days; that rates far in excess of the "renewal rate" were frequently exacted on loans aggregating many millions of dollars; and that frequently at the same time the rates charged on loans already in the bank varied to such an extent that while some borrowers were paying 6 per cent others at the same time were being charged 20, 25, or 30 per cent.

Following the publication by this office of its statements relative to the methods by which the high rates for call money in New York were made and maintained, numerous communications loudly condemning the existing practices and calling for reform were received from various parts of the country.

Typical of these was the following letter received from a New York business man of responsibility and standing, who in writing, under date of November 16, 1920, said:

"I hand you a clipping which I detached from the * * * news ticker yesterday morning at 11.10 a. m. It was put out by the most responsible financial publicity organization in the United States. It tells its own story and it is a dirty one. I want to say that I honor you, as all decent thinking financiers must, in the steps you have taken to correct what I believe is a great conspiracy. * * *

"I am a Republican, always have been, but I am first, or at least try to be, an honest business man. The crowd which determines, and has done so for months past, what the daily 'call rate' shall be in these great banking institutions should be investigated, as I am strongly of the opinion that very much of our financial distress and burden is due to their machination."

The article from the New York "news ticker" service which was inclosed in the above letter was as follows:

"It is evident call money market is not being governed by old law of supply and demand.

"Numerous instances of failure to lend call money below fixed rate have developed. As an example a manufacturer recently gave instructions to his New York banker to lend something like one half million dollars at 9pc, rate then ruling on N. Y. Stock Exchange. He was informed that there were no takers at that figure. Not being familiar with New York call money market, he asked his banker to lend it at 6pc if that was the best he could do.

"Later on he was told that money could not be loaned unless some one was willing to come along and pay 9pc. At close of the day not a dollar had been loaned."

POSSIBLE REASONS WHY NEW YORK BROKERS DO NOT RESIST HIGH
MONEY RATES.

Some surprise has been occasioned by the omission of stock exchange houses to protest more vigorously against the imposition of excessive interest rates by banks in New York City; but their silence may be better understood when we consider that it is not the brokers who have ultimately to pay the heavy rates, but their customers and clients for whom they are carrying securities.

Furthermore, it is conceivable that the brokers themselves may profit by these high rates, automatically fixed by the stock exchange "coterie," on brokers' loans, for it is understood that the brokerage houses generally, if not always, charge their customers, for the use of the capital of the brokerage firms employed in carrying stocks, the same rates, or the average rates, which they have to pay to the banks from whom they borrow.

In other instances the brokerage houses profit from these high rates when stocks are sold short and when the borrowing rate on stocks is less than the rates which the brokers receive by lending the proceeds of the stocks which they sell short.

These two considerations go far to explain the forbearance displayed by the brokers for excessive rates charged by the banks on brokers' loans, although high rates naturally have a tendency to curtail the volume of their business.

MONEY RATES IN CANADA MUCH BELOW NEW YORK RATES.

In connection with the excessive rates of interest which have prevailed in New York during the past 12 months and which, as has been pointed out, have been higher than in any other city in the world, the following extracts from the reports of the president and of the general manager of the Bank of Montreal, one of the two largest, if not the largest bank of Canada, submitted recently at the one hundred and third annual general meeting of the shareholders of the bank, are instructive:

"As a result of the completion of a successful year's operations, due in part to the high interest rates for money that have prevailed outside Canada, where a portion of our reserves are carried, your directors decided to declare a bonus of 2 per cent, making the distribution to shareholders for the year 14 per cent."

The general manager of the same bank, in his report in commenting upon the extra bonus of 2 per cent in addition to the usual dividend, said:

"Let me make it clear that this result is not the outcome of higher rates of interest on current loans in Canada.

"The rate of interest to the merchant and manufacturer at home is about the same as it was before the war. * * *

"The volume of our call loans in New York is governed solely by our requirements in liquid reserves. We do not increase or diminish them on account of higher or lower rates, but we have been fortunate this year in that rates have averaged high. * * *

"As comparisons are constantly made between Canada and the United States owing to general similarity in conditions, one anomaly attracts special attention, viz, that with credit restriction as acute here as it is across the line, the price of money is materially lower in the Dominion.

"This condition, in days of world-wide high interest rates, has attracted much attention in other countries, and is regarded as a tribute to Canada's good banking system. * * *

"As everyone knows, the connection between the price of money and the yield on investments is of the closest."

The concluding paragraph, which suggests that the yield on investments keeps pace with the rise and fall of rates for money, means that the prices of securities decline as money rates advance and is in line with the closing paragraph of the Comptroller of the Currency's statement of August 10, 1920, quoted on page 1250 of the comptroller's report, as follows:

"I am convinced that the unjustifiable and excessive interest rates maintained in New York City in the past 10 months covered by my request for data, and which I am informed have in some cases gone as high as 15 and 20 per cent or more, have been one of the potential causes, rather than the result, of the unsettling of values in our securities market, and of the burdensome rates which our railroad and industrial corporations and other concerns and individuals of the highest credit, have been required to pay for new capital essentially needed for the country's development and well-being."

CONDITIONS UNDER WHICH CHARTERS ARE GRANTED TO NEW NATIONAL BANKS.

The excellent record which the national banks have established in the past few years in immunity from failure, growth, and ability to respond effectively to the requirements of business and the financial needs of the country has increased immensely their prestige and standing. One of the results has been unusual and increasing demands for charters for national banks which have come to the comptroller from every section of the country, despite the fact that since the inauguration of the Federal reserve system the deposit balances carried with national banks in reserve cities can be no longer regarded as a portion of the reserve of the so-called country national banks.

During the fiscal year ending October 31, 1920, charters were granted to 361 new national banks, and 27 applications for charters were rejected. On October 31, 1920, 259 applications for charters for new national banks were on hand and awaiting the comptroller's decision.

Since the present comptroller assumed office on February 3, 1914, up to the 1st of July, 1920, 1,292 charters had been granted to new national banks. I have the honor of calling attention to the exceedingly gratifying fact that, from the beginning of the present comptrollership and up to July 1, 1920, the record shows that *there has not been a single failure among the 1,292 national banks chartered during this period.*

This immunity from failure is an evidence of the care which is exercised in the examination of all applications for new national bank charters, and of the discrimination with which these applications are passed upon.

When a group of men decide to apply for a charter for a national bank, they are required, in the first instance, to fill in and file with the Comptroller of the Currency an application in the following form:

APPLICATION TO ORGANIZE A NATIONAL BANK.

....., 19....
To the COMPTROLLER OF THE CURRENCY,
Washington:

SIR: We, the undersigned, prospective shareholders, being natural persons and of lawful age, intend, with others, to organize a national banking association, under the title of "The, " to be located at, county of, State of, with capital of \$....., to succeed the bank of Population,

We request that the title be reserved and that the necessary instructions be sent to, who is an actual resident of the place where the proposed bank is to be located.

Signatures of applicants.	Residences.	Business.	Financial strength in figures.	Shares to be sub- scribed for.
.....
.....
.....
.....

The signers of this application are known by me to be reputable citizens; the information in reference to their business and financial standing is in my opinion correct, the statement as to population authentic, and I am of the belief that the conditions locally are such as to insure success if the bank is organized and properly managed.
....., Mayor., Judge of Court.
....., Postmaster.

Read these instructions carefully.

The name of the place should form a part of the title, thus, "The First National Bank of A——," but the name of the State should not be included.
Consideration will not be given to an application for a title including the word "First," if a national bank exists at the given locality; nor to an application for a title identical with that of a national bank heretofore in existence, nor to one materially similar to that of a national, State, or other bank existing in the place.
The application must be signed by at least five prospective shareholders, preferably the proposed officers or directors, and should be indorsed by three prominent persons, judge of court, postmaster, and mayor, or other public officials.
The correspondent should be a resident of the place where the bank is to be located, a prospective shareholder, and if possible an officer or director of the proposed bank.
It is not necessary for the applicants to subscribe for the entire issue of stock. Only the actual number of shares to be held by each should be stated, and each applicant should be worth financially twice the value of the stock for which he subscribes.
The following shows the national, State, or private banking institutions with which the applicants are, or have been, connected either as officers or directors:

Applicant.	Institution.	Position.	Period.
.....
.....
.....
.....

(Date) (Signed) Correspondent.¹

¹ N. B.—The correspondent is requested to furnish, as early as possible, a list of the prospective officers and directors of the proposed organization and a statement showing their previous connection, if any, with other banking institutions.

Upon receipt of this formal application, a national-bank examiner is designated to visit the city or town in which it is proposed to locate the new bank; and to inform himself as to the character, experience, and financial standing of the applicants, general conditions of business, the status of the existing banks, and need, if any, of additional facilities.

The following is an extract of the standing instructions issued by the comptroller to national-bank examiners in regard to such investigations:

EXAMINATIONS PRELIMINARY TO GRANTING NEW BANK CHARTERS.

To national-bank examiners:

In making the *preliminary* investigations in connection with the organization of a new national bank, the examiner should report very fully on the character and standing of the applicants and on the necessity for a bank and need for additional banking facilities in the community. Sufficient time should be taken to make the investigation thorough.

The examiner should report on the character, standing, and business of the applicants, and should also advise as to the prospective officers, and others who are expected to take a prominent part in the organization or management of the bank. If possible, the examiner should also ascertain the names of the subscribers to the stock so that he can report to what extent the stock is to be distributed and the general character of these subscribers.

In cases where there is no existing bank.

If there is no bank at the place, the examiner should endeavor to learn the amount of business transacted in the village, the approximate value of produce shipped therefrom, the value of the output of mills and factories, and the volume of business done by the principal merchants during the last year.

The examiner should also ascertain where the business men of the place and the farmers of the community are now doing their banking business, and to what extent they would probably do business with the new bank if the charter is granted.

Find out how far the organization of the proposed bank would be a convenience to the local business people and also to the farmers of the neighborhood; whether there seems to be a general desire for its establishment and the extent to which local business men have subscribed for stock.

It is particularly important to find out whether the men who are to manage the new bank are of good reputation and whether some one of banking experience has been selected as an active officer.

The fact that the organization of a bank in the place would diminish the deposits of existing banks located in other villages or towns some miles away, or that there may not seem to be any immediate prospect of the new bank being a large earner at once, would not necessarily justify an adverse recommendation. It frequently happens that a new bank can receive a large amount of deposits which are not taken from any of the neighboring banks, but represent cash funds held by local merchants and farmers, or kept with banks in distant cities. The organization of a new bank in a live growing town should naturally help its business. Farmers will generally prefer to sell their produce where they can secure banking accommodations.

Organization of a new national bank where there is another bank or banks.

Where the examiner is directed to report on an application to organize a national bank at a point where there is already a bank doing business, he should thoroughly investigate the reputation and financial standing of the applicants and the need for *additional* banking accommodations. He should report on the management of the existing bank, whether it is satisfactory to the community and, if a State bank, by whom its stock is owned, if ascertainable; also the average and maximum interest charged on loans and discounts and the rates paid on time and demand deposits. If the stock of the local bank is owned by but a few shareholders and largely by non-residents, and the stock of the proposed national bank is to be widely distributed among the substantial men of the village and neighboring territory, these facts should have due consideration.

It may appear on a hasty survey that there is but little apparent need for another bank in the community, and that the existing bank has but a small line of deposits,

but a thorough investigation may disclose conditions which indicate real need for another bank.

In all cases the examiner should make a thorough personal investigation, which generally can not be done satisfactorily in a few hours. A sufficient deposit is made to cover an effective investigation and the applicants are therefore entitled to thorough examinations.

It is also customary for the Comptroller of the Currency to address a letter to the congressman in whose district the proposed bank is to be located, requesting such information as he may give as to the character of the applicants and the need for additional banking facilities.

Similar inquiries are also addressed to the Federal reserve agent of the district and to the State superintendent of banks. Information is also sometimes sought and obtained from other sources.

When the field examiner makes his report, it is submitted to the chief examiner of the district, and by him forwarded to the Comptroller of the Currency with the recommendations of the chief examiner. These reports are then digested in the Division of Organization, of the comptroller's bureau, and the results are submitted to the comptroller for action. With all the facts before him, pro and con, the comptroller himself, in the case of national banks for \$100,000 capital or more, decides whether or not the charter should be granted. In the case of banks with less than \$100,000 capital, the comptroller submits his recommendations to the Secretary of the Treasury, by whom such applications are then finally passed upon.

When passing upon applications, the following points are considered by the comptroller, with special care:

1. The character, experience, and financial standing of the proposed organizers and officers of the new bank.

2. The question as to whether the existing banking facilities are adequate for the business of the community. In considering this point, special attention is given to the volume of the deposits of the local banks. If these deposits amount to more than 10 times the capital and surplus of these banks, that is regarded as *prima facie*—although not conclusive—evidence that there is room for additional banking capital.

If there seems to be justification for complaints that the local banks are charging excessive interest rates to their customers or deal unfairly with them in other respects, or if it is shown that there is a monopoly in the local banking situation and that the existing banks, either National or State, are controlled by a particular group or set of men, such considerations are regarded as favorable to the granting of a new charter.

INCREASE IN NUMBER OF DEPOSITORS IN NATIONAL BANKS.

The number of depositors or deposit accounts in all national banks increased during the year ended June 30, 1920, 12.50 per cent, the number of such accounts at the close of the year aggregating 20,520,177. Based upon the estimated population as of June 30, 1920, the average number of deposit accounts per 1,000 of population was 193, or one deposit account for every five of our population.

In the following comparative statement the number of deposit accounts by States on June 30, 1919 and 1920, is shown, together with the increase and the percentage of increase, also the estimated population and the number of deposit accounts per each 1,000 of population:

Number of depositors or deposit accounts in national banks June 30, 1919 and 1920.

State.	Total number of deposit accounts June 30, 1919.	Total number of deposit accounts June 30, 1920.	Increase in number of deposit accounts June 30, 1920, over June 30, 1919.	Percentage of increase June 30, 1920, over June 30, 1919.	Population June 30, 1920.	Number of deposit accounts for each 1,000 of population June 30, 1920.

CONDITION OF NATIONAL BANKS AT THE DATE OF EACH CALL DURING THE REPORT YEAR.

During the year ended October 31, 1920, the Comptroller of the Currency, in pursuance of the authority granted by section 5211, United States Revised Statutes, called upon national banks to submit six reports of condition as of various dates.

The condition of these banks as of the date of each call is shown in the following abstract:

Abstract of reports of condition of national banks in the United States on Nov. 17 and Dec. 31, 1919, Feb. 28, May 4, June 30, and Sept. 8, 1920.

(In thousands of dollars.)

CONDITION OF NATIONAL BANKS SEPTEMBER 8, 1920.

In the following pages will be found detailed statements concerning the resources and liabilities of all National Banks of the United States as of September 8, 1920.

RESOURCES.

LOANS AND DISCOUNTS.

Loans and discounts (exclusive of paper rediscounts aggregating \$1,290,304,000) were reported by national banks on September 8, 1920, at \$12,415,762,000. This is the highest point reached since the beginning of the national banking system, and represents an increase of \$18,862,000 over June 30 last and an increase of \$1,330,300,000 over the amount reported September 12, 1919, which at that time was the greatest amount ever reported. The loans and discounts of national banks as of the date of each call during the past year have shown a steady increase, and rose from \$11,560,242,000 on November 17, 1919, to the figures shown above on September 8, 1920. The proportion of loans to total deposits on September 8, 1920, was 74.11 per cent. On September 12, 1919, the ratio of loans to deposits was 66.45 per cent.

The classification of the loans and discounts made by national banks as of the date of the midsummer call for reports of condition during the past three years is shown in the following table:

[In thousands of dollars.]

Class.	June 29, 1918.		June 30, 1919.		June 30, 1920.	
	Amount.	Per cent.	Amount.	Per cent.	Amount.	Per cent.
On demand, paper with one or more individual or firm names (not secured by collateral).....	620,765	6.1	597,560	5.43	707,229	5.20
On demand, secured by stocks and bonds.....	1,150,073	11.3	1,307,787	11.88	1,261,984	9.27
On demand, secured by other personal securities, including merchandise, warehouse receipts, etc. . .	300,212	3.0	317,286	2.88	392,277	2.88

OVERDRAFTS.

Overdrafts on September 8, 1920, were reported at \$17,545,000, as compared with \$15,131,000 on September 12, 1919.

UNITED STATES GOVERNMENT SECURITIES OWNED.

The United States Government securities owned by national banks on September 8, 1920, totaled \$2,175,019,000. The classification of these securities includes old United States bonds deposited to secure circulation to the amount of \$711,075,000; \$1,006,943,000 were Liberty loan bonds and Victory notes, and the remainder consisted of certificates of indebtedness, war-savings stamps, and thrift stamps. The amount of all United States securities held September 12, 1919, was \$3,296,593,000. There was therefore a reduction of \$1,121,574,000 in the holdings of these securities during the fiscal year. United States Government securities owned by national banks declined in volume between each call during the past year. The reduction between June 30 and September 8, 1920, was \$94,556,000.

OTHER BONDS, SECURITIES, ETC.

On September 8, 1920, national banks had investments in miscellaneous bonds and securities (other than stocks) aggregating \$1,805,579,000, which, with the exception of June 30, when such investments amounted to \$1,802,196,000, was the smallest amount reported during the year. The net reduction, as compared with September 12, 1919, was \$1,016,000.

STOCKS.

The holdings of national banks in stocks, including \$66,850,000 of stock of Federal reserve banks, aggregated \$118,582,000. The amount of stocks held, other than Federal reserve bank stock, showed a reduction for the year of \$416,000, while, as a result of the provi-

sion of the Federal reserve act which requires all national banking associations to subscribe to the capital stock of the Federal reserve bank in the district in which the banks are established to the extent of 6 per cent of the paid-up capital stock and surplus of each national bank, the stock of Federal reserve banks held by national banks has shown a steady increase during the year, as the number of national banks has steadily increased. Only 3 per cent of the required subscriptions to the stock of Federal reserve banks has been paid in, however, the remaining 3 per cent being subject to the call of the Federal Reserve Board.

National banks are authorized under an amendment to section 25, of the Federal reserve act, approved September 17, 1919, regardless of their capital and surplus, with permission from the Federal Reserve Board, to invest 5 per cent of their capital and surplus in the stock of one or more corporations chartered or incorporated under the laws of the United States, or any State thereof, which may be principally engaged in international or foreign financial operations, in connection with the export of commodities. The authority for obtaining this permission was limited to January 1, 1921. By a subsequent amendment to the act, approved December 24, 1919, national banks were permitted to invest in the stock of such corporations, in accordance with the provisions of the act, up to 10 per cent of the subscribing bank's capital and surplus.

BANK PREMISES AND OTHER REAL ESTATE OWNED.

On September 8, 1920, national banks had invested in banking houses \$322,732,000 and in furniture and fixtures \$46,394,000. Other real estate owned was carried at \$45,931,000. The valuation placed upon banking houses exceeded by \$32,824,000 the amount at which they were carried on September 12, 1919, and an increase was reported as of the date of each call subsequent thereto during the year. The increase during this period on account of furniture and fixtures was \$8,875,000; the value of other real estate owned was reduced \$1,882,000, as compared with September 12, 1919.

DUE FROM BANKS.

On September 8, 1920, the lawful reserve maintained with Federal reserve banks, in accordance with the provision of section 19 of the Federal reserve act, against deposits, was \$1,230,282,000, while on September 12, 1919, national banks had on deposit with Federal reserve banks on this account, \$1,227,341,000. Items with Federal reserve banks in process of collection on September 8, 1920, amounted to \$493,215,000, an increase of \$115,354,000 over the amount reported on September 12, 1919.

The net amount due from national banks was \$1,110,772,000, and the net amount due from banks, bankers, and trust companies was \$313,451,000. The net decrease in the amount due from banks and bankers, including the lawful reserve with Federal reserve banks and items in process of collection during the year, was \$165,158,000.

The total cash in the vaults of national banks on June 30, 1920, with the addition to the total of the respective amounts shown in the preceding table, of \$34,300,000 in legal-tender notes, \$67,256,000

in national-bank notes, and \$215,605,000 in Federal reserve and Federal reserve bank notes, was \$450,351,000, while on September 8, 1920, the total cash in the vaults of these banks was \$471,546,000. On the latter date gold coin amounted to \$22,516,000, clearing-house certificates to \$9,137,000, silver and minor coins were reported at \$42,350,000, and legal-tender notes were \$397,543. The increase in the total cash between September 12, 1919, and September 8, 1920, was \$32,335,000.

EXCHANGES FOR CLEARING HOUSE.

On September 8, 1920, exchanges for clearing houses reported by national banks amounted to \$511,375,000. With the exception of the amount of such exchanges reported February 28, 1920, this was the smallest amount held by national banks during the year, being a reduction since September 12, 1919, of \$98,956,000.

LIABILITIES.

CAPITAL STOCK, SURPLUS, AND UNDIVIDED PROFITS.

The aggregate paid-in capital stock of national banks was \$1,248,-271,000 on September 8, 1920, the greatest amount ever reported. The increase over the amount reported June 30, 1920, was \$24,105,000, and over the amount reported September 12, 1919, \$110,301,000. The surplus and undivided profits of these banks aggregated \$1,456,-067,000 on September 8, 1920, as compared with \$1,300,786,000 on September 12, 1919, the increase in the year amounting to \$155,281,000.

CIRCULATION OUTSTANDING.

The outstanding circulation of national banks reached the highest point during the year on September 8, 1920, at which time it amounted to \$693,270,000, an increase over the amount outstanding September 12, 1919, of \$11,681,000.

National bank circulation outstanding as of the date of each call during the report year, is shown in the following statement for central reserve, reserve city, and country banks, and the total for all banks in the United States:

[In millions of dollars.]

Date.	New York City banks.	New York, Chicago, and St. Louis banks.	Other reserve city banks.	All reserve city banks.	Country banks.	Total United States.
Nov. 17, 1919.....	37.6	48.7	170.9	219.6	461.3	680.9
Dec. 31, 1919.....	38.4	49.4	171.8	221.2	464.6	685.8
Feb. 28, 1920.....	37.6	48.9	171.5	220.4	467.2	687.6
May 4, 1920.....	38.0	48.8	170.7	219.5	469.0	688.5
June 30, 1920.....	37.0	47.8	170.9	218.7	469.5	688.2
Sept. 8, 1920.....	36.9	47.8	170.6	218.4	474.9	693.3

DUE TO BANKS.

The balances with national banks on September 8, 1920, to the credit of *Federal reserve banks*, were \$21,316,000; the net amount due to *national banks* was \$1,076,101,000, while the amount on deposit to the credit of *other banks, bankers, and trust companies* totaled \$1,694,249,000. Certified checks and cashiers' checks outstanding were \$310,903,000, making an aggregate of \$3,102,569,000 *due to banks and bankers*. On September 12, 1919, similar items amounted to \$3,490,137,000, the reduction during the year being, therefore, \$387,568,000.

INDIVIDUAL DEPOSITS.

On September 8, 1920, the *individual deposits* (time and demand) in national banks were \$13,595,934,000, a reduction as compared with the amount reported June 30, 1920, of \$109,391,000, and an increase over the total of these deposits held September 12, 1919, of \$923,367,000.

Demand and time deposits increased \$284,103,000 and \$639,264,000, respectively, during the year. Time deposits increased between the dates of each call during the year, while demand deposits were reported in greater volume at the date of each report until February 28, 1920, when they dropped from \$10,325,162,000 on December 31, 1919, to \$10,044,189,000. On May 4, 1920, the amount of demand deposits was in excess of the total reported on February 28 and September 8, 1920, they were again less than the amount reported June 30, the decrease amounting to \$184,188,000.

Postal savings deposits are included in the classification under time deposits, and are subject to the reserve of 3 per cent as provided by section 19 of the Federal reserve act.

UNITED STATES DEPOSITS.

Deposits in national banks on September 8, 1920, to the credit of the United States were only \$53,453,000, while on September 12, 1919, these deposits amounted to \$518,903,000, a reduction during the year of \$465,450,000. The lowest point for the period was reached on September 8, 1920, in the holdings of Government funds, and the next lowest point was February 28, 1920, when these deposits were \$67,914,000. The amounts reported as of the dates of each of the other calls during the year were, on November 17 and December 31, 1919, \$270,390,000 and \$448,863,000, respectively, and on May 4 and June 30, 1920, were \$115,200,000 and \$175,788,000, respectively.

BONDS AND MONEY BORROWED.

The aggregate liability of all national banks on September 8, 1920, on account of bills payable with Federal reserve banks and with other banks, and including borrowed bonds and securities, was \$1,150,073,000, while on September 12, 1919, the liability of these banks on this account was \$1,260,341,000, a reduction during the year of \$110,268,000.

In addition to this liability, the contingent liability of national banks on account of paper rediscounted was \$1,290,304,000 on

September 8, 1920. This was the largest amount reported during the year, and represented an increase over June 30, 1920, of \$75,788,000, and over September 12, 1919, of \$849,394,000. The smallest amount of rediscounts reported at any call during the report year was \$680,476,000, on November 17, 1919, and the liability on this account was increased materially at the date of each report subsequent thereto.

BANK ACCEPTANCES.

Bank acceptances were reported September 8, 1920, at \$414,583,000 an increase during the year of \$91,357,000, but a reduction as compared with the amount reported at the date of each of the three preceding calls.

TOTAL RESOURCES AND LIABILITIES.

The increase of \$270,064,000 in the total resources of national banks during the year ended September 8, 1920, was distributed among the various items of the assets and liabilities, the principal increases being on account of loans and discounts under resources offset by an increase in aggregate deposits under liabilities.

CLASSIFICATION AND AMOUNT OF LOANS BY NATIONAL BANKS IN THE CENTRAL RESERVE CITIES, ETC., JUNE 30, 1920.

The character and amount of loans and discounts made by national banks in the central reserve cities, reserve cities, and country banks, together with the total loans by all national banks in the United States, is shown in the following statement:

Total loans on June 30, 1920.

CLASSIFICATION OF LOANS BY NATIONAL BANKS IN THE CITY OF NEW YORK FOR FIVE YEARS, JUNE, 1916, TO JUNE, 1920, BOTH INCLUSIVE.

Of the aggregate of the loans and discounts by all national banks in the United States on June 30, 1920, 20.16 per cent were made by banks in the city of New York. The following table gives a classification of the loans and discounts as of the date of the mid-summer call for reports of condition during the past five years:

[In thousands of dollars.]

Classification.	June 30, 1916— 33 banks.	June 20, 1917— 33 banks.	June 29, 1918— 49 banks.	June 30, 1919— 31 banks.	June 30, 1920— 31 banks.
On demand, paper with one or more individual or firm names (not secured by collateral).....	29,233	32,767	25,224	36,166	33,036
On demand, secured by stocks and bonds.....	531,580	581,659	445,936	454,928	355,335
On demand, secured by other personal securities, including merchandise, warehouse receipts, etc.	46,267	66,660	58,516	88,455	88,864
On time, paper with one or more individual or firm names (not secured by collateral).....	574,530	805,189	1,074,907	954,023	1,590,502
On time, secured by stocks and bonds.....	328,095	271,780	398,154	679,867	429,796
On time, secured by other personal securities, including merchandise, warehouse receipts, etc.	61,294	66,602	92,463	109,605	188,164
Secured by real estate mortgages or other liens on realty.....	874	767	1,016	725	1,871
Acceptances of other banks discounted.....	15,783	63,360	102,404	78,830	50,748
Acceptances of this bank purchased or discounted.....		12,680	20,876	22,119	5,928
Total.....	1,587,656	1,901,464	2,219,496	2,424,718	2,744,244

On September 26, 1918, the law was amended to authorize the Federal Reserve Board to permit banks located in the outlying sections of central reserve cities to maintain reserves in the amounts required of other reserve city banks. The necessary authority to maintain the smaller ratio of reserve has been granted to a number of banks in Greater New York, and they are no longer included in this classification. This accounts for the reduction from 49 to 31 in the number of banks reporting on June 29, 1918, as compared with June 30, 1919 and 1920.

PAPER ELIGIBLE FOR REDISCOUNT WITH FEDERAL RESERVE BANKS, HELD BY NATIONAL BANKS, IN COUNTRY AND RESERVE CITIES, BY GEOGRAPHICAL DISTRICTS.

Loans eligible for rediscount with Federal reserve banks, as shown by reports of condition made by national banks at the close of business on June 30, 1919, and June 30, 1920, with amount of increase during the year.

CLASSIFICATION OF INVESTMENTS MADE BY NATIONAL BANKS.

The total investments of national banks in United States Government securities and domestic and foreign bonds and securities on June 30, 1920, were \$4,186,465,000, a reduction since June 30, 1919, of \$861,056,000. The largest investments of the banks were in United States Government securities, these investments aggregating \$2,269,-575,000; the investment in railroad bonds, which ranked next in volume, amounted to \$416,430,000.

A classification of national bank investment in bonds and stocks is given in the following statement, for the years ended June 30, 1919, and June 30, 1920:

[In thousands of dollars.]

	June 30, 1919.	June 30, 1920.

SPECIE AND GOLD AND SILVER CERTIFICATES IN NATIONAL BANKS.

The classification of the coin and coin certificates held by national banks on June 30, 1919 and 1920, is shown in the following table, the net decrease during the year being \$16,761,000. This reduction is offset, however, by the increase in the amount due from Federal reserve banks, during this period, of \$230,958,000, as shown in the preceding statement.

Comparison of coin and coin certificates held by all national banks on June 30, 1919, with June 30, 1920.

NATIONAL BANK CHARTERS APPLIED FOR, GRANTED, AND REFUSED.

Applications for charters for 470 national banking associations with capital of \$40,720,000 were applied for during the 12 months ended October 31, 1920, as compared with 422 applications and capital of \$30,932,000 during the previous year.

Of the applications received during the year 389 with capital of \$33,990,000 were approved, as against 290 and capital of \$20,600,000 during the previous year.

Of the 470 applications received during the past year 27, capital of \$850,000, were rejected, and 83, capital of \$8,620,000, were abandoned or action upon them indefinitely deferred. The principal causes of rejection were lack of demand for additional banking facilities in the various communities or the unsatisfactory financial standing or character of the applicants.

National banking associations to the number of 361, with capital of \$31,077,500, were chartered during the year ended October 31, 1920, as compared with 245 associations, with capital of \$21,780,000, chartered during the year ended October 31, 1919. Of the national banks chartered during the year just closed only 79 became banks of issue, and of this latter number 23 were converted from State banks and 56 were banks of primary organization.

INCREASES AND REDUCTIONS OF CAPITAL STOCK OF
NATIONAL BANKS.

In order to meet the constantly increasing demands for additional capital incident to the growing business of the country there was an increase in the capital stock of national banks of \$104,618,100 on the part of 608 national banks during the year ended October 31, 1920. In the previous year the increase in capital of existing banks was \$45,145,100, the number of banks concerned in this increase being 311.

In 1920 there were but four banks which made a reduction in their capital stock, the aggregate being \$300,000. In 1919 the number of reductions of capital was four, and the aggregate amount of the reductions was \$85,000.

LIQUIDATION OF NATIONAL BANKS.

Exclusive of 17 banks liquidated and absorbed by other national banks, 67 national banking associations, with capital of \$11,180,000, were placed in voluntary liquidation during the past year, of which 32 were absorbed by State banks and 35 reorganized as State banks. The year before there were 75 such liquidations with \$15,855,000 capital. The number of receiverships was 5, and the capital involved was only \$205,000, or 16/1000 of 1 per cent of the authorized capital of all national banks on October 31, 1920.

CONSOLIDATION OF NATIONAL BANKS.

Under the provisions of the act of Congress, approved November 7, 1918, providing for the consolidation of national banking associations, 80 national banks have consolidated into 39 associations. During the last year 15 consolidations were effected, with capital of \$30,365,000, surplus \$35,248,000, and other undivided profits of

\$12,386,628, the number of banks concerned being 30, and their capital \$30,890,000. There was therefore a reduction as a result of these consolidations of \$525,000 in aggregate capital stock. The total assets of the 15 consolidated banks amounted at the date of consolidation to \$897,654,973.

In the following table the capital, surplus, undivided profits, and aggregate assets and date of consolidation of each of the 15 consolidated banks are shown:

NATIONAL BANKS CONSOLIDATED UNDER ACT OF NOV. 7, 1918, THEIR CAPITAL SURPLUS, UNDIVIDED PROFITS, AND AGGREGATE ASSETS, YEAR ENDED OCT 31, 1920.

GROWTH IN NUMBER AND CAPITAL OF NATIONAL BANKS.

Notwithstanding the liquidations and the consolidations which took place there was a net increase in the year ended October 31, 1920, of 257 in the number of national banking associations and a net increase of \$118,810,600 in capital. The authorized capital stock of the 8,157 national banks in existence at the close of the year was \$1,273,949,765.

From the inauguration of the national banking system in 1863 to October 31, 1920, national banking associations to the number of 11,864 were chartered, the capital stock at organization being \$1,200,213,482. The total loss to the system in the number of banks

during this period was 3,707, of which 3,150 were closed by voluntary liquidation or by consolidation with other national banks and 557 were liquidated through receivers.

NATIONAL BANKS ORGANIZED SINCE 1900.

The organization of banks with minimum capital of \$25,000, authorized by the act of March 14, 1900, has added to the system 4,158 banks, aggregate capital at time of organization, \$108,397,500. During this period there were also organized 2,442 national banks with individual capital of \$50,000 or more. Their capital at organization aggregated \$335,382,800. It is therefore seen that from March 14, 1900, to October 31, 1920, 6,600 national banking associations were chartered, with combined capital of \$443,780,300.

STATE BANKS CONVERTED OR REORGANIZED INTO NATIONAL BANKING ASSOCIATIONS SINCE 1900.

State banks to the number of 1,215 and with capital of \$98,237,800 were converted into national banking associations between March 14, 1900, and October 31, 1920. In addition there were 1,613 reorganizations of 1,647 State banks, trust companies, and private banks and 138 reorganizations of 165 national banks which had voluntarily liquidated for the purpose of reorganizing or the charters of which had expired by limitation.

The remaining 3,634 of the 6,600 banks chartered during this period were banks of primary organization.

The capital at date of charter of the converted State banks was \$98,237,800, of the reorganized State and private banks the capital was \$85,317,000, of the reorganized national banks \$45,750,000. The banks of primary organization were capitalized at \$214,475,500. Therefore, of the aggregate capital of \$443,780,300 of banks chartered since March 14, 1900, \$229,304,800 was the capital of converted or reorganized State, private, and national banks, and \$214,475,500 entirely new capital, or that resulting from primary organizations.

ORGANIZATION AND LIQUIDATION OF NATIONAL BANKS.

The statistical or report year of the Comptroller of the Currency terminates on October 31, and the following table contains a statistical annual history from 1863 to 1920, inclusive, of the number of banks organized each year, and their capital at date of organization, together with the number and capital of banks closed voluntarily or by reason of failure, together with the yearly net increase or decrease in the number of banks and original capital. In the table the increases and reductions of capital of existing banks are not taken into account. The table shows the aggregate capital at date of organization of the 11,864 national banking associations to have been \$1,200,213,482.

NUMBER AND AUTHORIZED CAPITAL OF NATIONAL BANKS ORGANIZED AND THE NUMBER AND CAPITAL OF BANKS CLOSED IN EACH YEAR ENDED OCT. 31, SINCE THE ESTABLISHMENT OF THE NATIONAL BANKING SYSTEM, WITH THE YEARLY INCREASE OR DECREASE.

Year.	Organized.		Closed.				Net yearly increase (exclusive of existing banks increasing their capital).		Net yearly decrease (exclusive of existing banks increasing their capital).	
			In voluntary liquidation, in- cluding those consolidated with national and other banks.		Insolvent.

EXPIRATIONS AND EXTENSIONS OF CHARTERS OF NATIONAL BANKS.

Charters are granted to national banks for a period of 20 years from the date of the execution of the organization certificate. In the year ended October 31 last 316 banks with capital of \$24,517,000 reached the termination of their existence, and their charters were extended for an additional period of 20 years under authority of the act of July 12, 1882. In the same year charters of 35 banks with capital of \$8,432,100, extended under the act of 1882, were extended for a further period of 20 years, under the act of April 12, 1902.

The total number of extensions of charters under the act of 1882 has been 3,817 and under the act of 1902, 1,353.

In the coming fiscal year the charters of 289 banks, with capital of \$20,846,500, will expire for the first time, and 62, with capital of \$10,642,900, for the second time. A list of banks concerned in the extensions during the report year ending October 31, 1921, will be found in volume 2 of the report of the Comptroller of the Currency.

4604	The Merchants National Bank of Eagle Grove, Iowa, to "First National Bank in Eagle Grove"	Oct. 26

CHANGES OF TITLE INCIDENT TO CONSOLIDATIONS OF NATIONAL BANKS.

In the consolidation of national banks under the act of November 7, 1918, a number of changes resulted in the corporate title of banks under the charter of which consolidations were effected.

In the following statement the titles of the banks consolidating and also the new titles of the consolidated banks are given:

Merchants National Bank of Muncie, Ind. (4852), and Union National Bank of Muncie, Ind. (2234), consolidated under the charter of the latter, with title: The Merchants National Bank of Muncie.

The National Bank of Commerce of Wichita, Kans. (5169), and The Kansas National Bank of Wichita, Kans. (2782), consolidated under the charter of the latter, with title: First National Bank in Wichita.

The Union National Bank & Trust Co. of Albany, N. Y. (11626), and The National Commercial Bank of Albany, N. Y. (1301), consolidated under the charter of the latter, with title: The National Commercial Bank & Trust Co. of Albany.

The Afton National Bank, Afton, N. Y. (11514), and The First National Bank of Afton, N. Y. (11513), consolidated under the charter of the latter, with title: First National Bank of Afton.

The National Bank of Commerce of Wichita Falls, Tex. (10547), and The City National Bank of Wichita Falls, Tex. (4248), consolidated under the charter of the latter, with title: The City National Bank of Commerce of Wichita Falls.

The Manufacturers National Bank of Newark, N. J. (2040), and The Merchants National Bank of Newark, N. J. (1818), consolidated under the charter of the latter, with title: The Merchants & Manufacturers National Bank of Newark.

The Farmers & Merchants National Bank of Lompoc, Calif. (11756), and The First National Bank of Lompoc, Calif. (10897), consolidated under the charter of the latter, with title: First National Bank of Lompoc.

FAILURES AND SUSPENSIONS OF NATIONAL BANKS.

Five national banks with aggregate capital of \$205,000 were placed in charge of receivers during the year ended October 31, 1920. The date that each bank was authorized to commence business, date of the appointment of the receiver, the capital stock, and the circulation outstanding at date of failure are shown in the following table:

Title and location of bank.	Charter No.	Date of authority to commence business.	Date of appointment of receiver.	Capital stock.	Circulation outstanding at date of failure.
First National Bank, Bluffton, Ohio.....	5626	Nov. 19, 1900	Nov. 17, 1919	\$50,000	\$46,700
First National Bank, Newman, Calif.	9760	May 25, 1910	Jan. 31, 1920	50,000	12,500
First National Bank, Judsonia, Ark.	10439	Sept. 2, 1913	June 29, 1920	30,000	28,200
First National Bank, Eureka, S. Dak.	11527	Nov. 28, 1919	Aug. 20, 1920	50,000
First National Bank, Fairfield, Idaho.	10162	Mar. 20, 1912	Aug. 26, 1920	25,000	5,850

On October 31, 1913, there were 45 national banks in charge of receivers, their affairs being in process of liquidation and settlement. At the close of the year ended October 31, 1920, there were only 30 national banks in receivers' charge.

The total amount of dividends in liquidation, paid between October 31, 1913, and October 31, 1920, to the depositors and other creditors of insolvent national banks was \$22,064,161.15. If there be added to this the liabilities of 12 banks restored to solvency during the same period, \$33,859,526, the sum total of these amounts would be \$55,923,687.15.

The receiverships of four national banks, which had failed in previous years, were finally closed during the year ended October 31, 1920. In three cases dividends of 100 per cent and interest were paid and in the other case a dividend of 85 per cent.

The first failure of a national bank took place in 1865; from that date until the close of business on October 31, 1920, the number of such banks placed in charge of receivers was 594. Of this number, however, 37 were subsequently restored to solvency and permitted to resume business. The total capital of these failed banks was \$96,250,920, while the book or nominal value of the assets administered by receivers under the supervision of this bureau aggregated \$405,761,489, and the total cash thus far realized from the liquidation of these assets has amounted to \$208,376,193. In addition to this amount, however, there has been realized from assessments of \$51,241,240 levied against stockholders the sum of \$24,780,026, making the total cash collections from all sources \$233,156,219, which have been disbursed as follows:

In dividends to creditors on claims proved, amounting to \$212,366,597 the sum of.....	\$164, 005, 490
In payment of loans and other disbursements discharging liabilities of the bank other than those of the general creditors.....	47, 276, 592
In payment of legal expenses incurred in the administration of such receiverships.....	6, 095, 882
In payments of receivers' salaries and other expenses of receiverships..	10, 676, 155
There has been returned to shareholders in cash.....	3, 789, 079
Leaving a balance with the Comptroller and the receivers of.....	1, 313, 021
Total.....	233, 156, 219

In addition to the funds thus distributed there had been returned up to the close of business on October 31, 1920, to agents for shareholders, to be liquidated for their benefit, assets having a nominal value of \$15,818,008.

The book or nominal value of the assets of the 30 national banks that are still in charge of receivers amounted to \$45,117,916. The receivers had realized from these assets at the close of business on October 31, 1920, the sum of \$25,364,935, and had collected from the shareholders on account of assessments levied against them to cover deficiencies in assets the further sum of \$1,967,295, making the total collections from all sources in the liquidation of current or active receiverships the sum of \$27,332,230, which amount has been disbursed as follows:

Total assets taken charge of by receivers.....	\$45, 117, 916
Dividends to creditors (to Sept. 30, 1920).....	19, 891, 418
Loans paid and other disbursements discharging liabilities of the bank other than those to the general creditors.....	4, 506, 239
Legal expenses.....	665, 412
Receivers' salaries.....	430, 502
All other expenses of administration.....	526, 911
Amount returned to shareholders in cash.....	28, 621
Leaving a balance with the Comptroller and the receivers of.....	1, 283, 127
Total.....	27, 332, 230

The collections from the assets of the 564 national banks, the affairs of which have been finally closed, amounted to \$183,011,258, and, together with the collections of \$22,812,731 from assessments levied against the shareholders, make a total of \$205,823,989, from which,

on claims proved aggregating \$186,819,017, dividends amounting to \$144,114,072 were paid.

The average rate of dividends paid on claims proved was 77.14 per cent, but, including offsets allowed, loans paid, and other disbursements with dividends, creditors received on an average 83.71 per cent. The expenses incident to the administration of these 564 trusts—that is, receivers' salaries and legal and other expenses—amounted to \$15,149,212, or 4.20 per cent of the nominal value of the assets and 7.36 per cent of the collections from assets and from shareholders. The outstanding circulation of these banks at the date of failure was \$28,613,029, which was secured by United States bonds on deposit in the Treasury of the face value of \$30,864,800. The assessments against shareholders averaged 51.30 per cent of their holdings, while the collections from the assessments levied were 48.40 per cent of the amount assessed. The total amount disbursed during the current year to the creditors of 16 of the insolvent banks in the 24 dividends declared was \$2,542,040.93.

In the table following is summarized the condition of all insolvent national banks, the closed and active receiverships being shown separately:

Items.	Closed receiverships, 564. ¹	Active receiverships, 30.	Total, 594.
Total assets taken charge of by receivers.....	\$360,643,573	\$45,117,916	\$405,761,489
Disposition of assets:			
Collected from assets.....	183,011,258	25,364,935	208,376,193
Offsets allowed and settled.....	32,546,322	4,236,711	36,783,033
Loss on assets compounded or sold under order of court....	125,063,209	4,674,917	129,738,126
Nominal value of assets returned to stockholders.....	15,818,008		15,818,008
Nominal value of remaining assets.....	4,204,776	10,841,353	15,046,129
Total.....	360,643,573	45,117,916	405,761,489
Collected from assets as above.....	183,011,258	25,364,935	208,376,193
Collected from assessment upon shareholders.....	22,812,731	1,967,295	24,780,026
Total collections.....	205,823,989	27,332,230	233,156,219
Disposition of collections:			
Loans paid and other disbursements.....	42,770,353	4,506,239	47,276,592
Dividends paid.....	144,114,072	19,891,418	164,005,490
Legal expenses.....	5,430,470	665,412	6,095,882
Receivers' salaries and other expenses.....	9,718,742	957,413	10,676,155
Amount returned to shareholders in cash.....	3,760,458	28,621	3,789,079
Balance with the comptroller or receivers.....	29,894	1,283,127	1,313,021
Total.....	205,823,989	27,332,230	233,156,219
Capital stock at date of failure.....	² 91,870,920	4,380,000	96,250,920
United States bonds held at failure to secure circulating notes..	30,864,800	3,565,000	34,429,800
Amount realized from sale of United States bonds held to secure circulating notes.....	32,716,165	3,518,443	36,234,608
Circulation outstanding at failure.....	28,613,029	3,522,220	32,135,249
Amount of assessment upon shareholders.....	47,134,290	4,106,950	51,241,240
Claims proved.....	186,819,017	25,547,580	212,366,597

¹ Includes 37 banks restored to solvency.

² Includes capital stock of 37 banks restored to solvency.

The affairs of four insolvent banks were closed during the year ended October 31, 1920, and in the accompanying table appears information relative to the capital, date of appointment of receiver, and per cent of dividends paid to creditors:

Closed receiverships, year ended Oct. 31, 1920.

Title.	Location.	Date receiver appointed.	Capital.	Per cent dividends paid to creditors.
First National Bank.....	Salmon, Idaho.....	Aug. 8, 1911	\$50,000	¹ 100
American National Bank.....	Fort Smith, Ark.....	Apr. 1, 1916	200,000	85
Williamstown National Bank.....	Williamstown, W. Va.....	Nov. 23, 1916	30,000	² 100
Citizens National Bank.....	Pineville, W. Va.....	July 16, 1917	50,000	² 100

¹ With 37.90 per cent of interest due.² With interest in full.

CAUSES OF NATIONAL BANK FAILURES.

Two hundred and twenty-eight, or over one-third, of the 594 failures of national banks were attributable to criminal acts. In 51 of the 228 instances defalcation of officers was the cause, in 128 fraudulent management, and in 49 the banks were wrecked by cashiers or subordinate officers. Unlawful loans—that is, loans in excess of the statutory limit—were the principal causes of 114 of the failures. In 62 of the 114 instances excessive loans were made to officers and directors and in 52 to others than officers and directors. Depreciation in the value of assets was the ascribed cause of 83 of the failures. Injudicious or careless banking was the cause of 139, or nearly one-fourth of the total number, and the remaining 30 failures were ascribed to insolvency of large debtors, “runs,” nonliquidity of assets, etc.

In the following table are shown the number and percentages of failures from principal causes since inauguration of national banking system.

Principal causes of failure of national banks in past 57 years.

Cause.	Number.	Percent.
Involving criminal actions.....	228	38.4
Defalcation of officers.....	51	
Fraudulent management.....	128	
Wrecked by cashier.....	46	
Wrecked by defalcation bookkeeper.....	1	
Wrecked by assistant cashier.....	2	
Involving unlawful acts.....	114	19.2
Excessive loans to officers.....	62	
Excessive loans to others.....	52	
Depreciation of assets.....	83	14.0
Securities.....	19	
Real estate.....	14	
General stringency money market.....	50	
Failure of large debtors.....	12	2.0
Injudicious banking.....	139	23.4
Closed by run or in anticipation.....	9	1.5
No record of cause.....	9	1.5
Total.....	594	100.0

NATIONAL BANK FAILURES SINCE INAUGURATION OF THE SYSTEM.

The following table shows the number of national bank failures for each fiscal year ending October 31 since the inauguration of the national banking system in 1863. It also shows the total capital of the banks that failed during each fiscal year, and also the total resources of all the national banks of the country at the time of the June call in each year.

The column on the right shows the percentage of the capital stock of the failed national banks to the total capital of all national banks, as reported at the time of the June call each year during the period between 1864 and 1920.

An examination of this table shows that the largest number of national bank failures took place in the year 1893, when there were 65 such failures.

The only fiscal years in which there were no failures were the years 1870, 1871, and 1881, but in 1870 and 1871 the resources of all national banks were only about 7 per cent of what they are now and in 1881 their resources were about *one-tenth* of their present resources.

In the fiscal year ended October 31, 1919, there was only one national bank failure; but this bank paid its creditors 100 cents on the dollar before the close of the fiscal year, and there was therefore not a dollar's loss to any national bank depositor in that year.

In the fiscal year 1893, the capital of the national banks which failed amounted to \$10,910,000. This was the largest reported for any year, and was equal to 1.591 per cent of the total resources of all national banks at that time.

The percentage of capital of failed national banks to the total capital of all national banks for the fiscal year 1920 was only 0.017 per cent—seventeen one-thousandths of 1 per cent. This means that the percentage of the capital of the failed banks to the total capital of all national banks in operation in 1893 was more than ninety times as great as the percentage of the capital of the failed banks to the total capital of all national banks for the fiscal year ended October 31, 1920.

The average percentage of the capital of failed national banks to the average capital of all national banks for the past 57 years, since the beginning of the national banking system in 1863 to the present time, has been two hundred and fifty-two thousandths of 1 per cent (0.252). As the percentage for the past fiscal year was only 0.017 per cent, or seventeen one-thousandths of 1 per cent, we find that the average percentage of capital of failed national banks to the total capital of all national banks during the 56 years prior to 1920 was about fifteen times more than the percentage for the fiscal year which has just closed.

NATIONAL BANK FAILURES, BY YEARS, 1864 TO 1920, SHOWING, EACH YEAR, NUMBER OF FAILURES, CAPITAL OF FAILED BANKS, CAPITAL AND TOTAL RESOURCES OF ALL NATIONAL BANKS, AND PERCENTAGE OF CAPITAL OF FAILED BANKS EACH YEAR, TO TOTAL CAPITAL OF ALL NATIONAL BANKS.

Year ended Oct. 31—	Failed banks.		Total resources all national banks on or about June 30.	Capital stock of all national banks on or about June 30.	Percentage of capital stock of failed national banks to capi- tal of all national banks.
	Number of failures.	Total capital stock.			
1864.....			\$252,273,804	\$75,213,945	
1865.....	1	\$50,000	1,126,455,482	325,834,558	0.015

BANK INVESTMENTS IN UNITED STATES GOVERNMENT SECURITIES.

In June, 1920, United States securities to the amount of \$3,680,-294,000 were owned by national banks, Federal reserve banks, and State banks, the amount owned by each class of banks being as follows: National banks, \$2,269,575,000; Federal reserve banks, \$336,240,000, and State banks \$1,074,479,000. At the same time the national banks held as security for loans \$885,772,000 and Federal reserve banks \$1,294,892,000 of these securities. Hence the total amount owned and loaned on was \$5,860,000,000, or nearly one-fourth of the interest-bearing debt of the Government.

UNITED STATES BONDS ELIGIBLE AS SECURITY FOR NATIONAL BANK CIRCULATION.

In 1913 United States bonds eligible as security for national bank circulation amounted to \$913,317,490, but under authority of the Federal reserve act of December 23 of that year 2 per cent gold bonds to the amount of \$56,256,500 were converted into \$28,894,500 3 per cent 30-year bonds and \$27,362,000 3 per cent 1-year Treasury notes, both without the circulation privilege. In this period 3 per cent circulation bonds of 1908-1918 to the amount of \$63,945,460 became due and were called for redemption, thus reducing the amount of bonds eligible as security for circulation by \$120,201,960.

United States bonds now outstanding and eligible as security for national bank circulation amount to \$793,115,530, consisting of \$599,724,050 consols of 1930, \$118,489,900 4 per cents of 1925, and \$74,901,580 Panama Canal 2 per cents.

On October 31, 1920, the Treasurer of the United States held in trust as security for national bank circulation \$712,066,500 of these bonds, of which \$570,372,500 were consols of 1930, \$68,578,000 4 per cents of 1925, and \$73,116,000 Panama 2 per cents. On the date named the circulation outstanding secured by United States bonds amounted to \$704,732,185. The difference between this amount and the sum of the bonds held as security for circulation is accounted for by the fact that some additional currency is due to the banks, and certain bonds are held by the Treasurer on account of banks which have gone into liquidation, lawful money not having been deposited to retire the circulation, and the bonds consequently not having been withdrawn.

In addition to the bonds on deposit to secure national bank circulation the Treasurer holds bonds of these issues to the amount of \$17,150,200 as security for Federal reserve bank notes and \$2,634,700 to secure public deposits. The total amount of these bonds held by the Treasurer for the purposes here indicated is \$731,851,400. There are, therefore, \$61,264,130 additional of the outstanding Government issues that might be acquired and deposited as security for national bank circulation.

In the last year the office transactions in bonds available for circulation totaled \$44,762,040, of which \$14,258,800 were withdrawals and \$30,503,240 deposits as security for circulation. With these changes there has been a net increase between October 31, 1919, and October 31, 1920, of \$16,244,440 in the amount of bonds deposited as security for national bank circulation.

The transactions monthly from November, 1919, to October 31, 1920, are shown in the following table:

United States bonds deposited as security for circulation by banks chartered and by those increasing their circulation, together with the amount withdrawn by banks reducing their circulation and by those closed, during each month, year ended Oct. 31, 1920.

Date.	Bonds deposited by all banks chartered and those increasing circulation during the year.	Bonds withdrawn by banks reducing circulation.	Bonds withdrawn by banks in liquidation.	Bonds withdrawn by banks in insolvency.

¹ Includes \$3,115,000 deposited by banks chartered during the year.

PROFIT ON NATIONAL BANK CIRCULATION.

The profit on national-bank circulation is measured by the difference between the amount of interest received on the bonds deposited and on the currency received and loaned, and the expenses incident to issuing the notes; that is, the tax, cost of redemption, and the sinking fund to provide for premium paid for the bonds bought above par.

Consols of 1930 were not quoted in the last report year (Nov. 1, 1919, to Oct. 31, 1920) until March, 1920, the average net price then being 101. In June the price was 100.750, in October 101.125.

Panama Canal 2 per cents in November, 1919, were quoted at 99.125. These bonds were not again quoted until June, 1920, when they were held at 100.750. In October these bonds were at par.

During the past 12 months the 4 per cents of 1925 ranged from a maximum of 106.276 in March to a minimum of 104.750 in June, closing in October last at 105.717.

In Volume 2 of the report of the Comptroller of the Currency appears in detail the computation of the actuary of the Treasury of the profit on circulation in amounts and per cents per \$100,000, based upon the average monthly net prices of each of these three classes of bonds from November, 1919, to October, 1920.

REDEMPTION OF NATIONAL BANK NOTES.

In the 12 months ended October 31, 1920, national-bank notes to the amount of \$443,238,758 were received for redemption at the National Bank Redemption Agency, Treasury Department. This amount included \$19,303,400 notes in good condition for further circulation which after redemption were returned to the banks of issue. Under the law the expense of the redemption of circulation is charged

to and paid by the banks annually. In the year ended June 30, 1920, the expense of the redemption of national-bank notes averaged \$0.93 per \$1,000 redeemed.

In addition to national-bank notes there was received at the Treasury for redemption during the year \$213,001,110 Federal reserve bank notes and \$284,999,477 Federal reserve notes, or total receipts of \$941,239,345. The total cost of redemption of these notes was \$974,053.11; the average cost per \$1,000 for the three classes of issues being \$0.83. The cost per \$1,000 of Federal reserve bank notes was \$1.15, and for Federal reserve notes \$0.40.

In the following statements are shown, first, the monthly receipt for redemption of each and all classes of bank currency, and, second, the principal sources of receipt. It is explained that the difference of \$20,912,950 between the totals of the two statements is due to the fact that that amount was on hand and not reported as a cash receipt prior to November 1, 1920.

In addition to the receipts accounted for in the following monthly statement the National Bank Redemption Agency advises that there was received during the year direct from Federal reserve banks and branches canceled Federal reserve notes amounting to \$1,722,882,472 which were not "counted into cash" and therefore not included in the statement of receipts.

Bank currency received for redemption, by months, from Nov. 1, 1919, to Oct. 31, 1920.

DENOMINATIONS OF NATIONAL-BANK CIRCULATION.

At this time the issues of national-bank currency are confined to notes of the denominations of \$5, \$10, \$20, \$50, and \$100, and while issues of 1's, 2's, 500's, and 1,000's are authorized, designs for plates of the 1's and 2's have not been prepared and no orders received nor plates prepared for notes of the two highest denominations mentioned. The 1's and 2's outstanding are those issued under the act of 1864, and prior to 1879, their further issue under those acts being prohibited by the resumption of specie-payments act.

In the following table the amounts of each denomination of national bank circulation outstanding at the close of business on October 31, 1920, are shown:

National-bank notes outstanding Oct. 31, 1920.

Denomination.	Amount.	Denomination.	Amount.
One dollar.....	\$341,906	One thousand dollars.....	\$21,000
Two dollars.....	163,288	Fractional parts.....	59,800

Fifty dollars.....	29,862,000		
One hundred dollars.....	30,542,700		
Five hundred dollars.....	87,500		

¹ Notes redeemed but not assorted by denominations.

VAULT ACCOUNT OF NATIONAL-BANK CIRCULATION.

At the close of the year October 31, 1919, national bank circulation to the amount of \$297,145,200 was held in the vaults of this office. During the year ended October 31, 1920, there was received from the Bureau of Engraving and Printing \$488,720,800, making the total to be accounted for \$785,866,000. During the past year there were issued to national banks on account of redemptions and to banks chartered and to those increasing their circulation, notes amounting to \$456,046,770, and there was withdrawn from the vaults on account of liquidations and expirations of charters \$5,456,670, making total issues and withdrawals of \$461,503,440.

On October 31, 1920, the amount of currency in the vaults was therefore \$324,362,560 or \$27,217,360 more than on the corresponding date in 1919.

INVESTMENT VALUE OF UNITED STATES BONDS.

Based upon the average price flat for the quarters ended January, April, July, and October, 1920, the rates of interest realized by investors in various classes of United States bonds, have ranged as follows: Consols of 1930, 1.918 to 1.945; 2 per cent Panama Canal bonds, 1.916 to 2; 4 per cents of 1925, 2.589 to 2.708; 3 per cent Panama bonds, 3.548 to 3.709; and 3½ per cent Liberty bonds, 3.544 to 4.049 per cent. The prices and rates realized on each class of bonds, quarterly, are shown in the table appearing in volume 2 of the report of the Comptroller of the Currency.

UNITED STATES BOND MARKET QUOTATIONS.

The Actuary of the Treasury has compiled for publication in volume 2 of this report a statement relating to the range, monthly, November, 1919, to October, 1920, of prices in New York for registered 4 per cents of 1925, Consols of 1930, Panama 2 per cents, 1916-1936, Panama 3 per cents of 1961, coupon 4 per cents of 1925, 2 per cents of 1930, and 3½ per cent Liberty bonds.

FEDERAL RESERVE NOTES.

In the weekly statements issued by the Federal Reserve Board, in addition to showing in detail the assets and liabilities of the Federal reserve banks, and the volume of Federal reserve notes issued, the amount of notes secured by gold and the amount secured by commercial and other eligible paper are reported.

The volume of Federal reserve notes outstanding, having passed the \$3,000,000,000 mark early in November, 1919, steadily increased

up to the end of the year. During the month of January, 1920, there was a falling off of about \$60,000,000, followed by a comparatively steady increase up to October 29, 1920, when the figures reached a high point of \$3,666,170,000.

Federal reserve notes.—Weekly statement of Federal reserve notes outstanding (amount issued by Federal reserve agents to the banks, less “unfit” notes returned for redemption), amount secured by gold, and amount secured by commercial and other eligible paper, from Dec. 5, 1919, to Nov. 26, 1920.

[In thousands of dollars.]

28	3,359,493	1,112,040	2,247,453				

A gradual increase during the year is noted in the proportionate amount of notes secured by commercial and other eligible paper, there being \$1,910,928,000, or about 62 per cent of the total outstanding, thus secured on November 28, 1919, whereas the amounts so secured had increased to \$2,455,600,000, or more than 67 per cent of the total, on November 26, 1920.

Up to October 31, 1920, Federal reserve notes to the amount of \$8,914,980,000 were printed, \$8,142,400,000 of which were shipped or delivered to, or upon the order of, the Federal reserve agents, and \$772,580,000 held in the reserve vault available for shipment as required.

During the year ended October 31, 1920, Federal reserve notes to the amount of \$1,703,397,500 were returned to the Comptroller's bureau for destruction as “unfit for circulation,” making, with prior returns, a total of \$3,697,643,815 mutilated notes returned for redemption and destruction to October 31, 1920.

Detailed information relative to issues and redemptions of Federal reserve notes, by banks and denominations, is given in the following tables:

Statement of Federal reserve notes, by denominations, printed, shipped to Federal reserve agents and United States subtreasuries, since inauguration of Federal Reserve System, and on hand in reserve vault Oct. 31, 1920.

NOTE.—During the year burned, badly mutilated, and fractional parts of Federal reserve notes amounting to \$33,570 have been identified, valued, and the bank of issue determined.

FEDERAL RESERVE BANK NOTES.

In addition to Federal reserve notes, the Federal reserve banks may issue "Federal reserve bank notes." This currency is issued under the same terms and conditions as national-bank notes except that its volume is not limited to the amount of capital stock of the issuing bank.

The notes issued to the banks are secured by deposits of United States Government bonds bearing the circulation privilege, acquired in the open market or taken over from national banks desiring to reduce their circulation, or secured by United States certificates of indebtedness as authorized by the act of April 23, 1918.

ISSUE OF \$1 AND \$2 FEDERAL RESERVE BANK NOTES.

Under the provisions of "An act to conserve the gold supply of the United States," etc., approved April 23, 1918, and commonly known as the "Pittman Act," the Secretary of the Treasury was authorized to withdraw silver certificates from circulation and to melt or break up and sell as bullion not more than 350,000,000 standard silver dollars held as security therefor. Under authority of this act about 260,000,-000 silver dollars were melted and sold to December 31, 1919.

In order to prevent contraction of the currency Federal reserve banks were authorized to issue Federal reserve bank notes (including denominations of \$1 and \$2) upon the deposit as security with the Treasurer of the United States of United States certificates of indebtedness or one-year gold notes.

Issues to Federal reserve banks of Federal reserve bank notes, amounts printed, redeemed, and outstanding, by denominations, up to and including October 31, 1920, are shown in the following tables:

Statement showing the total amount of Federal reserve bank notes, by denominations, issued to Federal reserve banks upon the deposit of securities under the provisions of the act of Apr. 23, 1918.

Bank.	Ones.	Twos.	Fives.	Tens.	Total.

DISCOUNT RATES OF FEDERAL RESERVE BANKS.

Discount rates for each of the 12 Federal reserve banks approved by the Federal Reserve Board up to November 26, 1920, are shown in the following table:

Discount rates approved by the Federal Reserve Board up to Nov. 26, 1920.

Federal reserve bank.	Paper maturing within 90 days.				Bankers' acceptances maturing within 3 months.	Agricultural and live-stock paper maturing after 90 but within 180 days.
	Secured by—		Trade acceptances.	All other.		
	Treasury certificates of indebtedness.	Liberty bonds and Victory notes.				
Boston.....	5½	6	7	7	6	7
New York.....	5½	6	7	7	6	7
Philadelphia.....	1 6	5½	6	6	5½	6
Cleveland.....	1 6	5½	5¾	6	5¾	6
Richmond.....	1 6	6	6	6	6	6
Atlanta.....	1 6	5½	7	7	6	7
Chicago.....	1 6	6	7	7	6	7
St. Louis.....	2 5½	5½	6	6	5½	6
Minneapolis.....	5½	6	6½	7	6	7
Kansas City.....	1 6	6	6	6	5½	6
Dallas.....	1 6	5½	6	6	5½	6
San Francisco.....	1 6	6	6	6	6	6

¹ Discount rate corresponds to interest rate borne by certificates pledged as collateral, with minimum of 5 per cent in the case of Philadelphia, Atlanta, Kansas City, and Dallas, and 5½ per cent in the case of Cleveland, Richmond, Chicago, and San Francisco.

² 5½ per cent on paper secured by 5½ per cent certificates and 5 per cent on paper secured by 4½ and 5 per cent certificates.

NOTE.—Rates shown for St. Louis, Kansas City, and Dallas are normal rates, applying to discounts not in excess of basic lines fixed for each member bank by the Federal reserve bank. Rates on discounts in excess of the basic line are subject to a ¼ per cent progressive increase for each 25 per cent by which the amount of accommodation extended exceeds the basic line.

RATES FOR MONEY IN NEW YORK.

Call loans on the New York Stock Exchange as reported by the Commercial and Financial Chronicle ranged from 2 to 30 per cent in November, 1919; 5½ to 25 per cent in December; 6 to 20 and 6 to 25 per cent in January and February, 1920; 6 to 15 per cent in March and April; 6 to 12 per cent in May, and 6 to 15 per cent in June. July, 7 to 11 per cent; August, 6 to 10 per cent; September 6 to 9 per cent; and in October the range was from 6 to 10 per cent.

Time loans in November and December, 1919, ranged from 6 to 7 per cent, rose to 7 to 8 per cent in January, and to 8 to 8½ per cent in February, and continued at the latter range until July, when the rate for that month and August was 8 to 8¼ per cent. In October the range was 7¾ to 8 per cent.

Choice double name commercial paper was held at 5½ to 6 per cent in November, 5½ to 6 per cent in December, 6 in January, increasing fractionally by months to July, when the range was 7¾ to 8 per cent. The rate was 8 in August, 7¾ to 8 per cent in September, and 8 in October.

Prime single name paper rates conformed to the rates for double name paper during the entire period, and good single name paper was only fractionally higher than prime.

The range monthly for each class of paper during the year ended October 31, 1920, is shown in the following table:

Range of rates for money in the New York market, year ended Oct. 31, 1920.

1 Percentage based on all issues of United States Government securities.

RESERVE.

The reserve held by national banks with Federal reserve banks as of the date of each call during the report year, commencing with the call of November 17, 1919, classified by central reserve cities, *other* reserve cities, and *country* banks, and the total reserve held by all national banks in the United States, including nonmember banks in Alaska and Hawaii, is shown in the following table. The percentage of reserve held and the amount of reserve in excess of the required amount is also given.

Section 19 of the Federal reserve act requires national banks, in central reserve and reserve cities and banks outside of central reserve or reserve cities, commonly referred to as *country* banks, to maintain a reserve against *demand* deposits, with the Federal reserve bank of the district in which the bank is established, of 13 per cent in central

reserve city banks, 10 per cent in reserve city banks, and 7 per cent in country banks and a reserve against *time* deposits, regardless of the situation of the bank, of 3 per cent.

By reference to the following table it will be seen that the aggregates of the reserves held by national banks in the central reserve and other reserve cities, and by country national banks, were all, with but one exception, in which a deficiency of \$1,976,000 on June 30, 1920, was reported by *other* reserve city banks, in excess of the legal requirements at the date of each call during the year.

[In thousands of dollars.]

Date of call.	Amount of reserve held.	Per cent of reserve held.	Amount of excess reserve.	Date of call.	Amount of reserve held.	Per cent of reserve held.	Amount of excess reserve.

¹ Deficit.

CLASSIFICATION OF LOANS MADE AND DEPOSITS IN NATIONAL BANKS AS OF JANUARY 31, 1920, IN RESERVE CITIES AND CITIES OF 50,000 OR MORE POPULATION.

The classification of *loans* and *deposit balances*, of 595 national banks in reserve and other cities, having a population of over 50,000, indicating the amount which national banks in each city have loaned and the amount on deposit with these banks to the credit of other national and State banks, in each geographical section, are shown in the following table.

The total amount of loans to banks and to individuals who keep deposits with the banks, and the direct loans to individuals and others who keep no deposit accounts with the banks, are also shown:

Classification of loans (including paper bought) made by 595 national banks in the cities indicated, as of Jan. 31, 1920, showing separately loans made to banks and bankers, loans made to borrowers who keep deposit accounts with the lending banks, loans made to those who keep no deposit accounts, and loans placed for account of correspondents.

[In thousands of dollars.]

City.	Num- ber of banks.	Direct and indirect loans made to banks.	Redis- counts, made to banks.	Bills re- ceivable purchased from or discounted for banks.	Direct loans to individ- uals, etc., who keep deposit. no deposit.	Direct loans to individ- uals, etc., who keep no deposit. to resell.	Securities, etc., pur- chased from banks with agreement to resell.	Other loans.	Total loans and discounts.	Loans placed for account of corre- spondents.		
										Placed for national banks in reserve or central reserve cities.	Placed for national banks out- side of reserve and central reserve cities.	Placed for correspond- ent state banks and trust com- panies.

* Includes central reserve and other reserve city banks in Chicago.

GROWTH OF NATIONAL BANKS SINCE PASSAGE OF THE FEDERAL RESERVE ACT, IN RESERVE CITIES AND ELSEWHERE IN THE COUNTRY.

The principal items of the assets and liabilities of national banks as of the date of each call, during the fall of each year, commencing with October 31, 1913, are shown in the following summary.

On account of the reduction in the proportion of lawful reserve required, by the Federal reserve act, to be held by national banks, the total cash reported as of September 8, 1920, was \$469,862,000 less than the amount held October 31, 1913.

Material increases are noted in the combined surplus and profits, which amounted to \$1,599,679,000 on September 8, 1920, as compared with \$1,007,578,000 on October 31, 1913. In this period capital stock increased from \$1,059,403,000 to \$1,248,271,000.

The total deposits, which amounted to \$16,751,956,000 on September 8, 1920, show an increase of over 100 per cent during this period. Loans and discounts, including overdrafts and rediscounts, which amounted to \$6,288,338,000 on October 31, 1913, increased to \$13,723,611,000 on September 8, 1920. Of this latter amount, \$1,148,538,000 represented rediscounts with Federal reserve banks.

Principal items of assets and liabilities of national banks, 1913-1920.

DOMESTIC BRANCHES OF NATIONAL BANKS.

Under the national-bank act it is lawful for any bank or banking association organized under State laws, and having branches, the capital being joint and assigned to the parent bank and branches in definite proportions, to become with the approval of the Comptroller of the Currency, a national banking association and to retain and keep in operation such branches.

Under no other circumstances may national banks operate branches, except under the consolidation act of November 7, 1918, where a State bank, having branches, is converted into a national banking association and subsequently is consolidated with another national bank, the latter may continue to operate the branches of the bank which it has absorbed, as it is provided in the consolidation act that "all rights, franchises, etc., of the bank so consolidated shall be deemed to be transferred to and vested in such consolidated bank, and the latter shall hold and enjoy the same and all rights of property, franchises, etc., in the same manner and to the same extent as was held and enjoyed by the national bank so consolidated therewith."

The following banks were formerly State banks and converted into national banking associations, the operations of their branches being continued:

Alabama:

Albertville National Bank; capital, \$100,000.

Branch at Arab, Ala.; capital, \$25,000.

California:

First National Bank of Bakersfield; capital, \$400,000.

Branch at Taft; capital, \$50,000.

Branch at Wasco; capital, \$25,000.

Branch at Maricopa; capital, \$25,000.

Branch of California National Association, San Francisco; capital, \$8,500,000.

Branch at Portland, Oreg.; capital, \$300,000.

Branch at Seattle, Wash.; capital, \$200,000.

Branch at Tacoma, Wash.; capital, \$200,000.

Louisiana:

Calcasieu National Bank of Southwestern Louisiana, Lake Charles; capital, \$750,000.

Branch at De Quincy; capital, \$21,000.

Branch at Jennings; capital, \$105,000.

Branch at Kinder; capital, \$30,000.

Branch at Lake Arthur; capital, \$33,000.

Branch at Oakdale; capital, \$60,000.

Branch at Sulphur; capital, \$21,000.

Branch at Vinton; capital, \$45,000.

Branch at Welch; capital, \$60,000.

Michigan:

City National Bank of Battle Creek; capital, \$250,000.

Branch in Battle Creek; capital, \$25,000.

National Union Bank of Jackson; capital, \$400,000.

Branch in Jackson; capital, \$100,000.

Mississippi:

Pascagoula National Bank of Moss Point; capital, \$75,000.

Branch at Pascagoula; capital, \$25,000.

New York:

Chatham & Phoenix National Bank of New York; capital, \$7,000,000.

Twelve branches in the city of New York, with capital of \$100,000 assigned to each.

Public National Bank of New York; capital, \$2,000,000.

Five branches in the city of New York, with \$100,000 capital assigned to each.

North Carolina:

American Exchange National Bank, of Greensboro; capital, \$400,000.

Branch at South Greensboro; capital, \$50,000.

Oregon:

First National Bank of Milton; capital, \$50,000.

Branch at Freewater; capital, \$10,000.

Washington:

Union National Bank of Seattle; capital, \$600,000.

Branch at Ballard; capital, \$50,000.

Branch at Georgetown; capital, \$50,000.

Under the consolidation act of November 7, 1918, converted State banks having branches were consolidated with the following banks and the branches continued:

New York:

National Commercial Bank & Trust Co. of Albany; capital, \$1,250,000.

Branch in Albany; capital, \$100,000.

Irving National Bank, New York; capital, \$12,500,000.

Eight branches in the city of New York, with capital of \$100,000 assigned to each.

Mechanics & Metals National Bank, New York; capital, \$10,000,000.

Nine branches in the city of New York, to which is assigned \$50,000 capital each to seven, and \$100,000 each to two of the branches.

Virginia:

First National Bank of Abingdon; capital, \$200,000.

Branch at Abingdon; capital, \$25,000.

FOREIGN BRANCHES OF NATIONAL BANKS.

Only two national banks have branches in foreign countries—the First National Bank of Boston and the National City Bank of New York—the establishment of which was authorized by the Federal Reserve Board under authority of section 25 of the Federal reserve act.

The locations of the branches of each of these two banks are as follows:

The First National Bank of Boston:

Argentina.—Buenos Aires.

The National City Bank of New York:

Argentina.—Buenos Aires; Once, subbranch; Rosario.

Brazil.—Bahia, Pernambuco, Porto Alegre, Rio de Janeiro, Santos, São Paulo.

Chile.—Santiago, Valparaiso.

Colombia.—Barranquilla, Bogota, Medellin.

Cuba.—Artemisa, Bayamo, Caibarien, Camaguey, Cardenas, Ciego de Avila, Cienfuegos, Colon, Cruces, Cuatro Caminos, and Galiano, subbranches; Guantanamo, Habana, Manzanillo, Matanzas, Nuevitas, Pinar del Rio, Placetas del Norte, Remedios, Sagua la Grande, Sancti Spiritus, Santa Clara, Santiago, Union De Reyes, Yaguajay.

Italy.—Genoa.

Peru.—Lima.

Porto Rico.—San Juan, Ponce.

Siberia.—Vladivostok.

South Africa.—Cape Town.

Spain.—Barcelona, Madrid, Trinidad (Port of Spain).

Uruguay.—Montevideo, Calle Rondeau, subbranch.

Venezuela.—Caracas, Ciudad Bolivar, Maracaibo.

Russia.—Moscow, Petrograd (temporarily closed).

In the following table the principal items of assets and liabilities of foreign branches of the National City Bank of New York and the First National Bank of Boston are shown as of June 30, 1920:

Condition of the foreign branches of the National City Bank, New York, N. Y., and First National Bank, Boston, Mass., on June 30, 1920.

BANKS OTHER THAN NATIONAL.

STATE BANKS, SAVINGS BANKS, PRIVATE BANKS, AND LOAN AND TRUST COMPANIES.

With the exception of a few private banks in States where such banks are not under the supervision of the banking departments, returns have been received through the courtesy of the officials of State banking departments throughout the United States and are herewith presented. The combined statements of State banks, savings banks, private banks, and loan and trust companies, to the number of 22,109, as of June 30, 1920 (or the dates nearest thereto), indicate an increase in the number of such banks, including scattered returns from private banks not under State supervision, of 771 banks over the number which reported on June 30, 1919.

The aggregate resources of these banks on June 30, 1920, amounted to \$29,667,855,000, an increase during the year of 12.46 per cent, or \$3,287,355,000.

The combined capital and surplus June 30, 1920, was \$2,902,435,000, while the capital and surplus on June 30, 1919, amounted to \$2,628,530,000.

The assets and liabilities of these 22,109 banks on June 30, 1920, were reported as follows:

¹ Including overdrafts.

² Postal savings deposits not included.

STATE BANKS.

Of State banks doing a commercial business returns were received from the State banking departments of the several States showing their condition on or about June 30, 1920, to the number of 18,195.

The aggregate assets of these banks amounted to \$14,009,781,000, and the combined capital paid in \$920,211,000.

Because the banking departments of some States do not compile returns received from the State banking institutions, separately by classes of banks, and have therefore been unable to supply this information, it has been necessary to include in the report of the Comptroller of the Currency with the returns from State commercial banks information with reference to certain other classes of banks, principally so-called savings banks and trust companies.

Of the aggregate assets of these State banks, \$8,875,085,000 were invested in loans and discounts, classified as follows:

Secured by farm lands.....	\$12,455,000
Secured by other real estate (including mortgages owned).....	463,348,000
Secured by collateral other than real estate.....	1,247,649,000
Not classified.....	7,151,633,000
Overdrafts amounted to \$88,325,000.	

Of the total investments amounting to \$2,226,916,000, \$413,278,000 were invested in United States bonds and other United States securities. State, county, and other municipal bonds were reported at \$78,252,000. Separately classified railroad bonds and bonds of other public service corporations (including street and interurban railway bonds) amounted to \$52,257,000, and investments not classified were \$1,683,129,000.

Banking houses, including furniture and fixtures, represent an investment of \$262,042,000, while other real estate owned amounted to \$42,961,000.

The amount due these banks from other banks was \$1,549,571,000. Checks and other cash items were reported at \$275,311,000, and exchanges for clearing house aggregated \$57,536,000.

The total cash in the vaults of State banks amounted to \$393,935,000, of which approximately \$8,000,000 was in gold coin and gold certificates, and \$18,000,000 in silver coin and silver certificates. The remainder consisted principally of legal-tender notes and cash not classified.

Resources not classified amounted to \$238,099,000.

The capital stock paid in was \$920,211,000, or an average of approximately \$50,500 per bank. Surplus was \$527,019,000 and undivided profits \$222,599,000.

The total deposits, other than bank deposits, which amounted to \$436,644,000, aggregating \$10,892,866,000, were distributed as follows:

Individual deposits subject to check without notice.....	\$3,408,130,000
Demand certificates of deposit.....	648,009,000
Certified checks and cashiers' checks.....	56,678,000
Savings deposits, or deposits in interest or savings department.....	2,118,558,000
Time certificates of deposit.....	1,317,716,000
Dividends unpaid.....	9,126,000
Postal savings deposits.....	10,705,000
Deposits not classified.....	3,323,944,000

Notes and bills rediscounted were \$136,365,000; bills payable, including certificates of deposit representing money borrowed, totaled \$549,608,000; and liabilities not specifically characterized amounted to \$324,469,000.

COMPARISON OF CONDITION OF MUTUAL SAVINGS BANKS IN THE UNITED STATES IN JUNE, 1919 AND 1920.

In June, 1920, there were 620 mutual savings banks reported in operation in the United States, all of which, except 24, are located in the New England and Eastern States. The aggregate assets of institutions of this class were \$5,619,017,000, of which those of the New England and Eastern States amounted to \$5,451,130,000, or 97 per cent of the total. The business of these banks, as measured by the volume of their assets, increased net, since June, 1919, \$447,466,000, or approximately 9 per cent.

Loans increased some \$255,000,000 and investments in bonds, etc., about \$225,000,000. In the same time, individual deposits increased \$435,732,000 to \$5,186,845,000, and in the same period the surplus and profits were increased \$24,088,000 to \$422,521,000, a margin of protection to depositors of about 8 per cent as reported by the excess of the assets over liabilities.

The investments of the mutual savings banks amounted to \$2,716,282,000, and were classified as follows: United States bonds, \$369,592,000; State, county, and municipal bonds, \$186,186,000; railroad bonds, \$531,107,000; bonds of other public service corporations (including street and interurban railway bonds), \$104,757,000, and miscellaneous stocks and bonds reported amounted to \$1,524,640,000.

Deposit accounts in these banks numbered 9,445,327, and the average rate of interest received or credited on these accounts was approximately 4 per cent. The average deposit balance was \$549.14, as against \$530.92 in 1919.

Evidence of the general patronage of these mutual savings banks, notably in the Northeastern and Eastern States, is shown in the number of depositors and in the volume of the average deposit accounts. In these two geographical divisions are located nearly one-third (roundly 32,000,000) of the population of continental United States, and it appears that one person in less than four has a savings account, with an average credit of over \$550.

The number of mutual savings banks, the number of depositors, total deposits, and the average amount due each depositor from 1909 to 1920 are shown in the following statement:

Year.	Banks.	Depositors.	Deposits.	Average to each depositor.
1909.....	642	7,204,579	\$3,144,584,874	\$435.66
1910.....	638	7,481,649	3,360,563,842	449.17
1911.....	635	7,690,973	3,460,575,072	449.95
1912.....	630	7,851,377	3,608,657,828	459.62
1913.....	623	8,101,238	3,769,555,330	465.31
1914.....	634	8,277,359	3,915,626,190	473.05
1915.....	630	8,307,787	3,950,666,362	475.53

¹ In thousands of dollars. ² Generally. ³ Approximately. ⁴ Includes 1 stock savings bank. ⁵ Estimated.

STOCK SAVINGS BANKS.

Statistics with reference to so-called stock savings banks submitted for the current year are incomplete, on account of the fact that such banks are regarded as commercial banks in a number of the States, and the returns have therefore been included in the summaries furnished the comptroller's office relative to State banks.

The number of such banks June 30, 1920, shown by the returns from seven States and in the District of Columbia were 1,087, compared with 1,097 in 1919, and the aggregate assets were \$1,506,413,000, or \$225,159,000 more than the assets reported on June 30, 1919.

Returns from stock savings banks in the following States were included with State bank returns: Maryland, Georgia, Mississippi, Louisiana, Michigan, Minnesota, North Dakota, Nebraska, and Kansas, and one bank in New Jersey was reported with mutual savings banks. The number of banks and the number of depositors is thus materially reduced in this compilation. The individual deposits in these banks, however, increased in the year ended June 30, 1920, from \$1,151,464,000 to \$1,349,625,000, and the average amount to the credit of each depositor rose from \$463 to \$680. The prevailing rates of interest credited to savings accounts by these banks appear to be 3 and 4 per cent.

Number of stock savings banks, number of depositors, aggregate deposit account, by States, June 30, 1919, and June 30, 1920.

State. ¹	1919				1920

¹ No separate returns received from stock savings banks in any other States.

² In thousands of dollars.

³ Generally.

⁴ Estimated.

Loans and discounts by stock savings banks on June 30, 1920, aggregated \$978,047,000, of which amount \$453,795,000, including mortgages owned, were secured by real estate other than farm land; \$5,518,000 were secured by collateral other than real estate, and the remainder of the loans were not classified. Overdrafts were \$436,000.

The aggregate investments of these banks were reported at \$323,596,000, classified as follows:

United States bonds.....	\$33,986,000
State, county, and municipal bonds.....	847,000
Railroad bonds.....	3,825,000
Bonds of other public-service corporations (including street and inter-urban railway bonds).....	1,727,000
Not classified.....	283,211,000

Banking houses and furniture and fixtures owned amounted to \$32,277,000 and other real estate was valued at \$5,555,000.

The amount due from banks was reported at \$70,783,000; checks and other cash items, at \$1,956,000; and exchanges for clearing house, \$2,880,000. Total cash held in the vaults of these banks was \$35,215,000, of which \$16,000 was in gold certificates, \$59,000 in silver coin, \$622,000 in legal tender notes, and cash not classified was \$34,518,000. Other resources totaled \$55,668,000.

The capital stock paid in was \$69,183,000 and surplus and undivided profits amounted to \$52,669,000.

The total deposits, including \$841,000 balances due to other banks and postal savings deposits of \$1,726,000, were \$1,352,230,000. Deposits other than the above items were classified as follows:

Individual deposits subject to check without notice.....	\$869,941,000
Demand certificates of deposit.....	176,000
Certified checks and cashiers' checks.....	147,000
Savings deposits, or deposits in interest or savings department.....	2,796,000
Time certificates of deposit.....	1,672,000
Dividends unpaid.....	38,000
Deposits not classified.....	474,893,000

Notes and bills rediscounted and bills payable amounted to \$24,081,000, and other liabilities were \$8,250,000.

MUTUAL AND STOCK SAVINGS BANKS.

The number of savings banks, depositors, amount of deposits and the average amount due each depositor from 1820 to 1920, together with the average per capita in census years from 1890 to 1920 are shown in the following table:

Number of savings banks in the United States, number of depositors, amount of savings, deposits, average amount due each depositor in the years 1820, 1825, 1830, 1835, 1840, 1845, and yearly to 1920, and average per capita in the United States in the years given.

Year.	Banks.	Depositors.	Deposits.	Average due each depositor.	Average per capita in the United States.
1820	10	8,635	\$1,138,576	\$131.86	\$0.12

¹ Dividends unpaid not included.

NOTE.—In the foregoing table the figures for 1896 to 1908, inclusive, but not subsequently, include the number of depositors and the amount of deposits in the State banks of Illinois having savings departments but not the number of such banks, by reason of the fact that general returns from these institutions are incorporated in State banks' returns.

In the assembling of data in relation to savings banks the classification of banks as made by the State banking departments is closely followed, in consequence of which a number of so-called State savings banks, formerly treated by this office as savings banks, are now regarded as commercial banks, and the returns therefrom are combined with the latter, which accounts for the relatively small amount of deposits reported for stock savings banks since 1915.

LOAN AND TRUST COMPANIES.

Returns were received in the comptroller's office with reference to the condition of 1,408 loan and trust companies, on or about June 30, 1920.

Their aggregate assets amounted to \$8,320,018,000, compared with assets of \$7,959,996,000 on June 30, 1919. While reports received show that the resources of these institutions have increased \$360,022,000 during the past year and a slight increase in the number of such banks, the number of these institutions and their assets probably increased more than these figures indicate, for information relative to trust companies has been included with the returns from State banks in summaries submitted by the banking departments of several of the States.

Of the loans and discounts, aggregating \$4,598,819,000, \$3,358,000 were secured by farm land; \$468,197 by other real estate, including mortgages; \$2,168,103,000 by collateral other than real estate; and unclassified loans totaled \$1,959,161,000.

Overdrafts were reported to the amount of \$2,689,000.

The loan and trust companies had invested in United States bonds and other Government securities \$249,249,000; State, county, and municipal bonds were held to the extent of \$37,438,000.

Railroad bonds amounted to \$164,000,000, and bonds of other public service corporations, including street and interurban railway bonds, aggregated \$115,972,000, while investments in *miscellaneous* stocks and bonds not classified amounted to \$1,335,416,000.

The amount invested in banking houses, furniture, and fixtures was \$163,233,000, and other real estate owned was \$26,609,000. Balances with other banks were \$878,692 and checks and other cash items and exchanges for clearing house totaled \$193,615,000.

Cash on hand to the amount of \$148,455,000 was classified as follows:

Gold coin.....	\$4, 988, 000
Gold certificates.....	3, 265, 000
Silver coin.....	3, 704, 000
Silver certificates.....	5, 825, 000
Legal tender notes.....	16, 416, 000
National bank notes.....	6, 339, 000
Federal reserve notes.....	28, 898, 000
Nickels and cents.....	1, 407, 000
Cash not classified.....	77, 613, 000

Resources not specified were \$405,831,000.

The *capital stock* paid in was \$475,745,000, and the *surplus* was \$509,929,000, while undivided profits were \$102,194,000.

Of the total *deposits* held by loan and trust companies, amounting to \$6,517,985,000, \$424,542,000 was credited to the accounts of other banks. Postal savings deposits were \$3,673,000 and other deposits were classified in the following order:

Individual deposits subject to check without notice.....	\$1, 771, 994, 000
Demand certificates of deposit.....	202, 398, 000
Certified checks and cashiers' checks.....	27, 476, 000
Savings deposits or deposits in interest or savings department.....	1, 141, 307, 000
Time certificates of deposit.....	201, 808, 000
Dividends unpaid.....	4, 095, 000
Deposits not classified.....	2, 740, 692, 000

Loan and trust companies had rediscounted their notes and bills to the amount of \$146,546,000, and the bills payable of these institutions, including certificates of deposit, representing borrowed money, aggregated \$214,144,000.

Liabilities other than the foregoing amounted to \$353,475,000.

PRINCIPAL ITEMS OF RESOURCES AND LIABILITIES OF LOAN AND TRUST COMPANIES, 1914 TO 1920.

The number of trust companies and information with reference to the principal items of *assets* and *liabilities* on or about June 30 of each year since 1914 are shown in the following table:

[In millions of dollars.]

Year.	Number.	Loans. ¹	Investments.	Capital.	Surplus and profits.	All deposits.	Aggregate resources.
1914.....	1, 564	2, 905. 7	1, 261. 3	462. 2	564. 4	4, 289. 1	5, 489. 5
1915.....	1, 664	3, 048. 6	1, 319. 6	475. 8	577. 4	4, 604. 0	5, 873. 1
1916.....	1, 606	3, 704. 3	1, 605. 4	475. 8	605. 5	5, 732. 4	7, 028. 2

1920.....	1, 408	4, 601. 5	1, 902. 1	475. 7	612. 1	6, 518. 0	8, 320. 0

¹ Includes overdrafts.

PRIVATE BANKS.

A reduction in the number of reporting private banks on or about June 30, 1920, from 1,017 with assets of \$266,122,000, to 799 banks having resources of \$212,626,000, is accounted for by the difficulty

experienced by the comptroller's bureau in obtaining from private banks and bankers, in the States of Texas, Illinois, Michigan, and Iowa, where such banks are not under State supervision, individual reports of condition when called for and which are needed for a complete compilation of statistics with reference to these banks.

Loans and discounts of private banks were \$127,661,000; classified as, secured by collateral other than real estate, \$11,566,000; secured by farm lands, \$5,455,000; and loans made upon the security of other real estate were \$10,126,000. Loans not classified totaled \$100,514,000. Overdrafts were \$1,254,000.

The investments of these banks were: In United States bonds and other Government securities, \$8,374,000; State, county and municipal bonds, \$1,603,000; railroad bonds, \$353,000. Bonds of other public service corporations, including street and interurban railway bonds were reported at \$459,000, and investments not classified were \$21,402,000, the aggregate of these investments being \$32,191,000.

Banking houses, furniture and fixtures owned were carried at \$4,046,000, and other real estate owned was reported at \$7,720,000.

The amount due these banks from other banks was \$29,467,000, and checks and other cash items were held to the extent of \$1,156,000. Exchanges for clearing house were \$307,000.

Total cash in vaults classified as follows, amounted to \$6,480,000:

Gold coin.....	\$219, 000
Gold certificates.....	27, 000
Silver coin.....	327, 000
Silver certificates.....	48, 000
Legal-tender notes.....	1, 738, 000
National-bank notes.....	166, 000
Federal reserve notes.....	175, 000
Nicksels and cents.....	43, 000
Cash not classified.....	3, 737, 000

Resources not enumerated were \$2,344,000.

The paid-in capital was \$13,334,000, surplus was \$13,046,000 and undivided profits, \$3,458,000. Of the total deposits reported, amounting to \$171,841,000, time certificates of deposits were \$44,932,000, individual deposits subject to check, were \$44,852,000, demand certificates of deposit \$37,879,000, and other deposits exclusive of \$2,139,000 due to banks, were as follows:

Certified checks and cashiers' checks.....	\$253, 000
Savings deposits, or deposits in interest or savings department.....	12, 814, 000
Dividends unpaid.....	101, 000
Postal-savings deposits.....	28, 000
Deposits not classified.....	28, 843, 000

Notes and bills were rediscounted to the extent of \$1,639,000; bills payable, including certificates of depcsit, representing borrowed money, were outstanding to the amount of \$5,870,000, and other liabilities were \$3,438,000.

CONDITION OF ALL BANKS, OTHER THAN NATIONAL, IN THE CONTINENTAL UNITED STATES AND ISLAND POSSESSIONS ON OR ABOUT JUNE 30, 1920.

The number of banks other than national in each State and island possessions, on or about June 30, 1920, and their resources and liabilities are shown in the following table:

Abstract of reports of condition of 22,109 State, savings, and loan and trust companies, showing their condition at the close of business on June 30, 1920.

¹ Includes overdrafts.

² Includes rediscounts.

³ Includes individual deposits, due to banks, dividends unpaid, postal savings, and United States deposits.

As indicated in the above statement, the number of banks other than national increased 771 during the past year, and the percentage of increase was 3.61, while the number of national banks increased during the year 245, the percentage of increase being 3.15.

The resources of State banks, savings banks, private banks, and loan and trust companies on June 30, 1920, amounted to \$29,667,855,000, while the resources of national banks, including rediscounts, were \$23,411,253,000, the percentages of increase being 12.46 and 10.25, respectively.

Loans and discounts, including overdrafts, were reported by all banks other than national to amount to \$17,263,796,000, an increase over the preceding year of 22.77 per cent, while loans and discounts of national banks, including overdrafts and rediscounts, amounted to \$14,101,537,000, an increase over the returns as of June 30, 1919, of 27.91 per cent.

The progress made by all reporting banking institutions during the past year is also expressed in the tremendous increase in deposits, capital, surplus, and undivided profits, the aggregate deposits of all reporting banks having increased from \$37,668,911,000 on June 30, 1919, to \$41,714,075,000 on June 30, 1920, capital stock increased

from \$2,437,365,000 to \$2,702,639,000 in this period, and surplus and profits advanced \$378,800,000.

PRINCIPAL ITEMS OF RESOURCES AND LIABILITIES OF THE 22,109 REPORTING BANKS OTHER THAN NATIONAL IN THE UNITED STATES AND ISLAND POSSESSIONS, AND 8,030 NATIONAL BANKS, ON JUNE 30, 1920, TOGETHER WITH THE GRAND TOTAL, ARE SHOWN IN THE FOLLOWING STATEMENT:

¹ Includes balances due from Federal reserve banks to State banks and trust companies, members of Federal Reserve System.

² Rediscounts not included with loans or aggregate resources.

Comparative statement of growth in resources of national and State banking institutions for 5-year period.

[In thousands of dollars.]

Resources national banks, June 30, 1920	22,196,737
Resources national banks, June 23, 1915	11,795,685
Increase (88.18 per cent)	10,401,052
Resources State banking institutions, June 30, 1920	29,667,855
Resources State banking institutions, June 23, 1915	16,008,445
Increase (85.33 per cent)	13,659,410

By reference to the preceding table it will be seen that the amounts due from Federal reserve banks and total cash held by all banks, including State, savings, private banks, and loan and trust companies, and national banks exceeded by \$439,403,000 the amount held June 30, 1919, the percentage of increase being 14.22.

Of the total cash and the amount due from Federal reserve banks reported by these banks on June 30, 1920, aggregating \$3,530,142,000, \$1,352,449,000 was reported by banks other than national, and the amount held by national banks, including lawful reserve with the Federal reserve banks and items in process of collection, was \$2,177,693,000. The amount of cash in vault and due from Federal reserve banks, as reported by national banks, was therefore \$825,-244,000 in excess of the amount reported by banks other than national.

NATIONAL FEDERAL RESERVE, STATE BANKS, TRUST COMPANIES, AND PRIVATE BANKS.

On June 25, 1920, the paid in capital stock of the twelve Federal reserve banks was \$94,506,000 and their aggregate resources \$6,074,-596,000, while on June 27, 1919, the paid in capital stock amounted to \$82,764,000 and resources were \$5,288,008,000, the capital stock having increased during this period 2.10 per cent, and the resources 14.8 per cent.

Including the assets of the twelve Federal reserve banks, the resources of all reporting banks in the United States on June 30, 1920, were \$59,153,704,000, being \$6,250,249,000, or 11.81 per cent greater than the total resources a year ago.

The principal items of resources and liabilities of the 8,030 national banks, 22,109 reporting banks other than national, and the twelve Federal reserve banks, on or about June 30, 1920, are shown in the following table:

STATEMENT OF THE PRINCIPAL ITEMS OF RESOURCES AND LIABILITIES OF 30,151 REPORTING BANKS, INCLUDING THE FEDERAL RESERVE BANKS, IN THE UNITED STATES, AND ISLAND POSSESSIONS, JUNE, 1920.

ASSETS AND LIABILITIES OF ALL REPORTING BANKS IN EACH STATE.

In the following table the assets and liabilities in detail of all reporting national and other banks, based upon returns for June 30, 1920, are shown for each State and geographical division of the country.

As will be noted, reports were received from 30,139 banks (8,030 national, and 22,109 State, savings, loan and trust companies, and private), and that the assets aggregated \$53,079,108,000, an increase for the year in number of banks of 1,016 and in total assets of \$5,463,661,000.

Comparing these returns with those of 1919, substantial increases in resources are shown for the several geographical divisions, as follows:

	Per cent.
Northeastern States.....	9.99
Eastern States.....	5.96
Southern States.....	22.70
Middle States.....	14.28
Western States.....	11.67
Pacific States.....	17.80
Island possessions.....	24.65
The average increase for all divisions slightly exceeding.....	11.00

Loans and discounts of the above banks aggregated \$31,256,147,000, an increase for the year of \$5,954,770,000, while investments in bonds and other securities amounted to \$11,387,525,000, or about \$842,000,000 less than in 1919.

Available cash resources consisted of \$1,076,378,000 cash in vault, \$849,910,000 exchanges for clearing house, \$607,868,000 checks and other cash items, and \$5,833,241,000 due from banks, the aggregate being \$8,367,397,000 as against a total of \$8,283,576,000 in 1919.

Of the liabilities of the banks, the paid-in capital amounted to \$2,702,639,000, surplus \$2,410,346,000, and other undivided profits \$976,261,000, a grand total of \$6,089,246,000. The aggregate of these items for June 30, 1919, was \$5,445,248,000, or less by \$643,998,000 than in June, 1920.

Individual deposits amounted to \$37,683,563,000, plus postal savings of \$99,376,000 and plus amount due shareholders on account of dividends due and unpaid of \$47,046,000, an aggregate of \$37,829,985,000. Add to this latter sum United States deposits of \$175,788,000, and the amount due to banks of \$3,708,302,000, and it will be shown that the grand total of deposit liabilities of the banks amounted to \$41,714,075,000, a sum greater by \$4,045,164,000 than was reported in June, 1919.

Liabilities on account of bills payable amounted to \$1,785,598,000, notes and bills rediscounted to \$1,499,262,000, an aggregate of \$3,284,860,000 borrowed money, being an increase of \$984,369,000 over the corresponding date in 1919.

NOTE.—Since 1873 the Comptroller has collected and published statistics of State banks, but complete data for compiling these statistics for a number of years thereafter were available only for those States in which the banks were required to report to some State official. For recent years the statistics are practically complete.

INDIVIDUAL DEPOSITS IN ALL REPORTING BANKS.

The individual deposits in all reporting banks in the United States and island possessions on June 30, 1920, were \$37,683,563,000. These deposits on June 30, 1919, amounted to \$33,065,051,000. The percentage of increase during the year was 13.97 per cent.

Of the total individual deposits the amount subject to check without notice was \$15,679,376,000 and savings deposits totaled \$7,493,015,000. The classification of savings deposits, however, has particular reference to banks other than national. Deposits in national banks are classified as "time" and "demand" and no information, with reference to strictly savings deposits in these banks, is available. A classification of individual deposits in all reporting banks is shown in the following table:

Individual deposits in each class of banks June 30, 1920.

[In thousands of dollars.]

	Number of banks.	Individual deposits subject to check without notice.	Demand certificates of deposit.	Certified checks and cashiers' checks.
State banks.....	18,195	3,408,130	648,009	56,678
Stock savings banks.....	1,087	869,941	176	147

¹ Does not include United States and postal savings deposits or dividends unpaid.

² Includes \$2,337,275, time deposits on open account.

CASH IN ALL REPORTING BANKS.

On June 30, 1919, the national banks of the country had \$450,351,000 cash in their vaults and all reporting banks other than national had \$626,027,000 making a grand total of \$1,076,378,000. The total cash holdings of the 12 Federal reserve banks on June 25, 1920, amounted to \$2,108,605,000, which added to the above amount makes the total cash holdings of all these banks \$3,184,983,000.

The total cash held by all reporting banks including the Federal reserve banks, on June 30, 1919, was \$3,213,609,000; the reduction during the year, therefore, was \$28,626,000.

A classification of the coin and other currency held by national banks, banks other than national and the Federal reserve banks, is shown in the following table:

Cash in all banks June 30, 1920.

[In thousands of dollars.]

Classification.	8,030 national banks.	22, 109 State, etc., banks.	Total, 30, 151 banks. ¹

Cash in Federal reserve banks (June 25, 1920):			
Gold coin and certificates (reserve).....			1, 969, 375
Legal-tender notes, silver, etc. (reserve).....			139, 230
Grand total.....			3, 184, 983

¹ Includes 12 Federal reserve banks.

² Includes clearing-house certificates.

³ Includes nickels and cents.

⁴ Includes Federal reserve bank notes.

UNITED STATES POSTAL SAVINGS SYSTEM.

The Postal Savings System is in operation throughout the continental United States and in the island possessions. Returns received through the office of the Third Assistant Postmaster General, Post Office Department, show total deposits on June 30, 1920, to the amount of \$139,208,954. The balance to the credit of depositors on June 30, 1919, was \$167,323,260 and the withdrawals during the year amounted to \$149,255,892, leaving a net balance to the credit of depositors on June 30, 1920, of \$157,276,322. The net increase in deposits during the year was \$2,518,832. The number of depositors on June 30, 1920, was 508,508, a decrease during the year of 57,001, and the amount due each depositor was \$309.29, an average gain of \$13.41.

The aggregate assets of the system on June 30, 1920, were \$163,044,171.56 compared with \$173,353,650.59 on June 30, 1919.

The following statement shows by States and Territories the balance to the credit of depositors on June 30, 1919 and 1920, the deposits during the year and the withdrawals, etc.

United States Postal Savings System.

State.	Balance to the credit of depositors June 30, 1919.	Deposits.	Withdrawals.	Balance to the credit of depositors June 30, 1920.	Increase in balance to the credit of depositors. ¹	Savings cards and stamps.		Amount at interest in banks June 30, 1920, including transit items.	Interest received from banks.	Interest paid to depositors.	Amount of deposits surrendered for bonds.

FEDERAL FARM LOAN SYSTEM.

At the close of the year ended October 31, 1920, statements of the 12 Federal land banks show that the assets of these institutions have increased to \$376,399,471, the principal assets being loans, including accrued interest, of \$356,072,902, United States Government bonds and securities \$5,601,455, and cash on hand and due from banks \$7,172,552.

The capital of these banks is \$24,550,051, of which the national farm loan associations contributed \$17,620,891, the Government of the United States \$6,832,680, and borrowers through agents and individual subscribers \$96,480. These banks have accumulated a

reserve fund of \$766,900. The banks' liability on account of farm loan bonds authorized is \$334,050,000.

The net earnings of these banks to October 31, 1920, were \$4,032,112, from which, in addition to the reserve mentioned, dividends were paid to the amount of \$1,136,770, leaving the net undivided profits on hand \$2,022,095.

The original subscription to capital stock of these banks by the United States Government was \$8,892,130, of which \$2,059,450 has been retired.

The condition of these banks at the close of the year is shown in the following statement:

Consolidated statement of condition of the 12 Federal land banks at the close of business Oct. 31, 1920.

JOINT STOCK LAND BANKS.

While 31 joint stock land banks have been chartered, only 25 were doing business at the close of the year ended October 31, 1920, the charters of six having been surrendered during the past year. The aggregate assets of the 25 banks on that date amounted to \$99,865,634, the principal items being mortgaged loans, amounting, including accrued interest uncollected, to \$79,022,000, United States bonds and other securities \$3,643,000, cash on hand and in banks \$1,805,000.

The capital of these joint banks was \$7,951,000, surplus \$80,750, reserve \$167,566. The assets and liabilities in detail are shown in the following statement:

Consolidated statement of condition of the joint stock land banks at the close of business Oct. 31, 1920.

BUILDING AND LOAN ASSOCIATIONS IN THE UNITED STATES.

A statement relating to the number, membership, and assets of the building and loan associations of the United States in each State for the years 1919-20, submitted to the comptroller's office by Mr. H. F. Cellarius, secretary United States League of Local Building and Loan Associations, shows that the volume of business transactions

exceeds all previous records and that "the associations have met the responsibilities which new and changed conditions imposed upon them in the most satisfactory manner."

The number of the existing associations is stated at 7,788, the membership 4,289,326, and the aggregate assets \$2,126,620,390. By comparison of the returns for the current year with those of 1918-19, it appears that there has been an increase of 304 in the number of associations, 277,925 in membership, and \$228,276,044 in assets.

The States in which the principal increases in assets were reported are shown, as follows: Pennsylvania, \$45,797,507; New Jersey, \$29,961,166; Ohio, \$21,919,165; Massachusetts, \$14,674,966; Indiana, \$13,754,315; New York, \$11,241,143; Nebraska, \$8,616,514; Illinois, \$8,538,598; Oklahoma, \$8,284,097; Wisconsin, \$8,196,696; Louisiana, \$6,927,612; Kansas, \$4,952,839; Michigan, \$4,484,317; and Missouri, \$4,117,960.

The following table shows, by States, the number of associations, total membership, and total assets for States in which accurate statistics are compiled by State supervisors, the figures given being those shown by their reports for the fiscal year ending in 1919. The data for other States are consolidated under the heading, "Other States," and the figures given are estimated:

Statistics for 1919-20—Building and loan associations.

	State.	Number of associations.	Total membership.	Total assets.	Increase in assets.	Increase in membership.

BUILDING AND LOAN ASSOCIATIONS IN THE DISTRICT OF COLUMBIA.

The number of building and loan associations in the District of Columbia for the years ended June 30 from 1909 to 1920, the amount of their loans, installments on shares, and the aggregate resources are shown in the following table:

Year.	Number of associations.	Loans.	Installments on shares.	Aggregate resources.
June 30—				
1909.....	22	\$13,511,587	\$11,996,357	\$14,393,927
1910.....	19	14,415,832	13,213,644	15,250,731
1911.....	19	14,965,220	13,324,217	16,017,405
1912.....	20	16,004,700	14,529,977	17,100,293
1913.....	20	17,398,010	16,453,044	18,438,294
1914.....	20	18,582,156	17,113,899	19,029,260
1915.....	20	19,524,065	17,866,337	20,655,614
1916.....	19	20,186,662	18,668,808	21,611,007
1917.....	19	20,951,089	19,413,266	22,264,005
1918.....	20	21,567,904	20,252,005	23,215,027
1919.....	20	23,654,000	22,463,000	25,699,000
1920.....	21	27,398,000	25,373,000	29,322,000

It appears by reference to the preceding statement that the number of these institutions has remained practically the same subsequent to March 4, 1909, when they were placed under the supervision of the Comptroller of the Currency. The amount of loans, however, and aggregate resources have increased over 100 per cent, the aggregate resources of these associations on June 30, 1920, being \$29,322,000, compared with \$14,393,927 on June 30, 1909. Loans were reported on June 30, 1920, to the amount of \$27,398,000, while on June 30, 1909, loans were \$13,511,587.

FINANCIAL INSTITUTIONS IN THE DISTRICT OF COLUMBIA.

On June 30, 1920, there were 66 banks or institutions doing a banking business in the District of Columbia, under the supervision of the Comptroller of the Currency, consisting of 15 national banks, 6 loan and trust companies, 24 savings banks, and 21 building and loan associations. The aggregate resources of these institutions were \$244,512,000. The increase in the number of institutions during the year was 2, and in the resources \$8,226,000. The capital stock of these institutions increased from \$19,956,000 on June 30, 1919, to \$20,572,000 on June 30, 1920, while the individual deposits increased from \$165,764,000 to \$177,358,000.

The following table shows the number of banks, capital, individual deposits, and aggregate resources, by classes, on June 30, 1920:

	Number.	Capital.	Individual deposits. ¹	Aggregate resources.
National banks.....	15	\$7,677,000	\$73,536,000	\$111,380,000
Loan and trust companies.....	6	10,400,000	54,531,000	74,929,000
Savings banks.....	24	2,495,000	23,606,000	28,881,000
Building and loan associations.....	21	² 25,625,000	29,322,000
Total.....	66	20,572,000	177,358,000	244,512,000

¹ Amounts due to banks, cashiers' checks, and certified checks not included.

² Share payments mainly.

EARNINGS, EXPENSES, AND DIVIDENDS OF SAVINGS BANKS AND TRUST COMPANIES IN THE DISTRICT OF COLUMBIA.

In the 12 months' period ended June 30, 1920, the gross earnings of the savings banks and trust companies in the District of Columbia were \$5,975,000, compared with \$4,684,000 for the year ended June 30, 1919, while the net addition to the profits of these banks during the year was \$1,665,000, or \$407,000 more than was added to their profits during the preceding year. The total dividends declared during the year were \$929,000, compared with \$881,000 during the preceding year.

The following statement shows in detail items in connection with the operation and earnings of these banks during the years ended June 30, 1919 and 1920:

Earnings, expenses, and dividends of savings banks and trust companies in the District of Columbia for the fiscal years ended June 30, 1919 and 1920.

TRANSACTIONS OF CLEARING-HOUSE ASSOCIATIONS.

Through the courtesy of W. J. Gilpin, manager, New York Clearing House Association, the comptroller is enabled to present in volume 2 of his report a comparative statement for the years ended September 30, 1919, and 1920, of the transactions of the clearing houses of the country.

Clearing-house associations to the number of 199 are in existence, an increase in the year of eight, and the volume of transactions during the last year reached \$462,920,250,000, exceeding by \$75,553,577,000 the transactions of the prior year. From the returns it appears that over 81 per cent, some \$378,110,000,000, of the clearings of the country were effected through the clearing houses of the 12 Federal reserve cities. It is also noted that over 75 per cent of the increase in clearings was in these cities.

In addition to the 12 Federal reserve bank cities, there are 19 other cities in which the transactions of the clearing houses exceeded \$1,000,000,000, the aggregate amounting to \$429,557,933,000, or over 92 per cent of the total transactions of the year.

A statement of the volume of the transactions in each of the 31 cities and in all other cities combined in 1919 and 1920, with the amount of the increases, stated in thousands of dollars, is subjoined:

Comparison of the transactions of clearing-house associations in the 12 Federal reserve bank cities and in other cities with transactions exceeding \$1,000,000,000 in the years ended Sept. 30, 1919, and 1920.

[In thousands of dollars.]

NEW YORK CLEARING HOUSE.

In 1920 the New York Clearing House reached the sixty-seventh year of its existence. From a comparative statement submitted by Manager Gilpin of the New York Clearing House Association of the transactions for the year ended September 30, 1919 and 1920, it appears that while the membership has been reduced during the last year from 60 to 55 the combined capital of the member banks rose from \$220,350,000 to \$261,650,000.

The average daily clearings of the association during the last year were \$830,060,031 and the aggregate \$252,338,249,466, an increase over 1919 of \$37,635,000,000. The per cent of balances to clearings was 9.99. By reference to the comparative statement of the transactions of all clearing houses of the country for 1919 and 1920, appearing in volume 2 of this report, it will be seen that the clearings in New York amounted to over 54 per cent of the total clearings of the country.

Transactions of the Assistant Treasurer of the United States with the New York Clearing House during the current year were as follows:

Exchanges received from the clearing house.....	\$569,477,562
Balances received from the clearing house.....	120,748,081
Total exchanges and balances.....	690,225,643
Exchanges delivered to the clearing house.....	599,243,850
Balances paid to the clearing house.....	90,981,792
Total exchanges and balances.....	690,225,643

EXAMINATIONS OF NATIONAL-BANK BRANCHES IN FOREIGN COUNTRIES.

During the past year the comptroller's bureau, through its examiners, has examined foreign branches of our national banks in Europe, in South America, and also in Cuba.

In the early part of the year a national-bank examiner and his assistant made examinations of the foreign branches of our national banks in Brussels, Paris, Barcelona, Madrid, and Genoa, Italy. In the summer the chief national-bank examiners of the New York Federal reserve district and the Boston Federal reserve district were sent to South America.

The chief examiner of the New York district conducted the examinations on the east coast of South America, at Buenos Aires, Once, Rosario (Argentina), Montevideo and Rondeau (Uruguay), Porto Alegre, Santos, São Paulo, Rio de Janeiro, Bahia, Pernambuco (Brazil).

The chief examiner of the Boston district conducted the examinations on the west coast, including the banks at Santiago, Valparaiso

(Chile), Lima (Peru), Bogota, Medellin, Barranquilla (Colombia), Caracas, Maracaibo (Venezuela), Port of Spain (Trinidad).

In the autumn national-bank examiners visited Cuba for the examination of national bank branches at Artemisa, Cardenas, Galiano, Habana, Matanzas, Pinar del Rio, Sagua Grande, Santa Clara, Union de Reyes, Cuatro Caminos, Remedior, Cruces, Bayamo, Caibarien, Camaguey, Ciego de Avila, Cienfuegos, Colon, Guantanamo, Manzanillo, Nuevitas, Placetas del Norte, Sancti Spiritus, Santiago, Yaguajay.

In the early part of the year national-bank examiners made examinations of the two national banks in Honolulu, Hawaii, and another examiner went to Alaska for the examination of the national banks in Juneau and Fairbanks.

NATIONAL BANK EXAMINERS.

The following is a list of the examiners in the service on October 31, 1920:

CHIEF EXAMINERS.

Federal Reserve District—

- No. 1—Daniel C. Mulloney, Boston, Mass.
- No. 2—Sherrill Smith, New York, N. Y.
- No. 3—Stephen L. Newnham, Philadelphia, Pa.
- No. 4—William J. Schechter, Cleveland, Ohio.
- No. 5—James K. Doughton, Richmond, Va.
- No. 6—J. William Pole, Atlanta, Ga.
- No. 7—Silas H. L. Cooper, Chicago, Ill.
- No. 8—John S. Wood, St. Louis, Mo.
- No. 9—Fred Brown, Minneapolis, Minn.
- No. 10—Luther K. Roberts, Kansas City, Mo.
- No. 11—Richard H. Collier, Dallas, Tex.
- No. 12—Horace R. Gaither, San Francisco, Calif.

SUPERVISING EXAMINERS.

Federal Reserve District—

- Nos. 1 and 2—E. Willey Stearns, New York, N. Y.
- Nos. 3 and 4—Oliver W. Birkhead, Washington, D. C.
- Nos. 5 and 6—R. Gordon Finney, Richmond, Va.
- Nos. 7 and 9—Joseph L. Kennedy, Sheldon, Iowa.
- Nos. 8 and 10—E. H. Gough, Boonville, Ind.
- No. 11—David Murphy, Mexia, Tex.
- No. 12—Harry L. Machen, Los Angeles, Calif.

ASSIGNED AS CHIEF, EXAMINING DIVISION, COMPTROLLER'S OFFICE.

Henry B. Davenport, Washington, D. C.

FIELD EXAMINERS.

First District.

Norwin S. Bean, Manchester, N. H.	Michael J. Hurley, Montpelier, Vt.
Harold W. Black, Boston, Mass.	Edward F. Parker, Boston, Mass.
George M. Coffin, New Haven, Conn.	Herbert W. Scott, Boston, Mass.
Thomas A. Cooper, Augusta, Me.	

Second District.

Russell T. August, New York, N. Y.	William Z. Hayes, Buffalo, N. Y.
Daniel C. Borden, New York, N. Y.	Charles F. Horn, New York, N. Y.
Ralph W. Byers, Newark, N. J.	Burdett Kelly, New York, N. Y.
Milton E. Donough, Ithaca, N. Y.	Benjamin Marcuse, New York, N. Y.
James B. Funsten, jr., New York, N. Y.	William F. Mitchell, Kingston, N. Y.
Harry L. George, Albany, N. Y.	Frank L. Norris, New York, N. Y.

Third District.

William B. Baker, Philadelphia, Pa.	George C. Congdon, Williamsport, Pa.
John W. Barrett, Johnstown, Pa.	Edward I. Johnson, Philadelphia, Pa.
John A. Best, Wilkes-Barre, Pa.	W. Morris Lammond, Lancaster, Pa.
Charles V. Brown, Philadelphia, Pa.	Carl M. Sisk, Douglasville, Pa.
Kinzie B. Cecil, Philadelphia, Pa.	Vernon G. Snyder, Sunbury, Pa.
Charles H. Chapman, Philadelphia, Pa.	George S. Summers, Carlisle, Pa.

Fourth District.

George E. Armstrong, Cleveland, Ohio.	Edward C. Haneke, Lima, Ohio.
Albert B. Camp, Toledo, Ohio.	J. Francis Miller, Wilkesburg, Pa.
John B. Chenault, Maysville, Ky.	Robert Montgomery, Wheeling, W. Va.
Sidney B. Congdon, Cleveland, Ohio.	Edwal F. Shively, Cleveland, Ohio.
Dan H. Cooney, Cleveland, Ohio.	George H. Smith, Pittsburgh, Pa.
Nathan S. DuBois, Pittsburgh, Pa.	Thomas C. Thomas, Columbus, Ohio.
A. Burton Faris, Cincinnati, Ohio.	

Fifth District.

Ashley E. Bing, Raleigh, N. C.	Lawrence W. Hoffman, Richmond, Va.
Roger E. Brooks, Washington, D. C.	Oscar K. LaRoque, Marion, S. C.
William B. Cloe, Huntington, W. Va.	Charles A. Stewart, Washington, D. C.
John W. Dalton, Charlotte, N. C.	James Trimble, Washington, D. C.
Thomas H. Davis, Richmond, Va.	D. Robertson Wood, Martinsburg, W. Va.
William P. Folger, Richmond, Va.	

Sixth District.

John C. Borden, Knoxville, Tenn.	W. Waller McBryde, Chattanooga, Tenn.
Charles E. Boyd, Mobile, Ala.	William C. Roberts, Jacksonville, Fla.
Thomas E. Fletcher, Cordele, Ga.	George M. Trammell, Atlanta, Ga.
James L. Griffin, Atlanta, Ga.	John K. Woods, Birmingham, Ala.
Reginald M. Hodgson, Atlanta, Ga.	

Seventh District.

J. Harvey Beall, Des Moines, Iowa.	William G. Minor, Cannelton, Ind.
William P. Funsten, Davenport, Iowa.	Paul Partridge, Peoria, Ill.
Nels E. Haugen, Des Moines, Iowa.	Ellis D. Robb, Waterloo, Iowa.
Ben Hayes, Milwaukee, Wis.	John T. Sawyer, jr., Milwaukee, Wis.
Robert C. Houston, Marion, Ind.	Clarence F. Smith, Chicago, Ill.
John C. McGrath, Indianapolis, Ind.	Robert K. Stuart, Chicago, Ill.
Charles R. Mertens, Shelbyville, Ill.	Robert C. Williams, Chicago, Ill.

Eighth District.

Eugene H. Gough, Boonville, Ind.	William R. Parker, St. Louis, Mo.
Richard L. Hargreaves, San Francisco, Calif.	John C. Peightel, Seymour, Mo.
Ben M. McPike, St. Louis, Mo.	Frank T. Ransom, Memphis, Tenn.
William M. Morgan, Louisville, Ky.	Hal Woodside, Kirkwood, Mo.
	William R. Young, Hot Springs, Ark.

Ninth District.

Christopher H. Anheier, Minneapolis, Minn.	Bert K. Patterson, Minneapolis, Minn.
Ward M. Buckles, Helena, Mont.	Wm. A. Regan, Fargo, N. Dak.
William P. Dougherty, Minneapolis, Minn.	Mervale D. Smiley, Sioux Falls, S. Dak.
Peter J. Lorang, Minneapolis, Minn.	Arthur B. Smith, Fargo, N. Dak.
Leland L. Madland, Billings, Mont.	John H. Smith, Minneapolis, Minn.
	Harry W. Walker, Huron, S. Dak.
	Irwin D. Wright, Fargo, N. Dak.

Tenth District.

Henry C. Bergman, jr., Coffeyville, Kans.	Orville A. Griffey, Muskogee, Okla.
Arthur R. Bradley, Kansas City, Mo.	Granville M. McClerkin, Omaha, Nebr.
L. Oscar Challman, Cheyenne, Wyo.	William H. Reed, Kansas City, Mo.
Roy A. Cooper, Edmond, Okla.	Roy E. Smith, Hastings, Nebr.
Sherwood Crocker, Denver, Colo.	Sam H. Sullenberger, Okla.
Charles H. Filson, Guthrie, Okla.	Thomas M. Williams, Kansas City, Mo.
George W. Goodell, Denver, Colo.	

Eleventh District.

Clarence E. Breg, El Paso, Tex.	Alexander B. McCans, Dallas, Tex.
Henry F. Brewer, El Paso, Tex.	Fred S. Mansfield, Dallas, Tex.
William E. Hutt, Sherman, Tex.	Jesse L. Penix, Waco, Tex.
Robin M. Johnson, St. Cloud, Fla.	Allison D. Thompson, San Antonio, Tex.
Stanley A. Longmoor, Dallas, Tex.	J. Ernest Thompson, Dallas, Tex.

Twelfth District.

Harry E. Albert, Portland, Oreg.	Leo H. Martin, San Francisco, Calif.
William M. Gray, Ocean Park, Calif.	Charles T. Maxey, San Francisco, Calif.
Arthur L. James, Sacramento, Calif.	Lewis M. Sawyer, Boise, Idaho.
Edward S. Jernegan, Fresno, Calif.	Harry B. Raney, Salt Lake City, Utah.
Martin McLean, Seattle, Wash.	Oscar Thompson, Los Angeles, Calif.
Charles H. Martin, San Francisco, Calif.	Max C. Wilde, San Francisco, Calif.

CONCLUSION.

In submitting this, the Fifty-eighth Annual Report of the Bureau of the Comptroller of the Currency, and the seventh and last annual report of the present incumbent of the office, it is with a feeling of deep gratification and thankfulness that I direct attention to the strength and soundness, the efficiency and prosperity, of the more than 8,000 national banking associations now under the supervision of this bureau.

The past seven years have been, in numbers of persons and extent of interests involved, the most momentous and critical in the history of this Republic. We have had to face and to solve gigantic and unprecedented problems, and the banking and financial machinery of the country has been subjected to a test and strain unparalleled. It has been the duty of our country very largely to finance the world, and in carrying out the program which fate imposed upon us we have overcome successfully difficulties that at times seemed almost insurmountable and we have met every righteous demand made upon us. Our Federal reserve financial and banking system, inaugurated in 1914, has been of inestimable value; and without its aid, tasks which we have so successfully accomplished would have been impossible.

The records show that a majority of the Liberty bonds placed by our Government in financing the war were disposed of through the national banks of the country; and this huge job, carried through so ably and with such splendid efficiency, would also have been impossible had it not been for the strength and soundness, the ability and good management, of the banks which aided so enormously in these great undertakings.

In the earlier days of the present administration it was found that many irregular and dangerous practices had grown up and many

loose and careless methods were in vogue. The comptroller's bureau addressed itself earnestly to the correction of existing abuses, and to the installation of many important and necessary reforms which have now been largely accomplished, not without some friction here and there and some resentments from a few bankers who were found to be incorrigible; but it is a deep gratification to be able to report that with these really inconsiderable exceptions the bankers of the country have adopted and approved or have acquiesced cheerfully in the reforms which have been promulgated and insisted upon, and in most cases they now frankly and cheerfully admit their usefulness, importance, and need.

COMMENDATION FOR BANK OFFICERS AND DIRECTORS.

It would be unfair not to give to the officers and directors of the national banks a high meed of praise for the splendid and increasing cooperation which they have given to this office in curing many evils or weaknesses in the management of banks which at one time existed and in establishing the reforms which have aided in bringing these banks to their present unprecedented condition of strength, of efficiency, and of prosperity; and it is a great pleasure to be able, in this closing report, as has already been done in other reports, to make this cordial acknowledgment.

There are printed in the report of the Comptroller of the Currency three charts which show graphically the growth, the safety, and the great increase in earnings of our national banks during the past seven years as compared with the preceding 40 or 50 years.

From the first of these charts it will be observed that our national banks have grown more, both in deposits and total resources, in the past seven years than in the preceding half century.

The second chart shows the greatly increased immunity from failure of our national banks. It is encouraging to find that, despite the unprecedented shrinkage in values which took place during the past fiscal year and the great strain upon our banks and all business interests, the proportion of the capital of banks which failed in the year 1893 (when the strain was hardly comparable to that of the past year) to the total capital of all the banks in operation at that time was about *100 times greater* than the proportion of capital of failed banks to the total capital of all banks in the fiscal year just closed.

In the matter of profits accruing to the banks, the third chart referred to informs us that the net earnings of the national banks made an actual increase in the six years from 1914 to 1920 of \$132,812,829, as compared with the total increase for the 44 preceding years, from 1870 to 1914, of \$91,052,053.

BANK EXAMINERS IN TWO HEMISPHERES.

Our examiners have made during the past year approximately 15,000 examinations of national banks in this country, Hawaii, and Alaska, and their branches in Europe, South America, and Cuba. In addition to these examinations the national banks were required to submit to this bureau six times during the year detailed reports of their condition, including full statements of their status and opera-

tions. Approximately 65,000 reports of condition and statements as to earnings and dividends, and special reports showing geographical distribution of loans and deposits, etc., were received by the Comptroller. These reports were all carefully analyzed and abstracted in the statistical department of the bureau and condensed statements and digests were from time to time prepared and given to the public.

In addition to the important duty of supervising and examining all national banks in the United States, including Alaska and Hawaii, and their branches in Porto Rico, and in 13 foreign countries in both hemispheres, the Comptroller of the Currency, through the bureau of which he is the head, has supervision also over the issue and redemption of all national bank notes, of all Federal reserve notes, and of all Federal reserve bank notes.

5,534 MILLION DOLLARS OF CURRENCY ISSUED AND REDEEMED IN 1920.

During the year ended October 31, 1920, the amount of such currency issued through the comptroller's bureau aggregated \$3,118,262,770 and the amount of this currency redeemed for the same period was \$2,416,424,878. The grand total of all currency issued and redeemed through the bureau during the fiscal year as shown in detail in tables contained herein aggregated \$5,534,687,648.

EXPRESSION OF APPRECIATION FOR FIDELITY AND EFFICIENCY OF STAFF OFFICERS AND EMPLOYEES.

In conclusion, I desire to make special acknowledgement to Deputy Comptrollers Thomas P. Kane and Willis J. Fowler for the very large part which they have taken in the successful administration of this bureau during the past seven years. Their experience, their skill, and their unfailing devotion to duty have been invaluable in securing the results obtained, and I earnestly renew the recommendations which I have made in previous years that their salaries be materially increased so as to be more commensurate with the excellent and skilled services which they render. Much credit is also due to the chiefs of divisions of the bureau, and to the rank and file of our employees, whose fidelity and zeal and energy I gratefully acknowledge.

To the chief national-bank examiners of the 12 examining districts, and to the field examiners and to their assistants also, belongs a large share of the credit for the notable advance and the improvement which has taken place in the operation and management of the banks under their supervision during these past several years. Their task has not been easy. The faithful and efficient performance of their duties has involved much wear and tear upon mind and body and many real sacrifices. Their work has been done with exceptional thoroughness, tact, and courage. The high reputation which our examiners generally have established for themselves is indicated by the recognition which they are constantly receiving from the leading and most successful banks throughout the country, both national and State, who, in acknowledgment of their skill character, and ability, have made heavy drafts upon our force of examiners by selecting them for positions of official importance and dignity at salaries much above those paid by the Government.

The records, in fact, show that the resignations of examiners in the past few years, for the purpose of accepting higher positions elsewhere, amount in number to more than 100 per cent of the examiners in the service at the beginning of the present administration, and the condition and management of the many banks in which former national-bank examiners are now holding responsible and important offices suggests that practice is following precept in their new executive positions.

CONTENTS OF VOLUME 2.

In Volume II of the report of the Comptroller of the Currency will be found complete statements of the condition of each national bank in the United States as of the call of September 8, 1920; a digest of legal decisions affecting national banks; a list of the employees of the comptroller's bureau; further information concerning State banks, savings banks, trust companies, and private banks; and much additional general statistical data relating to banks and banking.

Respectfully submitted.

JOHN SKELTON WILLIAMS,
Comptroller of the Currency.

To the SPEAKER OF THE HOUSE OF REPRESENTATIVES.

EXHIBIT A.

DUTIES AND LIABILITIES OF DIRECTORS OF NATIONAL BANKS AND MEMBER BANKS OF THE FEDERAL RESERVE SYSTEM.

PROVISIONS OF LAW DEFINING DUTIES OF DIRECTORS AND PRESCRIBING PENALTIES FOR NEGLECT OF SUCH DUTIES.

APPOINTMENT AND POWERS OF DIRECTORS.

(SEC. 5136, U. S. R. S.) Fifth. To elect or appoint directors, and by its board of directors to appoint a president, vice president, cashier, and other officers, define their duties, require bonds of them, and fix the penalty thereof, dismiss such officers or any of them at pleasure, and appoint others to fill their places.

Sixth. To prescribe, by its board of directors, by-laws not inconsistent with law, regulating the manner in which its stock shall be transferred, its directors elected or appointed, its officers appointed, its property transferred, its general business conducted, and the privileges granted to it by law exercised and enjoyed.

Seventh. To exercise by its board of directors, or duly authorized officers or agents, subject to law, all such incidental powers as shall be necessary to carry on the business of banking; by discounting and negotiating promissory notes, drafts, bills of exchange, and other evidences of debt; by receiving deposits; by buying and selling exchange, coin, and bullion; by loaning money on personal security; and by obtaining, issuing, and circulating notes according to the provisions of this title.

NUMBER AND ELECTION OF DIRECTORS—TERM OF OFFICE.

(SEC. 5145, U. S. R. S.) The affairs of each association shall be managed by not less than five directors, who shall be elected by the shareholders at a meeting to be held at any time before the association is authorized by the Comptroller of the Currency to commence the business of banking; and afterwards at meetings to be held on such day in January of each year as is specified therefor in the articles of association. The directors shall hold office for one year, and until their successors are elected and have qualified.

QUALIFICATIONS OF DIRECTORS.

(SEC. 5146, U. S. R. S.) Every director must, during his whole term of service, be a citizen of the United States, and at least three-fourths of the directors must have resided in the State, Territory, or District in which the association is located for at least one year immediately preceding their election, and must be residents therein

during their continuance in office. Every director must own, in his own right, at least ten shares of the capital stock of the association of which he is a director unless the capital of the bank shall not exceed twenty-five thousand dollars, in which case he must own in his own right at least five shares of such capital stock. Any director who ceases to be the owner of the required number of shares of the stock, or who becomes in any other manner disqualified, shall thereby vacate his place.

OATH REQUIRED FROM DIRECTORS.

(SEC. 5147, U. S. R. S.) Each director, when appointed or elected, shall take an oath that he will, so far as the duty devolves on him, diligently and honestly administer the affairs of such association, and will not knowingly violate, or willingly permit to be violated, any of the provisions of this title, and that he is the owner in good faith, and in his own right, of the number of shares of stock required by this title, subscribed by him, or standing in his name on the books of the association, and that the same is not hypothecated, or in any way pledged, as security for any loan or debt. Such oath, subscribed by the director making it, and certified by the officer before whom it is taken, shall be immediately transmitted to the Comptroller of the Currency, and shall be filed and preserved in his office.

VACANCIES, HOW FILLED.

(SEC. 5148, U. S. R. S.) Any vacancy in the board shall be filled by appointment by the remaining directors, and any director so appointed shall hold his place until the next election.

LIMIT OF LIABILITIES TO AN ASSOCIATION OF ANY PERSON, FIRM, OR CORPORATION FOR MONEY BORROWED—THE DISCOUNT OF BILLS OF EXCHANGE, ETC., NOT MONEY BORROWED.

(SEC. 5200, U. S. R. S.) The total liabilities to any association of any person or of any company, corporation, or firm for money borrowed, including in the liabilities of a company or firm the liabilities of the several members thereof, shall at no time exceed 10 per centum of the amount of the capital stock of such association, actually paid in and unimpaired, and 10 per centum of its unimpaired surplus fund: *Provided, however,* That

(1) the discount of bills of exchange drawn in good faith against actually existing values, including drafts and bills of exchange secured by shipping documents conveying or securing title to goods shipped, and including demand obligations when secured by documents covering commodities in actual process of shipment, and also including bankers' acceptances of the kinds described in section 13 of the Federal reserve act.

(2) the discount of commercial or business paper actually owned by the person, company, corporation, or firm negotiating the same,

(3) the discount of notes secured by shipping documents, warehouse receipts, or other such documents conveying or securing title covering readily marketable nonperishable staples, including live stock, when the actual market value of the property securing the obligation is not at any time less than 115 per centum of the face amount of the notes secured by such documents and when such property is fully covered by insurance, and

(4) the discount of any note or notes secured by not less than a like face amount of bonds or notes of the United States issued since April 24, 1917, or certificates of indebtedness of the United States, shall not be considered as money borrowed within the meaning of this section.

The total liabilities to any association, of any person or of any corporation, or firm, or company, or the several members thereof upon any note or notes purchased or discounted by such association and secured by bonds, notes, or certificates of indebtedness as described in (4) hereof shall not exceed (except to the extent permitted by rules and regulations prescribed by the Comptroller of the Currency, with the approval of the Secretary of the Treasury) 10 per centum of such capital stock and surplus fund of such association and the total liabilities to any association of any person or of any corporation, or firm, or company, or the several members thereof for money borrowed, including the liabilities upon notes secured in the manner described under (3) hereof, except transactions (1), (2), and (4), shall not at any time exceed 25 per centum of the amount of the association's paid-in and unimpaired capital stock and surplus. The exception made under (3) hereof shall not apply to the notes of any one person, corporation, or firm or company, or the several members thereof for more than six months in any consecutive twelve months.

DEPOSITS WITH NONMEMBER BANKS SUBJECT TO LIMIT (SEC. 19,
FEDERAL RESERVE ACT).

No member bank shall keep on deposit with any State bank or trust company which is not a member bank a sum in excess of ten per centum of its own paid-up capital and surplus. No member bank shall act as the medium or agent of a nonmember bank in applying for or receiving discounts from a Federal reserve bank under the provisions of this act, except by permission of the Federal Reserve Board.

DIVIDENDS AND SURPLUS FUND.

(SEC. 5199, U. S. R. S.) The directors of any association may, semiannually, declare a dividend of so much of the net profits of the association as they shall judge expedient; but each association shall, before the declaration of a dividend, carry one-tenth part of its net profits of the preceding half year to its surplus fund until the same shall amount to twenty per centum of its capital stock.

WITHDRAWAL OF CAPITAL PROHIBITED—DIVIDEND NOT TO EXCEED
NET PROFITS—BAD DEBTS DEFINED.

(SEC. 5204, U. S. R. S.) No association, or any member thereof, shall, during the time it shall continue its banking operations, withdraw, or permit to be withdrawn, either in the form of dividends or otherwise, any portion of its capital. If losses have at any time been sustained by any such association, equal to or exceeding its undivided profits then on hand, no dividend shall be made; and no dividend shall ever be made by any association, while it continues its banking operations, to an amount greater than its net profits then on hand, deducting therefrom its losses and bad debts. All debts due to any association, on which interest is past due and unpaid for a period of six months, unless the same are well secured, and in process of collection, shall be considered bad debts within

the meaning of this section. But nothing in this section shall prevent the reduction of the capital stock of the association under section fifty-one hundred and forty-three.

**PENALTY FOR VIOLATION OF PROVISIONS OF THIS TITLE—VIOLATION,
HOW DETERMINED—LIABILITY OF DIRECTORS FOR VIOLATION.**

(SEC. 5239, U. S. R. S.) If the directors of any national banking association shall knowingly violate, or knowingly permit any of the officers, agents, or servants of the association to violate any of the provisions of this title, all the rights, privileges, and franchises of the association shall be thereby forfeited. Such violation shall, however, be determined and adjudged by a proper circuit, district, or territorial, court of the United States, in a suit brought for that purpose by the Comptroller of the Currency, in his own name, before the association shall be declared dissolved. And in cases of such violation, every director who participated in or assented to the same shall be held liable in his personal and individual capacity for all damages which the association, its shareholders, or any other person shall have sustained in consequence of such violation.

PENALTY FOR FALSELY CERTIFYING CHECK.

(SEC. 5208, U. S. R. S.) It shall be unlawful for any officer, director, agent, or employee of any Federal reserve bank, or of any member bank as defined in the act of December twenty-third, nineteen hundred and thirteen, known as the Federal reserve act, to certify any check drawn upon such Federal reserve bank or member bank unless the person, firm, or corporation drawing the check has on deposit with such Federal reserve bank or member bank, at the time such check is certified, an amount of money not less than the amount specified in such check. Any check so certified by a duly authorized officer, director, agent, or employee shall be a good and valid obligation against such Federal reserve bank or member bank; but the act of any officer, director, agent, or employee of any such Federal reserve bank or member bank in violation of this section shall, in the discretion of the Federal Reserve Board, subject such Federal reserve bank to the penalties imposed by section eleven, subsection (h), of the Federal reserve act, and shall subject such member bank if a national bank to the liabilities and proceedings on the part of the Comptroller of the Currency provided for in section fifty-two hundred and thirty-four, Revised Statutes, and shall, in the discretion of the Federal Reserve Board, subject any other member bank to the penalties imposed by section nine of said Federal reserve act for the violation of any of the provisions of said act. Any officer, director, agent, or employee of any Federal reserve bank or member bank who shall willfully violate the provisions of this section, or who shall resort to any device, or receive any fictitious obligation, directly or collaterally, in order to evade the provisions thereof, or who shall certify a check before the amount thereof shall have been regularly entered to the credit of the drawer upon the books of the bank, shall be deemed guilty of a misdemeanor and shall, on conviction thereof in any district court of the United States, be fined not more than \$5,000, or shall be imprisoned for not more than five years, or both, in the discretion of the court.

PENALTY FOR EMBEZZLEMENT, MAKING FALSE ENTRIES IN BOOKS, REPORTS, ETC.

(SEC. 5209, U. S. R. S.) Any officer, director, agent, or employee of any Federal reserve bank, or of any member bank as defined in the act of December twenty-third, nineteen hundred and thirteen, known as the Federal reserve act, who embezzles, abstracts, or willfully misapplies any of the moneys, funds, or credits of such Federal reserve bank or member bank, or who, without authority from the directors of such Federal reserve bank, or member bank, issues or puts in circulation any of the notes of such Federal reserve bank or member bank, or who, without such authority, issues or puts forth any certificate of deposit, draws any order or bill of exchange, makes any acceptance, assigns any note, bond, draft, bill of exchange, mortgage, judgment, or decree, or who makes any false entry in any book, report, or statement of such Federal reserve bank or member bank, with intent in any case to injure or defraud such Federal reserve bank or member bank, or any other company, body politic or corporate, or any individual person, or to deceive any officer of such Federal reserve bank or member bank, or the Comptroller of the Currency, or any agent or examiner appointed to examine the affairs of such Federal reserve bank or member bank, or the Federal Reserve Board; and every receiver of a national banking association who, with like intent to defraud or injure, embezzles, abstracts, purloins, or willfully misapplies any of the moneys, funds, or assets of his trust, and every person who, with like intent, aids or abets, any officer, director, agent, employee, or receiver in any violation of this section shall be deemed guilty of a misdemeanor, and upon conviction thereof in any district court of the United States shall be fined not more than \$5,000 or shall be imprisoned for not more than five years, or both, in the discretion of the court.

Any Federal reserve agent, or any agent or employee of such Federal reserve agent, or of the Federal Reserve Board, who embezzles, abstracts, or willfully misapplies any moneys, funds, or securities intrusted to his care, or without complying with or in violation of the provisions of the Federal reserve act, issues or puts in circulation any Federal reserve notes shall be guilty of a misdemeanor and upon conviction in any district court of the United States shall be fined not more than \$5,000 or imprisoned for not more than five years, or both, in the discretion of the court.

PENALTY FOR MAKING POLITICAL CONTRIBUTIONS, ACT JANUARY 26, 1907.

That it shall be unlawful for any national bank, or any corporation organized by authority of any laws of Congress, to make a money contribution in connection with any election to any political office. It shall also be unlawful for any corporation whatever to make a money contribution in connection with any election at which presidential and vice presidential electors or a Representative in Congress is to be voted for or any election by any State legislature of a United States Senator. Every corporation which shall make any contribution in violation of the foregoing provisions shall be subject to a fine not exceeding five thousand dollars, and every officer or director of any

corporation who shall consent to any contribution by the corporation in violation of the foregoing provisions shall upon conviction be punished by a fine of not exceeding one thousand and not less than two hundred and fifty dollars, or by imprisonment for a term of not more than one year, or both such fine and imprisonment in the discretion of the court.

LOANS TO BANK EXAMINERS PROHIBITED.

(SEC. 5, Act Sept. 26, 1918.) That section twenty-two of the Federal reserve act, as amended by the act of June twenty-first, nineteen hundred and seventeen, be further amended and reenacted to read as follows:

(a) No member bank and no officer, director, or employee thereof shall hereafter make any loan or grant any gratuity to any bank examiner. Any bank officer, director, or employee violating this provision shall be deemed guilty of a misdemeanor and shall be imprisoned not exceeding one year or fined not more than \$5,000, or both; and may be fined a further sum equal to the money so loaned or gratuity given.

Any examiner accepting a loan or gratuity from any bank examined by him or from an officer, director, or employee thereof shall be deemed guilty of a misdemeanor and shall be imprisoned one year or fined not more than \$5,000, or both, and may be fined a further sum equal to the money so loaned or gratuity given, and shall forever thereafter be disqualified from holding office as a national bank examiner.

BANK EXAMINERS FORBIDDEN TO PERFORM ANY SERVICE FOR COMPENSATION FOR ANY BANK OR OFFICER, OR TO DISCLOSE INFORMATION ABOUT BANK WITHOUT PERMISSION OF COMPTROLLER.

(b) No national bank examiner shall perform any other service for compensation while holding such office for any bank or officer, director, or employee thereof.

No examiner, public or private, shall disclose the names of borrowers or the collateral for loans of a member bank to other than the proper officers of such bank without first having obtained the express permission in writing from the Comptroller of the Currency, or from the board of directors of such bank, except when ordered to do so by a court of competent jurisdiction, or by direction of the Congress of the United States, or of either House thereof, or any committee of Congress, or of either House duly authorized. Any bank examiner violating the provisions of this subsection shall be imprisoned not more than one year or fined not more than \$5,000, or both.

PENALTY FOR OFFICER, DIRECTOR, OR EMPLOYEE RECEIVING ANY FEE OR COMMISSION FOR MAKING LOANS, ETC.

(c) Except as herein provided, any officer, director, employee, or attorney of a member bank who stipulates for or receives or consents or agrees to receive any fee, commission, gift, or thing of value from any person, firm, or corporation, for procuring or endeavoring to procure for such person, firm, or corporation, or for any other

person, firm, or corporation, any loan from or the purchase or discount of any paper, note, draft, check, or bill of exchange by such member bank shall be deemed guilty of a misdemeanor and shall be imprisoned not more than one year or fined not more than \$5,000, or both.

PURCHASE OF OR SALE TO DIRECTORS OF SECURITIES, ETC., BY BANK.

(d) Any member bank may contract for, or purchase from, any of its directors or from any firm of which any of its directors is a member, any securities or other property, when (and not otherwise) such purchase is made in the regular course of business upon terms not less favorable to the bank than those offered to others, or when such purchase is authorized by a majority of the board of directors not interested in the sale of such securities or property, such authority to be evidenced by the affirmative vote or written assent of such directors: *Provided, however,* That when any director, or firm of which any director is a member, acting for or on behalf of others, sells securities or other property to a member bank, the Federal Reserve Board by regulation may, in any or all cases, require a full disclosure to be made, on forms to be prescribed by it, of all commissions or other considerations received, and whenever such director or firm, acting in his or its own behalf, sells securities or other property to the bank the Federal Reserve Board, by regulation, may require a full disclosure of all profit realized from such sale.

Any member bank may sell securities or other property to any of its directors, or to a firm of which any of its directors is a member, in the regular course of business on terms not more favorable to such director or firm than those offered to others, or when such sale is authorized by a majority of the board of directors of a member bank to be evidenced by their affirmative vote or written assent: *Provided, however,* That nothing in this subsection contained shall be construed as authorizing member banks to purchase or sell securities or other property which such banks are not otherwise authorized by law to purchase or sell.

**PAYMENT OF INTEREST ON DEPOSIT TO DIRECTORS TO BE AT A RATE
NO GREATER THAN PAID TO OTHER DEPOSITORS.**

(e) No member bank shall pay to any director, officer, attorney, or employee a greater rate of interest on the deposits of such director, officer, attorney, or employee than that paid to other depositors on similar deposits with such member bank.

**PENALTY FOR VIOLATION OF PROVISIONS OF SECTION 22 OF FEDERAL
RESERVE ACT.**

(f) If the directors or officers of any member bank shall knowingly violate or permit any of the agents, officers, or directors of any member bank to violate any of the provisions of this section or regulations of the board made under authority thereof, every director and officer participating in or assenting to such violation shall be held liable in his personal and individual capacity for all damages which the member bank, its shareholders, or any other persons shall have sustained in consequence of such violation.

LOANS OF TRUST FUNDS TO DIRECTORS, ETC., PROHIBITED.

Section 11k of the Federal reserve act provides that it shall be unlawful for national banking associations to lend any officer, director, or employee any funds held in trust under the powers conferred by that section, and that any officer, director, or employee making such loan, or to whom such loan is made, may be fined not more than \$5,000 or imprisoned not more than five years, or may be both fined and imprisoned in the discretion of the court.

INTERLOCKING DIRECTORATES—WHEN FORBIDDEN (ACT OCT. 15, 1914, AS AMENDED BY ACT MAY 15, 1916).

(SEC. 8.) That from and after two years from the date of the approval of this act no person shall at the same time be a director or other officer or employee of more than one bank, banking association, or trust company organized or operating under the laws of the United States, either of which has deposits, capital, surplus, and undivided profits aggregating more than \$5,000,000; and no private banker or person who is a director in any bank or trust company organized and operating under the laws of a State, having deposits, capital, surplus, and undivided profits aggregating more than \$5,000,000, shall be eligible to be a director in any bank or banking association organized or operating under the laws of the United States. The eligibility of a director, officer, or employee under the foregoing provisions shall be determined by the average amount of deposits, capital, surplus, and undivided profits as shown in the official statements of such bank, banking association, or trust company filed as provided by law during the fiscal year next preceding the date set for the annual election of directors, and when a director, officer or employee has been elected or selected in accordance with the provisions of this act it shall be lawful for him to continue as such for one year thereafter under said election or employment.

No bank, banking association, or trust company organized or operating under the laws of the United States, in any city or incorporated town or village of more than two hundred thousand inhabitants, as shown by the last preceding decennial census of the United States, shall have as a director or other officer or employee any private banker or any director or other officer or employee of any other bank, banking association, or trust company located in the same place: *Provided*, That nothing in this section shall apply to mutual savings banks not having a capital stock represented by shares: *Provided further*, That a director or other officer or employee of such bank, banking association, or trust company may be a director or other officer or employee of not more than one other bank or trust company organized under the laws of the United States or any State where the entire capital stock of one is owned by stockholders in the other: *And provided further*, That nothing contained in this section shall forbid a director of class A of a Federal reserve bank, as defined in the Federal reserve act, from being an officer or director, or both an officer and director, in one member bank: *And provided further*, That nothing in this act shall prohibit any officer, director, or employee of any member bank or class A director of a Federal reserve bank, who shall first procure the consent of the Federal Reserve Board, which board

is hereby authorized, at its discretion, to grant, withhold, or revoke such consent, from being an officer, director, or employee of not more than two other banks, banking associations, or trust companies, whether organized under the laws of the United States or any State, if such other bank, banking association, or trust company is not in substantial competition with such member bank.

The consent of the Federal Reserve Board may be procured before the person applying therefor has been elected as a class A director of a Federal reserve bank or as a director of any member bank. * * *

When any person elected or chosen as a director or officer or selected as an employee of any bank or other corporation subject to the provisions of this act is eligible at the time of his election or selection to act for such bank or other corporation in such capacity his eligibility to act in such capacity shall not be affected, and he shall not become or be deemed amenable to any of the provisions hereof by reason of any change in the affairs of such bank or other corporation from whatsoever cause, whether specifically excepted by any of the provisions hereof or not, until the expiration of one year from the date of his election or employment.

DIRECTORS OR OTHER OFFICERS OF BANK OR CORPORATION INCORPORATED UNDER THE LAWS OF THE UNITED STATES OR OF ANY STATE AND ENGAGED IN FOREIGN BANKING—WHO MAY BE.

Under the act of September 7, 1916, any director or other officer, agent, or employee of any member bank may, with the approval of the Federal Reserve Board, be a director or other officer, agent, or employee of any bank or corporation chartered or incorporated under the laws of the United States or of any State thereof and principally engaged in international or foreign banking or banking in a dependency or insular possession of the United States either directly or through the agency, ownership, or control of local institutions in foreign countries or in such dependencies or insular possessions in the capital stock of which such member bank shall have invested without being subject to the provisions of section 8 of the act approved October 15, 1914, entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes."

BY-LAWS TO BE ADOPTED BY DIRECTORS.

BY-LAWS.

When a bank is organized the board of directors should adopt by-laws, and send a copy to the Comptroller of the Currency. (Sec. 5136, U. S. R. S.) The following is submitted as a general form that may be modified in any manner deemed expedient, but not in conflict with law or the articles of association:

GENERAL FORM OF BY-LAWS OF NATIONAL BANKS.

By-laws of the [here insert the title of the bank], organized under the national-banking law of the United States.

ANNUAL MEETING.

SECTION 1. The regular annual meeting of the shareholders of this bank for the election of directors shall be held at its banking house on the day in January of each year provided in the articles of association, between the hours of 10 and 4 of said day.

It shall be the duty of the board of directors, within one month prior to the time of said election, to appoint three shareholders to be judges of said election, who shall hold and conduct the same, and who shall, after the election has been held, notify under their hands the cashier of this bank of the result thereof and the names of the directors elect.

SEC. 2. The cashier, upon receiving the returns of the judges of the elections as aforesaid, shall cause the same to be recorded upon the minute book of the bank, and shall notify the directors elect of their election and of the time at which they are required to meet at the banking house of the bank for the purpose of organizing the new board. If at the time fixed for the meeting of the directors elect there is not a quorum in attendance, the members present may adjourn from time to time until a quorum is secured, and no business shall be transacted prior to taking the oath of office as prescribed by law.

SEC. 3. If, for any cause, the annual election of directors is not held on the date fixed in the articles of association, the directors in office shall order an election to be held on some other day, of which special election notice shall be given in accordance with the requirements of section 5149, United States Revised Statutes, judges appointed, returns made and recorded, and the directors elect notified, according to the provisions of sections one and two of these by-laws.

OFFICERS.

SEC. 4. The officers of this bank shall be a president, vice president (who shall be members of the board of directors), cashier, and such other officers as may be from time to time required for the prompt and orderly transaction of its business. to be elected or appointed by the board of directors, by whom their several duties shall be prescribed.

SEC. 5. The president shall hold his office for the current year for which the board of which he shall be a member was elected, unless he shall resign, become disqualified, or be removed; and any vacancy occurring in the office of president or in the board of directors shall be filled by the remaining members.

SEC. 6. The cashier and the subordinate officers and clerks shall be appointed to hold their offices, respectively, during the pleasure of the board of directors.

SEC. 7. The cashier of this bank shall be responsible for all the moneys, funds, and valuables of the bank, and shall give bond, with security to be approved by the board, in the penal sum of — dollars, conditioned for the faithful and honest discharge of his duties as such cashier, and that he will faithfully apply and account for all such moneys, funds, and valuables, and deliver the same to the order of the board of directors of this bank, or to the person or persons authorized to receive them.

SEC. 8. The president of this bank shall be responsible for all such sums of money and property of every kind as may be intrusted to his care or placed in his hands by the board of directors or by the cashier, or otherwise come into his hands as president, and shall give bond, with security to be approved by the board, in the penal sum of — dollars, conditioned for the faithful discharge of his duties as such president, and that he will faithfully and honestly apply and account for all sums of money and other property of this bank that may come into his hands as such president, and pay over and deliver the same to the order of the board of directors, or to any other person or persons authorized by the board to receive the same.

SEC. 9. The teller shall be responsible for all such sums of money, property, and funds of every description as may from time to time be placed in his hands by the cashier, or otherwise come into his possession as teller; and shall give bond, with security to be approved by the board, in the penalty of — dollars, conditioned for the honest and faithful discharge of his duties as teller, and that he will faithfully apply, account for, and pay over all moneys, property, and funds of every description that may come into his hands, by virtue of his office as teller, to the order of the board of directors aforesaid, or to such person or persons as may be authorized to demand and receive the same.

SEAL.

SEC. 10. The following is an impression of the seal adopted by the board of directors of this bank:

{ Impression }
{ of seal. }

CONVEYANCE OF REAL ESTATE.

SEC. 11. All transfers and conveyances of real estate shall be made by the association, under seal, in accordance with the orders of the board of directors, and shall be signed by the president or cashier.

INCREASE OF STOCK.

SEC. 12. Whenever an increase of stock shall be determined upon, in accordance with law, it shall be the duty of the board to notify all the shareholders of the same, and to cause a subscription to be opened for such increase of capital. In the increase of capital each shareholder shall have the privilege of subscribing for such number of shares of the new stock as he may be entitled to subscribe for, according to his existing stock in the bank. If any shareholder fails to subscribe for the amount of stock to which he may be entitled, the board of directors may determine what disposition shall be made of the privilege of subscribing for the unsubscribed stock.

BANKING HOURS.

SEC. 13. This bank shall be opened for business from — o'clock a. m. to — o'clock p. m. of each day of the year, excepting Sundays and days recognized by the laws of this State as holidays.

DIRECTORS' MEETINGS.

SEC. 14. The regular meetings of the board of directors shall be held on the — of each month. When any regular meeting of the board of directors falls upon a holiday, the meetings shall be held on such other day as the board may previously designate. Special meetings may be called by the president, cashier, or at the request of three or more directors.

DISCOUNT COMMITTEE.

SEC. 15. There shall be a committee, to be known as the discount committee, consisting of the president, cashier, and — directors appointed by the board every — months, to continue to act until succeeded, who shall have power to discount and purchase bills, notes, and other evidences of debt, and to buy and sell bills of exchange; and who shall, at each regular meeting of the board of directors, submit in writing a report of all bills, notes, and other evidences of debt discounted and purchased by them for the bank since their last report. The board of directors shall approve or disapprove the report of the discount committee, such action to be recorded in the minutes of the meeting.

MINUTE BOOK.

SEC. 16. The organization papers of this bank, the returns of the judges of the elections, the proceedings of all regular and special meetings of the directors and of the shareholders, the by-laws and any amendments thereto, and reports of the committees of directors shall be recorded in the minute book; and the minutes of each meeting shall be signed by the president and attested by the cashier.

TRANSFERS OF STOCK.

SEC. 17. The stock of this bank shall be assignable and transferable only on the books of this bank, subject to the restrictions and provisions of the national banking laws; and a transfer book shall be provided in which all assignments and transfers of stock shall be made.

SEC. 18. Transfers of stock shall not be suspended preparatory to the declaration of dividends; and, unless an agreement to the contrary shall be expressed in the assignments, dividends shall be paid to the shareholders in whose name the stock shall stand at the date of the declaration of dividends.

SEC. 19. Certificates of stock, signed by the president and cashier, may be issued to shareholders, and the certificates shall state upon the face thereof that the stock is transferable only upon the books of the bank; and when stock is transferred, the certificates thereof shall be returned to the bank, canceled, preserved, and new certificates issued.

EXPENSES.

SEC. 20. All the current expenses of the bank shall be paid by the cashier, who shall every six months, or oftener if required, make to the board a detailed statement thereof.

CONTRACTS.

SEC. 21. All contracts, checks, drafts, etc., and all receipts for circulating notes received from the Comptroller of the Currency shall be signed by the president or cashier.

EXAMINATIONS.

SEC. 22. There shall be appointed by the board of directors a committee of — members, exclusive of the president and cashier, whose duty it shall be to examine every six months the affairs of this bank, count its cash, and compare its assets and liabilities with the accounts of the general ledger, ascertain whether the accounts are correctly kept, and the condition of the bank corresponds therewith, and whether the bank is in a sound and solvent condition, and to recommend to the board such changes in the manner of doing business, etc., as shall seem to be desirable; the result of which examination shall be reported in writing to the board at the next regular meeting thereafter.

SEC. 23. The board of directors shall have power to change the form of the books and accounts when deemed expedient and define the manner in which the affairs of the bank shall be conducted.

QUORUM.

SEC. 24. A majority of all the directors is required to constitute a quorum to do business. Should there be no quorum at any regular or special meeting, the members present may adjourn from day to day until a quorum is in attendance. In the absence of a quorum no business shall be transacted.

CHANGES IN BY-LAWS.

SEC. 25. These by-laws may be changed or amended by the vote of a majority of the directors.

EXAMINATION BY DIRECTORS.

In connection with the annual or semiannual examinations made by examining committees or by accountants at the instance of the board of directors, the following suggestions are made as to the general points that should be covered:

(1) The cash should be counted and the total compared with the books of the bank. Cash items should be carefully scrutinized, and any improper items, such as unposted checks held for the purpose of not showing overdrafts, and other items that can not be readily converted into cash, should be reported.

(2) The bonds and other securities of the bank should be examined and those not on hand should be verified by reference to the receipts of the parties with whom they are deposited and if the receipts are old they should be verified by correspondence. The market value and the amount at which carried on the books in the aggregate should be shown, and any stocks held by the bank should be listed, with a statement showing the reason the securities were taken by the bank.

(3) The notes should be carefully checked and their total compared with the general ledger. The genuineness, value, and security of each note, and of any collateral thereto, should be carefully determined, and any losses ascertained, or probable, in the judgment of the committee, should be noted. The liabilities of each of the larger borrowers and loans to affiliated interests should be aggregated and carefully considered. The report should also show the general character of the loans—whether well distributed; the general character of the collaterals; whether corporations in which officers or directors are interested borrow to an undue extent; also any large liabilities of the officers or directors. It should also be shown whether all paper claimed by the bank as its own property, including collaterals, is properly indorsed or assigned to it, and all mortgages recorded. Any loans exceeding 10 per cent of the capital and surplus of the bank should be reported. The signatures of all note makers and indorsers should be carefully scrutinized, and any erasures and alter-

ations or any indications of manipulation should be carefully investigated and reported to the full board. All overdue paper should be listed and comment made as to its collectibility.

(4) The certificates of deposit and the cashier's checks should be verified by totaling those outstanding as shown by the register and comparing with the general ledger, and also by comparing the canceled certificates and checks with the register and checking them against the stubs.

(5) The copy retained by the bank of the report of condition made to the Comptroller at the last call should be compared with the bank's books at that date, particularly with reference to the excessive loans and directors' and officers' liabilities reported.

(6) The bank's last reconcilements of accounts with correspondent banks should be compared with the bank's books, and a transcript of the bank's account from the date of the last reconciliation to the date of the examination sent to the correspondent bank with a request for verification. Balances with nonmember banks in excess of 10 per cent of the capital and surplus should be reported.

(7) Individual ledger balances should be verified in such manner as the directors may deem advisable, by calling in pass books, by sending out reconcilements of certain accounts selected by the directors, or in some other suitable way. A trial balance of the ledger should be taken by some member of the committee, or at least by some person other than the clerk engaged on the ledger.

(8) Overdrafts should be totaled and carefully considered, and the report should show any estimated losses.

(9) The committee should consider carefully the "profit and loss" and the "expense" accounts, with a view of determining whether the charges against those accounts are proper, whether the earnings of the bank warrant the expense charges, and whether the bank is making a legitimate profit.

(10) The examining committee should inquire carefully into the arrangement of the working affairs of the bank and ascertain whether any employee who keeps the individual ledger receives deposits or balances pass books; and whether the employees are properly bonded, and in whose custody the bonds are lodged.

(11) Any liability of the bank for borrowed money should be listed, and the proper authority and the necessity for such borrowing ascertained. The total amount of the present liabilities of that nature should be reported to the board, including money borrowed from other banks on certificates of deposit.

The report of the directors or the examining committee should show that these points have been covered, and should recite any deficiencies discovered.

The report should also contain a complete statement of the total assets and liabilities of the bank, with any additions or deductions that in the judgment of the directors should be made as a result of their investigation. There should also be included a detailed statement of the loans which the directors estimate as worthless, doubtful, or insufficiently secured, giving reasons therefor, and as nearly as possible the real value.

A statement should also be made of any matters which in the opinion of the committee affect in any way the bank's solvency, stability, or prosperity.

It is believed that there are few instances where the examining committee can not, if they will take the necessary time, cover these points fully and satisfactorily.

An examination twice a year, along the lines indicated, by a committee of the directors who will give sufficient time to the work to make it thorough and complete, can not fail to be of great benefit to all concerned, and this the directors owe to the shareholders who have placed them in their positions of trust.

A complete report of each examination should be preserved in the files of the bank and be accessible to the bank examiner when examining the bank.

LIABILITY OF DIRECTORS FOR MAKING AND PUBLISHING FALSE REPORT.

Under the decisions of the Supreme Court of the United States in *Thomas v. Taylor* (224 U. S., 73) and of the United States Circuit Court of Appeals in *Chesbrough et al v. Woodworth* (195 Fed. Rep., 875), when the Comptroller of the Currency has notified directors to collect or charge off certain assets it is a warning that those assets are doubtful, and to disregard such a notice and represent the assets in a statement to be good is a violation of law and renders the directors making the statement liable for damages to one deceived thereby.

The Circuit Court of Appeals in the latter case held that while the duty of charging off such worthless paper was that of the board of directors as an entity, and in such matter the board had a reasonable discretion, yet when the duty existed and was wholly unperformed an individual director who is engaged generally in the performance of his functions may be personally liable because of his participation in the failure to act by failing to make reasonable personal efforts to induce the proper action.

In the case referred to (*Chesbrough et al. v. Woodworth*) the plaintiff bought stock in the bank in reliance upon a false report of its condition and had suffered damage thereby. He was held to have a right of action against any officer or director who knowing its falsity had authorized such a report. The court held that the measure of the plaintiff's recovery would be the difference in the fair valuation of his stock if all of the paper had been of a character entitling it to be reported as assets and that sum which would have been a fair minimum valuation if the directors in the exercise of due care and good faith had charged off the books and not reported so much of the paper as they knew or had good reason to believe was not good and collectible.

LIABILITY OF DIRECTORS FOR MISMANAGEMENT—DEGREE OF CARE REQUIRED OF DIRECTORS.

The Supreme Court of the United States has held (*Briggs v. Spaulding*, 141 U. S., 132) that directors of a national bank must exercise ordinary care and prudence in the administration of the affairs of a bank, and this includes something more than officiating as figure-heads. They are entitled under the law to commit the banking business, as defined, to their duly authorized officers; but this does not absolve them from the duty of reasonable supervision nor

ought they to be permitted to be shielded from liability because of want of knowledge of wrongdoing, if that ignorance is the result of gross inattention.

It was further held in the same case that the degree of care required of directors of corporations depends upon the subject to which it is to be applied, and each case is to be determined in view of all the circumstances; that the directors of a corporation are not insurers of the fidelity of the agents whom they appoint and they can not be held responsible for losses resulting from the wrongful acts or omissions of other directors or agents unless the loss is a consequence of their own neglect of duty.

The United States Supreme Court in a decision rendered June 9, 1919, in the case of *Bowerman v. Hamner*, held that a director who had never attended a meeting during five years' connection with the bank, and who lived 200 miles from the place where the bank was located, was liable for mismanagement because he did not exercise the diligence which a prudent man would usually exercise in ascertaining the condition of the business of the bank or a reasonable control and supervision over its affairs, and that he could not be shielded from liability because of want of knowledge of wrongdoing on his part, since that ignorance was the result of gross inattention in the discharge of his voluntarily assumed and sworn duty.

LIABILITY OF DIRECTORS FOR ASSENTING TO EXCESSIVE LOANS.

The United States Circuit Court held (*Rankin v. Cooper et al.*, 149 Fed. Rep., 1010) that it is the duty of directors of a national bank to exercise reasonable control and supervision over its affairs, and to use ordinary care and diligence in ascertaining the condition of its business, which is such care as an ordinarily prudent and diligent man would exercise in view of all the circumstances; and that where the directors of a national bank became aware through the report of a committee of their number, and also by notices sent them individually by the Comptroller of the Currency, that the bank had been making excessive loans to its president and to other persons, firms, and corporations with which he was associated, but took no effective steps to reduce such loans, or to prevent their increase, which continued until the bank became insolvent, they will be held jointly and severally liable for all losses which the bank sustained through subsequent transactions, and which could have been prevented by a proper discharge of their duties.

The United States Circuit Court has held (*Witters, Receiver, etc., v. Sowles et al.*, 31 Fed. Rep., 1) that under Revised Statutes, section 5200, directors of a national bank who make or assent to the making of a loan to any one person of a sum exceeding the legal limit become personally and individually liable for all loss sustained thereby; but where the borrower in such a case is also one of the directors he is not so liable, but simply as a debtor to the bank.

The United States Circuit Court of Appeals in *McCormick v. King et al.* (241 Fed. Rep., 737), held that directors responsible for excess loans were liable not only for the excess of such loans above the legal limit, but for the entire loss thereon with interest, and this case was affirmed by the Supreme Court of the United States on June 9, 1919, in *Bowerman v. Hamner*.

REPORT OF THE COMMISSIONER OF INTERNAL REVENUE.

TREASURY DEPARTMENT,
OFFICE OF COMMISSIONER OF INTERNAL REVENUE,
Washington, September 30, 1920.

SIR: I have the honor to submit the following report of the work of the Bureau of Internal Revenue for the fiscal year ended June 30, 1920.

The outstanding features of the work of the Bureau during the past year are the organization of the Prohibition Enforcement Unit; the bringing to a plane of higher efficiency the administrative machinery for properly auditing income and excess-profits tax returns; and the extension of service to taxpayers through the establishment of a number of branch offices at accessible centers of population. The National Prohibition Act placed upon the Bureau of Internal Revenue new responsibilities involving many difficult problems of interpretation and administration. The progressive steps taken during the year in the solution of these problems are related in detail in a separate part of this report.

The two years of our participation in the World War were marked by emergency revenue legislation and constituted a period of almost constant reorganization of the administrative machinery of the Internal-Revenue Bureau. The year covered by this report has witnessed the approach of more stable and more nearly normal conditions. Opportunity has been offered to review with some measure of care the vast organization so suddenly and hastily developed, to coordinate and harmonize the many diverse activities incident to the enforcement of the different provisions of the law, and to realize progressively increased efficiency in every branch of the service.

COLLECTIONS.

The operations of the Internal-Revenue Bureau during the fiscal year 1920 under the War Revenue Act of 1918 and other internal-revenue tax legislation have resulted in the collection of \$5,407,580,-251.81, compared with \$3,850,150,078.56 in the fiscal year ended June 30, 1919, an increase of \$1,557,430,173.25, or 40.5 per cent.

Large income-tax payers generally have availed themselves of the privilege of installment payment, which first became operative in connection with returns made under the Revenue Act of 1918. The payments made during the first six months of the fiscal year 1920

embraced the third and fourth installments of the income and profits taxes due on income in the calendar year 1918, together with additional collections on assessments made for prior years, while the payments made during the last six months of the fiscal year embraced the first and second installments of the income and profits taxes on incomes in the calendar year 1919, together with additional collections made on assessments for prior years. The total of these income and profits tax collections for the fiscal year 1920 amounted to \$3,956,936,003.60, compared with \$2,600,783,902.70 for the fiscal year 1919, an increase of \$1,356,152,100.90. The miscellaneous collections arising from objects of taxation other than income and profits taxes amounted to \$1,450,644,248.21 for the fiscal year 1920, compared with \$1,249,366,175.86 for the fiscal year 1919, an increase of \$201,278,072.35.

The collection of internal-revenue taxes for the fiscal year 1920 and selected prior years are summarized in the following table:

Source.	1920	1919	1918	1914
Distilled spirits.....	\$97,905,275.71	\$365,211,252.26	\$317,553,687.33	\$159,098,177.31
Fermented liquors.....	41,965,874.09	117,839,602.21	126,285,857.65	67,081,512.45
Tobacco.....	295,809,355.44	206,003,091.84	156,188,659.90	79,986,639.68
Oleomargarine.....	3,728,276.05	2,791,531.08	2,336,907.00	1,325,219.13
Capital-stock tax, including other special taxes.....	102,933,701.35	33,497,047.82	27,281,269.12
Miscellaneous and war excise taxes.....	883,863,871.82	513,823,884.14	225,973,363.44	1,136,070.65
Stamp sales for parcel-post packages, etc.....	24,437,893.75	10,199,466.51	4,336,182.21
Total receipts from other than income and excess-profits taxes.....	1,450,644,248.21	1,249,366,175.86	859,955,926.65	308,627,619.22
Income and excess-profits taxes..	3,956,936,003.60	2,600,783,902.70	2,838,999,894.28	71,381,274.74
Total receipts.....	5,407,580,251.81	3,850,150,078.56	3,698,955,820.93	380,008,893.96

¹ The figures concerning internal-revenue receipts as given in this report differ from such figures carried in other Treasury statements showing the financial condition of the Government, because the former represent collections by internal-revenue officers throughout the country, including collections by postmasters from the sale of internal-revenue documentary stamps, while the latter represent the deposits of these collections in the Treasury or depositories during the fiscal year concerned, the differences being due to the fact that some of the collections in the latter part of the fiscal year can not be deposited, or are not reported to the Treasury as deposited, until after June 30, thus carrying them into the following fiscal year as recorded in the statements showing the condition of the Treasury.

COST OF ADMINISTRATION.

The total cost of administering the internal-revenue laws for the fiscal year 1920 as expressed by the aggregate expenditures from the several appropriations was \$29,647,439.71, compared with \$20,573,771.52 for the fiscal year 1919. The sum of \$184,803.55 expended from the appropriation of \$250,000, "Refunding internal-revenue collections," is not included in the total, as it is in no sense an administrative expense.

The cost of operating the Internal-Revenue Service for the fiscal year 1920 was 55 cents for each \$100 collected, based on the expenditure of \$29,647,439.71. The cost of operating the Internal-Revenue Service for the fiscal year 1919 was equivalent to 53 cents for each \$100 collected. There is included in the expenditures for the fiscal year 1920 the expenditures for enforcing the child-labor, the narcotic,

and the prohibition laws. The amount expended for salaries, traveling expenses, and miscellaneous items for enforcing the provisions of the child-labor section of the Revenue Act of 1918 was \$89,703.65; for enforcing the provisions of the narcotic laws, \$460,827.24; and for enforcing the provisions of the prohibition laws, \$2,059,774.32, a total of \$2,610,305.21. Deducting this amount from the total amount expended, \$29,647,439.71, leaves \$27,037,134.50 as the net expenditure for collecting the internal-revenue taxes for the fiscal year 1920, which is equivalent to a cost of 50 cents for each \$100 collected.

INCOME TAX UNIT.

The administration of the income and profits tax laws has been essentially a problem of organization. This task involves the annual determination, in accordance with the income and profits tax provisions of the war-revenue acts, of the correct tax liability of more than 4,000,000 individuals and corporations. In organizing for this work, the principle observed was the segregation in one unit of the Bureau of all income and profits tax matters. As far as possible, therefore, the Income Tax Unit has been made self-contained, in order that its operations may not be confused or impeded by other responsibilities of the Bureau. During whatever time the Government may continue to depend on income and profits taxes for its principal revenue it seems essential to encourage the highest degree of specialization in this important work.

The second principle observed in organizing the Income Tax Unit has been the development of uniformity of procedure through centralized operation and control. This policy was necessary in the early stages of the work because it was clearly impracticable to devise regulations capable of uniform application by many officers acting independently. Accordingly, all tax returns for the years up to and including those of 1917 were forwarded to Washington for audit and verification. Of these returns, those which involved new or difficult questions of law, accounting, or business practice were reviewed by the technical advisers of the Bureau, whose findings were approved by the Commissioner. This procedure necessarily retarded the early operations of the Bureau under the War Revenue Act of 1917, and resulted in seemingly interminable review of specific cases. All decisions made in these reviews, however, were recorded and used as the basis for organizing the Income Tax Unit in accordance with the divisions of subject matter into which these decisions fell, so that with the accumulation of precedent cases the rate of progress in the audit of returns has been steadily accelerated without loss of centralized control.

EVENTUAL DECENTRALIZATION OF OPERATIONS.

The principle of centralized operation, which was essential in the early stages of organization in order to develop uniformity of methods and decisions, has been followed without losing sight of the desirability of conforming as rapidly as possible to the eventual policy of decentralization by transfer of the audit of returns to collectors'

offices. Obviously, the ideal time for the correct determination of tax liability is the date the return is made and the ideal place is the business headquarters of the taxpayer.

The first officers of the Bureau to receive the returns filed by taxpayers are the collectors and their deputies. It is to these local officers that citizens naturally apply for advice and assistance in the preparation of returns. Although collectors are responsible for the transaction of internal-revenue business of all kinds, it has been possible in their offices, as well as in the Bureau, to provide for considerable specialization on income and profits taxes. Employees have been carefully selected and trained for this important work, so that the best possible service might be rendered to the community.

Beginning with the returns for the calendar year 1918, collectors were authorized to conduct a preliminary audit of individual returns of income not exceeding \$5,000. About 3,500,000 (or more than 80 per cent of the total number) income and profits tax returns for the calendar year 1918 were examined in the offices of the 64 collectors. Errors discovered by the deputy collectors assigned to this work were adjusted in many instances by personal conference with the taxpayers, always with less delay and correspondence than when similar adjustments are made in Washington. The returns for 1919 were handled in a similar manner, and it is believed that the result will be even more satisfactory, because the deputies have had the advantage of the previous year's experience and of considerable subsequent training and study.

Although this audit in the offices of collectors must later be reviewed by the Income Tax Unit at Washington, the increasing proficiency of the deputy collectors will eventually reduce this review to a mere matter of verification, and readjustments made in Washington will be greatly reduced in number.

To facilitate the audit of returns in the offices of collectors and to avoid the necessity for reference to Washington, the attention of the most competent advisers at the command of the Bureau has been given to the preparation of tax forms that could be accurately and completely filled out by the average taxpayer. While every possible effort has been made to satisfy the natural desire of taxpayers for brief and simple forms, it has been deemed advantageous both to the Government and to taxpayers generally that the forms provided should present, in questionnaire style, a fairly complete analysis of the law. In most cases the accurate use of these forms by the taxpayers has obviated the necessity of furnishing any additional information when the returns are taken up for audit by the Bureau at Washington.

To aid taxpayers in filling out this questionnaire type of tax form correctly, the Bureau has sought to make available to the public, as rapidly as possible and in convenient form, the regulations and decisions which constitute the official interpretations of the law. In addition to these basic rulings all current rulings of importance and general application made in specific cases are digested and published in a service of information.¹ Furthermore, carefully prepared state-

¹ Income Tax Rulings, etc., published through the Government Printing Office and distributed by subscription at the rate of \$2 per annum, by the Superintendent of Documents, Washington, D. C.

ments and analyses of the law and regulations have been made available to all newspapers and magazines, banking institutions, lawyers and accountants, officers of civic organizations, and other agencies of public information. The establishment of 186 division headquarters and 49 subdivision headquarters offices, where taxpayers are given advice as well as aid in the preparation of the several tax forms, proved of material benefit to the public in making available at various centers of population offices where their queries on taxation could be satisfactorily answered. All of these agencies have rendered invaluable cooperation in disseminating authentic information regarding the correct preparation of income-tax returns, and this assistance has greatly facilitated the work of the unit. To supplement these efforts exerted by the Bureau, a committee has been appointed to make further efforts toward a simplification of the forms. The taxpaying public has competent representation on this committee.

PERSONNEL OF INCOME TAX UNIT.

At the beginning of the fiscal year 1920 the divisional organization of the Income Tax Unit had been perfected to the point described in the last annual report. Although the number of employees had gradually increased to 2,672 and the output of completed audits had increased even more rapidly than the increase in facilities and personnel, the progress being made fell far short of the production necessary to complete the audits of the great accumulation of pending returns and claims. During the fiscal year 1920, therefore, every effort has been made to increase the efficiency and production by training employees and by securing qualified persons for appointment as auditors and clerks. Despite the loss of 979 employees through resignation and from other causes, the personnel of the Income Tax Unit has been brought, by means of 2,624 appointments, to 4,317, a net increase of 1,645 over the number at the beginning of the year.

The selection and appointment of 2,624 qualified persons for the work has not been the sole problem in the recruitment program. It was found impracticable to attract from outside the public service the grade of professional accountants who could undertake immediately upon appointment the more important and difficult auditing work. Consequently, employees for technical work were selected in large part from clerks and assistant auditors of the Income Tax Unit. In order to train and select capable employees, the training courses of the unit were elaborated and hundreds of persons within the organization were taught until qualified to handle the simpler auditing work, while many experienced auditors were given advanced training and promoted to the higher technical positions. This close relation between appointment and training led to the amalgamation of the Personnel and Training Divisions into one division—the Staff Division.

AUDIT AND ASSESSMENT.

The great importance of the audit work of the Income Tax Unit is shown by the fact that additional taxes aggregating \$376,977,-667.49 have been assessed during the year. With the prospective increase in personnel it is believed that the assessments to be made

during the fiscal year 1921 may result in the collection of \$1,000,000,000 in additional taxes.

Large as are these additional taxes collected as the result of the audit of income-tax returns, this verification work accomplishes the even more important end of laying a sound foundation for the collection of much greater revenues through voluntary payments regularly made by taxpayers. The vigilance of the Bureau in auditing the tax liability of every person and corporation satisfies the public that the law is being enforced without fear or favor and that all are being required sooner or later to pay the full amount of tax due. Year by year, as taxpayers become more familiar with the requirements of the law and as delinquency and evasion are stamped out, the auditing work will be greatly decreased and the expense of insuring the observance of the law will become comparatively negligible. The auditing program, now well in hand and rapidly approaching its greatest necessary proportions, has thus laid the groundwork for the successful administration of the income-tax laws.

CHANGES IN ORGANIZATION DURING THE FISCAL YEAR 1920.

The Audit and Administration Division, referred to in the last annual report, has been divided into two independent divisions—the Administration Division, which has charge of mails and files, space, equipment and supplies, and much of the vast amount of routine clerical work incident to the audit; and the Internal Audit Division, which conducts the audit of all returns, except those of certain special classes referred to specialized groups of auditors in the Technical Division.

The most important change in the development of the Income Tax Unit during the year was the establishment of the Field Audit Division, which was given immediate charge and control of the force engaged in the field investigation of income and profits tax cases. Before the Field Audit Division was established these revenue agents and inspectors of the field force served all units of the Bureau and investigated cases involving internal-revenue taxes of all kinds. They were then under the direction of the Chief of Revenue Agents, who was responsible directly to the Commissioner. The paramount importance for revenue purposes of the collection of income and profits taxes made it desirable to segregate the work and to assign to the Income Tax Unit all agents and inspectors best fitted to specialize in income and profits tax investigations. Some agents and inspectors were transferred to the field prohibition force and others to the offices of the several collectors, where they have been engaged mostly in sales-tax work, according to the plan described elsewhere in this report.

With the exception of estate-tax investigations, which for reasons of expediency are still assigned to the agents and inspectors, the work of these officers now pertains exclusively to income and profits taxes and is directed immediately by the Income Tax Unit through the Field Audit Division. This change has resulted in material improvement in the reports of field investigations, on which the auditors of the Income Tax Unit depend for the completion of many important cases. The efficiency of the agents and inspectors has also been in-

creased by the intensive 45-day training course conducted at Washington by the Staff Division, which all new appointees are required to complete before assignment to the field.

As a result of the increased efficiency of the field force, the accumulation of reports received from field agents, referred to in the last report, has now been disposed of, together with practically all reports received during the fiscal year 1920. This achievement has entailed the completion, by the Income Tax Unit, during the year, of the great total of nearly 700,000 audits.

COLLECTIONS FROM DEPARTING ALIENS.

During the year a large number of aliens who had had a temporary residence in the United States left this country. Many of them were unfamiliar with the revenue laws of the United States, while others were not disposed to comply with the income-tax requirements. In accordance with the plan described in the last annual report, revenue agents and inspectors assigned to the examination of these departing aliens at ports of embarkation continued their activities vigilantly during the year. Record of this work was not made prior to September, 1919, but for the 10 months' period ended June 30, 1920, the number of aliens examined was 366,122, and the additional tax collected as the result of these examinations was \$13,117,788.38. Nearly all of this work was carried on at the port of New York under the immediate direction of the supervising internal-revenue agent, by whom a trained and efficient organization of examiners has been developed. Similar examinations are now necessary at all ports, and the procedure worked out at New York is being put into operation as rapidly as possible at all points of embarkation.

It is clear that aliens departing from the United States after enjoying the opportunities afforded in this country for making and saving money should not be permitted to escape the burdens of taxation which are borne by the citizens of this country. The Bureau has not seriously regarded, therefore, the protests of aliens and their representatives against these examinations, which are merely a substitute for the review of income-tax returns at Washington and which are clearly required by the law and justified by the results obtained. Great care has been exercised, however, to see that the right of appeal to superior officers is given to every alien, and that no tax is imposed which is not clearly due on the basis of admissions of fact or on other clear evidence. Frequent inspections of this important work by officers of the Bureau have shown that the examiners, though frequently under provocation to act arbitrarily, are uniformly fair and considerate to the aliens as well as vigilant of the Government's interest.

AUDIT OF TECHNICAL CASES.

Although the greatest volume of audits are conducted and the greatest number of auditors are employed in the Internal Audit Division of the unit, the more important and difficult classes of cases are handled by the Technical Division, which, as explained in the last report, has exercised technical control of the entire audit.

The rulings developed in the audit of difficult cases reported to this division have afforded guidance to the auditors and investigators of all other divisions of the unit.

It has been expected that the work of the Technical Division would gradually decrease with the standardization of rulings and procedures. It has been necessary, however, in order to expedite the audit of large classes of difficult cases, such as those pertaining to the industries engaged in the exhaustion of natural resources, those involving fraud, those presenting claims for special relief, and consolidated returns of affiliated corporations, to organize within the Technical Division large groups of specialized auditors.

These technical auditing groups have naturally become permanently established and must be continued. On the other hand, the body of precedents and rulings which have been built up in the course of two years' operation has reduced the necessity for the technical review and special treatment of many classes of difficult audit cases. Instead of becoming primarily a reviewing body, the Technical Division has developed into a large auditing organization, caring for the classes of more difficult audits. It is now proposed, therefore, to remove from this division the functions of reviewing all audits and digesting and recording all precedents, and to place these operations in a new division to be known as the Review Division.

While the Review Division will be charged with the review of difficult audits, it is being created primarily for the purpose of enabling the Bureau to expedite the handling of the avalanche of claims for refund and abatement of income and profits taxes. It will thus supersede the present Claims Division, which will be discontinued. The auditing and examining work now performed by the Claims Division will be assigned to the Internal Audit Division and to the Technical Division, the reviewing work will go to the Review Division, and the routine clerical work and the control and routing of claims will be performed by the Administration Division.

Under this procedure, which will soon be put into effect, the great proportion of claims will be disposed of by auditors in conjunction with the audit of the returns to which they relate. All unnecessary review of the audit will then be eliminated and the delay caused by the duplication of work in treating the adjustment of claims as a matter distinct from the determination of tax, as well as the delay caused by the separate demands of auditors and of claims examiners for the same files of papers, will be prevented. This reorganization will expedite both the audit of returns and the adjustment of claims, as these functions will be conducted simultaneously and in an orderly manner.

COMMITTEE ON APPEALS AND REVIEW.

In the annual report for 1919 reference was made to the dissolution, on October 1, 1919, of the Advisory Tax Board. The members of that body were compelled to return to their own personal affairs, from which they had temporarily separated themselves, and the board was accordingly discontinued under the provision contained in the act authorizing its creation. It was recognized, however, that many difficult and complex problems would arise involving differences of opinion between taxpayers and the unit having in

charge the administration of the income and profits tax provisions of the law. Therefore, in order to assure taxpayers that their cases had received the most impartial and expert consideration possible, there was created from the Bureau personnel an organization to which such cases might be appealed.

This organization is known as the Committee on Appeals and Review. It is entirely independent of the Income Tax Unit and is responsible only to the Commissioner. Its personnel embraces three officers of the Bureau, two of whom have had many years' experience in responsible positions in the Bureau as heads of the Technical Division, Rules and Regulations Section, and the former Law Division, as well as in other positions, and one of whom is a certified public accountant with professional experience covering many years. These three men give their entire time and attention to the hearing and consideration of cases which have been appealed by taxpayers and to questions upon which the advice of the committee is asked by the Income Tax Unit. In addition, the head of the Internal Audit Division and head of the Review Division, men of long experience in the Income Tax Unit, are associate members of the committee and attend the committee conferences.

The conclusions of the individual members of the committee, after being formulated and reduced to writing, are submitted to a conference of the entire committee and when agreed to are submitted to the Commissioner in the form of recommendations. Such recommendations, when approved by the Commissioner, are accepted by the Income Tax Unit as the conclusions of the Bureau, and action is taken accordingly.

It is believed that confidence has been established among taxpayers in the fairness and impartiality of the committee's decisions, and that its work has satisfied the taxpaying public to an extent which will eliminate much useless litigation that would otherwise ensue.

From the date of its organization, October 1, 1919, to the close of the fiscal year the committee received 434 appeals by taxpayers and 148 requests for advice from the Income Tax Unit. It also received for criticism or approval 818 important letters making new rulings or new applications of old rulings, submitted by the Income Tax Unit; 100 Treasury decisions; and 121 law opinions and Solicitor's memoranda. In addition, 188 committee recommendations and 70 formal memoranda were submitted to and approved by the Commissioner and 145 informal memoranda were prepared for officers of the Bureau; 178 oral hearings on appeals were given to taxpayers or their representatives; and 39 formal committee conferences, 457 informal conferences with taxpayers, and 124 informal conferences with officers of the Department upon questions of interpretation, policy, or procedure were held.

THE UNIT DIRECTING THE ADMINISTRATION OF THE ESTATE, CAPITAL-STOCK, AND CHILD-LABOR TAX LAWS.

This unit was organized for the administration of those sections of the Revenue Act of 1918 pertaining to the tax on the transfer of estates of decedents; the annual excise tax based on the fair value of the capital stock of corporations and certain associations of a

kindred character; and the tax on the employment of children under certain ages by certain classes of industries, during certain hours, or for certain consecutive periods of time.

The exigencies of the work peculiar to each of these three classes of taxation provided by the act made necessary the organization of three separate administrative divisions, each headed by an officer highly trained in the particular line presented and in charge of a staff of specially qualified persons.

The policy of according every taxpayer a full opportunity to be heard upon all questions pertinent to his tax problems, either upon protest prior to assessment or upon claim for abatement or for refund thereafter, has been carefully observed. Many personal hearings have been granted upon request and much of the time of the head of the unit and his staff has been consumed in sitting with the review committees in informal conferences. The results are believed to have been satisfactory both to taxpayers and to the Bureau.

The reorganization of the field service has permitted closer contact between the unit and its field investigators. This has brought about a better coordination of effort and an improvement in the verification of returns for the determination of the correct tax.

PERSONNEL.

This unit has a total personnel of 483, as follows:

	Officers.	Technicians.	Clerks.	Field.
Executive Section.....	2		4	1
Estate Tax Division.....	2	42	41	228
Capital-Stock Tax Division.....	2	31	74	12
Child-Labor Tax Division.....	1	2	15	27
Total.....	7	75	134	267

¹ Includes 9 deputy collectors now engaged in this work.

² Includes 12 field deputy collectors now engaged in capital-stock and child-labor tax auditing.

TAXES COLLECTED.

The collections of estate, capital-stock, and child-labor taxes for each of the fiscal years 1919 and 1920, and the increases in 1920, are shown in the following tables:

	1919	1920	Increase.
Estate tax.....	\$82,029,983.13	\$103,635,563.24	\$21,605,580.11
Capital-stock tax.....	28,775,749.66	93,020,420.50	64,244,670.84
Child-labor tax.....		2,380.20	2,380.20
Total.....	110,805,732.79	196,658,363.94	85,852,631.15

ESTATE TAX DIVISION.

The work of examining and auditing estate-tax returns is on a current basis. The Manual of Instructions for Field Officers was revised during the year. It is proving of great assistance in expediting the work and in minimizing the necessity for additional information and supplemental investigations.

The most important part of the work of this division is of a legal nature, requiring consideration of nearly every branch of substantive law, knowledge of State statutes, and at times a study of the laws of foreign nations, especially those applicable to the administration of estates and the descent and distribution of property. All examiners and field agents are required to prove their fitness for the work by taking a course of study in estate-tax procedure and to pass an examination before being assigned to duty. A committee on appeals and review, recruited from the most experienced examiners and field agents, considers protests against valuations and interpretations of the act, as well as appeals from the findings of the claims section on claims for refund or abatement.

During the year, 10,171 returns were filed, showing tax liability in the amount of \$107,957,766.18. As the result of field investigation and divisional audit, 8,372 cases were closed, showing additional tax amounting to \$13,926,206.73. This is an increase of 3,046 cases closed and an increase of \$5,881,420.92 additional tax over the record for the fiscal year ended June 30, 1919. The total amount of estate tax collected during the year amounted to \$103,635,563.24, an increase of \$21,605,580.11 over 1919 and of \$56,182,683.46 over 1918.

A charitable bequest section was organized to consider the questions of deductions allowed under the Revenue Act of 1918. This section also considers all claims for exemption of estates of persons who died in the military service or as a result of wounds or disease contracted in the service, as well as exemptions of property taxed within five years.

The installation of a numerical filing system has expedited the work and reduced the number of employees necessary to handle it.

CAPITAL-STOCK TAX DIVISION.

The capital-stock tax (Revenue Act of 1918, Title X, section 1000) is an excise tax payable annually in advance in July, and is imposed upon corporations, joint-stock companies, associations, and insurance companies for the privilege of doing business. Some 325,000 corporations are required to file returns. The initial assessments are listed in the collectors' offices, bills rendered, and all returns are forwarded to the Capital Stock Tax Division of the Bureau for audit.

Owing to the retroactive feature of the Revenue Act of 1918, which was passed February 24, 1919, changing the rate and lowering the exemption, the work of the division was greatly increased; but the audit of returns for the taxable period ended June 30, 1919, was practically completed by January 1, 1920, except in the case of corporations delinquent in filing returns, or cases reopened by reason of additional information contained in subsequent returns or obtained by field investigation. The audit of the returns for the taxable period ended June 30, 1920, was begun immediately, and it will be completed by the time the returns filed for the coming year are arranged for audit.

Difficulty has been encountered in procuring and retaining capable examiners, owing to the qualifications required. This division has evolved into a staff of valuation experts on questions of estimating

the worth of collateral securities and all forms of property. It requires men of sound judgment, a general knowledge of business conditions, and some knowledge of law, accounting practice, and financing procedure. During the year the number of employees was reduced from 148 to an average working force of 115, and at the same time the work has been kept on a current basis.

A revision of capital-stock tax regulations has been accomplished, with a view to putting into taxpayers' hands complete information for the preparation of returns. The modifications in the regulations are not extensive, but changes of importance have been made in the provisions relative to tentative returns; to cases where a change in number of shares has occurred in the outstanding stock of a corporation during the year immediately preceding the taxable period; to questions of parent and subsidiary corporations or affiliated corporations; and to questions of classifying corporations exempt on account of personal service.

Returns are checked with those of previous years to detect inconsistencies. Periodical conferences are held between group heads and administrative officers of the division, in order that the examining force may receive the benefit of conclusions reached and the interpretations placed upon the law and regulations, from the consideration of intricate cases actually before the division for determination.

The claims section, which acts upon all claims for refund and abatement, has been enlarged and strengthened so that its work is on a current basis. The schedule below shows the status of the work in this section:

Number of claims—	Refund.	Abatement.
On hand July 1, 1919.....	363	218
Received during year.....	3,186	5,805
Disposed of during year.....	2,348	4,994
On hand June 30, 1920.....	1,201	1,029

A corps of deputy collectors was recently ordered to Washington for instruction in the capital-stock tax administration with a view to forming a field force for the investigation of questionable cases—cases where it has been impossible to reach satisfactory conclusions by correspondence—as well as to make a drive on possible delinquents.

A committee on appeals and review considers questions raised by those subject to the tax, and hearings are granted upon request of interested persons. During the year numerous hearings were held and protests to a large extent were eliminated.

The amount of capital-stock tax collected for the fiscal year was \$93,020,420.50.

Regular and additional assessments, due to increases in the rate affecting 1919 returns on hand and discoveries in the audit, amounted to \$33,771,597.69, as follows:

1917	\$12,086.25
1918	358,654.25
1919	32,020,115.36
1920	1,380,741.83
Total	33,771,597.69

CHILD-LABOR TAX DIVISION.

The section of the act levying tax upon the employment of child labor became effective April 25, 1919, two months before the beginning of the fiscal year. Consequently, the first full year of the operation of this law is now completed. The law, however, was so drawn that it did not permit taxation until the company subject to the tax completed its fiscal year, with an additional 60 days for filing returns.

The basis for the tax is employment in a mine or quarry of a child under 16 years of age; or in a mill, cannery, workshop, factory, or manufacturing establishment of a child under 14 years of age; or of a child between 14 and 16 for more than eight hours in a day or more than six days a week, or before 6 o'clock in the morning or after 7 in the evening.

The amount of tax imposed for nonobservance of these standards is 10 per cent of the annual net profits of the taxpayer. An establishment secures immunity from tax, however, by procuring, prior to employing or permitting a child to work, a certificate in which the child's age has been authoritatively established, and by observing the time limitations as stated.

During the past year Federal age certificates were issued by child-labor tax officers in five States. The issuance continued throughout the year in four States; in the fifth, certification was not begun until March 15, 1920. In a sixth State Federal age certificates were issued during the year by school authorities.

There were reported from these States 32,207 applications for age certificates. Of 18,715 cases definitely disposed of, 15,810 children, or 84.5 per cent, received certificates; and 2,905 children, or 15.5 per cent, were refused because applicants had not attained the prescribed age. The remaining applications were temporarily continued until adequate proof of age could be obtained, dropped because not prosecuted further, or are still under investigation.

The original methods of issuing certificates have been greatly improved. The influence of compulsory school laws is reflected by the sudden reduction in the number of applications at the beginning of the school term and the immediate increase when the compulsory period ends.

An employment certificate or other similar document attesting the age of a child, issued under State child-labor laws, is accepted by the Bureau in 37 States, designated by the Child Labor Tax Board as having the same force and effect as a Federal age certificate. A careful study must be made of State laws on child labor and education, of their administration, and of the forms and methods of certification before the designation of a State can be considered.

In addition, an intensive field study has been made of the certification in two States, and a more or less detailed study in three other States. From time to time instances of faulty certification practices have been referred to the proper authorities for correction.

Probably the most important piece of work undertaken was the collection by deputy collectors throughout the country of a child-labor tax information return. Questionnaires bearing upon liability to tax for the first taxable year and requiring answer under oath were submitted on this form to establishments employing children

under 17 years of age. Thousands of these questionnaires have been collected, thus spreading a knowledge of the law and bringing to the Bureau much valuable data for future use. The educational value of this distribution and its effect on the law's observance can not be overestimated.

Some employers have been misled by the fact that State child-labor laws and the Federal taxing law differ in essentials. Under the laws of some States 10 hours of employment for children instead of 8 are permitted; the time in others is extended beyond 8 hours for five days in order to provide a short working day, or perhaps a holiday, on the sixth day of the week; some States do not prohibit child labor before 6 o'clock in the morning or after 7 at night; and others do not count the time the child spends in vocational schools as part of the hours of labor. Many employers who observed every feature of the State law found themselves subject to the Federal tax law. As a consequence of the differences being called to their attention through the circulation of the information return many employers have taken the necessary steps to avoid taxation under the Federal law.

The general correspondence of the division indicates that employers are becoming better informed as to the child-labor tax law. Early in the year the questions asked often betrayed ignorance of the law. Later correspondence indicates a broader knowledge of the technical phases of the law and regulations, and the information sought is on the points of application.

Knowledge of tax liability is obtained through the activity of special inspectors, the cooperative action of State officials engaged in enforcing State child-labor laws, and inspections made by internal-revenue collectors. Child-welfare agencies also frequently report cases, and the information returns above referred to often reveal liability to tax.

During the year liability to tax has been established in the following States: Arizona, California, Delaware, Georgia, Illinois, Indiana, Louisiana, Maryland, Michigan, Mississippi, New Jersey, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, South Carolina, Tennessee, Texas, Virginia, and Washington. In most cases showing nonobservance of the law initial action has been taken for the collection of tax.

Little tax could be collected during 1920, as the law provides that the taxpayer shall be given two months after the completion of his business year in which to make a return of the amount of tax due. Furthermore, an audit of the return is necessary in every instance.

The Child Labor Tax Division has an office force of 18 employees, and a field force of 12 age-certificating agents and 15 inspectors and assistant inspectors. The services of deputy collectors in the different districts are utilized for inspection, and a special force of field auditors, directed by the Supervisor of Collectors' Offices, is to be utilized for verifying and auditing the returns upon which tax is to be assessed. In districts where child labor is most common deputy collectors have received much information and a valuable training through working with expert child-labor inspectors sent out by the division. This experience will prove valuable, since it follows that within a short time every collector will have his own corps of specially qualified men for child-labor tax work.

This division is completely organized and may be said to be on a permanent basis. Its forces are well trained, and its work is on a current basis in so far as the provisions of the act permit.

SALES TAXES—SPECIAL AND MISCELLANEOUS COMMODITIES—OCCUPATIONS AND PRIVILEGES.

Upon the enactment of the Revenue Act of 1918 a deputy commissioner was assigned to the supervision of the Sales Tax Unit. This unit was charged with the interpretation and administration of sections 500, 501, and 502, relating to the collection of the tax on transportation, telegraph, telephone, radio, cable, and other facilities; sections 503 and 504, relating to the tax on the issuance of insurance policies; section 628, relating to the tax on soft drinks and other beverages sold in bottles or other closed containers; section 630, relating to the tax on soft drinks, ice cream, and similar articles sold at soda fountains or similar places of business; sections 800, 801, and 802, relating to the tax on admissions and dues; section 900, relating to the excise tax on sales by manufacturers; sections 902 and 905, relating to excise taxes on works of art and jewelry; section 904, relating to excise taxes on sales by the dealer of wearing apparel, etc.; section 906, relating to the collection of tax on motion-picture films; section 907, relating to excise taxes on toilet and medicinal articles; sections 1001 and 1003, relating to special taxes upon businesses and occupations and upon the use of motor boats; and Title XI, relating to stamp taxes.

On December 1, 1919, the Tobacco and the Miscellaneous Divisions were placed under the jurisdiction of the Sales Tax Unit, and on January 7, 1920, these two divisions were consolidated into the "Tobacco and Miscellaneous Division." At the present time the Sales Tax Unit, in addition to the administration of the sections of the law above enumerated, is charged with the administration of the law relating to taxes on tobacco, oleomargarine and adulterated butter, mixed flour, etc.

The Revenue Act of 1918, dealing as it does with practically every important industry in the United States and affecting directly practically every individual, presents many complex questions of interpretation and procedure. The Bureau has endeavored at all times to handle these questions with due regard to business practices and the rights of the public, and has endeavored to secure all the tax to which the Government is entitled. It has been found necessary from time to time to amend the regulations covering these features of the act and return forms and other blanks have also been revised.

The revenue derived from the sales and special taxes during the fiscal year ended June 30, 1920, was largely in excess of the estimates made at the time the act went into effect.

On June 30, 1919, approximately 320,000 taxpayers were making returns of tax under these sections of the law. The number had increased to over 436,000 on June 30, 1920.

At the beginning of the fiscal year the personnel of the Sales Tax Unit numbered 255, exclusive of 57 temporary employees engaged in mailing tax returns, which work was subsequently transferred to collectors' offices, and exclusive also of the personnel in the Tobacco and Miscellaneous Divisions, later consolidated with the sales-tax

work. On June 30, 1920, there were engaged on sales-tax work proper 214 employees, a reduction of 41 during the fiscal year. This reduction was made possible by better organization and systemization of the work, and has been accompanied by a great improvement in both quantity and quality of work.

The Sales Tax Unit had on hand June 30, 1920, approximately 15,300 claims for refund or abatement of taxes or penalties and was disposing of these claims at a rate slightly in excess of the number being received. During the fiscal year ended June 30, 1920, about 60,000 were received. The correspondence work, consisting of the preparation of letters conveying rulings and interpretations of the law and regulations, was current on that date, as was also the assessment work.

The following tabular statement indicates the various taxes which have been included in the general classification of sales taxes. The date on which each tax became effective is shown, as well as the number of the return form used and the number of the regulations relating to each tax. This does not include taxes on tobacco, oleo-margarine and adulterated butter, mixed flour, etc., which are discussed separately.

Section of law.	Class of taxes.	Effective date.	Return forms.	Regulations No. —
500	Transportation.....	Apr. 1, 1919	727	49
500	Telegraph and telephone.....	do.....	727	57
503	Issuance of insurance policies.....	do.....	730	58
628	Soft drinks sold by manufacturers.....	Feb. 25, 1919	726	52
630	Sales at soda fountains and ice-cream parlors.....	May 1, 1919	726	53
800-801	Admissions and dues.....	Apr. 1, 1919	729	43
900	Manufacturers' taxes.....	Feb. 25, 1919	728	47
902	Sculpture, painting, etc.....	do.....	728-A	48
904	Luxury tax.....	May 1, 1919	728-B	54
905	Jewelry, etc., tax.....	Apr. 1, 1919	728-A	48
906	Motion-picture films.....	May 1, 1919	728-A	56
907	Toilet and medicinal articles.....	do.....		51
1001	Occupational taxes.....	Jan. 1, 1919	11 or 732	59
1003	Tax on use of boats.....	Apr. 25, 1919	732	59
Title XI	Stamp taxes.....	Apr. 1, 1919		50 and 55

For the fiscal year the total amount of taxes collected from these sources amounted to \$784,855,170.98.

TOBACCO.

The total receipts from all tobacco taxes during the fiscal year ended June 30, 1920, were \$295,809,355.44, an increase of \$89,806,263.60, or 43.6 per cent, over the preceding year. These receipts were the largest ever collected, and they exceeded the total internal-revenue receipts from all sources for any fiscal year prior to 1911 except 1901 and 1866.

The total receipts from tobacco taxes for 1920 were five times those of 1910, nearly four times the 1915 receipts, nearly three times those of 1917, and almost double the receipts for 1918.

Tobacco taxes comprised 17.1 per cent of the total receipts from all internal-revenue sources in 1916, 12.7 per cent in 1917, 5.2 per cent in 1918, 5.3 per cent in 1919, and 5.4 per cent in 1920, the decrease being due to vastly increased receipts from income and sales taxes under the Revenue Acts of 1917 and 1918.

The receipts from tobacco taxes for the period July 1, 1919, to February 29, 1920, were \$197,534,165.93, an increase over the corresponding eight months of the previous year of \$82,582,422.25, or 71 per cent. This comparison is made for the purpose of showing the results from the increased rates of tax in effect since February 25, 1919. A comparison of the receipts for the balance of each of the last two fiscal years, when the rates of tax were the same, shows an increase of \$7,223,841.35, or 7.9 per cent, due to increased consumption.

More than four-fifths of the total receipts from tax on tobacco manufactures came from seven States, as follows: North Carolina, \$108,457,156.85; New York, \$48,187,428.83; Virginia, \$20,721,138.76; Pennsylvania, \$20,195,573.49; New Jersey, \$18,742,131.26; Ohio, \$15,154,286.86; Missouri, \$12,319,733.51; total, \$243,777,449.56, or 82.4 per cent of the total receipts.

Since 1917 cigarettes have furnished the greatest revenue of any tobacco item. Prior to that time manufactured tobacco stood first as a revenue producer, with the exception of the years 1903 to 1907, inclusive, when cigars lead.

The largest increase over the preceding year for any one item of manufactured tobacco was on cigarettes weighing not more than 3 pounds per thousand. The tax collected on this item was \$151,208,481.61, an increase of \$60,767,674.88, or 67.2 per cent. The smallest increase was on little cigars, on which \$992,113.89 was collected, an increase of \$67,097.28, or 7.2 per cent.

The receipts from special taxes imposed on manufacturers of cigars, cigarettes, and tobacco amounted to \$1,032,304.15, an increase of \$243,195.12, or 30.7 per cent.

There were imported during the fiscal year 74,175,474 packages of cigarette paper subject to tax. The domestic manufacture of this paper amounted to 268,322,098 packages, and cigarette tubes to 963,628 packages. The tax on imported paper amounted to \$1,346,632.97, and on the domestic paper and tubes to \$195,113.56, or a total of \$1,541,746.53, an increase of \$521,214.51, or 51.1 per cent, over the preceding year.

The steady decrease in the number of manufacturers of cigars, cigarettes, tobacco, and snuff during the five years prior to 1919 was broken this year in respect to manufacturers of cigars and tobacco, both of which show small increases. The number of dealers in leaf tobacco also increased in 1919. The following table gives the number in each class of business on December 31 of each year from 1914 to 1919, inclusive:

Dec. 31—	Manufacturers of—				Dealers in leaf tobacco.
	Cigars.	Cigarettes.	Tobacco.	Snuff.	
	Number.	Number.	Number.	Number.	Number.
1914.....	16,754	381	2,364	68	3,164
1915.....	15,732	367	2,214	71	3,497
1916.....	14,576	311	2,085	67	4,139
1917.....	13,217	311	1,915	61	3,668
1918.....	11,291	263	1,803	60	3,092
1919.....	11,483	237	1,814	57	3,424

The leading States in the manufacture of tobacco products are as follows: In the manufacture of cigars weighing more than 3 pounds per thousand, Pennsylvania, New York, Ohio, Florida, New Jersey, and Virginia, in the order named; in the manufacture of cigars weighing not more than 3 pounds per thousand, Pennsylvania, Maryland, West Virginia, and New York; in the manufacture of cigarettes weighing not more than 3 pounds per thousand, North Carolina, New York, Virginia, and Pennsylvania; in the manufacture of cigarettes weighing more than 3 pounds per thousand, New York, which accounts for 92.7 per cent of the total manufactured; in the manufacture of plug tobacco, Missouri and North Carolina; twist, Missouri, Kentucky, and Tennessee; fine cut, Illinois and New Jersey; smoking tobacco, North Carolina, Ohio, Kentucky, New Jersey, and Illinois; snuff, Tennessee, New Jersey, and Illinois.

A general decrease is noted during the calendar year 1919, when compared with the previous year, in the production of every kind of manufactured tobacco, including snuff manufactured. The production of cigars weighing more than 3 pounds per thousand was practically the same as the year before. The production of small cigars decreased. A remarkable increase is noted in the production of cigarettes weighing more than 3 pounds per thousand, the number manufactured being 31,888,910, an increase of 8,475,053, or 36 per cent. The number of cigarettes weighing not more than 3 pounds per thousand manufactured was 53,119,784,232, an increase of 6,462,881,008, or 13 per cent.

Growers of, and dealers in, perique tobacco numbered 48 during the calendar year 1919. This class of tobacco, which is raised principally in St. James Parish, La., is so prepared and cured as to require growers and dealers to report their transactions as manufacturers of tobacco. Their operations during the calendar year 1919 were as follows:

	Pounds.		Pounds.
On hand Jan. 1, 1919	223, 394	Tax paid	6, 671
Grown	346, 760	Exported in bond	143, 468
Purchased	188, 765	Sold	372, 378
		On hand Jan. 1, 1920	236, 402
Total	758, 919	Total	758, 919

OLEOMARGARINE.

The number of factories producing oleomargarine during the fiscal year ended June 30, 1920, was 73, an increase of 7 over the preceding year. These factories produced a total of 391,279,512 pounds of oleomargarine, an increase of 32,062,941 pounds, or 8.9 per cent, over the production for 1919.

The following comparative data for the last two fiscal years indicates the trend of the industry:

	Colored oleomargarine.		Uncolored oleomargarine.	
	1919	1920	1919	1920
	<i>Pounds.</i>	<i>Pounds.</i>	<i>Pounds.</i>	<i>Pounds.</i>
Produced.....	13,848,576	15,623,746	345,367,995	375,655,766
Withdrawn tax paid for domestic use.....	5,199,758	9,277,361	343,776,167	369,343,611
Withdrawn free of tax for export.....	7,967,367	5,609,467	2,260,335	4,725,978
Withdrawn for the Government.....	713,152	699,466	660	50,936

The fact that the larger part of oleomargarine produced is uncolored, as indicated above, is due to the great difference in the rates of tax on the uncolored and colored article. The quantity of oleomargarine manufactured and consumed has been larger each year for the past decade, and the reports for the past year indicate a continued increase.

The quantity of oleomargarine produced and the number of manufacturers, wholesalers, and retailers engaged in business during the fiscal year 1920 was greater than in any previous year.

The revenue from tax on oleomargarine and the occupational taxes for the fiscal year 1920 amounted to \$3,728,276.05, an increase of \$936,444.97, or 33.7 per cent, over the amount collected during the preceding year. The collections from this source for 1920 were approximately twice the collections from the same source in 1915, when the rates of tax were the same.

The receipts from the tax on oleomargarine and the tax on the businesses of persons engaged in the handling of this product during the last two fiscal years were as follows:

Receipts from—	1919	1920	Increase.	
			Amount.	Per cent.
Oleomargarine taxed at 10 cents a pound.....	\$680,351.45	\$1,194,720.17	\$514,368.72	75.6
Oleomargarine taxed at $\frac{1}{2}$ cent a pound.....	852,888.80	930,343.25	77,454.45	9.1
Manufacturers' special tax.....	38,175.00	50,124.51	11,949.51	32.9
Wholesale dealers' special tax.....	445,366.49	494,961.92	49,595.43	11.3
Retail dealers' special tax.....	775,049.34	1,058,126.20	283,076.86	36.9
Total.....	2,791,831.08	3,728,276.05	936,444.97	33.7

Violations of the oleomargarine law to the number of 161 cases were reported during the year. Of this number 123 cases were compromised and the remainder were either prosecuted or dismissed. In addition innumerable technical violations, due mainly to ignorance or carelessness as to requirements, were discovered. As no hostility to enforcement of the law and regulations was apparent, the offenders were admonished by field officers and the cases dropped.

ADULTERATED BUTTER.

The receipts from the tax of 10 cents a pound on adulterated butter and the occupational taxes imposed upon manufacturers of, and wholesale and retail dealers in, adulterated butter amounted to \$57,023.34, a decrease of \$15,264.58 from the previous year.

Practically all these receipts represent the tax collected on creamery butter containing abnormal quantities of moisture found

on the market and held to be adulterated, under the act of May 9, 1902, and occupational taxes also collected. There are but three regularly qualified manufacturers of adulterated butter under that act, all of whom produce that product for foreign markets and withdraw for export without the payment of tax.

RENOVATED BUTTER.

The tax of one-fourth cent a pound on process or renovated butter and occupational tax at the rate of \$50 per annum on manufacturers of this product yielded for the year \$24,716.35, a decrease of \$20,003.79 in the amount from this source, compared with the collections for the previous year.

MIXED FLOUR.

The revenue from the tax on mixed flour at the rate of 4 cents per barrel and the occupational tax at the rate of \$12 per annum on makers, packers, and repackers thereof amounted to \$1,856.91. The decrease of \$15,718.16 noted in the collections is due to the return to prewar conditions after revocation of the order of the United States Food Administration, dated August 26, 1918, requiring the mixing of grains or flour in such proportions as to make the resultant product mixed flour.

COLLECTION FIELD SERVICE.

In order to increase the facilities afforded taxpayers for the transaction of their business with the Revenue Service, a comprehensive program of extension and reorganization of the field service was accomplished during the past fiscal year. A number of branch offices were established at accessible points, where taxpayers may secure assistance and advice in the transaction of their tax business. On June 30, 1920, there were 318 offices open for the accommodation of taxpayers, including 64 collectors' offices, 186 division headquarters, 49 subdivision headquarters, and 19 offices at which stamps only are sold.

During the past year 11 new collection districts were established in States which heretofore have been without separate collection districts. The establishment of collection districts in the States of Maine, Vermont, Rhode Island, Delaware, Mississippi, North Dakota, Wyoming, Idaho, Utah, New Mexico, and Nevada completes the Bureau's program of providing at least one collection district in each State.

In extending and reorganizing the service, consolidations of the following collection districts were effected: Third New York district with the second; second, sixth, seventh, and eighth Kentucky districts with the fifth; seventh Indiana district with the sixth; fifth Illinois district with the first; thirteenth Illinois district with the eighth; first Wisconsin district with the second; ninth Pennsylvania district with the first; fifth North Carolina district with the fourth.

In each instance consolidation has resulted in improved service to taxpayers through centralization of the accounting work.

Under Executive orders of March 11, 1920, the sixth Virginia district was consolidated with the second Virginia district, and a new

collection district for the State of Texas, known as the second Texas district, was created, effective July 1, 1920.

State lines have been followed in establishing the boundary lines of each district, except in those States having more than one collection district, where an effort has been made to follow the boundaries of judicial districts.

The system of accounting and office procedure which was installed in the several collection offices last year, referred to in the last annual report of Hon. Daniel C. Roper, former Commissioner of Internal Revenue, has been revised and improved. That the system is an efficient one is reflected in the fact that the records and accounts in collectors' offices are practically current and itemized accounts of taxes collectible and of abatement claims filed against outstanding taxes are available. The prompt deposit of collections with Federal reserve banks and other governmental depositories has received careful attention, with a view to making tax collections immediately available to meet outstanding indebtedness.

A corps of assistant supervisors of collectors' offices, experienced in office management and accounting procedure, has been established for the purpose of checking collectors' offices, determining the personnel needs, and assisting in effecting an efficient organization in each collector's office, and to assist collectors and chief field deputies in organizing and directing the field forces in the various collection districts.

In order to develop a trained personnel competent to advise taxpayers on the many complex problems of the tax law, there has been established a correspondence study department, which is engaged in preparing lectures and quizzes on the various topics concerning which deputy collectors should have complete knowledge. Lectures covering arithmetic, elementary bookkeeping, commercial bookkeeping, individual income tax, corporation tax, special taxes, and accountancy have been prepared. That the employees of the service are interested in self-improvement is evidenced by the fact that over 3,000 have availed themselves of this opportunity to increase their knowledge of the various phases of taxation.

Since January 1, 1920, an order has been in effect providing that appointments to all clerical office positions in the field shall be made by selection from the register of eligibles obtained as a result of examinations given by the Civil Service Commission, or by transfer from other classified positions. A second order, effective April 1, 1920, provides that all supervisory office positions shall be filled by promotion of classified office or field employees, by selection from civil-service certificates, or by transfer of classified employees from other branches of the Government service. The provision that supervisory positions shall be open to employees who have a civil-service status creates an incentive for such employees to increase their tax knowledge and general efficiency so as to be available for promotion to administrative positions and tends to retain in the service many employees whose knowledge of taxation has been gained by practical experience.

Appointments to the field force of collectors' offices are made without regard to civil-service requirements, the position of deputy collector being an unclassified one; but during the past year there has been a marked improvement in the qualifications of persons appointed

to these positions. The applicant must either have graduated from a high school; completed a course in accountancy; served as a book-keeper in charge of a complete set of double-entry books for at least a year; practiced law; or been employed in some other capacity which would give him the necessary training.

Because of the fact that the entrance requirements have been raised and because there is no assurance of permanent employment to the applicant, it has been difficult to recruit the field force of deputy collectors.

On June 30, 1919, there were 2,608 field deputy collectors in the service. Of this number, 821 resigned during the year and an equal number of new deputies were appointed in their places. It is estimated that each separation of a field deputy and the training of his successor involves a loss to the Government of approximately \$1,200. As an aid in the supervision of traveling deputy collectors, monthly reports showing in detail the work accomplished by each field deputy are required. These reports are carefully reviewed to ascertain if any employees are falling below the standard. Employees who are below the general average in efficiency are encouraged to improve in their work, and dismissals for inefficiency are made only after a thorough trial proves an incumbent to be unfit for the position.

The field force engaged in searching for delinquent taxpayers collected and reported for assessment during the fiscal year ended June 30, 1920, a total of \$42,213,889 in taxes, penalties, and compromises representing delinquent income, sales, special, and capital-stock tax returns, compared with \$20,560,334 collected and reported for assessment during the fiscal year ended June 30, 1919. This amount is in addition to the increased assessments based on reports of internal-revenue agents and inspectors and the Bureau audit of returns.

REORGANIZATION OF THE BUREAU WORK RELATING TO RECEIPTS AND DISBURSEMENTS.

The accounting work of the Bureau covering receipts and disbursements was reorganized on July 1, 1920. A Revenue Collection Division was created to deal with all internal-revenue receipts, all certificates of deposit issued to collectors of internal revenue by Federal Reserve banks and branches thereof, all quarterly accounts current of the various collectors of internal revenue, all statistical work dealing with the classification of the various collections under the many sections of internal-revenue laws, statistical tables incorporated in the Commissioner's annual report, and all other matters relating to accounts rendered under the collection bonds of collecting officers. Records are so kept that comparative data are always at hand to show how the collections in each collector's office from each of the several sources vary from month to month. Inquiries are made immediately to determine the cause whenever unusual fluctuations appear.

A Disbursement Division was created to handle all matters relating to accounts of disbursing agents. This division makes an administrative examination of all disbursements made under allowances approved by the Commissioner, advances all funds to disbursing officers, makes administrative examination of monthly accounts current and transmits them to the Auditor for the Treasury Department for

settlement, approves and forwards to the disbursing clerk of the Treasury Department bills covering bureau items and many field expenses, and keeps individual record cards of all payments made to the several field employees.

An officer designated as Supervisor of Accounts has immediate control over these two divisions. Allotments of internal-revenue appropriations are made, and a control ledger, which shows the allotments provided the several field and bureau units and incumbrances thereunder, is kept. The allowances granted under the allotments are charged against such allotments. Thus the Bureau is able to determine at all times the number of employees in the service, the annual rate of compensation, the allowance provided for travel and miscellaneous expenses, and the condition of the several appropriations. No expense can be incurred unless an allowance to cover such expense has been granted. The whole scheme of the reorganization plan has been to adopt a budgetary system of accounting whereby a complete check and control over expenditures can be had.

The Supervisor of Accounts is charged with the preparation of estimates of appropriations to be submitted to Congress, prepares statistical data and estimates of internal-revenue receipts to be furnished the Secretary of the Treasury, and submits periodical statements of receipts and disbursements to the Commissioner.

The Bureau organization is subdivided into administrative units and a complete record is kept of all changes in personnel in the respective units. Statements are prepared from month to month showing the changes in unit organization, the average compensation per employee, and fluctuations in the salary scale.

The expenditures by units are controlled and records are kept showing the cost of operation for each unit, including equipment supplied, furniture issued, and all other miscellaneous items which go to make up the overhead expense.

The work is coordinated so as to bring under one central control all allotments, the record of all allowances, the checking of all expenditures, the reporting of conditions of appropriations, and the recording in classified form of all expenditures and receipts.

A collateral administrative accomplishment of the year has been the installation by the Division of Supplies and Equipment of a more comprehensive and accurate property record system, necessitated by the unusual growth of the Bureau. The system installed requires an annual return from every accountable officer of the Bureau, and this return is verified by the Auditor of Property Returns by a comparison with previous returns and checking against intermediate issues and credits. Each item of added equipment is accounted for by means of an invoice and is posted to the returns with its description and location. The information furnished by the returns permits a more effective use of a minimum quantity of equipment.

ENFORCEMENT OF NATIONAL PROHIBITION.

The Prohibition Unit was created for the purpose of enforcing the National Prohibition Act, approved October 28, 1919. This law, known as the Volstead Act, was enacted to prohibit the manufacture, sale, and use of intoxicating beverages; to regulate the manufacture,

production, use, and sale of high proof spirits for other than beverage purposes; and to insure an ample supply of alcohol, and to promote its use in scientific research and in the development of fuel, dye, and other lawful industries. The Prohibition Unit is also charged with the enforcement of the Harrison Narcotic Law and the internal-revenue laws relating to distilled spirits, wines, and malt liquors.

Immediately upon the enactment of the law, a committee was appointed by the Commissioner of Internal Revenue to recommend a detailed plan of organization for prohibition enforcement. This committee, on November 8, 1919, submitted a recommendation for the creation of a new unit, one branch of which was to be charged with the enforcement of the penal and regulatory provisions of the law and the other to supervise the permissive features of the law covering traffic in nonbeverage liquors. This recommendation was approved by the Commissioner of Internal Revenue and the Secretary of the Treasury on November 12, 1919. The Bureau thereupon proceeded to organize departments under supervising Federal prohibition agents for the enforcement work and to create in each State an organization under a Federal prohibition director for the regulation and control of the nonbeverage traffic by a system of permits.

The selection of the force of agents and inspectors required was a very difficult matter. It was necessary to allot the appropriation to meet the demands for efficient enforcement in every State and section of the country. It was found impossible to establish a salary scale that would compare favorably with salaries paid in other occupations, and which would prove sufficiently attractive to enable the Department to secure the number and type of men needed. It has been necessary to appoint men with little or no experience in the work required of prohibition officers. Selections have been made largely from the ranks of those honorably discharged from the Army, Navy, and Marine Corps. The very small force of men available for transfer from the tax organization provided merely a nucleus for training the new men.

Prior to the enactment of the National Prohibition Act, Congress had passed several laws prohibiting the manufacture and sale during the war of intoxicating liquors for beverage purposes. The provisions of these "war-time prohibition" laws were later incorporated in Title I of the National Prohibition Act. The manufacture of distilled spirits and intoxicating malt and vinous liquors for beverage purposes from grains, cereals, fruits, and food materials was forbidden and the Commissioner of Internal Revenue was authorized and directed to prescribe rules and regulations, subject to the approval of the Secretary of the Treasury, governing the manufacture and sale of distilled spirits and the removal of distilled spirits held in bond for other than beverage purposes. A system of permits was established by the Department regulating the manufacture and sale of distilled spirits and wines. Under Title I of the National Prohibition Act, the Commissioner of Internal Revenue was charged with the enforcement of these laws. Investigations were made of violations; reports made to the United States attorneys, who were charged with the duty of prosecuting such offenders; and the manufacture and sale of intoxicating liquors for nonbeverage purposes were controlled by permits issued by the collectors in their respective districts. The enforcement of the "war-time prohibition" law was

prosecuted vigorously, and many cases of violations of that law are still pending.

One of the principal difficulties that has arisen in connection with the enforcement of the act has been the variation in point of view of United States attorneys and courts in different parts of the country. It has been found that in territory where the prohibition law has not the support of a clear majority of the citizens some of the courts are not disposed to inflict penalties adequate to deter violators from a repetition of their crimes. The district attorneys frequently have been in doubt as to the powers and duties of prohibition agents under the law, and in some instances have required prohibition officers to delay procedure in completing evidence. Cooperation with the Department of Justice is relieving this situation, and it is believed that early decisions of the courts will largely clear away these difficulties, so that in the near future a uniform plan of procedure in securing evidence, making arrests, and presenting cases to courts can be established throughout the country and a procedure adopted which will be sufficiently direct to enable the prohibition officers to achieve more satisfactory results.

Prior to the enactment of the prohibition act permits had been issued under the Revenue Acts of 1917 and 1918 to manufacturers and dealers in alcohol, whisky, etc., for nonbeverage purposes. The prohibition act extended the permit system to doctors for the prescription of intoxicating liquors for medicinal purposes and restricted the issuance of permits to manufacturers, dealers, and druggists. Permits that had been issued by collectors of internal revenue under the revenue acts were continued in force until the Department could investigate the permit holders and determine whether their operations were in conformity with the prohibition act. A definite procedure under the law for the revocation of permits granted has now been fixed, and permits held by persons who are not conducting their operations in conformity therewith are being revoked.

Both in connection with the permits granted manufacturers and the work of regulating industrial alcohol under Title III of the prohibition act, there are numerous technical questions pressing for solution. The scientific force of the Bureau has been reorganized and expanded in order that careful chemical tests may be made of preparations now upon the market that are believed to be fit for use as beverages, and the formulas of which must therefore be revised if the preparations are continued to be sold. New regulations have been issued governing the operation of industrial alcohol manufacturing plants and denaturing plants which have relieved them from many of the onerous restrictions imposed under the old revenue statutes. The Bureau fully comprehends the importance of alcohol as a raw material and solvent in general industry, and will endeavor to cooperate to the fullest degree with manufacturers of fuels, dyestuffs, paints, artificial colorings, and similar products, to the end that their business may not be hampered by restrictions which interfere with the efficient conduct of legitimate business.

ORGANIZATION OF PROHIBITION UNIT.

A permanent form of organization for the unit was put into effect December 22, 1919. Some modifications of the original plans have

been made, and the organization now consists of the following divisions and offices: Counsel and Head of the Legal Division; Supervisor of the Prohibition Field Force; Supervisor of the Narcotic Field Force; the Division of Technology; the Division of Audit and Statistics; and the Executive Division.

OFFICE OF COUNSEL AND LEGAL DIVISION.

Prior to the passage of the National Prohibition Act the activities of the Bureau in connection with various provisions of the internal-revenue laws relative to distilled spirits, fermented liquors, and wines were confined to the beverage spirits and nonbeverage alcohol divisions. In addition to the enforcement of internal-revenue laws and the assessment and collection of taxes arising thereunder, these divisions were handling the enforcement of war-time prohibition under regulations adopted pursuant to the acts establishing such war-time prohibition. When the National Prohibition Act became a law, it became apparent that a closer coordination of the work was necessary. Accordingly, when the Prohibition Unit was established, these divisions were consolidated into what is now known as the Legal Division. Because of the similarity of the work involved, the Narcotic Section was also included in the Prohibition Unit.

In order to facilitate the work of prohibition enforcement without impairing the tax activities of the Bureau, an attorney was designated as counsel to the Prohibition Commissioner, to advise him as to the proper interpretation of the laws, to have charge of civil and criminal litigation, and to confer with representatives of the Department of Justice, in order to assure cooperation between the Bureau of Internal Revenue and the Department of Justice in matters relating to prohibition. In addition to this work the counsel was directed to review all regulations, render opinions, review and approve all letters involving interpretations of the prohibition and narcotic laws, and review cases involving violations of those laws and internal-revenue laws relating to liquors.

All regulations, Treasury decisions, and mimeographs of interpretation and instruction relating to the enforcement of prohibition are prepared in this division. Taxes are assessed and penalties imposed for violations of both internal-revenue laws relating to liquors and the prohibition law, and claims for abatement and refund and offers in compromise are here passed upon and recommendations made to the Commissioner. All legal questions involving the issuance of permits under the act are determined by this division, and supervision is exercised over proceedings for the revocation of such permits. On July 1, 1920, the counsel to the Prohibition Commissioner was placed at the head of the Legal Division of the Prohibition Unit.

PROHIBITION FIELD FORCE.

The prohibition field organization comprises two classes of supervisory officers known as supervising Federal prohibition agents and Federal prohibition directors, each with a force of employees operating under their immediate control.

Supervising Federal prohibition agents.—For the purpose of detecting and suppressing violations of the prohibition laws, prosecuting violators, and securing uniform procedure, geographical administrative units were established embracing the United States, Hawaii, and Porto Rico. Each of these units is termed a “department,” and is in charge of a “supervising Federal prohibition agent.” Each supervising agent is in charge of a mobile policing force designated as “Federal prohibition agents.” There are 12 departments operating under 12 supervising Federal prohibition agents, with an aggregate force of 948 Federal prohibition agents and 103 office clerks.

Federal prohibition directors.—In each State, and in Hawaii and Porto Rico, a Federal prohibition director is in charge of the administration of the permissive features of the National Prohibition Act. It is also the duty of this officer to stimulate the efforts of State and local officers, and to determine the character and extent of essential Federal assistance. The directors’ subordinate officers are known as “Federal prohibition inspectors.” There are 50 Federal prohibition directors now functioning, assisted by 204 Federal prohibition inspectors and an office force of 233 clerks.

Warehouse agents.—The act of March 6, 1920, authorized the appointment of guards to be stationed at bonded warehouses throughout the United States. Effective May 1, 1920, all unassigned storekeeper-gaugers who had been performing guard duty at such warehouses, and who were qualified, were transferred to the position of warehouse agents.

On June 30, 1920, there were 428 warehouse agents in the service. Their specific duty is to protect stored spirits from theft and accidental loss.

NARCOTIC FIELD FORCE.

Early in the calendar year 1920 the field force formerly employed under the direction of the several revenue agents in charge of the enforcement of the Harrison Narcotic Act was placed under the direction of the 12 supervising Federal prohibition agents.

In order to establish a more effective administration of the narcotic laws the office of “Supervisor of the Narcotic Field Force” was created in February of the present year and an examination was held by the Civil Service Commission to establish an eligible register from which men of technical training and investigative skill could be selected for this important field work. There are, at the present time, 170 men actively engaged under the Supervisor of the Narcotic Field Force. The increase in the number of violators apprehended and successfully prosecuted and the resultant decrease in the number of persons illicitly dealing in these drugs has demonstrated the wisdom of the policy being pursued.

While exact data showing any marked decrease in the number of addicts in the country are not obtainable at this time, it is an established fact that the activities of the Bureau have resulted in a decrease in the amount of narcotic drugs sold and used.

As the result of decisions of the Supreme Court in the cases of Doremus and Webb and Goldbaum, in which it was held that

the furnishing of narcotic drugs to an addict merely to satisfy his addiction, and not in the bona fide medical treatment of disease or addiction, is an indictable offense, many physicians, fearing the operation of the law, refused to use narcotics in their practice. The Bureau was flooded with pleas for "permits" from habitual users of narcotics. In many of these cases the continued use of narcotics seemed necessary to preserve the health and lives of the applicants, but there is no authority of law for the issuance of "permits" in such cases. During the month of July, 1919, instructions were issued to collectors of internal revenue to confer with the United States attorneys and local health authorities in their districts with a view to devising some plan whereby bona fide narcotic cases might be properly treated.

As a temporary expedient to relieve this seemingly critical situation a number of narcotic clinics or dispensaries were established. Some of the so-called clinics that have since been established throughout the country without knowledge or sanction of this Bureau apparently were established for mercenary purposes or for the sole purpose of providing applicants with whatever narcotic drugs they required for the satisfaction of their morbid appetites. Little or no attempt was made by some of these private clinics to effect cures, and prominent physicians and scientists who have made a study of drug addiction are practically unanimous in the opinion that such clinics accomplish no good and that the cure of narcotic addiction is an impossibility unless accompanied by institutional treatment. Steps are now being taken to close these clinics, which are not only a menace to society but a means of perpetuating addiction. In many cases their continued existence constitutes a flagrant violation of the law.

An important step looking to the treatment of narcotic addiction was taken by the introduction of a bill in the Senate granting aid from the Federal Government to the several States in the prevention and control of drug addiction, the cure and treatment of drug addicts, and for other purposes. (S. 2785, reported Aug. 15, 1919, and with amendments Oct. 1, 1919.) Unfortunately this bill was not enacted at the last session of Congress. Attention is directed to recommendations made in previous annual reports for such legislation. The necessity has been made more acute by the interpretation of the law by the United States Supreme Court, as above indicated. The enactment of this bill or a similar measure at the earliest possible date is desirable.

DIVISION OF TECHNOLOGY.

Under the present organization of the Prohibition Unit, the following functions are assigned to the Division of Technology:

The analysis of all samples taken in connection with the administration of the internal-revenue and prohibition laws; the issuance of permits and the subsequent control of the operations of industrial alcohol plants, bonded warehouses, denaturing plants, medicinal whisky distilleries, rum distilleries, fruit-brandy distilleries, dealcoholizing plants, and bonded wineries; the issuance of permits for the use of intoxicating liquor under the National Prohibition Act, in-

cluding the importation and exportation of the same (the division does not issue permits to transport liquor or to prescribe liquor); the issuance of all permits for the use of alcohol free of tax as provided for in Title III of the National Prohibition Act; and the administration of the industrial alcohol and denatured alcohol laws in so far as they relate to the manufacture, transportation, and use of the alcohol.

Chemical work.—The chemical work of the Bureau of Internal Revenue is centered in the main laboratory at Washington. Four branch laboratories have been established at central points in the field in order to expedite the analysis of samples in prohibition violation cases. A large part of the time of the chemists in the laboratory at Washington and in the field laboratories is taken up in attendance at court. There has been a marked increase in the number of cases resulting in criminal prosecutions where the testimony of a chemist is required. The following table shows the number and character of the samples analyzed by the main laboratory at Washington during the past fiscal year:

Butter.....	8,804
Oils.....	2,406
Oleomargarine.....	.46
Narcotics.....	1,354
Fermented beverages.....	3,155
Distilled spirits.....	2,331
Medicinal preparations (nonbeverage).....	3,446
Denatured alcohol.....	134
Miscellaneous.....	84
Total	21,760

This is an increase of 3,374 samples received and analyzed over the corresponding number for the fiscal year ended June 30, 1919, and is the largest number handled in any fiscal year.

The following table shows the number of samples analyzed in the various branch laboratories since their establishment:

San Francisco (from Dec. 10, 1919, to June 30, 1920).....	251
Chicago (from Nov. 5, 1919, to June 30, 1920).....	2,119
New York (from Oct. 31, 1919, to June 30, 1920).....	1,764
Columbus. (Opened June 21, 1920.).....	

Nonbeverage alcohol.—In the period from July 1, 1919, to January 16, 1920, the division issued only those permits which were submitted for approval by the various collectors of internal revenue. The total number of permits issued by the collectors during this period is not available. Since January 16, 1920, the division has issued a total of 62,759 permits. This does not include permits to transport or to prescribe intoxicating liquor, which are issued by the various Federal prohibition directors. During the same period 395 applications were disapproved, 294 permits were revoked, and 4 permits were voluntarily surrendered. A corresponding number of bonds was examined.

The following table shows the number and classes of permits issued in the period from January 16 to June 30, 1920:

A permits, to manufacture.....	242
B permits, to sell.....	3,336

C permits, to transport.....	(¹)
D permits, to import and use.....	18
E permits, to import and sell.....	145
F permits, to export.....	10
G permits, to export and sell.....	312
H permits, to use.....	46, 646
I permits, to use and sell.....	11, 501
J permits, to prescribe.....	(¹)
K permits, to manufacture vinegar and to produce intoxicating liquor for conversion into same.....	187
L permits, to operate dealcoholizing plant.....	211
M permits, to sell flavoring extracts.....	2
N permits, to procure alcoholic preparations.....	88
O permits, to rectify.....	61
Total number issued.....	62, 759

Tax-free alcohol.—Under Title III of the National Prohibition Act, the use of alcohol free of tax was very much extended, with a consequent increase in the number of permits issued. The following statement shows the number of permits issued for the withdrawal of alcohol free of tax by the United States, States, municipal subdivisions, hospitals, colleges, and scientific laboratories:

Under sections 3297 and 3464, Revised Statutes, from July 1, 1919, to June 30, 1920.....	3, 047
Under regulations 61, from Apr. 1 to June 30, 1920.....	490

All outstanding permits issued under section 3297, Revised Statutes, will in due course be replaced by permits issued under the National Prohibition Act. Permits now issued under section 3464, Revised Statutes, will also be replaced by permits issued under the National Prohibition Act, in so far as they relate to alcohol.

Industrial alcohol and denatured alcohol.—When the National Prohibition Act, Title III, became effective, on October 28, 1919, all distilleries and industrial distilleries producing alcohol were required to requalify as industrial alcohol plants. These changes necessitated a large amount of correspondence. There were on June 30, 1920, 37 industrial alcohol plants, compared with 47 distilleries operating prior to October 28, 1919. At the close of the fiscal year 1919 there were 74 distilleries operating. There were in operation on June 30, 1920, 24 denaturing plants, compared with 45 denaturing warehouses and 1 redenaturing plant operating at the close of the fiscal year 1919. The number of bonded manufacturers using specially denatured alcohol increased during the fiscal year 1920 over those bonded for such use during the fiscal year 1919, indicating an increased use of industrial alcohol.

DIVISION OF AUDIT AND STATISTICS.

The Division of Audit and Statistics in the Prohibition Unit is charged with the preparation of assessment lists and the accounting in connection therewith; also the examination and audit of returns and accounts relating to distilleries, general and special bonded warehouses, industrial and denatured alcohol plants, dealers in and manufacturers using denatured alcohol, wineries, breweries, dealcoholizing plants, liquor dispensed on physicians' prescriptions, wine for sacramental purposes, liquors used in manufacturing and compounding, liquors received by physicians, hospitals, etc., and narcotics.

¹ Issued by Federal prohibition directors.

Distilled spirits.—During the fiscal year ended June 30, 1920, there were produced from materials other than fruit 99,615,792 taxable gallons of distilled spirits, an increase of 639,673.7 gallons compared with the quantity produced during the preceding fiscal year.

Of this class of spirits there were removed from bonded warehouses on payment of tax 28,220,909.6 taxable gallons, a decrease of 53,377,176.9 from the quantity tax paid during the preceding fiscal year. This decrease resulted from the prohibition of the use of spirits for beverage purposes.

The quantity of spirits remaining in distillery and general bonded warehouses and bonded warehouses under Title III of the National Prohibition Act at the close of the fiscal year 1920 was 55,863,745.2 gallons, a decrease of 16,494,405.9 gallons from the quantity (72,358,-151.1 gallons) in bond at the close of the preceding fiscal year.

The quantities of distilled spirits produced, withdrawn, and remaining in bond during the years ended June 30, 1910 to 1920, are summarized in the following statement:

Fiscal year.	Produced.	Withdrawn taxpaid.	Remaining in warehouse.
1910.....	156,237,526.4	126,384,726.7	233,508,674.6
1911.....	175,402,395.5	132,058,636.5	249,279,346.6
1912.....	178,249,985.0	133,259,147.6	263,785,831.8
1913.....	185,353,383.1	140,289,424.8	276,784,540.0
1914.....	174,611,645.0	136,269,752.6	282,036,460.2
1915.....	132,134,152.2	121,498,325.0	253,668,341.3
1916.....	249,123,921.8	133,025,969.4	232,402,878.3
1917.....	277,834,366.6	160,740,210.6	194,832,682.6
1918.....	173,476,473.7	87,787,823.5	158,959,264.5
1919.....	98,976,118.3	81,598,086.5	72,358,151.1
1920.....	99,615,792.0	28,220,909.6	55,863,745.2

Denatured alcohol.—During the fiscal year 1920 there were withdrawn from bond, free of tax, for denaturation, 45,640,948 proof gallons of alcohol and rum, against 60,399,308 proof gallons withdrawn for this purpose during the previous year. The following statement shows the quantity of spirits denatured during each fiscal year since the enactment of the denatured alcohol law of June 7, 1906:

Fiscal year.	Denaturing warehouses.	Completely denatured (wine gallons).	Specially denatured (wine gallons).	Total.	
				Wine gallons.	Proof gallons.
1907.....	8	1,397,861.16	382,415.19	1,780,276.35	3,084,950.8
1908.....	12	1,812,122.38	1,509,329.35	3,321,451.73	5,640,331.2
1909.....	12	2,370,839.70	2,185,579.15	4,556,418.85	7,967,736.4
1910.....	12	3,076,924.55	3,002,102.55	6,079,027.10	10,605,278.7
1911.....	14	3,374,019.92	3,507,109.94	6,881,129.86	11,682,887.9
1912.....	14	4,161,268.56	3,933,246.44	8,094,515.00	13,955,903.8
1913.....	21	5,223,240.78	4,608,417.76	9,831,658.54	16,953,552.8
1914.....	25	5,213,129.56	5,191,846.03	10,404,975.59	17,811,078.2
1915.....	23	5,386,646.96	5,599,821.81	13,986,468.77	25,411,718.1
1916.....	33	7,871,952.82	38,807,153.56	46,679,106.38	84,532,253.8
1917.....	44	10,508,919.34	45,170,678.29	55,679,597.63	93,762,422.7
1918.....	49	10,328,454.61	39,834,561.48	50,163,016.09	90,644,722.8
1919.....	45	9,976,720.62	28,294,218.97	38,270,939.59	60,399,308.9
1920.....	52	13,528,402.99	15,307,947.18	28,836,350.17	45,640,948.6

The decrease in the use of denatured alcohol during the year resulted from the greatly reduced demand since the close of the war for alcohol to be used in the manufacture of munitions.

Narcotics.—Commencing with February, 1920, importers and manufacturers, as well as wholesale dealers, registered under the act of December 17, 1914, as amended, were required to render monthly returns of transactions in narcotics. The returns are not as yet sufficiently complete to permit of the compilation of statistical information. The value of these monthly returns in uncovering additional special-tax and stamp-tax liabilities, as well as in assisting the Department in obtaining a more general observance of the law by persons who have registered under the Harrison Narcotic Act, has already become apparent.

The collections under this law for the fiscal year 1920 were \$1,513,919.50, an increase of \$787,782.71 over the collections of the previous year, which were \$726,136.79. This increase was due in part to the increased rates of occupational tax, which became effective on February 25, 1919, and were in effect during the entire fiscal year 1920, and in part to the collection of the stamp or commodity tax of 1 cent an ounce on all narcotic products imported into or produced in the United States, which tax was likewise in effect during the entire fiscal year.

During the year 857 persons were registered under the Harrison Narcotic Law as importers and manufacturers, 3,658 as wholesale dealers, 46,316 as retail dealers, 168,878 as practitioners, and 20,057 as dealers in and manufacturers of untaxed narcotic preparations, or a total of 239,766 registrants.

At the beginning of the year 11 cases of violations of the act were pending against importers and manufacturers, 16 against wholesale dealers, 211 against retail dealers, 637 against practitioners, 3 against dealers in and manufacturers of untaxed narcotic preparations, and 520 against persons not entitled to registration under the law, or a total of 1,398 cases. On account of failure to register and pay special tax as required under the act, the penalties imposed by section 3176 of the Revised Statutes, as amended, were assessed during the year against 240 importers and manufacturers, 901 wholesale dealers, 4,281 retailers, 26,805 practitioners, and 15,809 dealers in and manufacturers of exempt preparations, or a total of 48,036 persons. During the year violations other than delinquent payment of special tax were reported against 35 importers and manufacturers, 61 wholesale dealers, 473 retail dealers, 886 practitioners, 117 dealers in and manufacturers of exempt preparations, and 1,905 persons not qualified to register under the act, or a total of 3,477 violations. Accordingly, a total of 50,486 violations of all kinds accrued during the year against registered persons, and 2,425 violations against persons not mentioned in the act, principally illicit dealers, peddlers, etc.

Of the registered classes 134 convictions were had, 40 cases resulted in acquittals, 515 cases were settled by compromise, 46,663 cases were closed upon payment of the special tax and penalty, 1,172 cases were dropped upon satisfactory evidence of the technical or unintentional character of the violations, and 1,962 cases were pending at the close of the year. Of the unregistered classes, 774 persons were convicted, 89 persons were acquitted, 31 cases were compromised, 204 cases were dropped because of the impossibility of obtaining sufficient evidence to convict, and 1,327 cases were pending at the close of the year.

Special-tax penalties amounting to \$112,275.37 were assessed during the year and miscellaneous collections under the act, including 5 per cent penalties, interest, offers in compromise, fines, etc., amounted to \$150,745.69.

At the beginning of the year 95 cases of violations of the act of January 17, 1914, regulating the manufacture of smoking opium, were pending, and 455 cases were reported during the year, or a total of 550 violations. During the year 211 persons were convicted, 4 persons were acquitted, compromises were accepted in 86 cases, 50 cases were dropped, and 199 violations were pending at the close of the fiscal year. Fines amounting to \$5,903.72 were collected from violators of this act and \$4,395 was collected from compromises.

Intoxicating liquors in possession January 17, 1920.—Section 33, Title II, of the National Prohibition Act provides that—

Every person legally permitted under this title to have liquor shall report to the Commissioner within ten days after the date when the eighteenth amendment of the Constitution of the United States goes into effect, the kind and amount of intoxicating liquors in his possession.

The total number of inventories filed in compliance with the provisions of the above section was 77,711, which showed 2,233,021.2 proof gallons of distilled spirits and 1,749,474.3 wine gallons of wines, liqueurs, cordials, and similar compounds in possession on January 17, 1920.

Liquor tax assessments.—During the fiscal year ended June 30, 1920, the assessment of such taxes as are within the administration of the Prohibition Unit aggregated \$19,345,781.47, of which \$10,976,648.20 represents assessments of liquor-law liabilities made since January 16, 1920. Assessments of the "double tax" imposed by section 35 of the National Prohibition Act amounted to \$1,849,605.24 and \$2,682,000 was for "additional penalties" provided by that section. Assessments of narcotic taxes (including miscellaneous collections of 5 per cent penalties, interest, etc.) amounted to \$263,021.06.

The amounts assessed, covering the various kinds of liabilities, are as follows:

	July 1, 1919– Jan. 16, 1920.	Jan. 17–June 30, 1920.	Total.
Double tax, section 35, National Prohibition Act.....		\$1,849,605.24	\$1,849,605.24
Additional penalties, section 35, National Prohibition Act		2,682,000.00	2,682,000.00
\$1,000 special tax, section 1001, Revenue Act of 1918.....	\$2,748,853.51	1,742,355.58	4,491,209.09
Various special taxes (including penalties) under existing internal-revenue laws relating to liquors.....	1,046,596.31	523,589.86	1,570,186.17
Taxes assessed on distilled spirits, wines, cordials, etc.....	3,483,220.44	3,384,034.70	6,867,255.14
Miscellaneous collections of 5 per cent penalties, interest, offers in compromise, etc.....	827,441.95	795,062.82	1,622,504.77
Liquor taxes.....	8,106,112.21	10,976,648.20	19,082,760.41
Narcotic taxes (special taxes, penalties, interest, etc.).....			263,021.06
Total.....			19,345,781.47

Fermented liquor.—During the fiscal year ended June 30, 1920, there were 583 breweries in operation, compared with 669 at the close of the preceding fiscal year. The quantity of fermented liquor produced during the year aggregated 9,231,280 barrels, compared with

27,712,648 barrels during the previous year. This decrease in the number of breweries and in the output of fermented liquor was brought about by legislative restrictions that became effective during the year. The act of November 21, 1918, prohibited the manufacture of fermented liquors on and after May 1, 1919, and the National Prohibition Act of October 28, 1919, prohibited the manufacture for beverage use of fermented liquors containing one-half of 1 per cent or more of alcohol by volume after the approval of the act.

Wines and cordials.—Revenue from taxes on wines and cordials in 1920 amounted to \$4,017,596.82, compared with \$10,521,609.14 in 1919, \$9,124,368.56 in 1918, and \$5,164,075.03 in 1917. The total production amounted to 20,082,458.49 gallons for the fiscal year ended June 30, 1920, of which 18,747,143.15 gallons had not over 14 per cent alcoholic content; 860,540.34 gallons had over 14 per cent but not over 21 per cent alcoholic content; and 474,775 gallons had over 21 per cent and not over 24 per cent alcoholic content. On June 30, 1920, there were 17,677,370.49 gallons of wine on hand, compared with 17,521,147.57 gallons on hand June 30, 1919.

During the past fiscal year the production of both dry and fortified wines was much less than in the preceding year. There were on hand in bonded wineries and storerooms June 30, 1920, 156,222.92 gallons in excess of the quantity on hand June 30, 1919. The falling off in the production of wine and the increase in the quantity on hand at the end of the fiscal year were due to the restrictions imposed by the prohibition laws.

EXECUTIVE DIVISION.

The Executive Division handles all matters relating to space and requisitions for supplies and equipment, the preparation of forms, and questions relating to personnel.

A central mail control was established May 1, 1920, through which all incoming and outgoing mail passes. This facilitates distribution, provides means for follow-up and location of incoming mail, and expedites the departure of outgoing mail. During the two months ended June 30, 1920, 80,506 pieces of incoming mail, 106,039 pieces of outgoing mail, and 1,306 telegrams were handled.

A stenographic reserve was created January 26, 1920, to which all stenographers and typists not engaged on special duties occupying their entire time were assigned. This reserve, consisting of 45 employees, produced from date of organization to June 30, 1920, 88,613 letters relating to enforcement of the prohibition and narcotic laws.

SOLICITOR OF INTERNAL REVENUE.

There has been no tax legislation since the passage of the Revenue Act of 1918, but the questions for the consideration of the Solicitor's Office arising under the old acts have multiplied rapidly, due in large measure to business adjustments since the war. The additional work has necessitated an increase in the legal and clerical forces of the office from 94 in July, 1919, to 115 at the end of the fiscal year.

Careful consideration has been given to the selection of attorneys qualified for the particular work of the office, especially as it relates

to the preparation of opinions, interpretations of the law, and the preparation of briefs and memoranda of authorities for assistance of United States attorneys in the trial of cases.

The work of the Solicitor's Office consists of the handling of cases referred to it by different administrative units of the Bureau of Internal Revenue, by the Commissioner directly, and by United States attorneys where cases in litigation are involved or criminal action anticipated. In a few instances questions arise and are considered in the Solicitor's Office itself, and this is true especially when from a study of the law it becomes obvious that prevailing regulations or rulings of the Bureau of Internal Revenue require further consideration. The field covered embraces almost all kinds of Federal taxation and may be summarized as cases in suit, criminal and civil; income and profits tax cases from the Income Tax Unit; memoranda from the Committee on Appeals and Review; estate, capital-stock, and child-labor tax questions; documents and transactions, public utilities, insurance, sales, occupations, beverages, luxury, tobacco, oleomargarine, and special taxes; the more important prohibition questions; distilled spirits and narcotics; accounts, supplies, equipment, leases, etc.; matters referred by the Commissioner; and consideration, preparation, and revision of Treasury decisions, and of regulations, mimeographs, and other formal compilations. In the conduct of the work of the Solicitor's Office numerous conferences are held with the technical experts of the Bureau, with taxpayers or their counsel, and with the Department of Justice and other branches of the Government.

A complete reorganization of the Solicitor's Office was effected on March 1, 1920, under which there are now five divisions, as follows: Interpretative Division I, Interpretative Division II, Penal Division, Civil Division, and Administrative Division. The functions of the various divisions are as follows:

Interpretative Division I passes on all questions arising in connection with the administration of the income, excess-profits, and estate-tax laws, and on all Treasury decisions, regulations, and mimeographs having to do with those laws; edits confidential bulletins; reviews memoranda and recommendations of the Committee on Appeals and Review; and passes on numerous letters involving technical questions prepared by the Administrative Division.

Interpretative Division II deals with the same questions arising under the transportation, insurance, and excise-tax laws generally, including sales, tobacco, special tax, admissions and dues, beverages, stamp taxes, and child labor, and with administrative and general provisions of the law. This division also handles compromise cases and claims.

The Penal Division has charge, where the Bureau of Internal Revenue is concerned, of all criminal cases, all questions of penalties, pardons and parole, rewards, distraints, sale of forfeited real estate, conferences with United States attorneys in the trial of criminal cases, preparing indictments and such briefs and memoranda of authorities as are necessary in such cases.

The Civil Division has charge of matters affecting the Bureau of Internal Revenue and having to do with civil cases actually in suit. It prepares trial and court briefs, holds personal conferences both in Washington and in the field with United States attorneys, and assists

United States attorneys in the trial of cases involving internal-revenue matters whenever the attorneys request such assistance. It also holds conferences with the Department of Justice and with taxpayers concerning such cases, both pending and prospective.

The Administrative Division has under its charge all administrative matters in the office. These include the library, mails and files, supplies and equipment, personnel, editorial work, and the approval of leases on buildings and the examination of bonds.

To aid the Solicitor in important cases that come before the office and secure the composite judgment of five lawyers on the legal questions involved, a conference committee has been organized, composed of the heads of the first four divisions and one other lawyer, the latter of whom gives his entire time and attention to such committee and acts as the chairman thereof. This conference committee passes upon all briefs to be filed in court, all law opinions, Solicitor's memoranda, Treasury decisions, amendments to regulations, mimeographs, etc. It is also consulted before prosecution is recommended in any criminal case. This committee has aided the Solicitor's Office materially in reaching correct conclusions upon the construction of the internal-revenue laws.

The Committee on Appeals and Review in its consideration of particular cases often finds it necessary to call to its assistance the Solicitor's Office in determining questions of law or mixed questions of law and fact involved in such cases, so that an appropriate decision may be reached by the committee. At such times the committee prepares a memorandum of the question involved, and this is referred to the Solicitor's Office for attention. During the year 256 memoranda and recommendations by the Committee on Appeals and Review were submitted for the attention of the Solicitor's Office.

Fifty-five Solicitor's opinions were issued from May 21 to June 30, 1920, and from July 1, 1919, to May 21, 1920, there were prepared and promulgated by the Solicitor's Office 343 Solicitor's memoranda and 176 law opinions.

The increased work in the office is particularly noticeable in the number of claims and offers in compromise received. During the year 128,160 offers in compromise were received. Of this number 95,250 were accepted, and the amount of money covered into the Treasury of the United States through these acceptances was \$2,858,944.66. At the close of the year there were 23,062 offers in compromise pending. Twelve thousand four hundred and seventeen claims for abatement and refund were passed upon by the office during the fiscal year.

The work in the Civil and Penal Divisions, where matters in litigation are considered, is increasing steadily, approximately 145 cases coming into the office every month.

The following is a statement of internal-revenue and prohibition cases handled by the district courts of the United States during the fiscal year ended June 30, 1920, as furnished this Bureau by the Attorney General. The number of cases reported as pending on July 1, 1919, do not agree with the number of cases shown in the annual report of the Attorney General for the fiscal year 1919, as figures have been corrected to conform to subsequent reports of the various district attorneys. In addition to the cases reported under

the National Prohibition Act, a great many indictments brought under internal-revenue laws (which cases are shown under that head in the statement), also contain counts under the National Prohibition Act, but only those cases brought solely under the latter act are so shown under that heading.

	Internal-revenue suits.		Prohibition suits.	
	Civil.	Criminal.	Civil.	Criminal.
Number cases pending July 1, 1919.....	705	5,702	0	0
Number cases commenced during fiscal year ended June 30, 1920....	487	8,401	611	7,291
Number cases terminated during same period.....	377	6,765	92	5,095
Number cases pending at close of business on June 30, 1920.....	815	7,338	519	2,196

A docket has been installed in the Solicitor's Office, and all court cases, both criminal and civil, involving internal-revenue laws are now being entered upon such docket so that the status of every case may be instantly available.

The Civil Division is in constant touch with every civil internal-revenue case pending throughout the United States and is in active communication with the United States district attorneys, giving them aid and advice with respect to every step of such litigation. The United States attorneys, recognizing the especial fitness of the division to pass upon tax questions, in many instances refrain from making any move without the consideration of the Solicitor's Office, and frequently special requests are received for the special appearance of one of our attorneys to participate in the presentation of cases both in the district courts and circuit courts of appeals. In furtherance of this policy, the Department of Justice has recognized the assistance which can be rendered by this Bureau and has accordingly furnished to several special attorneys individual letters from the Attorney General to all United States attorneys looking toward complete cooperation of the Bureau with such United States attorneys in the conduct of internal-revenue cases. All important cases are carefully briefed in the Solicitor's Office and a copy of such brief furnished to the United States attorney for his assistance. Questions of error and appeal are considered for the assistance of the Department of Justice, and when cases reach the Supreme Court of the United States briefs showing the view of this Department are submitted to the Department of Justice.

Claims for reward for information relative to violations of the internal-revenue laws, submitted under the provisions of circular 99, revised, were presented and disposed of as follows:

Claims pending July 1, 1919.....	3
Claims presented during the fiscal year ended June 30, 1920.....	6
Total.....	9
Claims disposed of during the fiscal year ended June 30, 1920.....	6
Claims pending July 1, 1920.....	3

It is not the policy of the Bureau to make frequent use of the power to pay rewards conferred by section 3463, Revised Statutes, and

Internal-Revenue Circular No. 99 (revised), promulgated under said section of the Revised Statutes. Only in particular cases where it is clear that audits or other investigations of internal-revenue officers would not have disclosed the omission, and when the informant gives clear and definite information on which assessment can be made, is a reward made. It is the view of the Bureau that it is the duty of every good citizen to furnish to his Government any information which would be to its advantage without pecuniary compensation. The amount allowed during the fiscal year ended June 30, 1920, was \$1,006.97.

Parole cases arising under the internal-revenue laws pending July 1, 1919.....	28
Parole cases arising under the internal-revenue laws and the National Prohibition Act received during the fiscal year ended June 30, 1920-----	374
Total-----	402
Cases disposed of during the fiscal year ended June 30, 1920-----	318
Cases pending July 1, 1920-----	84

The President has power under the Constitution to grant pardons. (Art. II, sec. 2.) It not infrequently occurs that an applicant, denied the benefit of parole, applies for Executive clemency. As a rule, this Bureau does not recommend a pardon in cases where there is no question as to the prisoner's guilt, as to do so wipes out the offense and cancels any pecuniary fine or penalty imposed by the court, in addition to the term of imprisonment.

Pardon cases arising under the internal-revenue laws pending July 1, 1919-----	1
Pardon cases arising under the internal-revenue laws and the National Prohibition Act received during the fiscal year ended June 30, 1920-----	160
Total-----	161
Cases disposed of during the fiscal year ended June 30, 1920-----	137
Cases pending July 1, 1920-----	24

During the fiscal year ended June 30, 1920, the interest of the United States in and to realty acquired in three cases was sold and quitclaim deeds were executed to the purchasers.

The United States had acquired title to one tract of land, which was subsequently redeemed by the former owners prior to execution of a deed to the United States, and the collector of internal revenue for the district in which the case arose reported that he had filed discharge of the lien in favor of the delinquent taxpayers.

The number of real estate cases pending June 30, 1920, was 26. In 18 cases the Government acquired title to the lands by purchase on sales under distraint by collectors; in 3 by purchase on sales under execution by United States marshals, and in 5 by judgments of forfeiture of United States courts.

A suit in ejectment is pending in the northern district of Alabama as to one tract of land forfeited to the United States on November 3, 1911, by decree of the United States District Court for the Northern District of Alabama.

No acceptable offers for the right, title, and interest of the Government in and to the lands thus acquired and now claimed by the United States under the provisions of the internal-revenue laws have

thus far been obtainable and the lands are not of sufficient value to warrant this office in incurring any expense for advertising until bona fide offers for such realty shall have been received. The appropriate collectors of internal revenue have been instructed to give such publicity to the desire of the Bureau to sell these lands as can be given without expense to the United States.

A new compilation of internal-revenue laws superseding the issue of 1911 was released during the past year. This was prepared under the special supervision of the Solicitor's Office and is a completely annotated compilation of all internal-revenue laws down to May 1, 1920.

It has been gratifying to note that the decisions of Federal courts during the year in cases involving the internal-revenue laws have for the most part sustained positions taken by the Bureau. A synopsis of the more important court decisions arising out of internal-revenue legislation is presented on page 1528. Of these cases 20 are now pending in the Supreme Court of the United States.

Consideration of prospective legislation by the Congress has entailed a great deal of work by this office. The drafting of new legislation and the rendering of opinions to committees and appearance before them of the Solicitor or other attorneys was a common occurrence while the Congress was in session. Much good came of the conferences and association with the committees of Congress, which it is hoped will bear fruit in needed legislation during the coming session of Congress.

The work of the Solicitor's Office is practically current. It is only in cases where considerable research is required or personal interviews with taxpayers are deemed desirable that matters remain there longer than 10 days.

A statement of moneys paid to collectors from in rem actions, judgments recovered in civil suits, fines and penalties imposed in criminal actions, and costs, as reported by clerks of the United States courts, for the year ended June 30, 1920, is printed in Table 87 of the Annual Report of the Commissioner of Internal Revenue.

STAMPS.

During the fiscal year ended June 30, 1920, there were issued to collectors of internal revenue and to the Postmaster General 7,246,843,332 internal-revenue stamps of 556 different kinds or denominations. The total value was \$674,341,287.59.

The large increase in the number of different denominations of stamps requires the Bureau to carry a reserve stock that has a value in excess of half a billion dollars and fills two burglar-proof vaults with a floor area of 2,682 square feet.

The decrease from the previous year in the value of the stamps issued, amounting to \$59,772,393.58, is accounted for by the elimination, since January 16, 1920, of stamps for beverage spirits and fermented liquors, which are stamps of high value. The increase over the previous year of 1,581,382,109 in the number of all stamps issued is due to natural growth and to the tendency of manufacturers to use smaller containers for tobacco and snuff. This increase appears to have affected mainly tobacco, snuff, cigarettes, and proprietary stamps.

All stamps issued are engraved and printed by the Bureau of Engraving and Printing, with the exception of tobacco stamps imprinted on tin-foil wrappers. The printing of the latter is done under contract and without cost to the Government, the contractor receiving his remuneration from the purchasers of the stamps and reimbursing the Government for the salaries of the agent and counter necessary to properly supervise the work.

Stamps were returned by collectors and by the Postmaster General and credited in their accounts to the value of \$264,338,337.21. These were of various kinds and denominations, including partly used books from outgoing collectors and stamps for which there was no use, especially those for beverage spirits and fermented liquors.

BUREAU AND FIELD PERSONNEL.

During the fiscal year ended June 30, 1920, the number of employees in Washington increased from 4,080 to 5,912; in the collectors' offices from 6,877 to 7,147; the force under the revenue agents from 3,090 to 3,187; and 18 additional assistant supervisors of collectors' offices were appointed. In addition, 2,142 employees were appointed for the enforcement of the National Prohibition and Narcotics Acts, and a force of 21 special agents was created for the purpose of investigating violations of administrative rules and internal-revenue laws. In all, the personnel of the Bureau increased during the year from 14,055 to 18,440. The following statement shows the distribution of employees on June 30, 1920:

Bureau	5,912
Collectors' offices	7,147
Prohibition Field Service ¹	2,142
Assistant supervisors of collectors	31
Special agents, Special Intelligence Unit	21
Supervising internal-revenue agents	2
Internal-revenue agents in charge	31
Internal-revenue agents	1,461
Internal-revenue inspectors	467
Valuation engineers	5
Assistant valuation engineers	4
Valuation aid	1
Inspectors, Child Labor Tax Division	3
Assistant inspectors, Child Labor Tax Division	9
Age certificate inspectors, Child Labor Tax Division	13
Clerks and messengers under revenue agents in charge	241
Storekeeper-gaugers	950
Total	18,440

During the year the resignations of 2,149 employees of the Bureau were accepted. These resignations placed an added burden upon the Bureau by reason of the time and energy required in training new employees.

It has been the policy of the Bureau to give preference in its appointments to employees on the rolls of other bureaus of the Treasury Department in which reductions in personnel were made during the year, and approximately 600 such employees were transferred to the rolls of this Bureau.

In the Annual Report of the Commissioner of Internal Revenue for last year mention was made of the establishment of training facilities

¹ Including narcotic officers.

for Bureau employees. These classes have been conducted principally in the Income Tax Unit, and through the training thus received approximately 250 clerks have been enabled to advance to auditing positions that in most instances carry increased salaries. This opportunity for technical training and early advancement has brought applications from many high-grade clerks, and the Bureau has been enabled to obtain exceptionally efficient service at a reasonable rate of compensation.

Since the armistice nearly 1,700 ex-service men have been added to the rolls of the Bureau, either through reinstatement or original appointment. Of this number, approximately 1,000 were added during the past fiscal year.

In order to administer the amortization provisions of the Revenue Act of 1918, effort was made through examination to secure eligibles for positions as appraisal engineer and assistant appraisal engineer. As a result of this examination 6 appointments were made. The examination under the title of valuation engineer, assistant valuation engineer, and valuation aid resulted in the appointment of 58 men experienced in mining, lumber, and oil operations. From the examination for inspector and assistant inspector, Child Labor Tax Division, 12 appointments were made.

Respectfully,

WM. M. WILLIAMS,
Commissioner of Internal Revenue.

HON. D. F. HOUSTON,
Secretary of the Treasury.

NOTE.—For statistical details of the Report of the Commissioner of Internal Revenue, see his annual report.

FROM TABLES ACCOMPANYING THE REPORT OF THE COMMISSIONER OF INTERNAL REVENUE.

Wisconsin.....	Milwaukee, Wis.....	67,860,581.52	93,512,768.99	+ 38

¹ The collections for 1919 and 1920 are reported in this statement for the districts as they were constituted on June 30, 1920.

² Collections for 1920 from sale of stamps affixed to products from Porto Rico are included as follows: first Illinois, \$86.45; first New York, \$199,194.38; second New York, \$1,621,774.34; and first Pennsylvania, \$2,567.37. Included in second New York are also collections amounting to \$7,344.41 on account of products from the Virgin Islands.

³ Includes \$1,504.02 income tax on Alaska railroads.

SUMMARY OF INTERNAL-REVENUE RECEIPTS, YEARS ENDED JUNE 30, 1919 AND 1920, BY COLLECTION DISTRICTS—Continued.

Districts.	Locations of collectors' offices.	1919	1920	Per cent of increase (+) or decrease (-).
Wyoming.....	Cheyenne, Wyo.....	\$3,167,007.71	\$4,225,268.94	+ 33
Philippine Islands.....	Manila, P. I.....	1,078,218.21	1,423,478.69	+ 32
Total.....		3,839,950,612.05	5,407,580,251.81	
Sales of internal-revenue stamps affixed to parcel-post packages, etc., reported by the Postmaster General. ¹		10,199,466.51		
Grand total.....		3,850,150,078.56	5,407,580,251.81	+ 40

¹ In addition to this amount reported by the United States internal-revenue stamp agent, collections from sale of stamps affixed to products from the Philippine Islands are included as follows: First California, \$727.44; first Illinois, \$260.84; Indiana, \$20.80; Maryland, \$36; sixth Missouri, \$30; second New York, \$0.40; first Ohio, \$470.50, and first Pennsylvania, \$259.

² These stamp sales for 1920 amounted to \$24,437,893.75, which are distributed by districts in this statement.

³ The figures concerning internal-revenue receipts as given in this statement differ from such figures carried in other Treasury statements showing the financial condition of the Government, because the former represent collections by internal-revenue officers throughout the country, including deposits by postmasters of amounts received from sale of internal-revenue documentary stamps, while the latter represent the deposits of these collections in the Treasury or depositaries during the fiscal year concerned, the differences being due to the fact that some of the collections in the latter part of the fiscal year can not be deposited, or are not reported to the Treasury as deposited, until after June 30, thus carrying them into the following fiscal year as recorded in the statements showing the condition of the Treasury (Department Circular No. 176, par. 19)

DECISIONS OF THE COURTS IN INTERNAL-REVENUE CASES DURING THE FISCAL YEARS 1919 AND 1920.

BANKERS' SPECIAL TAX, ACT OF OCTOBER 22, 1914 (38 STAT., 745).

Germantown Trust Co. v. Lederer, Collector.—Circuit court of appeals (263 Fed., 672).

A trust company which does a banking business with its other business can avoid the tax levied by the act of October 22, 1914, section 3, on capital employed by bankers, only by showing by real transactions, and not as a mere distinction of bookkeeping or artificial transactions, that it does not employ any of its capital, surplus, or undivided profits in its banking business.

An assessment of internal-revenue taxes on a trust company for use of capital in banking business is prima facie valid, and one attacking the assessment has the burden of showing that it was unlawful.

Real Estate Title Ins. & Trust Co. v. Lederer, Collector.—Circuit court of appeals (263 Fed. 667).

The act of October 22, 1914, imposing on bankers a tax of \$1 for each \$1,000 of capital used or employed, is to be strictly construed, and, therefore, a corporation engaged in insuring titles, executing trusts, safe deposit, real estate, and banking is subjected to a tax only upon so much of its capital as actually is used in banking. Reserve funds of the corporation permanently invested are not to be included in the banking capital subject to tax unless actually used therefor, although the possession of such funds indirectly assists the banking department by enhancing the amount of credit obtainable. The case of *Treat v. Farmers' Loan & Trust Co.* (185 Fed., 760) was cited and approved and also the case of *Anderson v. Farmer's Loan and Trust Co.* (241 Fed., 323).

Fidelity Trust Co., of Baltimore, Md., v. Miles, Collector, and Baltimore Trust Co. v. Miles, Collector.—District court of United States (258 Fed., 770; T. D. 2895).

A bank which, in addition to its banking business, acts as trustee, receiver, executor, or administrator, or engages in underwriting or promoting new enterprises or refinancing old enterprises, or buys and sells securities on its own account for profit, is subject to the tax imposed by the first paragraph of section 3 of the act of October 22, 1914, upon the total amount of its capital, including surplus and undivided profits, unless it be shown that a specific portion of its capital is used in such other business and that such use does not constitute banking.

The mere showing that a specific portion of the capital, including surplus and undivided profits, is used in such other business is not alone sufficient to show that such capital is not used in banking.

The Union Trust Company of Indianapolis, Ind., v. United States, June 7, 1920.—United States Court of Claims (unreported to date).

A corporation having a place of business where credits are opened by the deposit and collection of money and currency, subject to be paid upon draft, check, or order, is a banker within this act.

The two words "using" or "employing" capital are not to be accorded the same meaning. Using a certain capital implies it is being made use of, while employing a certain capital does not mean an actual use of it, but rather the having it available for use where and as needed or desirable.

[The act] does not undertake to say that every dollar of the capital and surplus of the banker, as defined in the act, shall be employed or used in the banking business. It accords to him the right, if he chooses, of locking up his entire capital in his strong box or in using or employing it in strictly banking business, or in otherwise using or employing it. But if he does the business of a banker, he is taxed on the amount of the capital which he uses or employs in his business, of which that of banking may be but a part. It is the one person or firm or company or bank which is taxed, and the capital used or employed can be ascertained. It was not contemplated by the act that a firm, company, or bank, engaging in several lines and being a banker, could escape the tax under a claim that only a part of its capital and surplus was used or employed by it, acting as a banker.

BANKRUPTCY.

United States v. National Surety Co.—Pending in Supreme Court of the United States (262 Fed., 62).

Under Revised Statutes, section 3466, which gives the United States priority over other creditors of the estate of an insolvent or bankrupt debtor, and section 3468, providing that "whenever the principal in any bond given to the United States is insolvent, * * * and * * * any surety on the bond * * * pays to the United States the money due upon such bond, such surety * * * shall have the like priority," where the United States has a claim against the estate of a bankrupt, and the surety on the bankrupt's bond securing such claim has paid the same to the extent of the obligation of its bond, the United States as to the remainder of its claim, and the surety as to the amount paid are entitled to equal priority.

In re Jacobson.—Circuit court of appeals (263 Fed., 883; T. D. 3000).

Section 3466, Revised Statutes, giving priority over administration expenses to claims against insolvent estates for taxes, is superseded by section 64 (a) and section 64 (b) of the bankruptcy act, allowing priority of claims for taxes only as to "creditors," because that term, as defined by the act, does not include trustees or others acting for the estate, and Federal tax claims are, therefore, subordinate to administration expenses of insolvent estates.

CORPORATION EXCISE TAX.

United States v. Aetna Life Insurance Co.—District court of United States (260 Fed., 333; T. D. 2927).

Taxes paid to a State by various corporations upon shares of their stock owned by another corporation are not deductible from gross income of this latter corporation as taxes "paid by it," such taxes being not paid by this corporation, but being paid in its behalf by other corporations.

United States v. Chicago & Alton Railroad Co.—United States District Court, Northern District, Eastern Division, Illinois, January 5, 1920 (unreported to date).

The Commissioner of Internal Revenue has no power to prescribe a method of accounting for railroads different from that prescribed by the Interstate Commerce Commission.

Southern Pacific Railroad Co. v. Muentert.—Circuit court of appeals (260 Fed., 837; T. D. 2944).

A sum set aside annually on its books by a corporation as the pro-rata amount for that year of the discount at which it sold an issue of bonds, to be distributed throughout their term, is neither a "loss actually sustained" during the year nor "interest paid," and may not be deducted in determining net income for that year, under corporation excise tax act, August 5, 1909 (38, 2).

(See case of *Maryland Casualty Co. v. United States* under 1913 income-tax act, in re Income of insurance companies—Insurance reserves—Deductions.)

United States v. Philadelphia, Baltimore & Washington R. R. Co.—District court of United States (262 Fed., 188; T. D. 3006).

Dividends, other than stock dividends, paid in 1910, from profits earned partly before and partly on or after January 1, 1909, of a lessor railroad corporation not engaged in business within the meaning of the corporation excise-tax act of 1909, must be included in the net income of a stockholder corporation, subject to said tax act, which leases and operates the property of the corporation paying the dividend.

A corporation stockholder is not taxable on stock dividends received.

United States v. Long.—District court of United States (unreported to date).

The value of hay grown and consumed upon a stock farm is an allowable deduction in an income-tax return filed under the act of 1909 if included in gross income, whether the hay was grown before or during the taxable year. Money received in 1909 in final payment for wool sold in 1908 is not income for 1909. No additional tax is due by reason of erroneous deductions if a taxpayer also has erroneously included as income an amount in excess of the erroneous deductions, because the tax is measured by "net income" and the income reported by the taxpayer was in fact larger than "net income" as contemplated by the statute.

Alpha Portland Cement Co. v. United States.—Circuit court of appeals (261 Fed., 339).

There was no income, within corporation excise-tax law, August 5, 1909, section 38, where a corporation, pursuant to a scheme of recapitalization, organized another corporation, conveyed properties to it, constituting all its assets, received therefor its entire stock, except directors' shares, of greater par value than the price paid for the properties, distributed the shares, after formally valuing them at par, among its own stockholders and then effected a merger between the two corporations.

New York Life Insurance Co. v. Anderson, collector.—Circuit court of appeals (263 Fed., 527).

Excess premiums, collected by a mutual insurance company and returned to stockholders or applied to their credit, do not constitute "income" of the company within corporation excise-tax act, August 5, 1909, section 38.

An insurance company, the greater portion of whose assets consists of stocks, bonds, and other securities, held entitled to a deduction of the amount of the market depreciation of such securities during the year.

Dividends or surplus which life insurance companies are required by insurance law, New York, section 83, either to pay policyholders in cash or to credit upon premiums due from them, must be excluded

in determining the income of the company for the purposes of taxation. (262 Fed., 215; reversed on another point in 263 Fed., 527.)

Excess premiums of mutual insurance company not "income." C

Interest *held* properly allowed in an action against a collector of internal revenue on the amount of tax held to have been illegally exacted from plaintiff.

Rock Island, Arkansas & Louisiana Railroad Co. v. United States (54 Ct. Cl., 22).—Pending in Supreme Court of the United States.

An application for an abatement of the tax assessed, made before payment, and its denial, is not tantamount to an appeal to the Commissioner as required by section 3220, Revised Statutes, because an appeal for a refund can not be made until the tax is paid, and an action does not accrue until payment and rejection of the application for refund.

An application to the Commissioner of Internal Revenue for the refund of an excise tax, alleged to have been erroneously and illegally assessed and collected, is a condition precedent to maintenance of a suit against the United States under sections 3220–3226, Revised Statutes, and section 145, Judicial Code.

Associated Pipe Line Co. v. United States.—Circuit court of appeals (258 Fed., 800).

A pipe-line company organized by and doing business only for two other pipe-line corporations, *held* not merely a convenient agent of these corporations, but to be doing business for profit within corporation-tax law.

Moneys paid a pipe-line corporation by its stockholders *held* not payment for capital stock, but advances to corporation, and corporation, having no paid-up stock, could not deduct interest on such advances in calculating net income.

A statement made by a corporation's auditor to an internal-revenue tax agent that the corporation had no paid-up capital stock is admissible in proceedings to recover taxes under corporation-tax law of August 5, 1909.

Boston & Maine Railroad v. United States.—Circuit court of appeals (265 Fed., 578; T. D. 3004).

The indebtedness upon which interest may be taken as a deduction under the corporation excise-tax act of 1909 can not be greater than the par value of the capital stock paid up and outstanding. In computing paid-up capital stock, a surplus created by paying a premium on capital stock subscribed for can not be added in determining the indebtedness upon which the interest may be deducted.

The definition of "paid-up capital stock" by a local State statute is not controlling on a Federal court construing a Federal taxing statute applicable to all States.

Camp Bird, Ltd., v. Howbert.—Circuit court of appeals (262 Fed., 114).

On recovery of excise tax illegally collected from a corporation the penalty and interest exacted for delinquency in making payment under act of August 5, 1909, section 38 (5), *held* also recoverable.

A mining corporation *held* entitled to recover excessive excise taxes paid under act of August 5, 1909, section 38, because of refusal of the commissioner to make proper allowance for depreciation of equipment.

The Gulf & Interstate Ry. Co. v. Walker.—District court of United States (unreported to date).

Accrued but uncollected interest is not income under the provisions of section 38, act of August 5, 1909, and not taxable.

Advancements by parent company, sole stockholder, to cover operating deficit of subsidiary corporation, both companies constituting a single enterprise and each necessary to the existence of the other, are legitimate and necessary items of expense of the parent company and are deductible in ascertaining its net income for the purpose of the tax under act of August 5, 1909.

Northern Pacific Ry. Co. v. Lynch.—District court of United States, T. D. 3048 (unreported to date).

Payments of interest accrued before January 1, 1909, although paid in 1911, are not taxable income in the hands of the payee under the corporation excise-tax act of 1909.

Proceeds from items definitely ascertained and vested before January 1, 1909, and on that day the property of the taxpayer, are not taxable under the corporation excise tax of 1909 when collected.

ESTATE TAX, ACT OF SEPTEMBER 8, 1916 (39 STAT., 777).

New York Trust Co. and Pross v. Eisner.—District court of United States (263 Fed., 620; T. D. 2976). Pending in Supreme Court of United States.

The Federal estate tax act of September 8, 1916, is constitutional although the right of estate transfer upon death is through State probate process and although a right of renunciation may exist. State taxes on the respective shares received by beneficiaries are not deductible before computation of Federal estate tax under clause allowing deduction of "charges against the estate * * * allowed by the laws of the jurisdiction," as this clause contemplates deduction only of charges directed against estate as a whole (citing T. D. 2524).

Maclavish v. Miles, collector.—District court of United States (263 Fed., 457).

Where there is a dispute, dependent on the construction of the statutes, as to whether interest collectible under act September 8, 1916, section 204, on an estate tax not paid within one year, is a penalty, within Revised Statutes, section 5292, the district judge will decline to make the inquiry provided for by that section, as he would have no power to pass on anything but questions of fact.

Lederer v. Northern Trust Co. and Henry R. Zesinger, executors under will of Louis W. Klahr.—Circuit court of appeals (262 Fed., 52; T. D. 3027); writ of certiorari denied in Supreme Court of United States, May 3, 1920.

The decision of the court below (257 Fed., 812) was affirmed by the United States circuit court of appeals, third circuit, holding that the Pennsylvania collateral inheritance tax, being an estate tax, was deductible in determining the amount of the net estate under the Federal estate tax act of September 8, 1916, Title II, the circuit court of appeals states in its opinion that this decision has no bearing on the 1918 revenue act, Title IV; the latter act providing that "estate taxes" are not deductible.

Randolph v. Craig.—District court of United States (unreported to date).

A widow's rights to dower, homestead, and support are derived from her marriage, under the laws of Tennessee and Arkansas, and are not taken by transfer from her husband's estate but independently thereof by operation of law.

Under the Federal estate tax act of 1916, section 200, such rights, being neither subject to the payment of charges and the expenses of administration nor to distribution, are not a part of the gross estate.

The Tennessee law governing a widow's right to a year's support contains no provision by which such right is conditioned on actual dependency and such support is, therefore, deductible as a charge allowed by the laws of Tennessee irrespective of the widow's dependency, notwithstanding the provisions of section 203 (a) (1) of the Federal estate tax act making dependency on the decedent a condition to the deduction of such allowance from the gross estate.

Pearce v. Lederer.—District court of United States (262 Fed., 993).

Under the law of Pennsylvania the question of the effective exercise of a power of appointment is determined by the domicile of the donor of the power, not of the donee.

The principal of a spendthrift trust fund, bequeathed by will by the beneficiary of the trust under a power of appointment given him, although included with his other estate, and thereby made subject to general administration by his executor and to his debts, *held* not subject to estate tax under act of September 8, 1916, Title II, since the property was not "subject to the payment of the charges against his estate," within the meaning of section 202 (a); the rights of the creditors, coming to them not as creditors but as appointees of the decedent.

Stanley Field, executor, v. United States.—Court of Claims, June 7, 1920 (unreported to date). Pending in the Supreme Court of the United States.

The exercise of a general power of appointment does not constitute a "transfer" of the appointed property by the donee of the power within the meaning of paragraph (b), section 202, of the revenue act of 1916, and the value of such property should not be included in the gross estate of the appointor.

Polk v. Miles, collector.—District court of United States (unreported to date).

Where a father made over to his son all his stock in a brewery company, of doubtful stability, and assigned to him a debt of approximately \$105,000 against said company, in consideration of the son's promise and guaranty that the company would pay him monthly interest at 4 per cent per annum during his remaining life, such transaction taking place when the father was still vigorous, there being evidence tending to show he had no present thought of death, *held*, the transfer of such assets, though made within two years of the father's death, does not constitute a gift in contemplation of death within the meaning of section 202 (b) of the revenue act of 1916.

The transfer of such assets in consideration of the promise and guaranty of the payment of interest in monthly installments, under the circumstances, constituted not a transfer intended to take effect at or after vendor's death, but the purchase of an annuity for a consideration whereof vendor entered into immediate enjoyment, and said annuity is not part of his estate for purposes of taxation.

EXCESS PROFITS TAX, ACT OF OCTOBER 3, 1917. (39 STAT., 1000).

La Belle Iron Works v. United States.—Court of Claims, June 28, 1920 (unreported to date; T. D. 3051).

The act of October 3, 1917, section 207, defines "invested capital."

Increase in value of ore lands, first declared to be surplus, and afterwards treated as the basis of a stock dividend, did not thereby become earned surplus or undivided profits or invested capital. The stock dividend added nothing to, and took nothing from, the corporation's invested capital.

Inequalities arising from the application of the statute in particular cases can not be corrected by judicial construction, where the enactment is otherwise valid.

Where the act is ambiguous or uncertain, the construction of it by the administration officers charged with its execution is entitled to great respect.

EXCISE TAXES, ACT OF OCTOBER 3, 1917, SECTION 600 (40 STAT., 316).

Rech-Marbaker Co. v. Lederer, collector.—District court of United States (263 Fed., 593).

Section 600 of the 1917 act imposes a tax of 3 per cent upon the sale of "automobile trucks." When a purchaser buys a chassis and sends it, together with the kind of body desired, to some one to have the body put on the chassis or sends the chassis to a body builder to have a body put on it and it is then returned to him as an automobile truck, there has been no sale of an automobile truck.

Foss-Hughes Company v. Lederer, collector.—District court of United States (unreported to date).

Where a retailer buys a chassis from a manufacturer and has a body built thereon by another manufacturer, according to specifications of a prospective customer, he is taxable as a producer on the sale to the customer as on a sale of an automobile truck, under section 600 of the 1917 revenue act.

INCOME TAX, ACT OF OCTOBER 3, 1913 (38 STAT., 166).

United States v. Silver King Consolidated Mining Co.—District court of United States (unreported to date).

Where corporation "A," incorporated in 1908, received as part of its capital assets the claim against corporation "B" for an accounting, the money received in 1913 by virtue of the satisfaction of judgment on this claim was held to be part of the capital assets of corporation "A" and not income taxable under the acts of August 5, 1909, or October 3, 1913. It was also held that even assuming such money to be income it was earned long before the enactment of either law, and the practical result of taxing it when received would be to tax corporation "A" for half the proceeds of operations conducted by corporation "B" before 1908, while corporation "B," which received its portion of the proceeds in 1908, could not be required to pay tax on same.

Prattiss v. Eisner, Collector.—District court of United States (260 Fed., 589; T. D. 2933), affirmed by circuit court of appeals, T. D. 3050 (unreported to date).

A transfer tax upon a legacy or distributive share of an estate imposed by the laws of New York is not an imposition upon either the property passing or the right to receive it, but a deduction from the estate of the decedent, and may not be deducted from the net income of the legatee or distributee under income tax act United States, section 2, b.

Maryland Casualty Co. v. United States.—Supreme Court of the United States (251 U. S., 342; T. D. 3013).

An insurance company is required to include in its gross income in tax returns filed under the provisions of the corporation excise tax act of 1909 and the income tax act of 1913, premiums collected by its agents but not transmitted by them to its treasurer within the year.

A casualty company is entitled to deduct from its gross income for 1909 and subsequent years the net addition to its "unearned premium reserve," "specified reserve for unpaid liability losses," and "loss claims reserve." A reserve properly set aside by an insurance company under regulations of a State insurance department within the scope of its authority is a reserve required by law. But reserves maintained in the ordinary running expenses of an insurance company are not properly classified as "insurance reserves" and were not, therefore, in contemplation of Congress when it provided for the deduction by insurance companies of the net addition to reserve funds.

Under the facts as stated a decrease in the aggregate reserve funds would not give rise to any taxable income.

The amendment of a tax return by the Commissioner of Internal Revenue and the assessment and collection of an additional tax upon such return does not remove the statute of limitations imposed by sections 3227 and 3228, Revised Statutes, with respect to the refund of a part of the tax paid upon the original return.

Stoffregen v. Moore.—District court of the United States (264 Fed., 232).

Under income tax act October 3, 1913, section 2, the "income" of a stockholder of a corporation includes dividends received by him during a tax year, although declared and paid in whole or in part from the accumulated surplus of prior years.

Stockton v. Lederer, Collector.—District court of United States (262 Fed., 173); affirmed by circuit court of appeals (unreported to date).

Income to an estate devised to executors upon trust to pay certain annuities until death of beneficiaries, and the remainder to a named charity, is not taxable in the hands of the trustees, under the Federal income tax acts of 1913, 1916, and 1917, if the sum paid to each beneficiary is less in amount than the taxable limit, because the income to the estate is really income to those having the beneficial interest therein, none of whom are taxable (the annuitants because the amounts paid are too small; the charity because specifically exempted), and the trustees are only the reservoir and conduit pipe through which income reaches the beneficiaries.

Bryce, et al. v. Keith, Collector.—District court of United States (257 Fed., 133).

Loss of the value of corporate stock, acquired by numerous transfers of property to the corporation and payment of corporate debts, transactions carried on for a considerable period, complicated in character and involving large sums of money, so that they must have required much time and attention, is a loss incurred in trade, which

can be deducted from the gross income under income tax act, section 2, paragraph "b."

Union Pacific Coal Co. v. Skinner, Collector (249 Fed., 152).—Affirmed in per curiam decision of Supreme Court of the United States, and remanded.

An annual dividend received by a corporation on the stock of another corporation is subject to tax under section II G (a) of the act of October 3, 1913, for the calendar year in which it was declared and paid, as income accruing during such year, although half of the profits out of which the dividend was paid accrued prior to the passage of the 1913 act.

Northern Pacific Railway Co. v. Lynch.—District court of United States (unreported to date).

Proceeds from claims definitely ascertained and vested before January, 1909, are not taxable income under the act of 1913.

Where a taxpayer corporation conveys property to a subsidiary corporation upon contract agreement that the latter will manage it and pay the net proceeds after deducting necessary expenses to the taxpayer corporation semiannually, such payments are not taxable income in its hands under the act of 1913 if the managing corporation has made return of and paid the taxes on the proceeds of the property.

Mente v. Eisner, Collector.—Circuit court of appeals (266 Fed., 161; T. D. 3029). Pending in the Supreme Court of the United States.

Losses incurred by a member of partnership engaged in manufacturing jute bags and bagging, through his individual dealings on cotton exchange, are not incurred in trade within the meaning of section II, subdivision B of the act of 1913, and are not therefore deductible in computing net taxable income under that act.

Penn Mutual Life Insurance Company v. Lederer, Collector.—United States Supreme Court, April 18, 1920, T. D. 3046 (unreported to date); circuit court of appeals (258 Fed., 81; T. D. 2899) affirmed.

Under the provisions of paragraph G, subdivision (b), of section II of the act of October 3, 1913, that "life insurance companies shall not include as income in any year such portion of any actual premium received from any individual policyholder as shall have been paid back or credited to such individual policyholder within such year," a life insurance company is not entitled to exclude from its total income during the taxable year, for the purpose of ascertaining its gross income, any dividends paid or credited to policy holders from whom it did not receive any premium during that year; and as to such policyholders as it did receive premiums from that year it is entitled to exclude only such part of the dividends paid to those policyholders as did not exceed the amount received from them, respectively, by way of premiums during that year.

None of the cash dividends paid by a life insurance company to its policyholders which represent redundancies in previous premium payments is deductible from gross income in annual tax returns as "sums other than dividends paid within the year on policy * * * contracts."

United States v. Coulby.—Circuit court of appeals (258 Fed., 27; T. D. 2858); judgment of the district court (251 Fed., 982) affirmed.

A member of a partnership need not include as a part of his net income subject to normal tax such of his income derived from or through a partnership as has been received by the partnership in the

shape of dividends on stocks owned by it in corporations taxable upon their net income.

The law is so framed as to deal with the gains and profits of a partnership as if they were the gains and profits of the individual partners.

INCOME TAX, ACT OF SEPTEMBER 8, 1916. (39 STAT., 756).

In re Heller, Hirsh & Co.—Circuit court of appeals (258 Fed., 208).

A trustee of a bankrupt corporation, who is not carrying on its business but has received funds as a result of a compromise made by him with a foreign corporation of a claim for nonpayment of salary and commissions, is not liable to pay an income tax under act September 8, 1916, section 13(c), since under such section only net income earned by a trustee while operating the business of a bankrupt corporation is taxable.

Miller, Collector, v. Gearin.—Circuit court of appeals (258 Fed., 225); certiorari denied (250 U. S., 667).

Where, in 1907, the owner of land leased the same for 23 years, under an agreement requiring the tenant to construct an expensive brick building, and on the tenant's default the owner retook possession in 1916, the value of the building can not be deemed income accruing in the year 1917, within income tax law September 8, 1916, section 2 (a), for under the lease the title to the building vested in the owner immediately upon construction, and the lessee's default caused the owner a loss.

Cryan v. Wardell, Collector.—District court of United States (263 Fed., 248).

Where a lessee, pursuant to the terms of a lease of land for 26 years made in 1908, erected a building on the land which was completed in 1910 and forfeited the lease in 1916, the lessor reentering the premises, the value of the building erected under the lease is not income to the lessor for 1916.

Weiss v. Mohawk Mining Co.—Circuit court of appeals (264 Fed., 502; T. D. 3001); reversing the district court decision.

Notwithstanding a minimum royalty provision in a mining lease, whereby the lessee was under affirmative obligation to remove—or at least pay for—about two-thirds of the ore then in the ground, and the fact that this obligation probably covered all the ore mined during the taxing period involved, the lessee of the mining company was held not entitled to the deductions for depletion allowed by section 12 (a), second (b), act of September 8, 1916, the presence or absence of such an obligation being an incident of a particular case which can not control the general rule. The *Biwabik* case (247 U. S., 116) followed, and the court said, "We can not conceive any substantial distinction as applied to a mine between that depreciation which was sought by mine owners under the earlier acts, and that depletion which was expressly allowed by the amendment of 1916."

Eisner, Collector, v. Macomber.—Opinion handed down in Supreme Court of the United States, March 8, 1920, two dissenting opinions being filed; unreported to date. (T. D. 3010).

A true stock dividend made lawfully and in good faith by a corporation, either against profits invested in lands, buildings, equipment, or

working assets of a corporation, or against accumulated and undivided profits, is not taxable as income to the shareholder recipient, it being held that to tax such stock dividends would be to tax property without apportionment in violation of the provisions of article 1, section 2, clause 3, and article 1, section 9, clause 4, of the Constitution, notwithstanding the sixteenth amendment, there being no realization of profit taxable as income until a sale of shares is made.

In so far as the act of September 8, 1916, imposes an income tax upon true stock dividends, it is unconstitutional.

Stockton v. Lederer, Collector.—District court of United States, (262 Fed., 173). Affirmed by circuit court of appeals; decision unreported as yet.

Income of the estate of a testator in the hands of trustees held not subject to tax, under act September 8, 1916, chapter 463, section 2(b), where by the terms of the will a portion of it, so small as to be exempt from tax, is to be used in payment of an annuity, and the remainder, added to the corpus of the estate at the end of the annuity term, is to be paid over to a charity, which, under section 11 (a), is exempt from the tax.

United States v. McHatton.—District court of United States (unreported to date; T. D. 3043).

Where, on dissolution, corporate assets are gratuitously distributed to stockholders, the latter are liable, under the trust-fund doctrine, for payment of any taxes that may thereafter be imposed in respect of income received by the corporation prior to dissolution, and said assets may be pursued into the hands of the stockholders.

Taxes can be lawfully imposed by retrospective law. Corporation in being during period from January 1 to April 1, 1916, is liable under act of September 8, 1916, to tax in respect of income received during such period.

INCOME TAX, ACT OF OCTOBER 3, 1917 (40 STAT. 300).

Rau v. United States.—Circuit court of appeals (260 Fed., 131).

Under section 3229, Revised Statutes, empowering Commissioner of Internal Revenue, with advice of Secretary of the Treasury, to compromise any criminal case arising under the internal-revenue laws, one who failed to file an income tax return as required by act October 3, 1917, section 1004, can not be successfully prosecuted for this failure, where the collector of internal revenue offered to compromise on payment of the tax and penalty, and such offer was accepted.

Where internal-revenue officers, after defendant admitted he had not filed an income tax return as required by section 1004, accepted not only the tax, but the penalty, informing defendant that such payment would end the matter and there would be no indictment, such acceptance and statement was a "compromise," within section 3229, Revised Statutes, and was a bar to prosecution.

INCOME TAX, ACT OF FEBRUARY 24, 1919 (40 STAT., 1057).

Evans v. Gore.—United States Supreme Court, June 1, 1920, T. D. 3037 (unreported to date); district court (262 Fed., 550) reversed.

Stated in its broadest aspect, the contention involves the power to tax the compensation of Federal judges in general, and also the salary of the President.

The Constitution provides that the judge shall have a sure and continuing right to the compensation, whereon he confidently may rely for his support during his continuance in office, so that he need have no apprehension lest his situation in this regard may be changed to his disadvantage.

The primary purpose of the prohibition against diminution was not to benefit the judges, but to attract good and competent men to the bench and to promote independence of action and judgment.

The prohibition is general and the reasons for its adoption make with impelling force for the conclusion that the fathers of the Constitution intended to prohibit diminution by taxation as well as otherwise.

Apart from his salary, a Federal judge is as much within the taxing power as other men are. And, speaking generally, his duties and obligations as a citizen are not different from those of his neighbors. But his compensation as a judge is protected from diminution in any form, whether by a tax or otherwise, and is assured to him in its entirety for his support.

Smith v. Kansas City Title & Trust Co.—Supreme Court of the United States, April 26, 1920 (unreported to date).

The Supreme Court has postponed action on the case involving the constitutionality of the exemption from income tax of bonds issued under the Federal farm-loan act, by ordering a reargument.

United States v. Benowitz.—District court of United States (262 Fed., 223; T. D. 2952).

Under income tax act, February 24, 1919, section 223, and the regulation made thereunder, requiring income returns to be made under oath, such oath may be taken before any person authorized by the local law to administer oaths.

Jackson v. Smietanka.—District court of United States, December, 1919 (unreported to date; T. D. 2960).

A taxpayer who keeps no books of account, and to whom is paid, upon the termination of services extending over a period of years, a lump sum in amount not previously agreed upon, as compensation for such services, must return as income in the year in which received the entire amount so paid him, even when such payment is accompanied by a statement proportioning the compensation over the years in which the services were rendered.

LEGACY, TRANSFER, AND INHERITANCE TAXES, ACT OF JUNE 13, 1898 (30 STAT., 464).

Henry v. United States.—Supreme Court of the United States (251 U. S., 393; T. D. 3008).

For the purpose of this act the interest in a fund transferred from an estate to a trustee for ascertained persons is vested in possession no less than when it is conveyed directly to them.

A legacy tax paid over by the executor to the legatee, or to himself as trustee under the law for an ascertained beneficiary, is vested in possession within the meaning of the tax-refunding act of June 27, 1902, chapter 1160, section 3. 32 Statutes, 406, although the payments are made before expiration of the time for proving claims against the estate. (Affirming 53 Ct. Cls., 641.)

Simpson v. United States.—Supreme Court of the United States (252 U. S., 547).

The use of mortuary tables and the assumption of 4 per cent as the earning value of money in computing legacy taxes paid is legal.

Legacies which it was the legal duty of the executors to pay before July 1, 1902, and for compelling payment of which the statutory remedy was given to the legatees before that date, were vested in possession and enjoyment within the meaning of the act of June 27, 1902. (Affirming 53 Ct. Cls., 640.)

Clowes, executrix, v. United States.—Court of Claims, June 14, 1920 (unreported to date).

A tax upon a contingent beneficial interest which had not vested in possession or enjoyment was not authorized by section 29, act June 13, 1898, and such an assessment was "erroneous," within the meaning of section 3228, Revised Statutes, irrespective of the remedial act of June 27, 1902, and thus within the bar of limitations as to assessment and collection of taxes; to hold otherwise would allow an escape from any limitation on actions brought under the act of 1898.

Coleman v. United States.—Supreme Court of United States (250 U. S., 30; T. D. 3007).

A tax demanded and paid under section 29 of the war revenue act of June 13, 1898 (c. 448, 30 Stat., 448), on a contingent beneficial interest not vested prior to July 1, 1902, contrary to the refunding act of June 27, 1902 (c. 1160, sec. 3, 32 Stat., 406), is a tax "erroneously collected" within the meaning of the act of July 27, 1912 (c. 256, 37 Stat., 240), although the payment was without protest or reservation, and under that act the right to a refund is barred if the claim was not presented to the Commissioner of Internal Revenue on or before January 1, 1914.

LIQUOR DEALERS, DISTILLERS, ETC.

Sodini v. United States.—Circuit court of appeals (261 Fed., 913).

To sustain a conviction for carrying on the business of a retail liquor dealer without having first paid the special tax therefor, it is not indispensable that the evidence should show more than a single sale, where supported by surrounding circumstances.

Pinasco v. United States.—Circuit court of appeals (262 Fed., 400).

Internal-revenue statutes penalizing persons for distilling spirituous liquors without giving bond and notice in writing to the collector, etc., were not repealed by the Reed amendment of March 3, 1917, relating to shipments of liquor in interstate commerce.

A prosecution for violating on January 3, 1919, the internal-revenue statutes penalizing distillation of spirituous liquors without giving bond and notice to the collector, etc., was unaffected by war-time prohibition act, November 21, 1918, since that act did not take effect until May 1, 1919.

A conviction under the Federal statutes penalizing the distillation of spirituous liquors without giving bond and notice to the collector, etc., is not precluded by the fact that the violation occurred in a State which had prohibited the manufacture of intoxicating liquors under any circumstances.

United States v. Windham.—District court of United States (264 Fed., 376).

Statutes to enforce liquor revenue are repealed by act October 28, 1919.

Devoto v. United States.—Circuit court of appeals (263 Fed., 566). Judgment of conviction for carrying on the business of retail liquor dealers without having paid the special tax therefor held sustained by the evidence.

Kiersky v. United States.—Circuit court of appeals (263 Fed., 684). On trial of defendant, charged with carrying on the business of retail liquor dealer without having first paid the special tax therefor, evidence of a sale of whisky in defendant's place of business and in his presence, and that shortly afterwards, on search, nearly 50 cases of whisky were found in the room, *held* sufficient to sustain conviction.

Failure of prosecution to prove that defendant, charged with carrying on business of retail liquor dealer without payment of special tax, did not have a tax-paid stamp, *held* not ground for reversal.

Guignard v. United States.—Circuit court of appeals (258 Fed., 607). Evidence that defendant was seen by officers coming out of swamp and was pursued, brought back to the swamp, and identified, that illicit whisky and a still, with apparatus yet warm, was found at the place he came from, and that after arrest illicit whisky was found on him and his clothes were soiled with soot and beer, was sufficient to support a conviction for illicit distilling.

Rooks v. United States.—Circuit court of appeals (263 Fed., 894). Evidence that defendant, a dairyman, had three cases of whisky in his possession, and sold two bottles to two strangers, who gave no reason or excuse for the purchase, *held* sufficient to sustain a conviction for carrying on the business of retail liquor dealer without payment of the special tax.

Lamb et al. v. United States.—Circuit court of appeals (264 Fed., 660).

In trial of a defendant charged with unlawfully having in his possession and custody and under his control a still for the production of spirituous liquors, set up without having the same registered as required by law, evidence *held* sufficient to require submission of the case to the jury.

Sylvia v. United States.—Circuit court of appeals (264 Fed., 593). Instructions on trial of defendant for carrying on the business of retail liquor dealer without having paid the special tax held without reversible error.

Hunter v. United States.—Circuit court of appeals (264 Fed., 831). On trial for illegally carrying on the business of retail liquor dealer, where witnesses had testified that they bought liquor from defendant, and that on other occasions defendant told them he had whisky for sale, if they wanted any, evidence of defendant's possession of whisky at a time prior to such sales was competent.

Faraone v. United States.—Circuit court of appeals (259 Fed., 507). Where defendant was charged with carrying on the business of a retail liquor dealer without having obtained a Federal license and paid the special tax, the Government need not prove the nonpayment of tax, for the matter was peculiarly within the knowledge of defendant, and he might prove payment without inconvenience.

In a prosecution for carrying on the business of a retail liquor dealer without having paid special Federal tax, the refusal of the trial court to allow proffered witnesses to testify as to whether they had ever heard of liquor being sold at defendant's place of business can not be held error, where the record did not disclose the oppor-

tunity such witnesses had for knowing the defendant's reputation or the reputation of his place of business.

In a prosecution against defendant, a grocer, for carrying on a retail liquor business without paying the special Federal tax, a special charge that, if the sales testified to by the prosecuting witness were made by defendant's clerk, it was necessary to prove that the clerk was his agent and acted with his knowledge, was properly refused, for, while defendant could not be convicted on proof of sales made by his clerk without his knowledge, yet the vital question in the case was not whether any particular sales were made, but whether defendant was carrying on the business of retail liquor dealer without payment of the special tax, and hence the request was predicated on a false issue.

Barley v. United States.—Circuit court of appeals (259 Fed., 88).

To subject a person to conviction for carrying on the business of a retail liquor dealer in violation of section 3242, Revised Statutes, without having paid the special tax, a single sale is not sufficient, unless made under circumstances which warrant the inference by the jury that defendant either had liquor on hand or was ready and able to procure it for purposes of sale.

MISCELLANEOUS, ADMINISTRATIVE, ETC.

ACCEPTANCE OF RECEIPT OF TAXES.

Hurst v. Lederer.—District court of United States (unreported to date).

Where taxpayer made affidavit as to the amount of floor tax due from him and tendered the money by placing same on the desk of a deputy collector who was not authorized to receive such payments and the said deputy did not receive or accept same, but, from the evidence, the taxpayer's friend at his suggestion placed the money in an envelope and put it in the desk of another deputy who was absent at the time and the said money was lost or stolen, there was not such valid payment of the tax as would estop the future collection of the tax with the 5 per cent penalty and interest.

ACTIONS AGAINST UNITED STATES.

Hannah & Hogg v. Clyne.—District court of United States (263 Fed., 599).

As the Government can not act, save through its duly constituted officers and agents, a suit to enjoin an officer or agent from enforcing a Federal statute is clearly a suit against the United States; but officers or agents purporting to act under an unconstitutional law go beyond their lawful functions, and a suit to enjoin them from acting under an unconstitutional law is not treated as one against the United States.

ACTION TO RECOVER TAX PAID; BURDEN OF PROOF AND EVIDENCE.

New York Life Insurance Co. v. Anderson.—Circuit court of appeals (263 Fed., 527).

In an action against a collector of internal revenue to recover a tax alleged to have been illegally exacted, plaintiff has the burden to prove that the tax collected, or some part of it, was not due, and

defendant may give in evidence anything tending to show that no debt was due to plaintiff when the action began, whether such absence of indebtedness depends on the legality of the tax exacted, or the existence of another tax right against plaintiff, enforceable through defendant.

COMPROMISES.

United States v. One Five-Passenger Ford Automobile, Engine No. 1827566.—District court of United States (263 Fed., 241).

Compromise of prosecution for violation prevents forfeiture of property.

DEPARTMENTAL CONSTRUCTION.

Paul Jones & Co. v. Mayes, Collector.—District court of United States (265 Fed., 365).

If the construction of a statute under which acts are done is sanctioned by long adoption of it by officers of the executive department charged with its enforcement, the effect of such acts can not be changed *ex post facto* by a new ruling of the executive department, particularly if the statute imposes taxes and if Congress before the new ruling by reenactment of the previously existing statute has adopted the original construction. Thus, where certain treatment of whisky in 1918 was not then deemed to be rectification, a Treasury Decision (2953) issued in 1919, specifically defining such process as "rectification" and imposing as to whisky so treated the tax applicable under section 3244, Revised Statutes, and section 304 of the revenue act of October 3, 1917, is ineffective as to whisky treated before the promulgation of the Treasury decision. No opinion is expressed whether the Treasury decision is effective as to whisky subsequently treated.

National Lead Company v. United States.—Supreme Court of the United States (252 U. S., 140).

Where uncertainty or ambiguity is found in a statute, great weight will be given to the contemporaneous construction by department officials who were called upon to act under the law and to carry its provisions into effect, especially where such construction has been long continued. The reenactment of the statute without substantial change while the departmental construction was being enforced amounts to an implied legislative recognition and approval of that construction.

Cryan v. Wardell, Collector.—District court of United States (263 Fed., 248).

The Treasury Department has no power to abrogate a substantive rule of law by a regulation directing taxing officers to include permanent improvements under leases as income for the year in which the lease ends.

Edwards v. Wabash Railway Co.—Circuit court of appeals (264 Fed., 610; T. D. 3002).

A practical construction by departmental officers, whose duty it is to enforce a statute, is entitled to great influence, provided the statute presents an ambiguity which is real and not captious.

Where a statute which has been construed by an executive department of the Government is subsequently reenacted, the legislature is presumed to have adopted previous departmental construction, and a subsequent departmental construction, contrary to the original one, is not entitled to weight.

ELECTION OF REMEDIES.

Pinasco v. United States.—Circuit court of appeals (262 Fed., 400).

The Government can not be required to elect whether it will proceed under an indictment charging violation of the internal-revenue laws in distilling spirituous liquor without having given bond, etc., or proceed under pending suit seeking forfeiture of the distillery, etc., pursuant to Revised Statutes, section 3257.

JURISDICTION OF COURTS.

Duhne v. State of New Jersey.—Supreme Court of the United States (251 U. S., 311).

The United States Supreme Court has no jurisdiction to entertain an original bill filed by a citizen of New Jersey in his individual capacity seeking to enjoin the Attorney General of the United States, the United States Commissioner of Internal Revenue, the United States district attorney for District of New Jersey, and the State of New Jersey. So far as the question of original jurisdiction to entertain bills by a citizen against officials of the United States is concerned, it is obvious that no such jurisdiction obtains; and the whole sum of judicial power granted by the Constitution does not embrace the authority to entertain a suit by a citizen against his own State without its consent. Nor is original jurisdiction to entertain such suits conferred on the Supreme Court by section 2, article 3, of the United States Constitution, conferring original jurisdiction in cases "in which a State shall be a party." That provision merely classifies jurisdiction previously conferred, as original and appellate, without extending its scope.

Franklin, County Treas., et al. v. Nevada-California Power Co.—Circuit court of appeals (264 Fed., 643).

A Federal court of equity held to have jurisdiction to enjoin enforcement of taxes based on an alleged unlawful and unconstitutional assessment of intangible property of a public-service corporation.

LIMITATIONS.

United States v. Kendall.—District court of United States (263 Fed., 126).

Statute of limitations does not run against Federal or State Government.

PENALTIES.

United States v. Buckingham.—District court of United States (261 Fed., 418).

The penalty of \$500, prescribed by Revised Statutes, section 3258, for having possession of a still set up without having registered the same with the collector, which is found in the same sentence prescribing fine and imprisonment for the offense, is part of the punishment for the crime, in view of the whole nature of the statute, and a defendant who has served his term and paid his fine, but has not paid the penalty, is not entitled to discharge from imprisonment.

Mactavish v. Miles.—District court of United States (263 Fed., 457).

Judge investigating circumstances of penalty under statute does not act judicially.

Investigation of circumstances of penalty is optional with district judge.

RESTRAINING COLLECTION OF TAX.

Gouge v. Hart, collector.—Supreme Court of the United States (Jan. 19, 1920; dismissed for want of jurisdiction upon the authority of *Courtney v. Pratt*, 196 U. S., 89, 91; *Farugia v. Philadelphia and Reading Railway Company*, 233 U. S., 352, 353; *Louisville and Nashville Railway Company v. Western Union Telegraph Company*, 234 U. S., 369, 371–373; *Male v. Atchison, Topeka and Santa Fe Railway Company*, 240 U. S., 97, 99. Unreported to date). Opinion of District Court reported in 250 Fed., 802.

Bill in equity to declare assessment under section 3253, Revised Statutes, null and void and to set aside sale under distraint. Suit is forbidden by section 3224, Revised Statutes. Suit is in reality a suit against the United States.

SEARCHES AND SEIZURES.

United States v. One Ford Automobile and Fourteen Packages of Distilled Spirits.—Circuit court of appeals (262 Fed., 374).

Revised Statutes, sections 3061 and 3062, providing for seizure and forfeiture of merchandise imported in violation of the customs laws, and also any vehicle used in its importation, held not to apply to spirituous liquor brought into the United States from Canada in violation of the prohibition act of August 10, 1917, chapter 53, section 15, nor to an automobile used in such importation.

Silverthorne Lumber Co. v. United States.—Supreme Court of the United States (251 U. S., 385; T. D. 2984).

The fourth amendment to the Federal Constitution is violated if Government officers seize without warrant documents of defendant named in a pending indictment. Evidence gained by such a seizure may not be used by the Government in any way, and therefore refusal after return of documents seized to comply with court order to produce them is not contempt of court although the order was regularly drawn, if said order was based on information gained by the illegal seizure, and not upon knowledge of the facts gained from an independent source. Application of rule to corporations considered.

MUNITIONS MANUFACTURERS' TAX.

Corbon Steel Co. v. Lewellyn, collector; Forged Steel Wheel Co. v. Lewellyn, collector; Worth Bros. Co. v. Lederer, collector.—Supreme Court of the United States (251 U. S., 501, 511, 507; T. D. 3003).

These cases were reported in last year's annual report, defining what constitutes the manufacture of munitions and what is a "shell" or "any part" thereof, and were affirmed by the United States Supreme Court.

Traylor Engineering & Manufacturing Co. v. Lederer, collector.—District court of United States (266 Fed., 583).

Where A and B advanced certain sums of money to C, a munitions manufacturer, to help pay the expenses of a representative to be sent to Europe to secure a munitions contract, under an agreement that they, A and B, would share proportionately in any profits earned on such contract, and later gave C letters of recommendation and used their influence to secure the use of proving grounds and also indemnified the surety company which bonded C, C may not pay

out of its profits to A and B, who were thus interested with it in a common venture, disproportionately large dividends on their investment, or sums for giving security on its bond equal to the sum of said bond and thereby reduce the corporation's munitions tax, as such payments are not made as compensation for moneys advanced or services rendered but are distributions of profits among joint venturers.

NARCOTICS.

Melanson v. United States.—Circuit court of appeals (256 Fed., 783).

An indictment charging violation of the Harrison narcotic act, which averred that defendant at the time of the offense knew that cocaine was a derivative of coca leaves, and that morphine and heroin were salts and derivatives of opium, sufficiently averred by implication the fact that cocaine was a derivative of such leaves, and that morphine and heroin are salts or derivatives of opium.

In prosecutions for violating and conspiracy to violate the Harrison narcotic act, evidence in one case held sufficient to show that the drugs, cocaine, morphine, and heroin, are salts and certainly derivatives of coca leaves or opium, and, in the second case, sufficient to authorize submission of the issue to the jury.

In prosecution of physicians for sale of drugs in violation of Harrison narcotic act, whether dispensing of drug in each case was a dispensing of it by a physician to a patient, in which case no order form was required, or whether the form of prescription was used by defendants as an evasion of the law, and not in good faith, in which case the dispensing would be a sale, and an order form necessary to bring it within the law, *held* for the jury.

In prosecution of physicians for having violated the Harrison narcotic act, whether two persons were consumers of the drug and not patients of defendants, and whether defendants and the druggist on whom they issued prescriptions, their codefendant, knew the true character in which such persons sought to procure drugs, *held* for the jury.

In prosecution of physicians for having violated and conspired to violate the Harrison narcotic act, the trial court in his general charge properly submitted an issue as to the good faith of defendants in issuing their prescriptions to supposed patients, since the defendants could only protect themselves if the prescriptions were issued legitimately in their practice.

United States v. Loewenthal.—District court of United States (257 Fed., 444).

Under Revised Statutes, section 1025, providing that defects of form, not prejudicing defendant, shall not invalidate indictments, and Harrison narcotic act, section 8, relative to negating exceptions in an indictment under sections 1 and 2 of the Harrison act, need not negative exceptions in those sections.

Indictment charging accused with dealing in forbidden drugs without having registered and paid the special tax, *held* not bad for duplicity, or because vague, indefinite, and uncertain.

Stetson v. United States.—Circuit court of appeals (257 Fed., 689).

The administrative provisions of Harrison narcotic drug act, section 1, relating to taxation and registration, are valid.

"Preparations and remedies," contained in Harrison narcotic drug act, section 6, *held* not to include clear morphine, but to relate to actual medicinal preparations and remedies not containing more than a quarter of a grain of morphine, remedies such as a physician or druggist would normally dispense.

In a prosecution for violation of the Harrison narcotic drug act, defendant not being charged as a physician or a druggist, and the indictment not negating the exception of section 6 of the act, it was open to him to show he was merely dispensing medicinal preparations and remedies containing not more than the amount of morphine permitted by section 6.

Harrison narcotic drug act, section 8, applies to the business of selling narcotic drugs as distinct from mere possession.

Bascom C. Thompson v. United States.—Circuit court of appeals (258 Fed., 196; T. D. 2887).

Section 2 of the act of December 17, 1914, known as the Harrison antinarcotic drug act, being a revenue measure, is not unconstitutional as an invasion of the police power reserved to the States.

It is proper to permit physicians to testify as experts as to the well-recognized methods among the medical fraternity of treating persons addicted to the use of narcotics for the purpose of curing them of the habit, with a view to showing that a physician did not dispense narcotics in a legitimate manner. Evidence from physicians to the effect that unless confined an addict is never cured of the habit was properly admitted.

The object of the narcotic act, although enacted under the taxing power of Congress, is to prevent the growing use of narcotics, deemed a menace to the Nation by Congress, the act having a moral end as well as revenue in view.

The fact that a physician when "in the course of his professional practice only" is excepted from the requirement that narcotics shall be dispensed upon an official order form does not provide the authority for a physician to sell narcotics, if he does not do so in good faith, for the purpose of securing a cure of one suffering from an illness or to cure him of the morphine habit. The exception referred to must be construed strictly in accordance with the general rule, and those who set up any such exception must establish it as being within the words, as well as within the reason, thereof. A contention that the act does not make it an offense for a registered physician to sell narcotics under any circumstances is without basis.

A physician who furnished narcotics to an addict in decreasing quantities and claims to be attempting a cure of the addiction is acting contrary to the narcotic act when it is shown that the physician has not personally attended the addict, or has given the addict some personal attention, but not sufficient to show, in connection with other facts and circumstances, that he acted in good faith.

The illegal dispensing of narcotics may be made a separate count in the indictment as to each addict involved, and evidence may be admitted tending to prove sales of the drug by the physician to persons other than those mentioned in the indictment, such evidence to be considered by the jury in determining the intent, or system, or knowledge on the part of the physician in selling to the persons set out in the indictment.

Paris v. United States.—Circuit court of appeals (260 Fed., 529).

Evidence that defendants, charged as unlawful dealers in narcotics, several months before in another district had a considerable quantity of morphine in their possession, *held* incompetent, where it was shown that they were habitual users of the drug.

Oakshette v. United States.—Circuit court of appeals (260 Fed., 830).

In a prosecution for violation of Harrison narcotic act, December 17, 1914, sec. 2, by selling narcotic drugs, not in pursuance of written orders on the prescribed forms, evidence that defendant, although a physician registered under the act, did not dispense the drugs in good faith in the course of his professional practice, which would bring him within exception (a) of the statute, but sold the same to gratify the appetite of the purchasers, was competent and relevant, and such issue was properly submitted to the jury.

Trader v. United States.—Circuit court of appeals (260 Fed., 923).

Under an indictment for violation of Harrison narcotic act by selling morphine sulphate without the prescribed orders, and by buying it for illegal purposes, where defendant was a physician, but not registered as a dealer, the question of this guilt *held* to depend on whether he obtained and dispensed the drug in good faith, in the course of the legitimate practice of his profession.

Giving of an instruction, in a prosecution for violation of Harrison narcotic act, that, while the act is a revenue measure, its clear purpose is to restrict the distribution and use of the drugs specified to medicinal purposes only, *held* not error.

United States v. Parsons.—District court of United States (261 Fed., 223).

An indictment charging that defendant, as a physician registered under Harrison narcotic act, by means of the prescribed forms, obtained opium for his own personal use, *held* not to charge an offense under section 2 of the act, which, to be constitutional, must be construed as in aid of the revenue features of the act.

United States v. Sischo.—District court of United States (262 Fed., 1001).

As smoking opium is a prohibited thing, and could have no market value in the United States, defendant, who smuggled into the United States smoking opium from British Columbia, where its sale was also forbidden, can not be required to pay the penalty prescribed by Revised Statutes, section 2809, against the master of vessels who bring in merchandise without manifesting the same, etc., for the penalty is under the section based on the value of the merchandise so brought in.

Doremus v. United States.—Circuit court of appeals (262 Fed., 849).

Knowledge by a druggist that a prescription under the Harrison narcotic law was issued to gratify the holder's appetite, and not to cure disease or alleviate suffering, is essential to guilt, and negligent failure to inquire will not take the place of knowledge.

Notwithstanding Harrison narcotic act, section 2, exception (b), excepting sales of the prohibited drugs on the written prescription of a registered physician, a sale by a druggist who knows that the prescription was issued to gratify the holder's appetite, and not to cure disease or alleviate suffering, violates the law, and the physician issuing the prescription, knowing it is to be filled by a druggist having such knowledge, aids and abets the violation.

Reeves v. United States.—Circuit court of appeals (263 Fed., 690).

A practicing physician is not authorized, under the Harrison anti-narcotic act, to sell or dispense opium or its derivatives in any manner other than in the course of his professional practice or in the ways laid down in the statute.

An indictment charging a registered physician with selling and dispensing morphine sulphate in violation of the Harrison antinarcotic act, which negatived the exceptions contained in the statute, *held* sufficient.

PROHIBITION.

FORFEITURE.

Ford v. United States.—Circuit court of appeals (260 Fed., 657).

The seizure of an automobile under act March 2, 1917, section 1, as having been used in the unlawful introduction of liquor, vests the Federal court with exclusive jurisdiction over the machine for the purposes of forfeiture proceedings against it, which is not affected by its subsequent seizure under a writ of replevin from a State court.

United States v. One Ford Automobile and Fourteen Packages of Distilled Spirits.—Circuit court of appeals (262 Fed., 374).

Revised Statutes, sections 3061, 3062, providing for seizure and forfeiture of merchandise imported in violation of the customs laws, and also any vehicle used in its importation, *held* not to apply to spirituous liquor brought into the United States from Canada in violation of the prohibition of act August 10, 1917, chapter 53, section 15, nor to an automobile used in such importation.

DEFINITIONS.

United States v. Kinsel.—District court of United States (263 Fed., 141).

Regulations prohibiting sale of liquor within camp zones.

"Alcoholic liquor," "intoxicating or spirituous liquors," "intoxicating liquor, including beer, ale, or wine," defined.

ACT NOVEMBER 21, 1918.

United States v. Bergner & Engel Brewing Co.—District court of United States (260 Fed., 764).

Ruling on a demurrer to an information charging violation of war-time prohibition act, section 1, by the manufacture of "beer" for beverage purposes, refused, where the purpose was to obtain a construction of the statute, and a ruling as to whether the particular beverage made by defendant is within its prohibition, which is a trial question.

Jacob Hoffman Brewing Co. v. McElligott.—District court of United States (259 Fed., 321).

The provision of the act, section 1, prohibiting the manufacture of beer, wine, or other intoxicating malt or vinous liquors for beverage purposes, whether construed to prohibit the manufacture of any beer or wine, or only such as is intoxicating, is constitutional.

United States v. Ranier Brewing Co.—District court of United States (259 Fed., 359).

The war-time prohibition act of November 21, 1918, is constitutional.

United States v. Petts.—District court of United States (260 Fed., 663).

War-time prohibition act of November 21, 1918, section 1, does not prohibit the manufacture or sale of beer which is not intoxicating.

Hamilton v. Kentucky Distilleries & Warehouse Co.—Supreme Court of the United States (252 U. S., 146).

The four questions considered in deciding the constitutionality of the act of November 21, 1918, were:

1. Whether the act was void when enacted because it violated the fifth amendment;

2. Whether it became void by the passing of the war emergency before the commencement of these suits;

3. Whether the act was repealed by the adoption of the eighteenth amendment; and

4. Whether the prohibition imposed by the act expired by limitation before the commencement of these suits.

The Supreme Court held the act to be constitutional.

Logan v. United States.—Circuit court of appeals (260 Fed., 746).

A vehicle or animal committed by the owner to the possession of a third person, who uses it in the removal of goods or commodities to defraud the United States of a tax imposed thereon, under Revised Statutes, section 3450, is subject to forfeiture, although the owner had no knowledge of such illegal use.

United States v. Pittsburgh Brewing Co.—District court of United States (260 Fed., 762).

In an information charging violation of war-time prohibition act, prohibiting the manufacture or sale for beverage purposes of "beer, wine, or other intoxicating malt or vinous liquor," by the manufacture or sale of "beer" for beverage purposes, it is not necessary to aver that such beer was intoxicating.

Scatena v. Caffey.—District court of United States (260 Fed., 756). War prohibition act held constitutional, as within the war powers of Congress in dealing with conditions growing out of the termination of hostilities and demobilization.

Ruppert v. Caffey.—Supreme Court of the United States (251 U. S., 264).

The "war-time prohibition" act of November 21, 1918, prohibiting the use of food products in the manufacture of "beer, wine, or other intoxicating liquors until the conclusion of the war with Germany and thereafter until the President should proclaim demobilization to be complete is a constitutional exercise of the war power of Congress, and the "enforcement" act of October 28, 1919, defining "beer, wine, or other intoxicating malt or vinous liquors" as "liquors which contain in excess of one-half of 1 per centum of alcohol" is valid because necessary effectively to enforce the "war-time prohibition" act. Lessening of value of brewery and distillery property was an incidental effect of legislation within power of Congress, and not such a taking of property as contemplated by the fifth amendment. Three judges dissented from this opinion.

United States v. Standard Brewery, Inc., and United States v. American Brewery Co.—Supreme Court of the United States (251 U. S., 210).

An indictment charging violation of the "war-time prohibition" act of November 21, 1918, prohibiting the use of foodstuffs in the

manufacture of "beer, wine, or other intoxicating malt or vinous liquors for beverage purposes," is demurrable, if it charges only that the beverage manufactured contained as much as one-half of 1 per cent of alcohol, without an allegation that such beverage was in fact intoxicating; otherwise, the words "or other intoxicating liquors" are given no effect. The administrative decision of the Internal Revenue Bureau that beverages containing one-half of 1 per cent of alcohol are intoxicating within the meaning of the act, is not controlling when determining criminal liability under the act.

Under war-time prohibition act, November 21, 1918, indictments charging that defendant brewers unlawfully used certain grains, cereals, fruit, and other food products in the manufacture and production of beer for beverage purposes, which contained as much as one-half of 1 per cent of alcohol, both by weight and volume, but failing to allege that liquor was intoxicating, did not charge an offense, and the court can not say, as a matter of law, that such liquor is intoxicating.

Under war-time prohibition act, November 21, 1918, court can not say, as a matter of law, that beer for beverage purposes which contained as much as one-half of 1 per cent of alcohol, both by weight and volume, was intoxicating.

Simon v. Moore.—District court of United States (261 Fed., 638).

Seemle, that war-time prohibition act, enacted under the war power of Congress, ceased to be constitutionally effective when the war terminated and demobilization was completed as matter of fact, and in consequence the war power of Congress, under which alone legislation in derogation of the constitutional rights of the States can be enacted or enforced. (The court, owing to the fact that the same point was before the United States Supreme Court, did not hand down a decision in this case but indicated their views as above, which are contrary to those of the Supreme Court in the case referred to, which was *Hamilton v. Kentucky Distilleries & Warehouse Co.*, 252 U. S., 146.)

United States v. Minery.—District court of United States (259 Fed., 707).

War-time prohibition act, November 21, 1918, does not violate the tenth amendment to the Federal Constitution, which reserves to the States powers not delegated to Congress.

Act November 21, 1918, prohibiting the manufacture and sale of intoxicating liquors "until the conclusion of the present war," is applicable to a sale on July 8, 1919, since no treaty had then been signed with Austria, and the army had not been entirely demobilized.

United States v. Baumgartner.—District court of United States (259 Fed., 722).

The term "intoxicating liquor," as used in war-time prohibition act, November 21, 1918, means any liquor, intended or capable of being used as a beverage, containing a proportion of alcohol which will produce intoxication when the beverage is taken in such quantities as it is practically possible for a man to drink.

An information under war-time prohibition act, November 21, 1918, is fatally defective for failure to allege that the beer sold was in fact intoxicating.

Hannah & Hogg v. Clyne.—District court of United States (263 Fed., 599).

War-time prohibition not rendered invalid by adoption of prohibitory amendment.

War prohibition act effective despite contention that emergency had passed.

Aside from distinctive war powers of Congress, the States, before eighteenth amendment, had exclusive police power to regulate sale and disposition within their borders.

Congress has power to declare war-time prohibition.

Maryland Distilling Co. of Baltimore City v. Miles.—District court of United States (263 Fed., 597).

Construction of war prohibition act as continuing till ratification of peace treaty does not make it invalid.

Act November 21, 1918, providing that no beer, wine, or other intoxicating liquors shall be manufactured or sold during continuance of the war, etc., refers only to intoxicating beer and wine.

United States v. Powers.—District court of United States (263 Fed., 724).

Under act of October 3, 1917, section 301, act of November 21, 1918, section 4, and act of February 24, 1919, section 601, whisky may be lawfully imported, and is therefore a "commodity of merchandise," embraced within the commercial regulations, and its smuggling is punishable.

ACT OCTOBER 28, 1919.

United States v. O'Brien et al. and *United States v. Eastern Hotel Corporation et al.*—District court of United States (Jan. 19, 1920; unreported to date).

Bills in equity to declare sales of intoxicants to be nuisances will lie against a saloon proprietor upon showing of sales of whisky by bartender from open bottle, regardless of the number of such sales, as such bartender acts within the scope of his authority, unless his acts are a private venture, unknown to his employer; and "there is no room for escape on the excuse that the offense will not be repeated." Sales of illegal beer will not be enjoined, however, where the only sales made were consummated on the day the law became effective, from old stocks of beer, and where there is no reasonable likelihood of further purchases and sales.

Street v. Lincoln Safe Deposit Co. and Porter.—District court of United States (unreported to date). Pending in the United States Supreme Court.

Section 33 of the Volstead enforcement act prohibits storage of intoxicating liquors in places other than residences by persons not legally permitted under the act to possess liquor, and, being necessary effectively to enforce the eighteenth amendment, is a constitutional exercise of the power therein granted.

United States v. Michael and Anthony Sassone.—District court of United States (unreported to date).

The Federal Constitution guarantees security against unlawful search of a man's home or place of business, and liquor seized without a search warrant from the cellar of a dwelling in which the defendant was sleeping may not be used in evidence against him.

Christian Feigenspan (Inc.) v. Bodine.—District court of United States (264 Fed., 187). Affirmed in *Rhode Island v. Palmer et al.*—Supreme Court of the United States, June 7, 1920.

National prohibition act, October 28, 1919, section 1, in providing that "intoxicating liquor," as used in the act, shall be construed to include all liquors, liquids, or compounds containing one-half of 1 per cent or more of alcohol by volume, does not make a definition which may be declared arbitrary and unconstitutional by the courts, but one which it was within the reasonable discretion of Congress to make for the purposes of the act.

United States v. Masters.—District court of United States (264 Fed., 250).

Claimant of a lien on an automobile, seized under Volstead Act of October 28, 1919, section 26, as having been used for illegal transportation of liquor, must establish his claim by competent evidence.

United States ex rel. Soeder v. Crossen, Supervising Prohibition Agent.—District court of United States (264 Fed., 459).

Under the act, a prohibition officer or agent is justified in seizing intoxicating liquor or other property without a search warrant only as provided in section 26, title 2, authorizing such seizure when liquors are found being transported contrary to law.

The liberal construction of the national prohibition act, enjoined by section 33, title 2, does not justify the court in extending the prohibitive provisions of the act beyond what is plainly stated, nor in omitting language which would change its plain meaning.

Under the act, title 2, section 25, relative to searches and seizures, and section 33, placing the burden of proof on any possessor of liquor in any action concerning the same to prove that it was lawfully acquired, possessed, and used, an officer seizing liquors under a search warrant must cause appropriate proceedings to be brought to determine whether the liquor has been lawfully possessed, or is liquor as to which no property rights exist.

Though, under the act, title 2, section 25, a dwelling house used in part for some business purpose may be searched for intoxicating liquors, section 33 makes the possession of liquor in one's private dwelling for personal use lawful, though the dwelling is used in part for business purposes, unless the possessor is the person using it for business purposes; and hence a wife's possession is lawful, though her husband is conducting a saloon in part of the premises.

United States v. Windham.—District court of United States (264 Fed., 376).

Revised Statutes, sections 3258, 3279, and 3281, which were enacted as part of the general plan of collecting internal revenue on the manufacture of intoxicating liquors, and impose fines for transportation or concealment before the tax has been paid, were impliedly repealed by the prohibition enforcement act of October 28, 1919, which prohibited all manufacture and sale of intoxicating liquor for beverage purposes, and imposed smaller penalties for the transportation of liquor contrary to its provisions.

Revised Statutes, sections 3258, 3279, and 3281, imposing penalties for transporting or concealing liquor on which a revenue tax has not been paid, can not be construed as continued in force to apply to alcohol manufactured and transported for industrial purposes under the provisions of prohibition act of October 28, 1919, title 3, which title provides a complete system for regulating alcohol and expressly exempts plants for manufacturing same from sections 3258 and 3279.

United States v. Murphy.—District court of United States (264 Fed., 842).

The provisions of Volstead Act, October 28, 1919, title 2, section 3, making it unlawful to have possession of intoxicating liquor, except as authorized by the act, held constitutional.

A search of the person of one arrested for an offense by the arresting officer is not an "unreasonable" search, within the meaning of the Constitution of the United States, amendment 4.

Bottles of whisky seized from the person of one arrested for intoxication *held* not obtained by unreasonable search, and hence admissible in evidence against him, in a prosecution for having liquor in his possession in violation of the prohibition act.

EIGHTEENTH AMENDMENT.

United States v. Minery.—District court of United States (259 Fed., 707).

The eighteenth amendment to the Federal Constitution, providing for national prohibition in 1920, does not invalidate war-time prohibition act, November 21, 1918, upon ground that prohibition legislation is precluded until 1920.

Ex parte Dillon.—District court of United States (262 Fed., 563).

In ruling on the validity of the eighteenth amendment to the United States Constitution, the Federal District Court for the Northern District of California, in *ex parte Dillon*, 262 Federal Reporter, 563, reviewed the decisions of the Washington and Ohio Supreme Courts in *State v. Howell* (Wash.), 181 Pacific Reporter, 920, and *Hawke v. Smith* (Ohio), 125 Northeastern Reporter, 400, holding the amendment subject to referendum to the voters, and states that in his opinion the correct rule is announced by the Supreme Judicial Court of Maine *In re opinion of the justices*, 107 Atlantic Reporter, 673, holding to the contrary.

An amendment to the Constitution of the United States takes effect and becomes a part of the Constitution on its ratification by the requisite number of States, and not from the date of its promulgation by the Secretary of State, under Revised Statutes, section 205.

The provision of article 5 of the Federal Constitution that, when that method is proposed by Congress, ratification of a proposed amendment shall be by the legislatures of these several States, in case of such proposal, excludes all other modes of ratification, and a State is without power to prescribe a different method, as by popular vote.

The eighteenth amendment to the Constitution *held* constitutionally adopted and valid.

Duhne v. New Jersey.—Supreme Court of the United States (251 U. S., 311).

In the case of *Duhne v. State of New Jersey* as to the invalidity of the proposal and ratification of the eighteenth amendment, the court held that a suit by a citizen against his own State can not be maintained in the United States Supreme Court.

United States ex rel. Soeder v. Crossen, Supervising Prohibition Agent.—District court of United States (264 Fed., 459).

The right to due process of law is not abrogated by the eighteenth amendment to the Constitution.

Rhode Island v. Palmer.—Supreme Court of the United States (June 7, 1920; unreported to date; dismissing the bill in the original cases of *State of Rhode Island v. Palmer* and *State of New Jersey v. Palmer*; reversing *Sawyer v. Manitowoc Products Company*; affirming *Dempsey v. Boynton*, *Feigenspan v. Bodine*, *Kentucky Distilleries and Warehouse Co. v. Gregory*, and *St. Louis Brewing Association v. Moore*, with leave granted to present petitions for rehearing within 60 days).

The adoption by both Houses of Congress, each by a two-thirds vote, of a joint resolution proposing an amendment to the Constitution sufficiently shows that the proposal was deemed necessary by all who voted for it. An express declaration that they regarded it as necessary is not essential. None of the resolutions whereby prior amendments were proposed contained such a declaration.

The two-thirds vote in each House which is required in proposing an amendment is a vote of two-thirds of the Members present, assuming the presence of a quorum, and not a vote of two-thirds of the entire membership, present and absent. (*Missouri Pacific Ry. Co. v. Kansas*, 248 U. S., 276.)

The referendum provisions of State constitutions and statutes cannot be applied, consistently with the Constitution of the United States, in the ratification or rejection of amendments to it. (*Hawke v. Smith*, decided June 1, 1920).

The prohibition of the manufacture, sale, transportation, importation, and exportation of intoxicating liquors for beverage purposes, as embodied in the eighteenth amendment, is within the power to amend reserved by Article V of the Constitution.

Amendment, by lawful proposal and ratification, has become a part of the Constitution, and must be respected and given effect the same as other provisions of that instrument.

The first section of the amendment—the one embodying the prohibition—is operative throughout the entire territorial limits of the United States, binds all legislative bodies, courts, public officers, and individuals within those limits, and of its own force invalidates every legislative act—whether by Congress, by a State legislature, or by a Territorial assembly—which authorizes or sanctions what the section prohibits.

The second section of the amendment—the one declaring “The Congress and the several States shall have concurrent power to enforce this article by appropriate legislation”—does not enable Congress or the several States to defeat or thwart the prohibition, but only to enforce it by appropriate means.

The words “concurrent power” in that section do not mean joint power, or require that legislation thereunder by Congress, to be effective, shall be approved or sanctioned by the several States or any of them; nor do they mean that the power to enforce is divided between Congress and the several States along the lines which separate or distinguish foreign and interstate commerce from intrastate affairs.

The power confided to Congress by that section, while not exclusive, is territorially coextensive with the prohibition of the first section, embraces manufacture and other intrastate transactions as well as importation, exportation, and interstate traffic, and is in no wise dependent on or affected by action or inaction on the part of the several States or any of them.

Power may be exerted against the disposal for beverage purposes of liquors manufactured before the amendment became effective, just as it may be against subsequent manufacture for those purposes. In either case it is a constitutional mandate or prohibition that is being enforced.

While recognizing that there are limits beyond which Congress can not go in treating beverages as within its power of enforcement, we think those limits are not transcended by the provision of the Volstead Act (Title II, sec. 1), wherein liquors containing as much as one-half of 1 per cent of alcohol by volume and fit for use for beverage purposes are treated as within that power. (*Jacob Ruppert v. Caffey*, 251 U. S., 264.)

Griesedieck Bros. Brewery Co. v. Moore.—District court of United States (262 Fed., 582).

In time of peace, and in the absence of the eighteenth amendment, the States have exclusive power to regulate the manufacture and sale of intoxicating liquors; such power falling within the police power reserved to the States.

In view of the fact that the eighteenth amendment provided a period of one year after ratification before it should go into effect, and that active hostilities had ceased and the armed forces had been demobilized at the time Congress passed the national prohibition act, which contained provision to carry into effect the previously enacted war-time prohibition act, *held*, the eighteenth amendment not yet having become effective, that enforcement of those provisions of national prohibition act designed to carry into effect the war-time prohibition act, and which prohibited the sale of 2.75 per cent beer, manufacture of which was allowed by previous acts, will, in view of the injury, be temporarily enjoined pending determination of the constitutionality of such act.

REED AMENDMENT.

United States v. Simpson.—District court of United States (257 Fed., 860).

An indictment for violation of act March 3, 1917, section 5, known as the Reed amendment, making it an offense to "cause intoxicating liquors to be transported in interstate commerce, except for scientific, sacramental, medicinal, or mechanical purposes," into a prohibition State, need not negative the excepted uses, which is matter of defense.

One who buys intoxicating liquor in one State and transports it in his own automobile into a prohibition State for his own personal use, and not for sale, does not transport it in interstate commerce, within the Reed amendment (act Mar. 3, 1917, sec. 5).

Laughter v. United States.—Circuit court of appeals (259 Fed., 94).

To render the Reed amendment (act Mar. 3, 1917, sec. 5), prohibiting the transportation of liquor in interstate commerce, except for certain purposes, into any State "the laws of which prohibit the manufacture or sale therein," of liquors for beverage purposes, applicable to a State, it must have adopted a general policy of prohibition throughout its territory; but it is not essential that such prohibition should be literally without exception.

Under various statutes of Tennessee, taken together, both the sale and the manufacture of liquor for sale as a beverage are prohibited

throughout the State, and the transportation of liquor into the State for beverage purposes is in violation of the Reed amendment.

United States v. Simpson.—Supreme Court of the United States (252 U. S., 465).

Liquor transported by owner in his own automobile and for his personal use comes within the provisions of the Reed amendment. The fact that the liquor was intended for the personal use of the person transporting it is not material, so long as it was not for any of the purposes specially excepted, citing *United States v. Hill*, 248 U. S., 420.

Whiting v. United States.—Circuit court of appeals (263 Fed., 477).

In a prosecution for violating the Reed amendment, as extended to apply to the District of Columbia, by bringing into the District whisky in half-pint bottles, an instruction that in practically all bootlegging cases tried in that court the whisky was found in half-pint bottles, and that the jury might take such fact into consideration in determining the present case, was prejudicial error, where there was no evidence regarding the facts shown in other cases.

The Reed amendment, as extended to apply to the District of Columbia, is not violated by a person transporting whisky from Baltimore, through the District, to his home in Virginia, for his personal use.

District of Columbia v. Gladding.—District of Columbia Court of Appeals (283 Fed., 628).

Intoxicants introduced in violation of Reed amendment not subject to forfeiture under Sheppard Act.

Collins v. United States.—Circuit court of appeals (263 Fed., 657).

A purchase of liquor in a State where the purchase is lawful is not converted into an interstate transaction, which Congress has power to deal with under the commerce clause of the Constitution, because the purchaser intended to transport the liquor into another State, and will not sustain an indictment for violation of Reed amendment, March 3, 1917.

Ousler v. United States.—Circuit court of appeals (263 Fed., 968).

On trial of a defendant for aiding in interstate transportation of liquor in violation of Reed amendment, section 5, by carrying the liquor in an automobile from a railroad station, where it had been unloaded, to another point in the same State, refusal to charge that defendant could not be convicted unless he had knowledge of the interstate character of the shipment, and that it was still in course of transportation and had not reached its intended destination, held error.

Lindsey v. United States.—Circuit court of appeals (264 Fed., 94).

Labels on packages and bottles of whisky which defendant and others were loading into an automobile near a wharf, and the identity in marks and other respects with other whisky found in a scow near the wharf, held to justify a finding that the whisky was transported from without the State into the State of Virginia.

Under an information charging defendant with transporting whisky from Baltimore, Md., to Norfolk, Va., it was not necessary to prove the transportation of the whisky from Baltimore, where there was evidence to support a finding that it was transported into Virginia from a point outside that State.

The possession by defendant and his associates of whisky transported by them from a wharf to a near-by automobile, with nothing to show any intervening possession or control, justifies the legitimate inference that they transported it into the State, where other evidence supports a finding that it had been transported into the State by some one.

Moran v. United States.—Circuit court of appeals (264 Fed., 768).

The offense of "causing liquor to be transported" in interstate commerce into a prohibition State, made punishable by Reed amendment, March 3, 1917, section 5, is not committed until the liquor has actually been carried into the latter State.

On trial of defendant in a Federal court in Tennessee, charged with violation of Reed amendment, March 3, 1917, section 5, by purchasing whisky in Missouri and causing it to be transported into Tennessee, where defendant was arrested in Mississippi with whisky in his possession, an instruction that defendant was guilty if the whisky was purchased by some one in Missouri to be shipped to Tennessee, and after it reached a point in Mississippi defendant was hired to carry it from here to another point in Mississippi and there deliver it to a person from Tennessee, held erroneous, as ignoring the essential element of guilty knowledge of defendant; also as not defining an offense within the jurisdiction of the court.

On trial of a defendant in a Federal court in Tennessee for violation of Reed amendment, March 3, 1917, section 5, an instruction that he was guilty if he ordered whisky from a place in Missouri to be brought into Tennessee held erroneous, as not limited to an offense committed within the jurisdiction of the court, defendant having been arrested, with whisky in his possession, in another State, and there being no evidence that it was ever in Tennessee.

United States v. Collins et al.—District court of United States (264 Fed., 380).

An indictment charging that defendant purchased intoxicating liquor in one State "to be transported in interstate commerce" for beverage purposes into another State, the laws of which prohibit its manufacture, held to state an offense under Reed amendment, March 3, 1917, section 5.

STAMP TAX.

Edwards v. Wabash Railway Co.—Circuit court of appeals (264 Fed., 610; T. D. 3002).

Issuance of certificates of stock of one class in conversion and exchange for stock of another class held not required to be stamped as an "original issue," for the reason that Congress intended to tax transactions by which substantial consideration passed, and also for the reason that Congress in reenacting a similar provision of the revenue acts of 1898 and of 1914, which had been construed by the Treasury Department as not requiring stamps upon certificates issued for conversion purposes, had approved and made part of the present act such former practical construction. (T. D. 2752 considered.)

A stock certificate is a document which is the evidence of the number of shares of stock which the holder of it owns.

Where there is an ambiguity in the statute imposing a tax, such ambiguity must be resolved in favor of the taxpayer.

United States v. Masters (Moran, Intervener).—District court of United States (264 Fed., 250).

A promissory note not bearing the internal-revenue stamps required by the act of February 24, 1919, section 1107, by virtue of section 1105, continuing all applicable prior laws in force, and the act of June 13, 1898, section 14, is not admissible in evidence in a Federal court.

Malley, Collector, v. Bowditch et al.—Circuit court of appeals (259 Fed., 809).

Within war-tax law, October 22, 1914, section 5, schedule A, imposing a stamp tax of 5 cents on each \$100 of face value or fraction thereof, of certificates of stock issued by any association, company, or corporation, such tax must be paid on certificates of shares issued by a manufacturing company organized in the form of a trust under the common law and deriving none of its rights, benefits, or qualifications from any statute, and which was not an ordinary common-law real estate trust; for if the word "association" be not broad enough to include the concern, it is included in the expression "company," while the phrase "certificates of stock" discloses no intent to exclude common-law associations or companies, but evidences a legislative purpose to impose a stamp tax on certificates of stock as muniments of title.

War-tax law, October 22, 1914, section 5, schedule A, imposing a stamp tax of 5 cents on each \$100 of face value or fraction thereof of certificates of stock issued by any company, association, or corporation is not invalid in its application to a manufacturing company organized as a trust at common law on the theory that it was inapplicable to other associations, for the taxes were merely on the muniments of title, and if other associations do not issue such muniments of title they are therefore not taxable.
